Faculty of Economic and Management Sciences

Dean:
Prof S du Plessis
BCom, BComHons (Stell), MPhil (Cambridge), PhD (Stell)

Calendar 2016
Part 10
Calendar

Amendments, liability and accuracy

- In this publication any expression signifying one of the genders includes the other gender equally, unless inconsistent with the context.
- The University reserves the right to amend the Calendar parts at any time.
- The Council and Senate of the University accept no liability for any inaccuracies there may be in the Calendar parts.
- Every reasonable care has been taken, however, to ensure that the relevant information to hand as at the time of going to press is given fully and accurately in the Calendar parts.

Where do I find the printed versions of the Calendar parts?

- The printed versions of the Calendar parts can be obtained at the Help Desk in the Admin A Building.
- Afrikaans (Part 1 to 12) and English copies of the individual parts are available.

Where do I find the electronic versions of the Calendar parts?

- The electronic versions of the Calendar parts can be obtained at www.sun.ac.za/Calendar.

The division of the Calendar

- The Calendar is divided into 13 parts.
- Part 1, 2 and 3 of the Calendar contains general information applicable to all students. Students are urged to take note especially of the content of the provisions in Part 1 of the Calendar applicable to them.
- Part 4 to 13 of the Calendar are the faculty Calendar parts.

How to use this Calendar Part

Readers of the Calendar Part
The information in this Calendar Part is intended for the following groups of readers:

- **Prospective** undergraduate and postgraduate students who are looking for information about the programmes of study offered by the Faculty
- **Registered** undergraduate and postgraduate students of Stellenbosch University who are looking for more information about the curriculums (combinations of subjects and modules) of specific programmes of study, as well as for other information related to their studies
- **Teaching, administrative and management staff of Stellenbosch University** who are required to keep abreast of the information contained herein to be able to fulfil their various functions.

Any person who are not in one of the abovementioned groups, but who wish to use this Calendar Part as a source of information for any reason, is of course also more than welcome to do so.

How to locate information
Guidelines for finding information in the different chapters in this Calendar Part are set out below. Consult the table of contents for the page numbers of the chapters referred to below.

**Prospective undergraduate students**
- **Undergraduate Programmes section**
  - Information on undergraduate programmes of study that are offered;
  - The minimum admission requirements for the different programmes of study; and
  - The subjects and modules that must be taken for the different programmes of study each year, with choices where applicable.
- **Subjects, Modules and Module Contents section**
  - An explanation of subjects as distinct from modules;
  - Definitions of the language specifications of modules;
  - Definitions of prerequisite pass, prerequisite and corequisite modules; and
  - An explanation of the different digits used for the numbering of modules in the Undergraduate Programmes section.
- **General Information section**
  - Information about the Language Policy of the University and the Faculty;
  - Information about the process of enrolment management, which entails selection for admission to programmes of study; and
  - Information about communication with the University, which includes an explanation of the concept “student number” and indicates applicable options for enquiries along with their contact details.
- **Index**
  - An index of undergraduate subjects that can be taken in programmes of study of the Faculty (as these subjects appear in the Subjects, Modules and Module Contents section), appears in the back of this Calendar Part.

**Prospective postgraduate students**

- **Postgraduate Programmes section**
  - Information on postgraduate programmes of study that are offered;
  - The minimum admission requirements for the different programmes of study;
  - Information about specific closing dates for applications, and other relevant information, for example selection; and
  - The subjects and modules that must be taken for the different programmes of study each year, with choices where applicable.

- **Subjects, Modules and Module Contents section**
  - An explanation of subjects as distinct from modules; and
  - An explanation of the different digits used for the numbering of modules in the Postgraduate Programmes section.

- **General Information section**
  - Information about the Language Policy of the University and the Faculty; and
  - Information about communication with the University, which includes an explanation of the concept “student number” and indicates applicable options for enquiries along with their contact details.

**Registered undergraduate students**

- **Undergraduate Programmes section**
  - Information on undergraduate programmes of study that are offered; and
  - The subjects and modules that must be taken for the different programmes of study each year, with choices where applicable.

- **Subjects, Modules and Module Contents section**
  - An explanation of subjects as distinct from modules;
  - An explanation of the different digits used for the numbering of modules in the Undergraduate Programmes section;
  - The abbreviations and definitions used for the teaching loads of individual modules;
  - An indication at each module of what its teaching load is;
  - Definitions of the language specifications of modules, as well as an indication at each module of what its language specification is;
  - The definitions of prerequisite pass, prerequisite and corequisite modules, as well as an indication at each module of which of the requisites apply, if any; and
  - The way in which individual modules are assessed, especially where a module is subject to continuous or flexible assessment.
• General Information section
  o The Faculty’s policy on the granting of Dean’s Concession Examinations to final-year students;
  o Information about the Language Policy of the University and the Faculty; and
  o Information about communication with the University, as well as applicable options for enquiries along with their contact details.

• Index
  o An index of undergraduate subjects that can be taken in programmes of study of the Faculty (as these subjects appears in the Subjects, Modules and Module Contents section), appears in the back of this Calendar Part.

**Registered postgraduate students**

• Postgraduate Programmes section
  o Information on postgraduate programmes of study that are offered; and
  o The subjects and modules that must be taken for the different programmes of study each year, with choices where applicable.

