Our journey towards **INTEGRATED REPORTING**

Since embarking on its journey to integrated reporting a few years ago, Stellenbosch University is publishing its third integrated report. On this journey, we realised that a far wider range of interconnected factors determine the value and future of an organisation than financial profitability alone.

Some forms of capital (resources) that contribute to the too.Our report contains financial facts and figures about our value of an organisation are tangible, and therefore easy operations over the 2017 financial year, and for the reader's to add up or subtract, but many others are not so easy convenience our full financial report is still published as part of our integrated report. The University's financial statements, to account for. In a university environment, our intangibles including the subsidiaries, associate companies and trusts, predominate. Consider our capitals: are prepared in accordance with the relevant policies of International Financial Reporting Standards (IFRS), and, like • human capital (our talented students and capable staff); our integrated report, also comply with the Department of • financial capital (our income streams); Higher Education and Training's Regulations for Reporting • intellectual capital (our intellectual expertise, brand and by Public Higher Education Institutions as published in the evolving reputation); Government Gazette No. 37726 of 9 June 2014.

- manufactured capital (our infrastructure);
- social and relationship capital (our indispensable partnerships); and
- natural capital (our supporting environment of natural resources).

You will also find the customary reports of the Chancellor, Chair of the University Council, Rector and Vice-Chancellor, Chief Operating Officer, Vice-Rectors, and Deans of faculties on their fields of care and supervision. Most of these reports however now highlight the value created over the reporting period in line with selected strategic priorities identified These, and more, make up the sum total of assets with which in the University's future-focused Intent and Strategy we create and sustain value. document for 2013–2018. This focus on value accords with the principles provided by the International Framework of Through our integrated reporting, we hope to show our the International Integrated Reporting Council (IIRC), which numerous stakeholders how we try to allocate resources, believes that "communication about value creation should manage risks and grasp opportunities in the best possible be the next step in the evolution of corporate reporting". It way. Stellenbosch University - like so many other also accords with the King Code of Governance Principles organisations, both corporate and public - is still en route... and the King Report on Governance (King III), arguably the We plan to improve our understanding of true materiality world's leading corporate governance standard. We have and true accountability across the board of our multiplicity also made a start on implementing the newly published King of operations, and we anticipate that integrated thinking will IV code.

eventually become second nature to us, so that we may make better decisions and manage efficiently and sustainably, as befits a knowledge-driven institution such as ours.

OUR SCOPE AND BOUNDARIES

Our integrated report is published annually and covers INTEGRATED REPORT the full scope of University operations over the reporting period, I January to 31 December 2017. To this we add a The Rectorate is closely involved in writing and compiling few months more - until March 2018 - to enable us to the annual integrated report. Our Audit and Risk Committee include all our graduation data for the year under review. of Council examines the report and, with adjustments, recommends the report for tabling at the University Council To show the members who approved this annual integrated report, we present the University Council as at 18 June meeting in June, where the report is considered and finally 2018, listing the outgoing members who were active in 2017 approved for publication.

The University's Intent and Strategy document for 2013-2018 is now nearing the end of its cycle when the University will develop a new strategy, and also celebrate its centenary.

APPROVING OUR ANNUAL

Foreword by THE CHANCELLOR

The position of Chancellor is a ceremonial one. I am in no way involved in the day-to-day running of the University. However, I am pleased that management and Council took steps in 2017 to promote financial sustainability at SU, while also providing assistance to academically deserving students in need of financial support.

The announcement by the President on 16 December 2017 that "fully subsidised free higher education and training for poor and working-class South Africans'' would be phased in from 2018 concluded a year dominated by this subject.

Up to that point, the higher education sector – if not the country as a whole – had been eagerly awaiting the state's response to the findings of the Fees Commission led by Judge Jonathan Heher. The commission of inquiry was set up in 2016 to investigate "the feasibility of making higher education and training fee-free".

The announcement seemed to contradict the recommendations of the commission, which had raised doubts about the state's capacity to provide free higher education to all students. Unsurprisingly, therefore, the presidential announcement was followed by uncertainty about how the new dispensation would be funded. Calculations showed that the progressive introduction of free higher education would cost R57 billion over three years. There were indications that VAT would be increased to stabilise public funding and raise the required money.

What was not in doubt, however, was the need to provide access to higher education to as many South Africans as possible. It was this cause that caught the public's attention and sparked the #FeesMustFall student protests back in 2015.

This was the context in which Stellenbosch University (SU), as a leading higher education institution, found itself in the reporting period of 2017. On the eve of its Centenary year, the University, which had grown to a R6 billion organisation, had to find a way to continue the successes it had achieved in its core activities, and at the same time adapt to changing circumstances. It had to consolidate the progress it had made on many fronts as it prepared to enter its second century of existence.

BUDGETING FOR SUSTAINABILITY

Over a number of years, government subsidies for higher education have increasingly fallen behind cost increases. These not only include the consumer price index (CPI) of around 6%, but particularly also the higher education price index, which measures cost increases in the sector and has typically increased by about 1,7% more than the CPI per year. This is due to the high costs associated with research equipment and technology, international research publications, meeting accreditation and statutory requirements, and maintaining world-class facilities. It is

Dr IL Marais, first Chancellor, Dr Johann Rupert

Stellenbosch University, 1918 Chancellor, Stellenbosch University

particularly applicable to institutions such as SU that focus intensively on research and postgraduate studies.

As pointed out by the Chief Operating Officer elsewhere in this report, the financial pressures that had built up over time finally led to a situation in 2017 where the first projection of the University's main budget for 2018 to 2023 showed a cumulative deficit of R572 million. Clearly, changes had to be introduced. The approach chosen was to make the most of all revenue streams, namely state subsidies, tuition and accommodation fees, research contracts, philanthropic donations and commercial revenue.

The budget submitted to Council at the end of 2017 called for a general adjustment of 8% in 2018 student fees (undergraduate and postgraduate), plus differentiated adjustments (to be phased in for new students only) in some faculties. Student accommodation fees would increase by 9,2%. An additional tuition fee for international students was also introduced. Further measures that were implemented included a progressive shift of institutional expenditure on bursaries to the fourth income stream (donations) to

free up funds in the main budget, as well as a reduction in library expenditure on less popular electronic databases. Additionally, it was proposed that income from indirect cost recovery be increased, while an allocation from the Strategic Fund would be made available to balance the main budget.

I was glad to see that this produced a balanced main budget for the next six years, which Council went on to approve. It was important to prevent shortfalls from building up over the next few years, and the integrated budget that was eventually adopted would indeed avoid any deficit over a six-year planning horizon.

FINANCIAL ASSISTANCE TO **STUDENTS**

To mitigate the impact of the market-related fee increases, SU continues its support to academically deserving students who struggle financially. The University adjusted its own bursaries upwards in line with increases in tuition and accommodation fees. Every year, SU ploughs back more than half of its income from student fees in the form of financial aid to students.

In 2017, the University administered a total of R754 million in bursaries – R298 million as an agent for external funders (including for the National Student Financial Aid Scheme) and R456 million from its own funds and research contracts. of which R129 million was allocated from its main budget. Nearly a guarter of SU students - 23% to be exact received bursaries.

Yet even students receiving financial aid sometimes accumulate student debt due to shortfalls in funding. They would typically have overcome all kinds of obstacles to get to university in the first place, and worked very hard to achieve success in their studies, only to be weighed down by debt at the final hurdle.

