EXECUTIVE SUMMARY	3
HIGHLIGHTS FROM THE RECTOR'S MANAGEMENT REPORT	11
1. Growing the SU brand	11
2. Graduation and pledge ceremonies 2022	11
3. SU Teaching Awards 2022	12
4. Two new SU teaching fellows	12
5. Another two research chairs.....	13
6. Student recruitment and strategic enrolment management	13
7. Snapshot of 2023 newcomer first-year enrolments and registration	14
8. Postdoctoral fellows.....	15
9. SUNFin progress towards go-live in June 2023	15
10. Progress with SUNStudent	16
11. Welcoming 2023.....	16
12. Addressing the Khampepe findings and recommendations.....	18
13. Race and Transformation in Higher Education conference	18
14. Research for impact	18
CONCLUSION	19
CONTRIBUTORS	20

EXECUTIVE SUMMARY

Welcome to the first scheduled meeting of the Stellenbosch University (SU) Council for the year. Although the second quarter of the academic year is already in full swing, it is perhaps sobering first to reflect on the somewhat sombre start to 2023.

Bereavements

On 31 January, we were shaken by the news of the untimely passing of our Council chair, Ainsley Moos, who will always be remembered and revered as a formidable leader. On that very same day, we learnt that Desmond Smith, a previous chair of Council and serving chair of the Stellenbosch Institute for Advance Study (STIAS), had passed away. To add to our sorrow, a second-year BCom student, Dylan Georgiades, died in an apparent hit-and-run accident in Merriman Avenue on Friday 10 February.

Newcomer Enrolments and a solid foundation of Academic Year 2023

With reference to our enrolment of new-comer students for this year, I am glad to report that SU has seen an increase of 3.9% on the previous year. Actual registrations at the close of the registration period amounted to 6110 new-comer registrations compared to the 5880 of the previous year. The CBIA enrolments is also notably up from 2458 in 2022 to 2704 this year. [The detailed reports on new enrolments and undergraduate registrations for 2023 is available at the following link <https://www.sun.ac.za/english/InformationGovernance/services/student-reports>.

Fundraising

Our solid enrolment figures for the year are aptly supported by excellent performance by our fundraising team. Total philanthropic donations to SU for February 2023 (R94,66 million) exceeded the sum received in February 2022 (R79,25 million) by 19,4%. This continues the upward trajectory from last year, when SU's philanthropic income topped R272 million compared to R234 million the previous year – an increase of 14%.

NSFAS cap on accommodation allowance

At an operating level, the decision by the National Student Financial Aid Scheme (NSFAS) to implement a R45 000 cap on accommodation funding for qualifying students this year poses a significant challenge to the sector. At SU, many rooms in our residences as well as private NSFAS-accredited accommodation will cost more than R45 000 for the year. We approached NSFAS for clarity on how the implied shortfall per student will be paid.

The scheme later announced that applications for exemption from the cap would be considered where required. It is our current understanding that university accommodation will be prioritised for exemption. We have submitted our application and are awaiting a response. Yet we are aware of other universities whose applications have been denied.

In the meantime, the Rectorate has appointed a contingency committee chaired by the Registrar to consider how the University can support students in this regard. The committee is comprised of representatives from Student Accommodation, Student Affairs (including Student Communities), Student Finance, Development and Alumni Relations, and the Students' Representative Council (SRC).

Universities South Africa (USAf) has also appealed to the Minister of Higher Education, Science and Innovation on behalf of the sector to withdraw the new policy on the capping of accommodation funding until due diligence has been conducted and a proper, well-researched policy can be formulated. In its appeal, USAf stressed that if the policy were to remain, students themselves would be liable for the funding gap, which would violate government's commitment to provide full funding for NSFAS students.

SU will continue to support students in finding suitable accommodation and will engage with the relevant entities, including the SRC and NSFAS, to work towards long-term solutions.

Growth in newcomer enrolments

Turning to more positive news, I am glad to report that SU has seen an increase of 3,9% in newcomer first-year enrolments compared to last year. Actual registrations at the close of the registration period totalled 6 110 (2022: 5 880). The coloured, black African, Indian and Asian (CBIA) component of new enrolments has also grown from 2 458 in 2022 to 2 700 this year. (For detailed reports on this year's new enrolments and undergraduate registrations, consult <https://www.sun.ac.za/english/InformationGovernance/services/student-reports.>)

Solid foundation for 2023 academic year

I am equally pleased to share with Council highlights of our university's stellar performance in 2022, which will naturally serve as a foundation for continued excellence in 2023.