**Teaching, administrative and management staff**

Most of the information in this Calendar Part may be of value in the execution of your various duties. The table of contents is the best place to begin looking for information, but frequent use of the book will naturally lead to familiarity with all the information in the book and with where it is located.
General Information

1. Introduction
Established in 1925, the Faculty of Economic and Management Sciences (EMS) has grown from a mere 15 students to more than 7 000 today, making it the largest of the 10 faculties at Stellenbosch University. The Faculty fosters the creation of prominent business leaders and entrepreneurs by producing quality graduates well equipped to serve the business community.

Teaching and research in the Faculty’s five academic departments and three schools are augmented by five research centres and an institute. The Faculty hosts the following departments and schools: Accountancy, Business Management, Economics, Industrial Psychology, Logistics, Public Leadership, Statistics and Actuarial Science, as well as the Business School (USB).

2. Language at the University
Stellenbosch University (SU) uses Afrikaans and English as languages of instruction at undergraduate level in its endeavour to promote multilingualism. The University is committed to safeguarding and developing Afrikaans further as a well-established academic language, taking into consideration this endeavour to promote multilingualism. SU also recognises English as an international academic language and a medium through which most South Africans can communicate with each other. In addition, the University provides for the development of specialist terminology and communication skills in isiXhosa, and the teaching of isiXhosa in some academic programmes for students who will need it in their careers.

Many of our modules are already presented in Afrikaans and English through parallel medium teaching and simultaneous interpretation. However, it is not possible to present the lectures of all modules fully in Afrikaans and English. The medium of teaching is therefore indicated in the relevant faculty’s calendar part. More information concerning language at the University is available on the website www.sun.ac.za/language. Support for the acquisition of academic language proficiency in Afrikaans and English is provided.

**Parallel medium:** A class is divided into separate Afrikaans and English streams. Students provide their preferred language of teaching at registration.

**Interpreting:** Simultaneous interpretation into Afrikaans or English, depending on the lecturing language, can take place during class teaching.

**Bilingual:** A combination of teaching in Afrikaans (approximately 50%) and English (approximately 50%) in the same class.
## 3. The Faculty's language plan

<table>
<thead>
<tr>
<th>Programme</th>
<th>Language of tuition</th>
</tr>
</thead>

</table>

**Please note:**

- Language options of modules may change from time to time, with due allowance for registered students’ language of choice and the availability of staff.
- Information about the language options of modules is available in the Subjects, Modules and Module Contents section.
4. How to communicate with the University

4.1 Use of student number

- In dealing with new formal applications for admission, the University assigns a student number to each applicant. This student number serves as the unique identification of the person concerned and has the purpose of making future communication easier.
- Once you have been informed of your student number you must please quote it in all future correspondence with the University.

4.2 Send correspondence to the following addresses

- Correspondence on academic matters – i.e. study-related matters, bursaries, loans, etc. – should be directed to:
  The Registrar
  Stellenbosch University
  Private Bag X1
  MATIELAND
  7602

- Correspondence on matters relating to finance and services, including services at University residences, should be directed to:
  The Chief Operating Officer
  Stellenbosch University
  Private Bag X1
  MATIELAND
  7602

5. How to communicate with the Faculty

Please note:

Only the minimum required number of credits is given above. The actual number of credits required for degree purposes will be determined by the particular subject combination and the accompanying prerequisite, co-requisite and prerequisite pass module prescriptions.

8. Postgraduate diplomas

Postgraduate Diploma in Actuarial Science
Postgraduate Diploma in Business Management and Administration
Postgraduate Diploma in Dispute Settlement
Postgraduate Diploma in Environment Management
Postgraduate Diploma in Financial Planning
Postgraduate Diploma in Future Studies
Postgraduate Diploma in HIV/AIDS Management
Postgraduate Diploma in Leadership
Postgraduate Diploma in Marketing
Postgraduate Diploma in Project Management
Postgraduate Diploma in Sustainable Development
9. Admission requirements for Baccalaureus degrees for 2016

**Faculty of Economic and Management Sciences**

**Programme-specific MINIMUM admission requirements for 2016 intake**

Please note: The admission requirements of some programmes for 2017 are under review.

- Afrikaans First Additional Language 6 (70%) or
- English First Additional Language 6 (70%)

This is a selection programme and only a limited number of students will be admitted.  
*Applications close 30 June.*

---

**EMS Admission Requirements currently under review for 2017**

* Minimum EMS language admission requirements:  
  Afrikaans Home Language 4 (50%) or English Home Language 4 (50%) or  
  Afrikaans First Additional Language 5 (60%) or English First Additional Language 5 (60%)
10. Major subject requirements
A major subject is a combination of third-year modules with a total credit value of at least 48, except in the case of Actuarial Science, Computer Science, Operations Research, Mathematical Statistics and Mathematics, where the minimum total credit value is 64. A student passes a major if all the modules of the third year and previous year/s (if any) of the subject have been passed.

11. Extra subjects
There are restrictions on the taking of extra subjects (for non-degree purposes). See University Examinations (General Provisions) in Part 1 (General) of the Calendar.