I was therefore pleased to see the University introduce the #SU99 fundraising campaign, which specifically targeted this problem. Donors were asked for contributions to enable students to graduate debt-free at the end of the year. The campaign was most successful and raised more than RI million in a short space of time. It again illustrated the power of donors joining hands to support a worthy cause. From staff and students who dropped coins and notes from their pockets into collection boxes across campus, to alumni who donated online, to major donors who extended their support once more, SU's mission was yet again bolstered by friends and partners of the University.

INCOME STREAMS

Universities the world over face financial constraints due to pressure on both the public purse and the private sector. To be sustainable in the long run, they have to find ways of generating their own income.

Again, I am pleased that SU is doing relatively well in this regard. In 2017, 19,8% of the University's income came from allocations and research contracts, 3,5% from the sale of goods and services, and 4% from private donations. Nevertheless, the institution still had to rely on the state for 32% of its income, and on student study and accommodation fees for 21,8%. There is, therefore, room for improvement in terms of strengthening the third, fourth and fifth income streams.

CONCLUSION

In the run-up to SU's Centenary in 2018, Maties has become an esteemed research institution with a strong emphasis on innovation. For universities to be regarded as part of this league, they require stability, systemic sustainability, an outstanding academic reputation and an impeccable governance and management structure.

It is no coincidence that SU boasts all these features. Hard work by staff and other members of the University community has brought the institution to this point, as evidenced in this annual report.

Looking ahead, the challenge for the University now is to position itself to maintain its proven status as an excellent institution, to broaden access and to remain financially sustainable in the face of economic challenges.

University Council's responsibility for FINANCIAL REPORTING

The University Council accepts responsibility for the integrity, objectivity and reliability of the consolidated annual financial statements of Stellenbosch University. The responsibility for the preparation and presentation of the annual financial statements has been delegated to management.

The Council is of the opinion that Stellenbosch University, including the subsidiaries, associate companies and trusts included in the consolidated annual financial statements, is a going concern, and consequently the annual financial statements have been prepared on this basis.

It is the responsibility of the external auditor to express an independent opinion on the fair presentation of the consolidated annual financial statements, based on their audit. They had unrestricted access to all financial records and related data, including minutes of meetings of the Council and all Council committees.

The Audit and Risk Committee has confirmed that adequate internal financial control systems are maintained and that there were no material defects in the functioning of the internal financial control systems during the year.

The Council is satisfied that the consolidated annual financial statements fairly present the financial position, the results of operations, changes in funds and cash flows in line with the relevant accounting policies based on International Financial Reporting Standards (IFRS).

Between the year-end and the date of this report, no material facts or circumstances have arisen that materially affect the financial position of Stellenbosch University.

The consolidated annual financial statements on pages 108 to 144 were approved by the Council and were signed by:

Mr GM Steyn

Chairperson of the University Council

Schullersis

Prof SA du Plessis Chief Operating Officer

Prof DP du Plessis Chairperson of the Audit and Risk Committee

18 June 2018

Independent auditor's report to the Council of STELLENBOSCH UNIVERSITY

REPORT ON THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

OPINION

We have audited the consolidated financial statements of Stellenbosch University set out on pages 108 to 144, which comprise the consolidated statement of financial position as at 31 December 2017, and the consolidated income statement, statement of other comprehensive income, statement of changes in funds, and statement of cash flows for the year then ended, as well as the notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Stellenbosch University as at 31 December 2017, and its consolidated financial performance and consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Higher Education Act of South Africa, act no. 101 of 1997.

CONTEXT FOR THE OPINION

We conducted our audit in accordance with the International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the consolidated financial statements section of our report.

We are independent of the University in accordance with the International Ethics Standards Board for Accountants' Code of ethics for professional accountants (IESBA code) together with the ethical requirements that are relevant to our audit in South Africa. We have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA code.

Our procedures address the reported performance information, which must be based on the approved performance planning documents of the University. We have We believe that the audit evidence we have obtained is not evaluated the completeness and appropriateness of the sufficient and appropriate to provide a basis for our opinion. performance indicators/measures included in the planning documents. Our procedures also did not extend to any disclosures or assertions relating to planned performance **RESPONSIBILITIES OF THE COUNCIL** strategies and information in respect of future periods The Council is responsible for the preparation and fair that may be included as part of the reported performance presentation of the consolidated financial statements in information. Accordingly, our findings do not extend to these accordance with International Financial Reporting Standards matters.

and the requirements of the Higher Education Act of South Africa and for such internal control as the Council determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Council is responsible for assessing Stellenbosch University's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the Council either intends to liquidate the University or to cease operations, or has no realistic alternative but to do so.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL **STATEMENTS**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of user's taken on the basis of these consolidated financial statements.

A further description of our responsibilities for the audit of the consolidated financial statements is included in the annexure to the auditor's report.

REPORT ON THE AUDIT OF THE ANNUAL PERFORMANCE REPORT

INTRODUCTION AND SCOPE

In accordance with the Public Audit Act of South Africa, 2004 (Act No. 25 of 2004) (PAA) and the general notice issued in terms thereof we have a responsibility to report material findings on the reported performance information against predetermined objectives for selected objectives presented in the annual report. We performed procedures to identify findings but not to gather evidence to express assurance.

We evaluated the usefulness and reliability of the reported performance information in accordance with the criteria developed from the performance management and reporting framework, as defined in the general notice, for the following selected objectives presented in the annual report of the University for the year ended 31 December 2017:

Objectives	Pages in the annual report
Objective I – to achieve the approved headcount enrolment target	33
Objective 2 – to achieve the approved first time entering enrolment target	33
Objective 3 – to achieve the approved graduate output rate target	33
Objective 4 – to achieve the approved research output per instructional/ research professional staff target	34

We performed procedures to determine whether the reported performance information was properly presented and whether performance was consistent with the approved performance planning documents. We performed further procedures to determine whether the indicators and related targets were measurable and relevant, and assessed the reliability of the reported performance information to determine whether it was valid, accurate and complete.

We did not identify any material findings on the usefulness **OTHER REPORTS** and reliability of the reported performance information for the following objectives:

- to achieve the approved headcount enrolment target
- to achieve the approved first time entering enrolment target
- to achieve the approved graduate output rate target
- to achieve the approved research output per instructional/research professional staff target

ACHIEVEMENT OF PLANNED TARGETS

Refer to the annual report on pages 33 and 34 for information on the achievement of the planned targets for the year.

REPORT ON AUDIT OF COMPLIANCE WITH LEGISLATION

INTRODUCTION AND SCOPE

In accordance with the PAA and the general notice issued in terms thereof we have a responsibility to report material findings on the compliance of the University with specific matters in key legislation. We performed procedures to identify findings but not to gather evidence to express NH Döman assurance.

We did not identify any instances of material non-compliance with specific matters in key legislation, as set out in the general notice issued in terms of the PAA.

OTHER INFORMATION

The Stellenbosch University Council is responsible for the other information. The other information comprises the information included in the annual report other than the financial report, and the University Council's responsibility for financial reporting included in the financial report. The other information does not include the consolidated financial statements, the auditor's report thereon and those selected objectives presented in the annual report that have been specifically reported on in the auditor's report.