Research output

According to official figures of the Department of Higher Education and Training (DHET) released in 2022, SU is among South Africa's top three research-intensive universities, both per capita and in terms of total research output. We currently have 68 research chairs, having started with 16 in 2012. Our postdoctoral fellows grew from 154 in 2012 to 354 in 2022. In addition, we now boast a total of 20 A-rated researchers after receiving nine new A-ratings in the latest rating round. Researchers with an A-rating from the National Research Foundation (NRF) are recognised by their peers as leading international scholars in their respective fields for the high quality and impact of recent research outputs. At the close of 2022, SU had 493 NRF-rated researchers.

School for Data Science and Computational Thinking, and CERI

In the short period of three years since its inception, the School for Data Science and Computational Thinking has made a big impact both nationally and abroad.

One of its interdisciplinary units, the Centre for Epidemic Response and Innovation (CERI), has drawn global attention with its revolutionary work in genomic sequencing. CERI's efforts are a gamechanger in Africa's pursuit to lead global science in the surveillance and early detection of, and effective response to, the epidemics of the future. This work by Prof Tulio de Oliveira and his team was showcased as one of the top ten breakthrough technologies of 2022 in the prestigious *MIT Technology Review*.

Early in 2022, CERI also received a visit from President Cyril Ramaphosa and the internationally renowned philanthropist Dr Patrick Soon-Shong. Shortly thereafter, a high-powered delegation of the World Health Organisation led by director-general Tedros Ghebreyesus visited. Ghebreyesus commented on the formidable skills base and world-leading research capabilities of our researchers, which make CERI and the cutting-edge facilities at the Biomedical Research Institute on our medical campus the ideal hub for the development of vaccine therapies across the spectrum – from Covid to malaria and many other dreaded diseases that plague our continent.

School for Climate Studies

Likewise, the School for Climate Studies is barely a year old, but has already made an important impact on the global stage. Through its involvement in the global climate conference COP27 in Egypt late last year, the School engaged global youth climate ambassadors in organising a week of youth-led climate events – the so-called Climate X week. It also hosted the African Regional Forum on Climate Change, with 16 African nationalities represented. Moreover, the School represents SU in the Global Alliance of Universities on Climate, or GAUC. We are the only African university in GAUC. Other members include the University of California, Berkeley; Cambridge; Imperial College London; the London School of Economics and Political Science; Massachusetts Institute of Technology; the University of Tokyo, and China's Tsinghua University.

Nobel in Africa Symposia

The Nobel in Africa symposium series, held at STIAS in October 2022, showcased the knowledge production and research potential on our continent. Through this initiative, STIAS became the first institution outside Scandinavia to host a Nobel symposium series on behalf of the Nobel Foundation since the symposia were initiated in 1965. The African-oriented event also included an outreach element that saw participants deliver public lectures at universities and research institutes countrywide. This represented a hugely effective way of taking science to a wider audience.

Innovation and entrepreneurship

In 2022, SU had a renewed focus on innovation and entrepreneurship aimed at strengthening our positive impact on society. We embed an entrepreneurial mindset across our learning and teaching, research and social impact activities. At the same time, synergistic efforts with Innovus (our division for *technology transfer, entrepreneurial support and innovation*) and the LaunchLab (our business incubator) saw the University and its spin-off companies deliver 136 patent applications. This is not only more than any other university in the country, but also exceeds patent applications by any other national research institute or organisation.

International rankings

Notwithstanding differing views concerning rankings, they do remain a means to measure university success. The Times Higher Education World University Rankings (THE WUR) released in October 2022 put SU in a solid second spot in South Africa, affirming our standing among the 300 leading universities of the world.

We improved our position on the indicators for citations, research and teaching. The most significant improvement was in the citation score, which increased by 4,4%. Judging by THE WUR's own definition of the citations indicator, this shows that we are a key player in "spreading new knowledge and ideas" and making a significant contribution to "the sum of human knowledge".

The latest Times Higher Education World Reputation Rankings too placed SU second in South Africa. We now rank among the world's top 150 institutions in the fields of Clinical and Health Sciences, the top 200 in Law, the top 250 in Education, and the top 300 in Arts and Humanities. Overall, SU features among the best 300 universities in the world in five of the 11 subject categories assessed.

Graduations and qualifications conferred

In December 2022, we gladly returned to in-person undergraduate and postgraduate ceremonies for the first time since the outbreak of the pandemic. Eleven ceremonies were hosted at the Coetzenburg centre, where 5 583 qualifications were awarded. With the Coetzenburg centre undergoing renovations, our March 2023 graduation series were hosted in open-air format at the Coetzenburg athletics stadium. Here, 3 072 students crossed the stage, which brought the total number of graduates for 2022 to 8 655.

Black African graduates increased notably by 11,6% from 2021 to 2022, with a growth rate of 26,5% (from 480 to 607) for undergraduates, and 5,7% (from 1 214 to 1 283) for postgraduates.

Over half of the qualifications conferred were at the postgraduate level, and master's degrees accounted for the largest proportion (17,2%) of total qualifications. This bodes well for the creation of a consistent pipeline of doctoral enrolments in the future.