12. Undergraduate prerequisite, corequisite and prerequisite pass requirements
A prerequisite module (P) is a module in which students must have achieved a class mark of at least 40, or a final mark of at least 40 in the case of a module that is subject to continuous assessment, before they are allowed to take the module for which it is a prerequisite module.

A corequisite module (C) is a module which students must take in the same academic year as the module for which it is a corequisite, or in an earlier academic year.

A prerequisite pass module (PP) is a module which students must have passed before they are allowed to take the module(s) for which it is a prerequisite pass module.

No qualification will be awarded unless the candidate has passed all the relevant prerequisite and corequisite modules.

Please note:
- If (with or without permission) a student enrolls for a specific module in any academic year but does not meet the co-, pre- and/or pass prerequisite/s for the module, it does not necessarily follow that this will be allowed again in a next academic year.

- Students who want to apply for postgraduate studies should take note of the prerequisites modules as indicated in the table Module requirements for postgraduate programmes in the Postgraduate section later in this calendar.

The following prerequisite, corequisite and prerequisite pass module provisions, with regard to the relevant subjects with which they are listed, are applicable:

</table>
13. Examination occasions
Particulars with regard to university examinations (first and second occasion) are provided in Part 1 of the Calendar. Students must take note of the provisions relating to examinations and promotions as set out in Part 1. With regard to the allocation of the final mark, the Economic and Management Sciences Faculty Board has decided as follows: “Upon the allocation of a final mark (0–100) for a module that is not subject to continuous assessment, the class mark, based on assessment done during the term of such module, and the examination mark which shall represent the student’s performance in the final examination, must be taken into account, with the understanding that –

- if the examination mark is 50 or higher, the final mark shall not be less than 50;
- the class and examination mark be combined in the ratio 50 to 50 to determine the final mark in the case of a year module and in the case of an extended module and 40 to 60 for a semester module.”

14. Timetable clashes
- Before making a final choice of modules (subjects) for a specific academic year, every student should closely consult the relevant class, test and examination timetables. Should it then become apparent that two modules fall in the same time slot on a particular timetable, the University will not allow registration as a student in both of them for the same year/semester since they will be an inadmissible combination.
- Alternative arrangements to accommodate students who experience clashes on the examination timetable will only be considered in cases where no alternative assessment opportunity exists. In this case students may take the option to write the second examination opportunity for the modules concerned. Arrangements must be made with the Examination Office beforehand.
- Students are encouraged, from a timetable perspective, to choose all 24 credits from the same discipline group (for example Industrial Psychology 114, 152 and 162; Economics 214, 244; Financial Management 314, 332, 352 and 354). If students choose modules from different disciplines, the possibility of timetable clashes becomes more eminent. In such cases students should test the module combination on the SU timetable system prior to selecting a particular combination.

15. Dean’s Concession Examinations (DCEs)
- A Dean’s Concession Examination may only be granted with the approval of the Dean. No department, lecturer or any other official may give an undertaking to a student in this regard.
- A Dean’s Concession Examination may be granted in a module if it is the only module (of not more than 48 credits) that the student needs to graduate and only if a class mark of at least 30% was obtained in the relevant module.
• All DCEs will be held during a single examination sitting on the last Friday before the commencement of lectures in February and no further examination papers will be set for this purpose.

• Students who, according to the second paragraph above, qualify for a DCE, must in good time, but not later than 12 January, report to the Secretary of the Faculty of Economic and Management Sciences for possible admission to a DCE and to confirm the date, time and venue of the examination.

16. **Unisa registration for non-degree purposes**

Students have to be registered for the specific academic year at Stellenbosch University for degree purposes. Simultaneous registration of modules at another University in order to obtain the same qualification is not allowed. Registration at different universities for more than one qualification is not allowed either. Registration of third year modules for non-degree purposes at Unisa is only allowed if the module was failed at Stellenbosch University (achieved exam entry of at least 40, but module was failed.)

Final-year students may register for one single third-year (final-year) module at Unisa if the specific module and/or content has been approved and authorised by the relevant department within the faculty and is recognised by the University.

17. **Admission procedures, selection principles and the registration process**

17.1 **Terminology**

• **Provisional acceptance** – Applicants will receive provisional acceptance on their grade 11 results. This means that applicants have conditional acceptance to the Faculty. Final acceptance will depend on the grade 12 final exam results.

• **New student intake** – Students that registered at Stellenbosch University for the first time.

• **Enrolment** – Amount of students that registered within a given time period.

• **Enrolment targets** – The faculty has limited capacity and resources. It is for this reason that we set enrolment targets to ensure that all resources are used effectively.

• **Selection programmes** – Applicants are selected for a specific programme by the Faculty Selection Committee. Not all applicants that meet the minimum requirements will necessarily be selected.

• **Mainstream** – The Faculty’s normal three-year degrees.

• **Extended degree programme (EDP)** – The content of the three-year Management Sciences programme is spread out over four years with additional supporting modules included.
17.2 Selection and admission principles

- All applications close on 30 June. (This means that your application must be finalised and all documentation must be handed in.)
- No applications that reach the University after the closing date will be accepted.