Our opinion on the financial statements and findings on the reported performance information and compliance with legislation do not cover the other information and we

do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements and the selected objectives presented in the annual performance report, or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed we conclude that there is a material misstatement of this other information, we are required to report that fact.

INTERNAL CONTROL DEFICIENCIES

We considered internal control relevant to our audit of the consolidated financial statements, reported performance information and compliance with applicable legislation; however, our objective was not to express any form of assurance thereon. We did not identify any significant deficiencies in internal control. We have nothing to report in this regard.

We draw attention to the following engagements conducted by various parties that had, or could have, an impact on the matters reported in the University's financial statements, reported performance information, compliance with applicable legislation and other related matters. These reports did not form part of our opinion on the financial statements or our findings on the reported performance information or compliance with legislation.

We issued 29 agreed-upon procedures engagement reports during the year ended 31 December 2017 on funding from various donors and Department of Higher Education and Training funding. These reports covered periods ranging from 1 January 2014 to 31 July 2017.

We issued 12 donor funding audit and non-audit assurance reports during the year ended 31 December 2017 covering periods ranging from 1 January 2015 to 31 December 2016.

Pricewaterhouse Copers Inc.

PricewaterhouseCoopers Inc. Registered Auditor Stellenbosch 18 June 2018

AUDITOR'S RESPONSIBILITY FOR THE AUDIT

As part of an audit in accordance with the ISAs, we exercise professional judgement and maintain professional scepticism throughout our audit of the consolidated financial statements, and the procedures performed on reported performance information for selected objectives and on the University's compliance with respect to the selected subject matters.

FINANCIAL STATEMENTS

In addition to our responsibility for the audit of the consolidated financial statements as described in the auditor's report, we also:

- identify and assess the risks of material misstatement of the consolidated financial statements whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Council.
- conclude on the appropriateness of the Council's use of the going concern basis of accounting in the preparation of the financial statements. We also conclude, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that

Annexure -

may cast significant doubt on Stellenbosch University's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements about the material uncertainty or, if such disclosures are inadequate, to modify the opinion on the financial statements. Our conclusions are based on the information available to me at the date of the auditor's report. However, future events or conditions may cause the University to cease to continue as a going concern.

- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

COMMUNICATION WITH THOSE CHARGED WITH GOVERNANCE

We communicate with the Council regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also confirm to the Council that we have complied with relevant ethical requirements regarding independence, and communicate all relationships and other matters that may reasonably be thought to have a bearing on our independence and here applicable, related safeguards.

The principal accounting policies applied in the preparation of these consolidated annual financial statements are set out below. The policies are applied consistently for all periods covered by these consolidated annual financial statements.

I. BASIS OF PREPARATION

The consolidated annual financial statements of Stellenbosch University are prepared in accordance with International Financial Reporting Standards (IFRS). The consolidated annual financial statements are prepared on the historical cost basis, as amended by the revaluation of investments available for sale, endowments and investment properties.

In the preparation of these consolidated annual financial statements in accordance with IFRS, a number of critical accounting estimates are relied upon. Application of the University's accounting policies is at management's discretion. Areas requiring greater discretion, and areas involving significant assumptions and estimates, are discussed in note 1 to the consolidated annual financial statements.

STANDARDS, INTERPRETATIONS AND AMENDMENTS TO PUBLISHED STANDARDS APPLIED FOR THE FIRST TIME DURING THE YEAR

Certain new standards, amendments and interpretations relating to existing standards that have become compulsory for the financial year starting on 1 January 2017, have been applied by the University for the first time. None of these had a material impact on the consolidated annual financial statements. The amendments to and interpretations of the standards are as follows:

Amendment to IAS 7	'Cash flow statements' on disclosure requirements
Amendment to IAS 12	'Income taxes' on recognition of deferred tax assets for unrealised losses
Amendments to IFRS 12	'Disclosure of interests in other entities' on disclosure requirements

STANDARDS AND AMENDMENTS TO EXISTING STANDARDS NOT YET EFFECTIVE

Certain new standards and amendments to existing standards that have become compulsory for accounting periods commencing on or after I January 2018 or later and that the University has not yet applied, have been published. The University will apply these in the applicable period, if relevant. The new standards and amendments to existing standards are as follows:

Standards and amendments to existing standards which will affect the consolidated annual financial statements.

	'Financial instruments' (2009 & 2010), on financial liabilities, derecognition of financial instruments, financial assets and general hedge accounting (effective date of I January 2018)
--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

IFRS 9 addresses the classification and measurement of financial assets and replaces the multiple classification and measurement models in IAS 39 with a single model that has only two classification categories: amortised cost and fair value. IFRS 9 includes guidance on financial liabilities and for the derecognition of financial instruments.

Although IFRS 9 changes the classification of certain financial instruments, the measurement basis of the University's financial assets and liabilities is expected to be unchanged under the new principles. Trade and other receivables are all held to collect solely principal and interest (SPPI) and will continue to be measured at amortised cost in future. Similarly, borrowings and trade and other payables will continue to be measured at amortised cost. The University has a significant portfolio of available for sale investments consisting of both debt and equity instruments - all currently measured at fair value through other comprehensive income (FVOČI). For debt instruments under IFRS 9, the University will continue to recognize them at FVOCI, since it is the business model of the University to hold and collect SPPI and sell these instruments. For equity instruments, the intention is to elect the FVOCI option. The University does not expect the new expected credit loss impairment model to have a significant effect on the provision for student fees, although the provision for student loans might increase if lifetime expected losses is to be taken into account. Management is in the process of further stratifying the debtors book into defined classes of student debt with differing payment profiles or guarantors.

IFRS 15 and amendment to IFRS 15 'Revenue from contracts with customers' (effective date of 1 January 2018)

IFRS 15 is a single, comprehensive revenue recognition model for all contracts with customers to achieve greater consistency in the recognition and presentation of revenue. Revenue is recognised based on the satisfaction of performance obligations, which occurs when control of the goods or service transfers to a customer.

Revenue needs to be recognized at a point in time or over time depending on the performance obligations linked to separate elements of the contract with the customer. The University has five income streams being I) Government grants, 2) Student, accommodation and other fees, 3) Grants and contracts, 4) Donations, and 5) Sale of services and products. It is expected that the timing and measurement of the University's revenue will not materially change as a result of the implementation of IFRS 15. Based upon an initial impact assessment, grants and contracts appears to be the only income stream impacted by this standard. Although the University in most instances already account for research grants over the term of the research period, management is in the process of analyzing individual contracts with specific focus on contracts with multiple performance conditions attached to them and where measurement of progress is not necessarily in line with time. Government grants are excluded from the scope of IFRS 15 and accounted for in terms of IAS 20. Student, accommodation and other fees generally accrues within the University's academic year and are not recognized over time periods that span multiple financial years. Donations with no restrictions attached to them are recognized at that point in time, or otherwise deferred in line with the performance conditions. Sundry sales of goods are mostly delivered to customers at the point of sale. Sales of services are already accounted for on an accrual basis over time and does not have multiple element arrangements included in it.

'Leases' (effective date of 1 January 2019)

The new standard addresses the definition of a lease, recognition and measurement of leases and establishes principles for reporting useful information to users of financial statements about the leasing activities of both lessees and lessors. A key change is that most operating leases will be accounted for on the statement of financial position of lessees. Management is currently investigating the impact of this new standard, but there will not be an effect on the consolidated annual financial statements of the University in the following year.