SAHRC report on 2021 'Afrikaans ban' in residences

On 15 March 2023, the South African Human Rights Commission (SAHRC) released a report stating that SU violated the human rights of Afrikaans-speaking students during the 2021 welcoming period.

Human dignity is non-negotiable at our institution and must be respected and upheld. We were disappointed when we heard about these incidents, and we note the SAHRC's recommendations on language at SU.

SU remains committed to advancing human rights, multilingualism and inclusiveness for all its students, staff and stakeholders as we continue to evolve and grow in compliance with our Language Policy. Yet I am on record as stating that our multilingual journey is not easy. Mistakes are inevitable, and we will learn from them as we build a progressive, multilingual and inclusive South African 21st-century

university. Within this context, the University started taking action when the first reports about the use of language in a particular residence came to light in 2021, as the SAHRC indeed acknowledged.

We are considering the SAHRC's findings, proposed remedial actions and recommendations in detail to establish our next steps to enhance the welcoming and inclusive nature of our institution and safeguard the rights and privileges of all our stakeholders.

Of course, the SAHRC report received wide media coverage. Consequently, at its meeting on 24 March 2023, Senate voted overwhelmingly in support of a motion of confidence in our pursuit of inclusivity and multilingualism at SU. The entire management team recused themselves from the discussion. In his support of the motion, Prof Mbulungeni Madiba, dean of the Faculty of Education, said that multilingualism at SU is a collective and collaborative effort, and an imperative that is strongly supported by all deans. He added that what the University had achieved with regard to multilingualism was unmatched by most universities in the country.

It is in this spirit of trust and inclusivity that we will also deal with the latest allegations of prohibitions on the use of Afrikaans at certain residences during this year's welcoming period. These are currently being investigated and will be dealt with in terms of the University's approved policies, principles and processes.

Addressing demand for residence spots among female students

Over the past decade, we have noted a consistent increase in first-year female student enrolments. This necessitates action to accommodate the concomitant increasing demand for residence spots for these students.

Current residence placement practices seem to favour male students:

- Male applicants have a 50% higher chance of being placed than a female applicant (2023). By final registration in 2023, the ratio of female first-years placed in residence compared to female applicants eligible for placement was 0,15, compared to 0,22 for males.
- One in seven female applicants received a spot in residence in 2023, while one in five male applicants received placement.
- Male applicants had to achieve 80% in Grade 11/12 to receive residence placement based on academic merit; yet the minimum for female applicants was set at 85%.

Against this backdrop, the University has started engagements with students and stakeholders to address the growing demand for residence spots for female students. A working group led by Dr Choice Makhetha, our senior director of Student Affairs, has been set up to formulate ideas for the phased implementation of a proposed 60:40 residence placement policy in favour of female applicants.

Numerous factors have to be considered, including financial implications, infrastructure requirements and student communities. It is envisaged that the process will be gradually phased in as from 2024.

We currently have 14 mixed residences at SU. On Stellenbosch campus, we have Goldfields, Metanoia and Huis Neethling (Maties Sport) at the undergraduate level, and Lobelia, Concordia, Huis MacDonald, Huis de Villiers, Russel Botman House and The Village for seniors. Our mixed residences on Tygerberg campus are Hippokrates, Meerhoff, eNkanyini, Nkosi Johnson House and Ubuntu House.

Institutional Planning Forum 2023

We started the year with our customary Institutional Planning Forum (IPF), which was attended by more than 70 of our senior colleagues from across our institution, including faculties and professional and administrative support (PASS) divisions. The IPF was preceded by the Rectorate Indaba. These planning events are critical moments in our annual planning cycle, steered by the Deputy Vice-Chancellor: Strategy, Global and Corporate Affairs.

As a team, we needed to take stock of the purpose, role and place of our university in the context of the challenges of higher education in South Africa, but also projected against the larger backdrop of higher education trends and imperatives globally.

A summary of my remarks at the start of the discussions, and of related events since then, follows below:

Transformation

Transformation of our university is an institutional priority, and the Rectorate has added this important matter to our list of institutional gamechangers going forward. We are all in agreement that transformation is a nuanced and multifaceted process.

However, with reference to the unacceptable and unsettling incidents on our campus last year and the subsequent recommendations of the Khampepe commission, we have embarked on a wide-ranging series of engagements with the internal stakeholders of our university. The aim is to address the matters raised in the commission's report in an inclusive and empowering manner.

The Rectorate has engaged with our institutional transformation structures, with Senate, the Institutional Forum, deans, the directors of schools, senior and executive directors, faculty managers, student leadership structures as well as staff members on the proposed implementation process that was discussed with Council on Sunday 5 March. Senate also received a progress report at its meeting on Friday 24 March.