17.2.1 Admissions are limited in accordance with enrolment targets

New students are selected to reach the overall enrolment target for programmes in the Faculty. However, there is an additional selection process for the following programmes: BAccLLB, BAcc, BCom (Financial Accounting), BCom (Management Accounting), BCom (Law), BCom (International Business) and BCom (Management Sciences) (EDP). The Faculty will consider first, second or third programme choices. Should you have more than one EMS programme on your list, the Faculty will consider all EMS choices in order of your preference. Selection will be based on your selection mark, your grade 11 marks (or grade 12 marks, if you have already matriculated) and availability of places in the programme. This rule excludes BAccLLB and BCom (Law). In order to meet the target number for new student intake, the principle of overbooking is applied to compensate for the fact that not all students who apply and are provisionally accepted will eventually enrol in the EMS Faculty.

Take note of the following:

- The Faculty of Law handles the selection of students for the BAccLLB and BCom Law programmes.
- Applicants who do not meet the minimum requirements for the mainstream programme (as a result of grade 11 average and Mathematics mark) will be considered for the BCom (Management Science) (EDP) programme. Candidates will be informed after 30 June (but before 30 September) whether they received provisional acceptance.
- For the BCom (Management Sciences) EDP, in addition to academic merit, preference will be given to candidates from disadvantaged school communities.

17.2.2 Selection is based on academic merit

Applicant selection is based on a student’s final grade 11 or NSC results. National Benchmark Test (NBT) results are not used in calculations concerning entry requirements or selection marks. Where necessary, they will be applied with regard to placement decisions in specific programmes such as the EDP programme. For this reason, the NBT test is compulsory for all EMS applicants. Prospective students first have to meet the minimum requirements of the programme they wish to enrol for. Admission requirements per programme can be found in the Undergraduate Programmes section. Their applications are then submitted to the Faculty for selection on academic merit by means of a selection mark (SM).
The SM is calculated as follows:

\[
(2 \times \text{Maths aggregate} + \text{aggregates of 5 other subjects, excluding Life Orientation})/7
\]

It is important to note that the exact mark aggregate is used. In instances where applicants present more than six school subjects, the five highest marks are used for the aggregate of the “other” subjects. Applicants from unfamiliar schools usually present three subjects, apart from Maths. The calculation suggested for them is:

\[
(2 \times \text{Maths aggregate} + \text{aggregates of 3 other subjects})/5
\]

The number of applicants afforded entry is limited according to the selection marks. Be advised that this could imply that an applicant can be refused entry because his SM is too low in relation to that of other applicants, even though he may satisfy the entry requirements of a programme.

17.3 The selection process

To receive immediate provisional acceptance, a student must meet all the following requirements:

- Complete application submitted by 30 June (no outstanding documents).
- A selection mark of at least 70.
- Meet the minimum requirement for the programme that they applied for.

These applicants are seen as top merit students and will not be subjected to further selection. They will receive immediate notification from the University that will confirm their provisional acceptance to the Faculty.

The following groups of applicants will NOT be granted immediate provisional acceptance. Their applications will be placed on a waiting list until the end of June, when the first phase of the selection process is due to commence.

- Prospective students with an SM of less than 70.
- Prospective students who apply for the programmes BAccLLB, BCom (Law) and BCom (Management Sciences) EDP.
- International students (students from non-South African schools).

All applicants on the waiting list will be notified of the outcome of the selection process by 30 September.

17.4. The registration process

During registration applicants who have been granted provisional acceptance to the Faculty may enrol for any programme within the Faculty, provided they meet the minimum requirements of the programme on the basis of their final matric marks. This ruling does not apply to BAccLLB and BCom (Law) programmes – for these, special permission has to be obtained from the Faculty of Law.
18. **Readmission requirements (HEMIS credits) for the Faculty: Minimum academic credit requirements**

You must pass at least 50% of your total credits to continue your studies in the second academic year.

**Example: BCom (Management Sciences)**

a) The first year of the BCom (Management Sciences) programme has a total of 120 credits. You need to pass at least 60 credits by the end of November exams to continue your studies at Stellenbosch University.

b) Pass 60/120 = 0.50 HEMIS credits.

c) Readmission is evaluated **annually**, therefore students have to pass 50% of their total credits for any given academic and/or historic enrolment by the end of the November exams.

d) Minimum credits for readmission to the BCom (Management Sciences) programme:
   - Second year: 128 credits: 64/128 = 0.50 OR 144 credits: 72/144 = 0.50
   - Third year: 120 credits: 60/120 = 0.50

e) The minimum readmission requirements also apply to the BCom (Management Sciences) Extended Degree Programme:
   - First year: 90 credits – pass 45 credits (45/90 = 0.50)
   - Second year: 104 credits – pass 52 credits (52/104 = 0.50)
   - Third year: 102 credits – pass 51 credits (51/102 = 0.50)
   - Fourth year: 120 credits – pass 60 credits (60/120 = 0.50)
Undergraduate Programmes

1. Broad programmes

1.1 BCom programmes

1.1.1 BCom General

This is the broadest programme offered by the Faculty. It is not intended to prepare the student for any one career but to provide broad formative training, with a deepening in one of the focal areas of the commerce sciences. The programme also offers students the opportunity to compile their programmes of study in such a way that it may include a field of study from the Faculty of Arts and Social Sciences up to the third year of study.