Standards and amendments to existing standards which will not have a material effect on the consolidated annual financial statements.

2. BASIS OF CONSOLIDATION

SUBSIDIARIES

IFRS 16

All entities (including special purpose entities) in which the University, directly or indirectly, has an interest of more than half of the voting rights, or otherwise is able to exercise control over activities, are included in the consolidated annual financial statements. The purchase method is used to bring the acquisition of subsidiaries to book. The cost of an acquisition is measured as the fair value of assets transferred and liabilities assumed at the date of the transaction, including any transaction costs. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at fair value.

The surplus of the cost of acquisition over the fair value of the group's share of identifiable net assets is accounted for as goodwill. The results of subsidiaries acquired during the year are included from the date on which effective control has been obtained. Subsidiaries are deconsolidated from the date on which effective control ends.

The University recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of the acquiree's identifiable net assets.

statements' and IAS 28, 'Investments in associates and joint postponed) fective date of I January 2021)

ctions and advance consideration' (effective date of 1 January 2018)

(effective date of | January 2018)

ne tax treatments' (effective date of 1 January 2019)

fective date of | January 2018)

effective date of | January 2018)

FRS' (effective date of 1 January 2018)

es and joint ventures' (effective date of 1 January 2018)

Intergroup transactions, balances and unrealised profits on transactions between the University and its subsidiaries are eliminated. Unrealised losses are also eliminated and are treated as a potential indicator of impairment of the underlying asset. The accounting policies of subsidiaries are adjusted during consolidation, where necessary.

ASSOCIATE COMPANIES

An associate company is a company, other than a subsidiary, in which the University holds an investment and on which it can have a significant influence due to the nature and size of its investment. The results of associates have been accounted for by using the equity method. The equity method involves the recognition of the interest of the University and its subsidiaries in the postacquisition profits and losses of associate companies in the consolidated income statement and the postacquisition movements in reserves in the consolidated statement of comprehensive income.

The cumulative postacquisition movements are adjusted against the carrying amount of the investment in the associate company. The recognition of the share of the University and its subsidiaries in losses of associate companies is limited to the interest in the associate company. Additional losses are only recognised to the

extent that the University and its subsidiaries have guaranteed the debt of the associate company.

Intergroup transactions, balances and unrealised profits on transactions between the University and its associate companies are eliminated to the extent of the University's interest in the associate companies.

Unrealised losses are also eliminated and are treated as a potential indicator of impairment of the underlying asset. The accounting policies of associate companies are adjusted, where necessary, in applying the equity method.

3. FOREIGN EXCHANGE

FUNCTIONAL AND PRESENTATIONAL **CURRENCY**

Items included in the consolidated annual financial statements are measured by using the currency of the primary economic environment in which the University operates (the functional currency). The consolidated annual financial statements are presented in South African rand, the functional and presentational currency of the University.

TRANSACTIONS AND BALANCES

Foreign exchange transactions are accounted for at the exchange rate ruling on the date of the transaction. Profits and losses arising from the settlement of such transactions and the conversion of monetary assets and liabilities denominated in foreign currency are recognised in the consolidated income statement. These balances are converted at exchange rates ruling at year-end.

4. PROPERTY, BOOKS AND EOUIPMENT

Land and buildings mainly consist of stands, lecture halls, laboratories, residences and administrative buildings. Land and buildings are shown at historical cost less accumulated depreciation, excluding donations of land and buildings valued at fair value by sworn valuers at the date of donation.

Historical cost includes direct costs associated with the acquisition of the item. Postacquisition costs are added to the original cost, or recognised as a separate asset, only when it is probable that future economic benefits associated with the item will flow to the University and the cost can be measured reliably. All other repair and maintenance costs are recognised in the consolidated income statement in the period in which they are incurred.

Books and equipment are shown at cost, excluding donations of books and equipment that are valued at fair value by sworn valuers at date of donation.

Government grants received for infrastructure are recognised by subtracting the grant from the value of the asset.

Land is not depreciated, as it has an unlimited useful life. Other assets are depreciated by using the straight-line method to write off cost or revalued amounts to residual values over their useful life. Residuals and depreciation rates are as follows:

	Residual %	Depreciation %
Land	100	-
Buildings	-	1,3-20,0
Computer equipment	-	33,3
Other equipment and motor vehicles	0-40	5-25
Library books	-	100

The useful life of property, books and equipment is reviewed annually and, if necessary, adjusted.

If the carrying value of an asset is significantly in excess of its realisable value, it is written down to the realisable value.

Profits and losses on the sale of assets are recognised in the consolidated income statement and represent the difference between the proceeds and the carrying amount at the date of sale.

5. INTANGIBLE ASSETS

Purchased computer software licences are capitalised at the cost incurred to obtain and use the specific software. This cost is amortised over the expected useful life of the software. The expected useful life of software falling into this category at year-end is 10 years. Postacquisition costs incurred in the maintenance of computer software are recognised as expenditure in the period in which incurred.

The surplus of the cost of acquisition over the fair value of the group's share of identifiable net assets is accounted for as goodwill. Goodwill is not subject to amortisation and is tested annually for impairment.

Intangible assets include computer software licences and goodwill.

6. FINANCIAL INSTRUMENTS

Financial instruments include cash and cash equivalents, derivatives, investments, loans and receivables, trade and other payables and borrowings. Financial instruments are initially recognised at fair value, including transaction costs. Conventional buying and selling of financial assets are recognised at date of trade.

The University classifies its financial assets in the following categories: loans and receivables; investments available for sale and financial instruments carried at fair value, with adjustments in the consolidated income statement through profit and loss. The University classifies financial liabilities in the following categories: trade and other payables and interest-bearing borrowings. The classification is determined by the purpose for which the asset or liability has been acquired. Management determines the classification at initial recognition.

LOANS AND RECEIVABLES

Loans and receivables are non-derivative financial instruments with fixed or determinable repayments not quoted in an active market. Loans and receivables are

initially measured at fair value. Where amounts are only payable 12 months from year-end, they are included in non-current assets, otherwise in current assets.

Loans and receivables are shown at amortised cost by using the effective-interest-rate method and after provision for impairment of the outstanding amount. An allowance for credit losses is raised in the event of objective evidence that outstanding amounts will not be collected in accordance with the original terms. The amount of the provision is the difference between the carrying amount and the recoverable amount, being the current value of the expected cash flows, discounted at the effective interest rate.

Significant financial difficulty and failure to pay outstanding debt are deemed indicators of impairment. The carrying amount of the asset is decreased by raising a provision. The amount of the impairment is recognised in the consolidated income statement as operating expenditure. When the debt or loan becomes irrecoverable, it is written off against the provision. Subsequent recoveries of any amounts previously written off are credited to the consolidated income statement against operating expenditure.

Trade and other receivables, excluding forward foreign exchange contract assets, are classified as loans and receivables.

Cashandcashequivalents, classified as loans and receivables, consist of cash on hand, call deposits, investments in money market instruments and bank overdrafts.

INVESTMENTS AVAILABLE FOR SALE

Investments are classified as 'available for sale' and are shown at fair value by using relevant valuation methods. Investments are included in non-current assets, unless the University intends to dispose of the investment within 12 months from year-end. Purchases and sales of investments are recognised at the date of trade, ie the date on which the University commits itself to the purchase and sale. Changes in fair values are shown in the statement of comprehensive income. The difference between the net sale proceeds and the cost of the investment is transferred from the fair-value reserve to the consolidated income statement on disposal.