The envisaged process of the Committee in Response to the Commission's Recommendations (CIRCoRe), which I am heading up, has been endorsed by all stakeholders. CIRCoRe and its workstreams hold the promise of delivering on our transformation quest to be a place of belonging for all our students and staff. Prof Aslam Fataar, whom I have appointed as implementation lead, is hard at work to set up the approved structures.

Taking stock of our role in society

Over the past few years, we have been purposefully working on shaping and sharpening the dimensions of our university that will bolster our excellence as we head into the future. Members of Council will

recall the discussions and action plans aimed at enhancing an entrepreneurial orientation in everything we do in order to have an innovative approach to our core functions of learning and teaching, research, and societal impact. We also want to grow our academic and research excellence exponentially (via our approved research areas) by responding to some of the formidable challenges of our time (climate change, HIV/Aids, etc.).

And in 2020, just as we turned our focus to being a nimble and agile institution, Covid-19 came along and forced us to adapt to circumstances and challenges that no one could ever have foreseen. As a team, we showed that we had the grit, agility and resilience not only to survive under adverse circumstances, but to thrive. We have delivered handsomely on key objectives of our Strategic Framework 2019–2024 as we work towards realising our vision of becoming Africa’s leading research-intensive university.

Yet, while we have shown our ability to rapidly adapt, there has been nothing faddish, haphazard or random about the progression of our strategy implementation over the past few years. Every single step has been intentional and purposeful. Alignment, integration and coherent progression are the hallmarks of our strategic journey.

The current juncture and looking forward

On the cusp of 2024 – which will mark the end of our current planning cycle – we find ourselves in a world characterised by volatility, uncertainty, complexity and ambiguity. Our challenge is to steer our institution to even greater heights with vision and clarity of purpose.

I think I can safely say that everyone knows what SU *is good at*. Our academic and research excellence is indisputable, and our governance is sound. On those, we will not compromise. But what is required now is to utilise our strengths to focus on what SU *is good for* in terms of our contribution to our immediate and broader society – locally, regionally and globally.

This is in line with the trend elsewhere in the world. Globally, leading universities have intensified their focus on their benefit to society and their engagement with the communities they serve, particularly in relation to our radically changed reality post-Covid.

We aim to meet this need through, among others, a concerted programme of academic renewal, a relentless focus on the interdisciplinarity and transdisciplinarity of our research, and developing new modes and platforms of delivery for our sought-after learning and teaching content to extend our reach and access to a broader student community. These imperatives form part of our list of gamechangers for SU.

This societal focus is not new or strange to us. Putting society’s needs at the heart of our enterprise is perfectly aligned with our goal to be a thriving, vibrant, transformed and systemically sustainable university with high social impact. And therefore, our senior leadership present at the IPF fully supported this strategic approach to guide us into the next phase of strategic planning and maintain the upward trajectory of our journey en route to 2040.

As we move forward together, coordinated and integrated planning and execution in our respective faculties, divisions, departments and entities will be crucial in delivering on our commitment to be of service to society.

Internationalisation at SU

SU International celebrates 30th anniversary at SIAN meeting

The 19th Stellenbosch International Academic Network (SIAN) meeting took place in March. This coincided with the 30th anniversary of SU International. Delegates from 37 countries attended the week-long conference. As part of the celebrations, SU International announced that the UNESCO Chair in Intercultural Competences had been allocated to SU, and also launched the first sustainable development annual report by the Centre for Collaboration in Africa.

Belgian collaboration

On the occasion of the state visit of the king and queen of Belgium to South Africa, SU also hosted a networking lunch attended by representatives from Belgian and Western Cape universities. At the event, SU signed cooperation agreements with KU Leuven, Vrije Universiteit Brussel, the University of Antwerp, Université Catholique de Louvain and Ghent University. The institutions will collaborate on student and staff mobility, strengthening research networks, and general affairs. This shows how, as an international higher education community, we can move forward together.

SASUF research week

In another international collaboration, the South Africa Sweden University Forum (SASUF) research and innovation week took place in the last week of March. The week brings together researchers, teachers, students and management representatives from all 40 SASUF partner universities. The activities consisted of satellite events taking place across South Africa, as well as the Sustainability Forum hosted by the University of the Western Cape. We hosted many of the satellite events on our campus.

Progress with inbound and outbound internationalisation

In 2022, 308 SU students participated in outbound student mobility opportunities, and this year to date, the University has already welcomed a record number of 650 international semester students from across the globe. Apart from the Study Abroad programmes, SU also confers joint degrees with partner universities worldwide. We have awarded more than 40 such PhD degrees with 28 institutions and over 60 master's degrees with 11 institutions.

As is customary, a member of the Rectorate will again be afforded the opportunity to submit an annual report to Council. This time, it is the turn of the **DVC: Research, Innovation and Postgraduate Studies, Prof Sibusiso Moyo**, to report on activities in her responsibility centre. For this reason, I will share only selected highlights from her portfolio – do consult her separate report for more details.