Take note of the stipulations regarding timetable clashes (see Clause 9 in the Calendar Part).

First year (120 credits)

1.2 BCom (Management Sciences)

The BCom (Management Sciences) programme offers students broad and open-ended choices of modules. It is also possible within this programme to focus on a specific area of study.

For these focal areas there are recommended combinations of modules.

See the different areas below for the recommended combinations of modules.

Please note: The recommended combinations are not prescriptive.

Also take note of the stipulation regarding timetable clashes (see Clause 9 in this Calendar Part).
### 1.2.1 BCom (Management Sciences) General

#### First year (120 credits)

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
<tr>
<td>Statistical Methods</td>
<td>176(18) or 186(18)</td>
</tr>
<tr>
<td>Theory of Interest</td>
<td>152(6)</td>
</tr>
</tbody>
</table>

**Elective modules**

*Plus 24 credits from:*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Communication</td>
<td>142(8)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>114(12), 152(6), 162(6)</td>
</tr>
<tr>
<td>Language and thinking skills for EMS</td>
<td>114(12)</td>
</tr>
<tr>
<td>Introduction to Transport and Logistics Systems</td>
<td>144(12)</td>
</tr>
</tbody>
</table>

#### Second year (128 or 132 credits)

**Elective modules**

At least 32 credits from the writing- and information-enriched modules (marked with an *) must be taken.

*Choose at least three major modules of at least 96 credits*

*Plus other choice modules to supplement the required credits of 128:*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>214(16), 244(16), 281(32)</td>
</tr>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Financial Management</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>288(32)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>214(16), 224(16) * 244(16) *</td>
</tr>
<tr>
<td>Information System Management</td>
<td>224(16), 262(8), 254(16)</td>
</tr>
<tr>
<td>Logistics Management</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Quantitative Management</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Transport Economics</td>
<td>214(16), 244(16)</td>
</tr>
</tbody>
</table>
Third year (At least 120 credits)

Compulsory modules
At least 24 credits from:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project Management</td>
<td>314(24)</td>
</tr>
<tr>
<td>Management of Corporate Social Responsibility</td>
<td>314(12) or</td>
</tr>
<tr>
<td>Business Ethics</td>
<td>314(12)</td>
</tr>
<tr>
<td>Strategic Management</td>
<td>344(12)</td>
</tr>
</tbody>
</table>

Elective modules
One complete major of at least 48 credits
Plus other elective modules to supplement the required minimum credits of 120:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Financial Management</td>
<td>314(12), 332(12), 352(12), 354(12)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>314(12), 324(12), 348(24)</td>
</tr>
<tr>
<td>Information System Management</td>
<td>314(18), 334(18), 354(18), 364(18)</td>
</tr>
<tr>
<td>Logistics Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
<tr>
<td>Quantitative Management</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Transport Economics</td>
<td>318(24), 348(24)</td>
</tr>
</tbody>
</table>

1.2.2  BCom (Management Sciences): Agricultural Economics focal area

Why Agricultural Economics?

Agricultural Economics is an interdisciplinary field in which the application of economic and management sciences to the production and marketing of agricultural and food products is studied. A BCom qualification in Agricultural Economics provides access to professional occupations in the growing domestic and international agricultural and food industries. Professional occupations include general management, financial management and logistical management in the entire food value chain, from agricultural input delivery, financial services, agribusinesses involved in production, distribution and marketing to food processing and production businesses.
First year (120 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
<tr>
<td>Statistics</td>
<td>186(18) or</td>
</tr>
<tr>
<td>Statistical Methods</td>
<td>176(18)</td>
</tr>
<tr>
<td>Theory of Interest</td>
<td>152(6)</td>
</tr>
</tbody>
</table>

Elective modules

Plus 24 credits from:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Communication</td>
<td>142(8)</td>
</tr>
<tr>
<td>Geo-Environmental Science</td>
<td>124(16), 154(16)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>114(12), 152(6), 162(6)</td>
</tr>
<tr>
<td>Language and thinking skills for EMS</td>
<td>114(12)</td>
</tr>
<tr>
<td>Philosophy</td>
<td>112(6), 122(6), 142(6), 152(6)</td>
</tr>
<tr>
<td>Political Science</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Public and development management</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Sociology</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Introduction to Transport and Logistics</td>
<td>144(12)</td>
</tr>
<tr>
<td>Systems</td>
<td></td>
</tr>
</tbody>
</table>

Second year (128 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agricultural Economics</td>
<td>234(16), 242(8), 262(8)</td>
</tr>
<tr>
<td>Financial Management</td>
<td>214(16)</td>
</tr>
<tr>
<td>Investment Management</td>
<td>254(16)</td>
</tr>
</tbody>
</table>

Elective modules

Plus two subjects of:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>288(32)</td>
</tr>
<tr>
<td>Logistics Management</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>214(16), 244(16)</td>
</tr>
</tbody>
</table>
Third year (at least 120 credits)