Investments are derecognised when the right to cash flow expires or is transferred or the University has transferred the significant associated risks and benefits of ownership

The fair values of listed investments are based on current market prices. The University determines the value of unlisted investments and investments in respect of which there is no active market by using relevant valuation techniques.

The University determines at each year-end whether a financial asset has been impaired, provided objective evidence can be provided. A significant decline in the fair value of the investment below its cost over a period is indicative of impairment. If there is such evidence for investments available for sale, the cumulative loss is transferred from the fair-value reserve to the consolidated income statement.

The cumulative loss is calculated as the difference between the acquisition cost and the current fair value, net of any impairments recognised in previous periods. Impairment losses recognised in the consolidated income statement are not reversed on later recovery.

DERIVATIVE INSTRUMENTS

Derivative instruments, including forward foreign exchange contracts, are classified as 'at fair value with adjustments through the consolidated income statement'. These instruments are recognised at fair value at the date the derivative contract has been entered into. In subsequent periods it is revalued at fair value. Profits and losses on derivative instruments are recognised in the consolidated income statement.

TRADE AND OTHER PAYABLES

Trade and other payables, excluding forward foreign exchange contract liabilities, are initially recorded at fair value. Thereafter they are shown at amortised cost by using the effective-interest-rate method.

INTEREST-BEARING BORROWINGS

Borrowings are initially recognised at fair value, taking into account any transaction costs incurred. After initial recognition borrowings are carried at amortised cost. Differences between the initially recognised amount and the redemption amount are recognised in the consolidated income statement over the term of the borrowings by using the effective-interest-rate method. Borrowings are shown as current liabilities, except where the University has an unconditional right to defer payment for at least 12 months after year-end, in which case these are shown as non-current liabilities.

7. RESEARCH AND DEVELOPMENT COSTS

Research and development costs are recognised as expenditure in the year in which incurred, since both are inherent in the normal operations of a university.

8. DONATIONS RECEIVED

Donations are recognised at fair value at the date of the donation, based on external valuations.

9. INVENTORIES

Inventories, mainly comprising consumer goods and stationery, are shown at the lower of cost, on the basis of average cost, or net realisable value.

Cost excludes finance charges. Net realisable value is the estimated selling price in the normal course of business, less selling costs.

10. IMPAIRMENT OF NON-FINANCIAL ASSETS

Assets with an indefinite useful life are not depreciated or amortised and are subject to annual testing for impairment. Assets subject to depreciation or amortisation are tested for potential impairment if an event or change in circumstances indicates that the

carrying amount of the asset may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of the asset exceeds its recoverable amount. The recoverable amount is the higher of the fair value of an asset, less any selling costs, or its value in use. In the test for impairment, assets are grouped at the lowest level for which there is a separate identifiable cash flow (cash-generating units). Non-financial assets previously impaired are reviewed at every year-end for potential reversal of previously recognised impairments.

II. REVENUE RECOGNITION

Income is recognised at the fair value of the amounts or goods received.

Donation income is accounted for when it accrues.

Student and accommodation fees are recognised as and when the service is provided.

Central government grants are recognised in the period for which they are received. Government grants are recognised where there is reasonable certainty that the grant will be received and that the University will meet all the associated conditions. Government grants received for infrastructure are included in liabilities as deferred government grants and are credited to the asset when the asset becomes availabe for use, resulting in a decrease in the depreciation recognised in the consolidated income statement over the expected lives of related assets.

Research grants are recognised over the term of the research and based on the terms of the individual contracts

Interest income is recognised on a time apportionment basis by using the effective-interest-rate method. On impairment of a debtor the University reduces the carrying amount to the recoverable amount. The recoverable amount represents the future cash flow, discounted at the original effective interest rate. This discount is recognised as interest over time. Interest income on loans in respect of which an impairment has been recognised, is recognised at the original effective interest rate.

Interdepartmental income is eliminated.

Other income earned by the University is recognised on the following bases:

- Dividend income when the shareholder's rights to receive a dividend vest, ie on the last day for registration in respect of listed shares, and when declared in the case of unlisted shares.
- Rental income receipts in respect of operating leases are recognised in the consolidated income statement on a straight-line basis over the period of the lease.
- Accidental sales and services are recognised on transfer of the goods or in the period in which the services are rendered.

12.LEASES

The University leases property and equipment. Lease agreements where the lessor retains the significant risks and benefits associated with ownership of a leased item, are classified as operating leases. Payments in respect of operating leases are recognised in the consolidated income statement on a straight-line basis over the period of the lease.

Lease agreements where the University, as lessee, receives all the significant risks and benefits of ownership, are classified as finance leases. Finance leases are capitalised at the beginning of the lease term at the lower of the market value of the leased property and the current value of the minimum lease payments. Each lease payment has a liability and finance charges element and is apportioned accordingly. The corresponding lease liability, net of finance charges, is recognised in the consolidated statement of financial position. Property and equipment acquired by means of finance leases are depreciated over the shorter of the useful life or the lease term of the asset.

13. PROVISIONS

Provisions are recognised when the University has a current statutory or constructive liability as a result of a past binding occurrence that will probably lead to an outflow of resources in the form of economic benefits to meet the liability, and a reasonable estimate of the amount of the liability can be made. Provisions are measured at the current value of the expected future expenditure to meet the liability, discounted at the market-related rate for similar provisions. Changes in the value of provisions due to passage of time are recognised as interest.

14.STAFF BENEFITS

POSTRETIREMENT MEDICAL BENEFITS AND **GROUP LIFE INSURANCE SCHEME**

Retired employees receive postretirement medical benefits. Access to this benefit is restricted to employees appointed prior to I June 2002. All employees are required to participate in the group life insurance scheme. The expected costs of these benefits are recognised over the period of employment. The liability in respect of postretirement medical benefits is the present value of the liability at year-end less the fair value of plan assets and any adjustments for actuarial profits or losses and past-service costs. The liability is calculated actuarially by independent actuaries at least once every three years. Actuarial profits and losses are recognised immediately in the consolidated statement of comprehensive income.

PENSION LIABILITIES

Contributions are made monthly to the US Retirement Fund, a defined-contribution plan for permanent employees of the University. A defined-contribution plan is a pension plan in terms of which the University makes fixed contributions to an external fund, recognised as an expense in the period in wich services are rendered.

LONG-SERVICE BENEFITS

After 25 years' service employees qualify for a gratuity valued at 50% of the employee's monthly salary (with a minimum value of R400 and a maximum value of R5 000). The University recognises a liability and the concomitant expenditure as and when the liability accrues.

15. DEFERRED TAXATION

Deferred tax is provided by using the liability method for temporary differences within tax-paying subsidiaries of the University. Deferred tax represents the tax effect of temporary differences between the tax bases of assets and of liabilities and their carrying values for financial reporting purposes. Deferred tax assets and liabilities are determined using tax rates (and laws) that have been enacted or substantively enacted by the statement of financial position date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled. Deferred tax assets are only recognised to the extent of their recoverability. Deferred tax is not provided if it arises from the initial recognition of assets and liabilities from transactions other than business combinations and at the date of the transaction does not impact accounting profits or losses or taxable income or determined losses.