This report covers the period 11 November 2022 to 3 March 2023, unless stated otherwise. My fellow members of management and I welcome this opportunity to engage with Council.

HIGHLIGHTS FROM THE RECTOR'S MANAGEMENT REPORT

In the following paragraphs, I provide highlights from my management report. For an in-depth look at contributions from the various responsibility centres, please turn to the addendum.

1. Growing the SU brand

We continued to implement our brand identity in the reporting period with a focus on brand visibility at institutional events and workshops.

- SU's [ceremonial emblem](#) and seal, which Council approved in June 2022, made their first appearance on our graduation documents (certificates and programme book) in December 2022 (*pictured below*). The emblem and seal are a visual and symbolic continuation of our corporate logo.

- Corporate Communication and Marketing (CCMD) hosted a series of **brand workshops** for SU's brand implementers in November 2022. The practical, solution-driven workshops ensure that our identity is applied uniformly and coherently across the University. The team also hosted a brand and media workshop for Maties Sport's brand ambassadors.
- The **renewal of our graduation attire** is an exciting community engagement project aimed at taking SU's new brand identity forward. The project kicked off in February 2023, and the first phase is being facilitated by award-winning surface designer Primrose Charmz.
- The CCMD Branding team facilitated a distinctive and vibrant **SU brand experience at the 2023 Welcoming** for newcomer first-years through the design and production of flags, banners, selfie-frames and even 'tattoos'.

2. Graduation and pledge ceremonies 2022

The RC of the Registrar, CCMD, Development and Alumni Relations, Facilities Management and other stakeholders arranged the **graduation series** that took place from 5 to 9 December 2022. We were thankful to be able to return to full face-to-face (in-person) celebrations for all ceremonies.

We conferred **5 587 qualifications**, awarded six honorary doctorates, and recognised 14 staff members with the prestigious [Chancellor's Award](#). The livestreamed ceremonies recorded **47 409 online views** on SU's YouTube streaming channel. The [graduation webpage](#) received **71 375 views** in the weeks leading up to the ceremonies. Moreover, the Institutional Secretariat and Publications (ISAP) Unit designed and

produced four graduation booklets. These were published in collaboration with CCMD to ensure compliance with SU branding protocols and accessibility and user-friendliness for graduands.

The **undergraduate pledge ceremonies** of the Faculty of Medicine and Health Sciences (FMHS) took place on 5 December on Tygerberg campus. Altogether 442 undergraduates and BScHons in Biokinetics graduands made an interdisciplinary pledge in public to uphold the values of the Faculty and the health professions they were joining. We also had the first cohort of B of Nursing graduands participating.

Over **1 000 guests attended** the ceremonies at Tygerberg, and **1 477 people watched** via livestreaming. Tygerberg's Centre for Student Administration enjoyed excellent support from the Dean's Division and FMHS Marketing and Communications to ensure the success of the events.

3. SU Teaching Awards 2022

The institutional selection panel for the SU Teaching Awards 2022 met on 16 November. Seven nominees were interviewed, and the following three were subsequently approved (*pictured below from left to right*):

- **Prof Faadiel Essop** from the Centre for Cardiometabolic Research in Africa (CARMA) in the Division of Medical Physiology (category "Leaderly teaching scholar")
- **Prof Herman Kamper** from Electrical and Electronic Engineering (category "Scholarly teacher")
- **Ms Mareli Rossouw** from the School of Accountancy (category "Scholarly teacher")

They received their awards at a teaching and learning celebration on 2 March 2023.

4. Two new SU teaching fellows

Two new teaching fellows were selected for the 2023 cycle. They are **Prof Dennis Francis** (Sociology and Social Anthropology) and **Prof Nicola Plastow** (Occupational Therapy). Both fellows' research projects will address social justice in teaching and learning in higher education.

Prof Francis (*left*) will focus on the troubling of compulsory heterosexuality in schooling in South Africa in the module Sociology 144, and the framework this module offers students to question social inequality more broadly.

Prof Plastow (*right*) will explore the promotion of social participation and occupational justice for older people

in Bishop Lavis through service learning. Her research involves developing a new community engagement project at SU.

5. Another two research chairs

SU has been awarded two new research chairs in the energy field. A tier-1 Sasol/DSI-NRF chair in *Green Hydrogen Integration and Transition* was awarded to Prof Prathieka Naidoo from Process Engineering, and a tier-2 chair in *Power Systems Simulation* to Prof Bernard Bekker from the Centre for Renewable and Sustainable Energy Studies. A potential third chair, in computational astronomy, is still being considered.