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agricultural Economics</td>
<td>314(16), 334(16), 354(16), 364(16)</td>
</tr>
<tr>
<td>Business Ethics</td>
<td>314(12) or</td>
</tr>
<tr>
<td>Management of Corporate Social Responsibility</td>
<td>314(12)</td>
</tr>
<tr>
<td>Strategic Management</td>
<td>344(12)</td>
</tr>
</tbody>
</table>

**Elective modules**

Plus modules from the following to make up the required number of at least 120 credits together with the above modules:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Financial Management</td>
<td>314(12), 332(12), 352(12), 354(12)</td>
</tr>
<tr>
<td>Logistics Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
</tbody>
</table>

**1.2.3 BCom (Management Sciences): Entrepreneurship and Innovation Management focal area**

This focal area assists students to obtain an orientation of possibly establishing their own business in future and not strive to achieve so-called work security in the form of a fixed appointment. The focal area consists of four modules that commences in the second year of study and include: Introduction to Entrepreneurship; Small Business Management; Creativity and Innovation Management; Strategic and Corporate Entrepreneurship. Career possibilities include: entrepreneur (start a business of your own, franchise, family business, or buy an existing business); management consultant; intrapreneur (take advantage of entrepreneurial opportunities within an existing business); innovation manager; new product manager.

First year (120 credits)

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
<tr>
<td>Statistical Methods</td>
<td>176(18) or</td>
</tr>
<tr>
<td>Statistics</td>
<td>186(18)</td>
</tr>
<tr>
<td>Theory of Interest</td>
<td>152(6)</td>
</tr>
</tbody>
</table>
**Elective modules**
*Plus 24 credits from:*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Communication</td>
<td>142(8)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>114(12), 152(6), 162(6)</td>
</tr>
<tr>
<td>Language and thinking skills for EMS</td>
<td>114(12)</td>
</tr>
<tr>
<td>Introduction to Transport and Logistics Systems</td>
<td>144(12)</td>
</tr>
</tbody>
</table>

**Second year (128 credits)**

**Compulsory modules**
*At least 32 credits from the writing and information-enriched modules (marked with an *) must be taken*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>214(16) * 244(16) *</td>
</tr>
</tbody>
</table>

**Elective modules**
*Plus 96 credits, of which at least 64 credits should be from two subjects:*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Financial Management</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>224(16) * 244(16) * [Industrial Psychology 244 is a co-requisite for Industrial Psychology 314, 324]</td>
</tr>
<tr>
<td>Logistics Management</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>214(16) * 244(16) *</td>
</tr>
</tbody>
</table>

**Third year (120 credits)**

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Ethics</td>
<td>314(12) or</td>
</tr>
<tr>
<td>Management of Corporate Social Responsibility</td>
<td>314(12)</td>
</tr>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Strategic Management</td>
<td>344(12)</td>
</tr>
</tbody>
</table>

**Elective modules**
*Plus 48 credits from:*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Financial Management</td>
<td>314(12), 332(12), 352(12), 354(12)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>314(12), 324(12)</td>
</tr>
<tr>
<td>Logistics Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
</tbody>
</table>
1.2.4 BCom (Management Sciences): Financial Management focal area

This focal area is geared to employment in the private sector where specialised knowledge of financial management and analysis is required. Financial Management focuses on the following: Financial Planning and Control; Financial Management Research; Capital Investments; Mergers and Acquisitions. Career possibilities include: financial director; financial advisor; financial analyst.

First year (120 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
<tr>
<td>Statistical Methods</td>
<td>176(18) or</td>
</tr>
<tr>
<td>Statistics</td>
<td>186(18)</td>
</tr>
<tr>
<td>Theory of Interest</td>
<td>152(6)</td>
</tr>
</tbody>
</table>

Elective modules

Plus at least 24 credits from:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Communication</td>
<td>142(8)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>114(12), 152(6), 162(6)</td>

<tr>
<td>Strategic Management</td>
<td>344(12)</td>
</tr>
</tbody>
</table>

Elective modules

Plus the following modules to make up the required number of at least 120 credits together with the above modules:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
</tbody>
</table>

1.2.5 BCom (Management Sciences): Human Resource Management focal area

To achieve the primary objectives of an organisation, a multitude of coordinated activities need to take place, which could be structured in a system of interrelated organisational functions. The human resource function represents one of these organisational functions. The human resource function serves the primary objective of the organisation through the procurement, development and maintenance of a competent work force, as well as the effective and efficient utilisation and management of such a work force. The importance of human resource management flows from the premise that organisational success is significantly dependent on the quality of the work force an organisation employs and the manner in which such a work force is utilised and managed. Labour constitutes a key factor of production due to the fact that organisations are managed, operated and kept going by people. Labour is the life-giving factor of production through which the other factors of production are mobilised and thus constitutes the factor which determines the effectiveness and efficiency with which the other factors of production are utilised.

The Department of Industrial Psychology would like to see its graduates addressing the current human resource management challenges and business-related people problems in such a way that they will earn the trust, respect and appreciation of line management. The programme BCom (Management Sciences) with Human Resource Management as focal area could, after approved practical work, lead to non-statutory registration with the South African Board for People Practices (SABPP) as human resource practitioner, and after further postgraduate studies, lead to non-statutory registration with the South African Board for People Practices (SABPP) as chartered human resource practitioner or master human resource practitioner.
First year (120 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>

<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Quantitative Management</td>
<td>214(16), 244(16)</td>
</tr>
</tbody>
</table>

Plus at least any other 16 credit modules from the list above to make up the required number of at least 128 credits.