16. FUNDS

Funds consist of restricted and unrestricted funds. Restricted funds consist of operational, loan, donor and fixed asset funds with specific conditions for use. Unrestricted funds are those which Council uses at its own discretion. In the pool of unrestricted funds are funds which are earmarked for specific purposes and can therefore not be used for other purposes.

Notes to the Consolidated Annual Financial Statements FOR THE YEAR ENDED 31 DECEMBER 2017

I. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS The estimates and judgements made by management are evaluated continuously and are based on past experience and other factors, which include future expectations and are deemed reasonable under the given circumstances. Consequently, the accounting estimates used in the consolidated annual financial statements will not necessarily be in line with the actual outcome in subsequent periods. The estimates and assumptions below may have a material effect on the carrying amounts of assets and liabilities.

STAFF BENEFITS

A number of assumptions are made in the provision for staff benefits. Refer to note 26 for the assumptions. The significant assumptions are a discount rate of 9,9% (2016: 9,9%), a medical inflation rate of 8,8% (2016: 9,3%) and an expected retirement age of 65 years (2016: 65 years).

The effect of a 1% increase in the discount rate will be as follow Decrease in the accrued liability

The effect of a 1% decrease in the discount rate will be as follow Increase in the accrued liability

The effect of a 1% increase in the medical inflation rate will be a Increase in the accrued liability Increase in the current service and interest cost

The effect of a 1% decrease in the medical inflation rate will be Decrease in the accrued liability Decrease in the current service and interest cost

The effect of an increase of one year in the expected retirement Decrease in the accrued liability

The effect of a decrease of one year in the expected retirement Increase in the accrued liability

The University's policy on retirement age states that employees retire at 65 years of age. After age 65 employment may be extended to a maximum age of 70, based on uninterrupted satisfactory performance. For computation purposes the normal and expected retirement age is therefore deemed 65 years.

IMPAIRMENT OF OUTSTANDING STUDENT **FEES AND LOANS**

The annual provision for the impairment of student loans is based on the assumption that students can obtain loans in the market at prime (2016: prime) on average. This assumption is based on enquiries made at various financial institutions.

Student loans are categorised as redeemable or non- redeemable. A provision for impairment of their loans is based on historical information according to the category of the student. Overdue student loans are considered annually for possible creation of an allowance for credit losses.

Provision for impairment of outstanding student fees is based on historical trends. The probability of collection is taken into account and based on that an allowance for credit losses is recognised. The probability of collection decreases with the ageing of debt and consequently a higher allowance for credit losses is recognised for older debt. A higher percentage is applied to debt handed over for collection.

IMPAIRMENT OF INVESTMENTS

The University determines the significance of a fairvalue decrease to below cost by taking into account the volatility of the specific instrument. A decrease to 20% lower than the cost, or lasting longer than 12 months, is deemed significant.

USEFUL LIFE AND RESIDUAL VALUE OF PROPERTY, BOOKS AND EQUIPMENT

Land is deemed to have an indefinite useful life. Consequently, land is not depreciated. The useful life of other assets is estimated in terms of past experience and the features of the specific items.

The residual value of assets other than land is estimated in terms of past experience and the features of the specific items.

MARKET VALUE OF BUILDINGS

Two methods are applied in determining the market value of buildings. The first is the directly comparable method, in terms of which value is determined with reference to the actual selling price of comparable property. The second is to base an evaluation on the potential rental income, taking into account the unique nature of the properties of the University and occupation rates.

The revaluation of buildings as at I January 2004 in terms of IFRS I, First-time adoption of International Financial Reporting Standards, is based on the following key assumptions:

- The buildings will be placed on and traded in the market under normal market conditions.
- All the properties of Stellenbosch University will not be placed on the open market at the same time.
- Where there are title restrictions registered against properties that restrict or prohibit their sale, such title restrictions will be removed, where possible, by means of the Removal of Restrictions Act, 84 of 1967, before the properties are placed on the market.

2. FUND BALANCES

The accumulated balances as at 3I December are as follows:

	Restricted	Un- restricted	Property revaluation reserve*	Fair-value reserve	Non- controlling interests	Total
	R000	R000	R000	R000	R000	R000
2017

Fixed-asset funds	2 050 588	-	2 538 731	78 36	-	4 667 455
Non-controlling interests	-	-	-	-	I 028	I 028
	7 560 026	1 005 562	2 538 731	48 86	I 028	12 254 208

The allocation of the fair-value reserve is as follows:

	Funds at book value	Allocation of fair-value reserve	Funds at market value
	R000	R000	R000
2017			
Restricted funds	8 450 871	645	9 562 516
Unrestricted funds	1012093	210 891	I 222 984
Earmarked funds	651 493	-	651 493
Unearmarked funds	360 600	210 891	571 491
	9 462 964	I 322 536	10 785 500
2016			
Restricted funds	7 560 026	993 308	8 553 334
Unrestricted funds	1 005 562	155 553	6 5
Earmarked funds	701 654	-	701 654
Unearmarked funds	303 908	155 553	459 461
	8 565 588	48 86	9 714 449

*The property revaluation reserve relates to an once-off event in 2004 when the University applied the IFRS I exemption in terms of which the fair market value of the buildings at the date of conversion to IFRS, became the deemed cost of the buildings.

3. INTEREST-BEARING BORROWINGS

One government loan at a fixed interest rate repayable in equal b ending 2018

Various loans from financial institutions at varying interest rates an biannual payments

Bank facility for financing the University's various motor vehicle sch Finance lease liability

Less: Portion repayable within one year

The maturity dates of interest-bearing borrowings are as follows:

Within one year Between two and five years After five years

The average interest rate on borrowings amounts to 15,6% (2016: 13,6%) at year-end. Motor vehicle loans owing by employees are included in trade and other receivables (refer to note 8). All the borrowings, excluding the motor vehicle schemes, have fixed interest rates. Motor vehicle scheme rates are linked to prime. The minimum finance lease payments are payable as follows: Within one year

Between two and five years After five years Total payments

Less: finance charges payable

After five years

The current value of lease payments is as follows: Within one year* Between two and five years*

*interest capitalised in initial periods of the lease exceed capital repayments.

The register containing full details of land and buildings is available at the offices of the University. Included in land is property in Stellenbosch on which a notarial bond of RI9I,6 million (2016: RI9I,6 million) was registered. The rights in terms of the lease were ceded to the financier.

Work in progress to the value of R404,9 million (2016: R507,4 million) is included in the cost of buildings. No depreciation is recognised on work in progress.

The University rents property through leases with terms ranging from 15 to 20 years and these are included in the costs and accumulated depreciation of buildings.

Trade receivables due
Less: Allowance for credit losses of trade receivables
Motor vehicle loans
Interest and dividends receivable on investments
Insurance claim receivable

Other

Less: Long-term portion of motor vehicle loans Less: Long-term portion of student loans, before taking into acc allowance for credit losses

Refer to note 28 for amounts outstanding by related parties included above. All non-current receivables are receivable within five years from the financial year-end.

STUDENT FEES

The largest component of outstanding student fees is due by former students. Debt is evaluated in terms of historical rates of successful collection. The probability of collection is taken into account and based on that an allowance for credit losses is recognised. The probability of collection decreases with the ageing of debt and consequently a higher allowance for credit losses is recognised for older debt. A higher percentage is applied to debt handed over for collection.