6. Student recruitment and strategic enrolment management

To ensure a diverse and inclusive student body at SU, undergraduate student recruitment activities focus on reaching specific CBIA enrolment goals. Apart from targeted application generation throughout 2022, the Division of Student Recruitment, faculties and the RC of the Registrar also undertook **two conversion campaigns** in November 2022 and January 2023 respectively. The aim was to convert as many conditional offers as possible into actual enrolments.

It was well worth the effort, as we managed to exceed our overall CBIA newcomer first-year target of 43,1%, having reached 44,3% (*see table below*). However, while most faculties reached or exceeded their diversity targets, diversity enrolments in specific faculties and targeted academic programmes need to be improved.

2023 CBIA enrolments by faculty, against targets (as at 13 February 2023)

Faculty	Enrolments	Target	Difference	% difference
AgriSciences	133	160	-27	-16,9%
Arts and Social Sciences	678	550	128	23,3%
Economic and Management Sciences	514	506	8	1,6%
Education	365	110	255	231,8%
Engineering	314	316	-2	-0,6%
Law	71	66	5	7,6%
Medicine and Health Sciences	236	271	-35	-12,9%
Military Science	46	90	-44	-48,9%
Science	242	293	-51	-17,4%
Theology	101	56	45	80,4%
Total	2 700	2 418	282	11,7%

Recruitment activities with a view to the **2024 intake** commenced once schools reopened in mid-January 2023. Since then, the recruitment team has already participated in more than 42 career exhibitions in the southern and northern suburbs of Cape Town, the Cape Winelands and the Southern Cape. These exhibitions formed part of the annual calendar of expos coordinated by the Cape Career Exhibition Association (CCEA). A considerable number of school visits have also been conducted in the Western Cape, Limpopo, Gauteng, KwaZulu-Natal and the Eastern Cape. Visits to the rest of the provinces will follow in the months ahead.

A highlight on the student recruitment calendar was the campus visit of 50 hand-picked high-school leaders from the Western, Northern and Eastern Cape who were attending the annual Die Burger youth leaders conference in December 2022. They indicated a keen interest in SU.

7. Snapshot of 2023 newcomer first-year enrolments and registration

The diagrams below reflect 2023 and 2022 enrolments based on official figures as at the end of the respective registration periods.

Population group distribution of new enrolments, 2022-2023

NOTE: Since 2022, international students no longer have to disclose their population group upon application, which explains the relatively high number of students who “withheld” this data in both years.

From 2022 to 2023:

- **black African** enrolments **increased by 16,5%** from 1 189 to 1 385;
- **coloured** enrolments **increased by 0,7%** from 1 070 to 1 078;
- **Indian** enrolments **increased by 18,5%** from 184 to 218;
- **white** enrolments **increased by 1,7%** from 3 139 to 3 191; and
- **Asian** enrolments **increased by 53,3%** from 15 to 23.

As the graph below shows, at **44,3%**, **total CBIA enrolments** are the highest since 2019.

CBIA enrolments as percentage of total, 2019-2023

8. Postdoctoral fellows

We ended 2022 with 348 postdoctoral fellows, having dropped from 371 as some fellows reached the end of their dedicated research projects in the course of the year. Postdoctoral fellowships are normally awarded for one to five years.

Our postdoctoral research fellows are distributed across all faculties, although the majority are in Science, Medicine and Health Sciences, Arts and Social Sciences, AgriSciences, and Engineering. They play an increasingly important part in furthering our strategic theme of conducting research for impact, and therefore, we aim to grow our number of fellows to 600 by 2026.

9. SUNFin progress towards go-live in June 2023

The focus of the SUNFin project team remains on:

- testing and signing off the Oracle Cloud Financial (OCF) solution;
- finalising the preparation of training material;
- conducting end-user training;
- building additional required reports;
- preparing for the migration to OCF in terms of technology and data clean-up;
- deploying the solution by the agreed target date of June 2023; and
- providing initial support after going live, and handing over to operations.

Testing quality has been excellent. Moreover, the tests are a good way to get core end-users to experience, understand and become more enthusiastic about the new system and how it will support their work.

While we have finished 50% of test cases, this consumed over 50% of the time allowed for testing, which does pose a risk that the team may need additional time to complete testing, with a potential knock-on effect on the go-live date. Yet the team is working hard to minimise the impact of the slower-than-anticipated progress through the speedy resolution of issues as they arise, considering the implications of additional required time, and exploring whether subsequent activities in the plan may be overlapped or compressed.

We are closely monitoring progress. Once sufficient information is available on the user acceptance training plan and its impact on the SUNFin timeline, a special steering committee meeting may be scheduled to decide whether an extension of the go-live date should be recommended to the Rectorate.

10. Progress with SUNStudent

At the November 2022 steering committee meeting, it was agreed to postpone the go-live of the SUNStudent capabilities of Registrations, Student Fees and Services, Residence Management as well as Financial Aid from December 2022 to December 2023. This was to allow for system and configuration readiness, user readiness, and operational and institutional considerations.