Third year (at least 120 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Ethics</td>
<td>314(12) or</td>
</tr>
<tr>
<td>Management of Corporate Social</td>
<td>314(12)</td>
</tr>
<tr>
<td>Responsibility</td>
<td></td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>314(12), 324(12), 348(24)</td>
</tr>
<tr>
<td>Strategic Management</td>
<td>344(12) [Prerequisite for Advanced Strategic Management at honours level]</td>
</tr>
</tbody>
</table>
**Elective modules**

*Plus modules from the following to make up the required number of at least 120 credits together with the above modules:*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Financial Management</td>
<td>314(12), 332(12), 352(12), 354(12)</td>
</tr>
<tr>
<td>Logistics Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
</tbody>
</table>

**Note**

Financial Management 314, 332, 352, 354 are recommended as primary elective modules. Marketing Management 314, 324, 344, 354 or Entrepreneurship and Innovation Management 318, 348 are recommended as alternative elective modules.

### 1.2.6 BCom (Management Sciences): Information Systems Management focal area

Knowledge is increasingly becoming the deciding factor in advanced economic activities around the world, spurred on to a large extent by the rapid progress in computational power. For organisations today, information is primarily computer-processed expressions of knowledge through which productive work is facilitated. But because organisations are complex phenomena and because of the complicated nature of computer technology and the information systems they support, the management of information pose difficult but also fascinating challenges. Please refer to www.informatics.sun.ac.za for more information.

**First year (120 credits)**

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
</tbody>
</table>

1.2.7 **BCom (Management Sciences): Logistics Management focal area**

Logistics Management is the process of planning, organising and executing the efficient, effective flow and storage of goods, services and related information from the place of origin to the place of consumption or application for the purpose of optimally meeting customer requirements in order to help maximise the long-run welfare of the firm. Students who intend to be involved with the business of the flow of resources from their origin, the transformation of resources to products, and making the products available to customers at the designated place...
and time in the required condition and quantity at an acceptable cost or price will pursue this focal area.

**First year (120 credits)**

*Compulsory modules*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
<tr>
<td>Statistical Methods</td>
<td>176(18) or</td>
</tr>
<tr>
<td>Statistics</td>
<td>186(18)</td>
</tr>
<tr>
<td>Theory of Interest</td>
<td>152(6)</td>
</tr>
</tbody>
</table>

*Elective modules*

Plus 24 credits from:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Communication</td>
<td>142(8)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>114(12), 152(6), 162(6)</td>
</tr>
<tr>
<td>Language and thinking skills for EMS</td>
<td>114(12)</td>
</tr>
<tr>
<td>Introduction to Transport and Logistics Systems</td>
<td>144(12)</td>
</tr>
</tbody>
</table>

**Note**

Statistical Methods 176 or Statistics 186 or Probability Theory and Statistics 114 or 144 is required for admission to Logistics Management 318. Supply Chain Management 144 is not a prerequisite, but is highly recommended.

**Second year (128 credits)**

*Compulsory modules*

At least 32 credit from the writing- and information-enriched modules (marked with an *) must be taken

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Logistics Management</td>
<td>214(16) * 244(16) *</td>
</tr>
</tbody>
</table>

*Elective modules*

Plus three of:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial Psychology</td>
<td>224(16) * 244(16) *</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>

<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Transport Economics</td>
<td>318(24), 348(24)</td>
</tr>
</tbody>
</table>

## 1.2.8 BCom (Management Sciences): Marketing Management focal area

The Marketing Management focal area and its instruction is based on the following: marketing theory; consumer behaviour; the application of theory to various aspects of marketing, with special emphasis on retail, services, promotion and marketing research; and the development of a management orientation in approaching marketing challenges. Career possibilities include: marketing manager; advertising manager; promotions manager; brand manager; marketing researcher. The course is continuously adapted to keep up with modern technologies such as the Internet’s impact and its advantages for marketing. A variety of modules in other areas form part of the compulsory modules or are available as electives.

## First year (120 credits)

### Compulsory modules

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>

</tr>
</tbody>
</table>
1.2.9 BCom (Management Sciences): Public and Development Management focal area

Thorough knowledge of Public and Development Management is essential preparation for various professions in the public, business and voluntary sectors. The public or government sector, which is in every country the largest employer, functions on national, regional, municipal and community level. The function of the public sector is to guard, regulate and develop, to provide for the people or to ensure that the business and voluntary sector collaborate in these activities. Possible career sectors requiring knowledge in Public and Development Management are the political sector; national, provincial and municipal departments and administrations; voluntary organisations; and the development, business and media sectors. Possible professions in these sectors include those of general managers, chief executive officers, strategic managers, financial managers, personnel managers, project and programme managers, development planners, development managers, community developers, specialists in policy and management research, consulting and advice.

Public and Development Management combines well as focal area or ancillary study area with other subjects in the BCom programme, especially in the programme BCom (Management Sciences). In the Arts and Social Sciences Faculty, Public and Development Management is an option in the programmes BA (Socio-Informatics), BA (Human Resource Management) and BA (Development and Environment) up to third-year level and in the programmes BA (PPE) and BA (Social Dynamics) up to second-year level.