The age analysis of outstanding student fees for which an allowance for credit losses has been recognised is as follows: One year

Between one and five years Five years and older Handed over

Total

The movement in the allowance for credit losses for student fees is a

Balance at the beginning of the year Increase in allowance for the year Amounts written off during the year as irrecoverable

Total

The increase in the allowance for the year, as well as irrecoverable debts written off, is shown in the consolidated income statement under 'Other operating expenditure'.

STUDENT LOANS

Student loans are granted at rates below market-related interest rates. An impairment on outstanding student loans is calculated at recognition of the loan.

Student loans are categorised as redeemable or non-redeemable. A provision for impairment of their loans is based on historical information according to the category of the student. As at year-end student loans that were not redeemable amounted to R79,5 million (2016: R74,2 million) and no further allowance for credit losses was deemed necessary for this group. Redeemable students amounted to ŔI56,5 million (2016: RI38,1 million), of which R39,4 million

(2016: R41,9 million) had not been overdue. No allowance for credit losses is deemed necessary for non-overdue loans. Overdue student loans amounted to RII7,I million (2016: R96,2 million). Overdue student loans are considered annually for possible creation of an allowance for credit losses.

The movement in the allowance for credit losses of student loans is as follows:

Balance at the beginning of the year	78 125	64 723
Increase in allowance for the year	29 355	13 719
Amounts written off during the year as irrecoverable	(710)	(317)
Balance at the end of the year	106 771	78 125

The increase in the allowance for the year as well as irrecoverable debts written off, is shown in the consolidated income statement under 'Other operating expenditure'

TRADE AND OTHER RECEIVABLES

As at year-end trade and other fully performing receivables amounted to R157,6 million (2016: RI44,7 million).

Other receivables include a number of smaller receivables who do not have a significant history of non-performance and are of good standing. Due to the nature of income levied, mainly consisting of research-related income for which contracts are in place, receivables younger than four months are not considered for the allowance of credit losses. The age analysis of overdue receivables is as follows:

Between one and four months	45 696	44 317
Older than four months	21 248	28 996
Total	66 944	73 313

Receivables older than four months are considered for an allowance for credit losses. The allowance for credit losses of receivables is as follows:

Balance at the beginning of the year	3 359	4 677
Increase/(decrease) in allowance for the year	5 021	(589)
Amounts written off during the year as irrecoverable	(3 751)	(729)
Balance at the end of the year	4 629	3 359

MOTOR VEHICLE LOANS

The recoverability of motor vehicle loans owed by employees is regarded as highly probable and consequently no allowance for credit losses is created for this category (refer to note 3).

INTEREST AND DIVIDENDS RECEIVABLE ON INVESTMENTS

The amounts are receivable from the University's investment managers. The University's investment portfolios are managed by professional asset managers and hence the amounts are deemed fully recoverable.

9. DEFERRED TAX

The movement in the deferred tax asset and liability is as fol

Balance at the beginning of the year Movement during the year: Temporary differences on property, books and equipment

Balance at the end of the year

The deferred tax balance consists of the following: Temporary differences on property, books and equipment - assets Temporary differences on property, books and equipment - liabilit

Balance at the end of the year

A deferred tax asset is recognised for tax losses only to the extent that recovery is probable. The movement in deferred tax for the year is included in 'Other operating expenditure'.

10. INVENTORIES

Inventories consist of the following items: Stationery Consumables

11. OPERATING LEASE ASSET

The net operating lease asset is made up as follows: Operating lease asset Operating lease liability

The expected movement in the net operating lease asset is a Balance at the beginning of the year Receivable within one year Receivable within two to five years Receivable after five years

12. TRADE AND OTHER PAYABLES

Trade payables Student fees received in advance Accrued remuneration costs Accrued expenditure Accrued leave liability Income other than student fees received in advance NRF deposit Interstructure balances (STIAS, WAT, MCS) Other

Refer to note 28 for amounts payable to related parties included above.

467 454

The average interest rate on cash and cash equivalents for 2017 amounts to 8,1% (2016:8%).

The University's facilities at banks, reviewed annually	204 932	171 055

As at year-end only a portion of the facility for motor vehicle loans was utilised. The portion that has been utilised is included in interest-bearing borrowings. Refer to note 3.

25. FINANCIAL RISK MANAGEMENT

The University's activities expose it to certain business and financial risks, namely market risk, credit risk and liquidity risk. The University's overarching risk management programme focuses on both the identified operational risks and the unpredictability of financial markets and is aimed at minimising the potentially negative impact on the University.

25.1 BUSINESS RISKS

The main business risks of the University, as identified by Management, are as follows:

- The pace of transformation and broadening of accessibility.
- Growing pressure on the unearmarked government subsidy to universities.
- Infrastructure constraints and the high cost of the ongoing maintenance of facilities and science equipment.
- Pressure on study fees due to sector wide protest actions (#FeesMustFall).
- Sector-wide fee regulation.

These risks are monitored continuously and appropriate steps are taken to manage them optimally.

25.2 MARKET RISK

The activities of the University expose it to various market risks, including foreign exchange risk, price risk and interest rate risk.

(a) FOREIGN EXCHANGE RISK

Owing to international transactions in currencies other than the South African rand (the University's functional currency), the University is exposed to foreign currency risk. This risk arises from future financial transactions as well as recognised assets and liabilities denominated especially in US dollar, pound and euro. Foreign exchange risk associated with future financial transactions is managed by taking out forward cover through forward foreign exchange contracts. If the exchange rate had increased/decreased by 5,0% as at 31 December 2017, with all other factors remaining unchanged, the surplus for the year would have increased/(decreased) as follows:

CHF			
EURO			
GBP			
SEK			
USD			

Forward foreign exchange contracts are entered into to manage exposure to exchange rate fluctuations in respect of certain transactions. A cautious approach to forward cover is maintained. On 30 November 2015, the University Council approved that exchange rate losses which arise due to the difference between the exchange rates used for budgeting purposes, and the actual exchange rate at which the Library's foreign payments are incurred, will be funded from the exchange rate profit generated from foreign investments. In respect of foreign exchange transactions, the following current assets and liabilities are not covered by forward foreign exchange contracts, as shown in the consolidated statement of financial position:

	Foreign exchange 2017	Rand value 2017	Foreign exchange 2016	Rand value 2016
	000	R000	000	R000
Trade receivables				
CHF	2	28	-	-
SEK	-	-	32	46
EURO	82	87	54	770

	-
59	39
67	27
-	2
240	397
367	465

2017	2016
R000	R000

(b) PRICE RISK

The University is exposed to price risk in terms of listed investments available for sale. Should the share price of the equity component of the portfolio rise/fall by 10,0% as at 31 December 2017 and all other factors remain unchanged, the fair-value reserve for listed shares would have increased/decreased by R720,3 million (2016: R658,6 million). A securities exchange ("bond exchange") rise or fall of 10,0% as at 3I December 2017 would have resulted in an increase/ decrease of R93,8 million (2016: R70,2 million) in the fair-value reserve for capital market instruments. The University is not directly exposed to commodity price risk.

(c) INTEREST RATE RISK

The interest rate features of new and existing loans are continuously reviewed. The University did not enter into any interest-rate-derivative agreements for the years ended 3I December 2017 and 2016.