The project team has since replanned their activities to ensure that all these modules will be ready for switch-on in accordance with the student lifecycle starting from December 2023. Several additional external and internal resources will be involved to achieve this ambitious target.

These delays now mean that SUNFin will go live before SUNStudent, requiring alternative integration between the old, integrated student information/finance system and SUNFin. Particular focuses in this regard are to:

- avoid ongoing access to financials from the old student information system once SUNFin has gone live; and
- deliver the required integrations from the old student information system in time to allow for proper testing within the SUNFin timeline.

In other SUNStudent news, with effect from April 2023, the Stellenbosch Business School's applications and admissions will also migrate to our new student information system. The Applications and Admissions module on SUNStudent has been working well for the rest of our institution for the past two years already.

11. Welcoming 2023

With preparations having started in August 2022 already, Welcoming 2023 included some additional changes to ensure a stronger focus on creating a human rights culture grounded in social justice, and to see to it that students got enough rest, considering both the faculty and general welcoming programmes they participated in. International students were included in the programme as an opportunity to meet locals and to familiarise themselves with the University's ethos.

Highlights of the welcoming programme, which is coordinated by our Centre for Student Communities and supported by the broader Division of Student Affairs (DSAf), included the following:

- In our **online onboarding programme**, which the Centre for Student Leadership, Experiential Education and Citizenship (CSLEEC) hosted from 14 December 2022 to 16 January 2023, five live webinars were offered to more than 3 000 prospective students, compared to 1 717 students the previous year. This increase in participation is largely the result of a student-centred mailer campaign created by DSAf's communications coordinator.

- At the **Dream Walk and Dream Fair**, newcomer first-years marked the official start of their academic careers at our institution and, along with parents and staff, could take part in a host of fun activities that ensured engagement. Thanks to expert coordination by our staff, newcomer Military Science students from SU's Saldanha campus and members of the Military Academy Student Council (MASC) arrived on our Stellenbosch campus earlier this year for a welcoming lunch with DSAf staff, and for their own Dream Walk in Victoria Street (*pictured below*).

Military Science newcomers and MASC members participate in the University's Dream Walk for the first time. This was preceded by a welcoming lunch with DSAf senior director Dr Choice Makhetha (in red) and other SU staff and student leaders.

Previously, our Saldanha students experienced a sense of isolation when attending the Rector's welcoming, as they felt excluded from the SU student community and were never able to participate in the Dream Walk due to their schedule. The students appreciated this year's arrangements, and discussions were held to invite the MASC leaders back for more engagement to ensure that our Military Science students also benefit from what is offered at Stellenbosch campus and by DSAf.

Tygerberg campus again hosted their own welcoming programme that catered to the needs of Medicine and Health Sciences students and their unique schedule.

- DSAf, the alumni platform Maties Connect and the Western Cape Department of Sport, Arts and Culture partnered to end the welcoming programme with **Vensters and the first Maties Connect Musical Festival (MC Fest)** (*pictured below*). The overall aim of the events was to promote social cohesion through diversity. For more, go to <http://www.sun.ac.za/english/Lists/news/DispForm.aspx?ID=9734>.

- Throughout the welcoming period, **events were monitored** to ensure that newcomers felt welcome at the institution and that practices that could violate their humanity and dignity were immediately addressed. Monitors also kept an eye on alcohol use, addressed food security challenges, and attended to emergency accommodation needs. The Monitoring Advisory Committee met every second day to assess activities and events, and where necessary, student leaders, residence heads and other partners were involved.

12. Addressing the Khampepe findings and recommendations

The Rectorate formulated a draft document that spells out the process that will be followed to address the insights, findings and recommendations of the Khampepe report. Discussions on the document subsequently commenced with various entities across campus. The plan is to constitute the central committee and workstreams proposed in the document by the end of March 2023.

13. Race and Transformation in Higher Education conference

SU, the University of Bath (United Kingdom) and Nelson Mandela University (Gqeberha) co-hosted the [Race and Transformation in Higher Education conference](#) at the Stellenbosch Institute for Advanced Study from 15 to 17 November 2022.

The event took place within SU's local context of transforming the University in line with human rights, equity and redress, as well as against the broader regional, national and global backdrop of transformation in higher education. The [thought-provoking and engaging conference](#) also featured site visits to local communities, where community members and SU partners could engage with conference delegates and share their lived experiences.

14. Research for impact

Since the first major revision of the Department of Higher Education and Training's funding framework in 2005, we have maintained a steady **increase in our total annual publication output** for subsidy purposes (journal articles, books, book chapters, and published conference proceedings). According to the latest report, which was released towards the end of 2022, our journal publications increased from 789,4 units in 2005 to 1 774,54 in 2021, representing a 4,89% annual growth rate. Overall publication

units grew by 6,04% from 826,1 in 2005 to 2 240,49 in 2021. Nationally, we rank fourth in terms of publications, which we hope to improve through increasing our postdoctoral footprint.

To further establish SU's research impact, the DVC: Research, Innovation and Postgraduate Studies, Prof Sibusiso Moyo, recently requested Prof Johann Mouton, director of the Centre for Research on Evaluation, Science and Technology (CREST), to conduct **a comprehensive bibliometric analysis of our research performance** from 2005 to 2021. The resultant [four-chapter report](#) makes for interesting reading. Chapter 1 presents the analyses and findings on SU's research publications over the past 17 years, while chapter 2 discusses the trends in terms of master's and doctoral graduate production. Chapters 3 and 4 view research article output by faculty and according to the Web of Science database respectively.

CONCLUSION

All indications are that we face another challenging year. Yet all our strategic and operational building blocks are in place. Therefore, we are well positioned to advance on our chosen journey to become a thriving, vibrant, transformed and systemically sustainable university, with an embedded culture of innovation, entrepreneurship, and agile responsiveness to the needs of society and the communities we serve.

CONTRIBUTORS

The Rector's Management Report was compiled by the Executive Communication support team in collaboration with Rector and Vice-Chancellor Prof Wim de Villiers, Mohamed Shaikh, executive manager in the Rectorate, as well as Melissa Douman, manager of Executive Communication. Editing and translation services were coordinated by the SU Language Centre and provided by their collaborator Hendrien Swanepoel. We also acknowledge the following contributors, listed by SU responsibility centre:

Learning and Teaching: Prof Deresh Ramjugernath, Dr Choice Makhetha, Yeki Mosomothane, Lynne Rippenaar-Moses, Minette Sieberhagen, Elmien Sinclair, Ramone Comalie, Eduard Beekman, Julie Nxadi, Dr Antoinette van der Merwe, Dr Karin Cattell-Holden, Dr Jean Farmer, Claudia Swart-Jansen van Vuuren, Dr Nicoline Herman, Dr Anthea Jacobs, Charmaine van der Merwe, Sim Ntwasa, Dr Jan Petrus Bosman, Dr Sonja Strydom, Zainab Suliman, Morris Samuels, Dr Arné Binneman, Selene Delport, Faika Haroun, Susan Lotz, Michelle Pieters, Dr Rose Richards, Dr Kim Wallmach, André Müller, Miné de Klerk, Michelle Munro, Qaqamba Mdaka

Operations and Finance: Prof Stan du Plessis, Manie Lombard and his Finance team, Nicolette van den Eijkel and her Facilities Management team, Denisha Jairam-Owthar and her Information Technology team, Ilhaam Groenewald and her Maties Sport team, and Anita Nel and her Innovus team

Registrar: Dr Ronel Retief, Gerhard Lipp, Dr Celeste Nel, Bruce Banda, Ashmind Daniels, Farah Fredericks, Anne Havemann-Serfontein, Freek Truter, Beire Kramer, Salot Hanekom, Penny van der Bank, Charmaine Wing, Che Bermosky, Felecia van Rooi, Robert Young, Jonathan-Dale Blanckenberg

Research, Innovation and Postgraduate Studies: Prof Sibusiso Moyo, Prof Johann Mouton, Maryke Hunter-Hüsselmann

Social Impact, Transformation and Personnel: Prof Nico Koopman, Bongani Mgijima, Ulrich Wolff, Ricky Brecht, Johannes Adams, Natasha Coltman, Elvandr  Galant, Awethu Fatyela, Dr Claire Kelly, Katlego Letlonkane, Shant  Neff, Dr Zethu Mkhize, Jubelian Korkie, Chevaan Peters, Mawethu Nyakatya, Renee Hector-Kannemeyer, Michelle Pietersen, Ernestine Meyer-Adams, Saartjie Botha, Candice Andries, Dr Craig Thompson, Dr Lynne Julie, Dr Haidee Williams, Dr Jo-Anne Kirby, Sr Anneke van Heerden, Susan Crumpton, Dr Pierre Viviers, Lieze-Carli Roux, Carmen Paynter, Shibu Mamabolo, Ebrahiem Abrahams, Venessa Williams, Joanne Williams

Strategy, Global and Corporate Affairs: Prof Hester Klopper, Dr Wayne Muller, Christelle Feyt, Tertia Kruger, Naud  van der Merwe, Amira Brown, Marguerite Cloete, Marick Hornsveld, Candes Keating, Michelle Swart, Martin Viljoen, Dr Alec Basson, Magdel Pretorius, Leon Eygelaar, Jerall Toi, Dr Barbara Pool, Lidia du Plessis, Dr Nico Elema, Prof Sarah Howie, Sarah van der Westhuizen