Should the interest rate on balances at banks as at year-end increase/decrease by IOO basis points, the surplus for the year would have increased/decreased by R7,7 million (2016: R7,5 million).

Should the interest rate on interest-bearing investments as at year-end increase/decrease by IOO basis points, the surplus for the year would have increased/decreased by R7,4 million (2016: R6,0 million).

Should the interest rate on the bank facility for the financing of the University's various motor vehicle schemes increase/decrease by IOO basis points as at year-end, the surplus for the year would have decreased/increased by R0,4 million (2016: R0,4 million).

25.3 LIOUIDITY RISK

Transparent liquidity risk management implies the maintenance of sufficient cash and marketable securities, as well as the availability of credit facilities.

In order to cover possible liquidity risks, the University is in a position to realise long-term investments at short notice. Cash investments amounting to R223,9 million (2016: RI09,8 million) have also been included in long-term investments.

Total financial liabilities	704 372	I 032 972	566 507	131 605	334 860

25.4 CREDIT RISK

Credit risk mainly arises from outstanding student fees and student loans, trade receivables and cash resources. The largest component of outstanding student fees is due by former students. Trade receivables consist of a large number of clients and their creditworthiness is evaluated continuously by the University. Cash surpluses are invested only at reputable financial institutions. As at 31 December 2017 and 31 December 2016, there was no material credit risk for which adequate provision had not been made. Trade and other receivables are shown net of any allowance for credit losses.

25.5 ESTIMATION OF FAIR VALUE

The fair values of listed investments available for sale are based on guoted market prices as at year-end. The guoted market price refers to the closing price on the last date of business before year-end. The fair values of unlisted investments not traded in an active market are determined by means of applicable valuation methods, based on market conditions as at year-end. Fair values of the remainder of financial instruments are determined on the basis of discounted-cash flow models. The nominal values of trade and other receivables and payables and interest-bearing borrowings less impairments and allowances for credit losses are deemed as their fair values. Fair value measurements are disclosed in accordance with the hierarchy below:

Level I	Quoted prices in terms of active markets for
Level 2	Inputs other than guoted prices obtained dire
Level 3	Inputs for assets and liabilities not based on a
Level 3	Inputs for assets and liabilities not based on

Assets as at 31 December 2017 shown at fair value:

Capital markets
Equities
- Listed shares
- Unlisted shares
Money market
Other

C

The fair value of listed investments, government bonds, fixed deposits and other investments is based on current market prices. Other investments mainly consist of cash instruments forming part of the University's long-term investment pool. The University determines the fair value of unlisted investments and investments for which there are not an active market by making use of relevant valuation techniques. As at 31 December 2016 government bonds, listed shares, fixed deposits and other investments were classified as level I and unlisted shares as level 2.

The fair value of financial instruments not traded on the securities exchange ("bond exchange") is determined by means of relevant valuation techniques. These techniques mainly take into account available market data. The use of entity-specific estimates is limited. Should inputs comprise available market data only, the instrument is shown at level 2. Specific valuation techniques include the use of quoted or dealer prices of similar instruments, taking risk factors into account.

Should any of the inputs not be based on available market data, the item is shown at level 3.

25.6 MANAGEMENT OF AVAILABLE FUNDS

Stellenbosch University manages its funds in order to ensure that it will continue as a going concern. Funds consist of restricted and unrestricted funds. Restricted funds consist of operating, loan, endowment and fixed-asset funds with specific conditions for application. Unrestricted funds are those funds that the Council may use at its discretion.

26. STAFF BENEFITS

CONTRIBUTIONS TO THE UNIVERSITY OF STELLENBOSCH RETIREMENT FUND (USRF)

USRF, established on I November 1994 and managed in terms of the Pension Funds Act of 1956 (as amended), is a defined-contribution plan for permanent employees of the University. The fund is valued by independent actuaries at least every three years. The fund's assets amounted to R3 733,2 million (2016: R3 341,0 million) as at 31 December 2017, and members totalled 3 570 (2016: 3 545). Membership contribution rates vary from 10% to 35% of pensionable earnings. The actuaries declared the fund financially sound.

Total contributions paid amounted to R234,5 million (2016: R208,I million). The most recent audit had been done for the year ended 31 December 2016 and an unqualified opinion was expressed.

- identical assets and liabilities.
- rectly (prices) or indirectly (derived from prices).
- available market data.

Level I	Level 2	Level 3	Total
R000	R000	R000	R000
938 052	-	-	938 052

-	2 724	-	2 724
743 049	-	-	743 049
2 224	-	-	2 224
8 885 984	2 724	-	8 888 708

OTHER BENEFITS

Post-retirement medical benefits are provided to certain retired employees. Access to this benefit is limited to employees appointed before | June 2002.

The group life insurance scheme provides life insurance at the death of the member. Membership of the scheme is compulsory for all permanent employees of the University.

Liabilities are calculated by the independent actuaries at least every three years and are reviewed annually. A complete actuarial valuation was performed as at 31 December 2017. The most recent valuation was performed on 18 January 2018. The next actuarial valuation will be performed no later than 1 January 2019.

The actuarial valuation method is the projected-unit-credit method. The main actuarial assumptions are as follows:

	2017	2016
Discount rate	9,9%	9,9%
Consumer price index	6,8%	7,3%
Medical inflation	8,8%	9,3%
Salary inflation	8,3%	8,8%
Expected average retirement age	65,0	65,0
Age difference between principal member and spouse:	4,0	4,0
Income at retirement	75,0%	75,0%
Proportion married at retirement	75,0%	75,0%
Group life proportion married at retirement	90,0%	90,0%
Maximum age for orphan contributions	21,0	21,0
Continuation at retirement	100,0%	100,0%

Reconciliation of the carrying amount:

		2017			2016	
	Medical liability	Group life insurance	Total	Medical liability	Group life insurance	Total
	R000	R000	R000	R000	R000	R000
Liability at the beginning of the year Adjustments in the consolidated income statement:	573 921	52 385	626 306	526 491	4 4 3	567 904
- Current service charges	6 688	3 007	9 695	6 543	2 292	8 835
- Interest charge	54 987	5 064	60 05 1	54 573	4318	58 891
- Expected contributions payable by the employer Actuarial (gain)/loss adjustments in the	(34 516)	(2 353)	(36 869)	(30 767)	(2 004)	(32 771)
consolidated statement of comprehensive income	(13 170)	5 789	(7 381)	17 081	6 366	23 447
	587 910	63 892	651 802	573 921	52 385	626 306

The actuarial (gain)/loss is attributable to the following:

Change in real discount rate

- Change in expected cost inflation
- Change in demographic assumptions
- Change in membership numbers and details

The liability at the end of the year is as follows:

Continued members In-service members

The expected increase in the liability (including long-service benefits) for the next 12 months is R32,0 million (2016: R33,4 million).

LONG-SERVICE BENEFITS

After 25 years' service, employees qualify for a gratuity to the value of 50% of the employee's monthly salary, with a minimum value of R400 and a maximum value of R5 000.

The liability at the end of the year is as follows:

Active members

Total liability

Summary of data for five years of:

Current value of liability Actuarial (gain)/loss due to experience

27. INCOME TAX

The University is exempted from normal income tax in terms of section IO(I)(cA)(i) of the Income Tax Act. Some of the subsidiaries of the University are, however, liable for tax. Refer to note 9.