First year (120 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Business Management</th>
<th>113(12), 142(6)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
<tr>
<td>Public and development management</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Statistics</td>
<td>186(18) or</td>
</tr>
<tr>
<td>Statistical Methods</td>
<td>176(18)</td>
</tr>
<tr>
<td>Theory of Interest</td>
<td>152(6)</td>
</tr>
</tbody>
</table>

Second year (128 or 144 credits)

Compulsory modules

At least 32 credits from the writing- and information-enriched modules (marked with an *) must be taken.

| Public and development management | 212(8), 222(8), 242(8), 252(8) |
Elective modules

One of:

</tr>
</tbody>
</table>
1.2.10 BCom (Management Sciences): Quantitative Management focal area

Study in this focal area will equip the student with a combination of management and analytical capabilities to be highly competitive in the business world. The aim is to educate managers and analysts who will, after adequate experience, be able to analyse and manage business functions and processes within the firm at the strategic, tactical and operational level, and to found decisions quantitatively in order to help maximise the firm’s wealth.

First year (120 or 132 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>

</tr>
<tr>
<td>Statistics</td>
<td>186(18)</td>
</tr>
<tr>
<td>Theory of Interest</td>
<td>152(6)</td>
</tr>
</tbody>
</table>

Elective modules

Plus at least 12 credits from the following:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Communication</td>
<td>142(8)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>114(12), 152(6), 162(6)</td>
</tr>
<tr>
<td>Language and thinking skills for EMS</td>
<td>114(12)</td>
</tr>
<tr>
<td>Introduction to Transport and Logistics Systems</td>
<td>144(12)</td>
</tr>
</tbody>
</table>

Note
A final mark of at least 60% in Statistical Methods 176 is required for admission to Quantitative Management 214 and 244.

Second year (128 or 144 credits)

Compulsory modules

At least 32 credit from the writing- and information-enriched modules (marked with an *) must be taken

<table>
<thead>
<tr>

<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
<tr>
<td>Transport Economics</td>
<td>318(24), 348(24)</td>
</tr>
</tbody>
</table>

### 1.3  BCom Economic Sciences programmes

The BCom (Economic Sciences) programme offers students a relatively free choice of modules. It is also possible within this programme to focus on a specific area of study. For these focal areas there are **recommended combinations** of modules.

See the different focal areas below for the recommended combinations of modules.

*Please note:* The recommended combinations are not prescriptive.

Also take note of the stipulation regarding timetable clashes (see Clause 9 in this Calendar Part).

#### 1.3.1  BCom (Economic Sciences) General

**First year (120 or 128 credits)**

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Statistics</td>
<td>186(18)</td>
</tr>
<tr>
<td>Theory of Interest</td>
<td>152(6)</td>
</tr>
</tbody>
</table>

*Or*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Actuarial Science</td>
<td>112(8)</td>
</tr>
<tr>
<td>Mathematics</td>
<td>114(16), 144(16)</td>
</tr>
<tr>
<td>Probability Theory and Statistics</td>
<td>144(16)</td>
</tr>
</tbody>
</table>

**Plus**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
</tbody>
</table>
Elective modules

Plus 24 credits from the following if Statistics 186 and Theory of Interest 152 were chosen above:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Geo-Environmental Science</td>
<td>124(16), 154(16)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>114(12), 152(6), 162(6)</td>
</tr>
<tr>
<td>Language and thinking skills for EMS</td>
<td>114(12)</td>
</tr>
<tr>
<td>Philosophy</td>
<td>112(6), 122(6), 142(6), 152(6)</td>
</tr>
<tr>
<td>Political Science</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Public and development management</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Sociology</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Introduction to Transport and Logistics Systems</td>
<td>144(12)</td>
</tr>
</tbody>
</table>

Second year (128 or 144 credits)

Compulsory modules

At least 32 credits from writing- and information-enriched modules (marked with an *) must be taken

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Statistics</td>
<td>214(16) and 224(16) and 244(16)</td>
</tr>
</tbody>
</table>

Or

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematical Statistics</td>
<td>214(16), 244(16)</td>
</tr>
</tbody>
</table>

Plus

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Agricultural Economics</td>
<td>234(16), 242(8), 262(8) or</td>
</tr>
<tr>
<td>Economics</td>
<td>281(32) * or</td>
</tr>
<tr>
<td>Transport Economics</td>
<td>214(16), 244(16)</td>
</tr>
</tbody>
</table>

Elective modules

Plus elective modules to supplement the required minimum credits of 128:

Please note: Modules may be chosen, provided that your choice does not create any timetable clashes.

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financial Accounting</td>
<td>288(32)</td>
</tr>
<tr>
<td>Financial Risk Management</td>
<td>212(8), 242(8), 274(24)</td>
</tr>
<tr>
<td>Financial Planning</td>
<td>214(16) or</td>
</tr>
<tr>
<td>Financial Management</td>
<td>214(16)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>224(16) * 244(16) *</td>
</tr>
<tr>
<td>Investment Management</td>
<td>254(16)</td>
</tr>
<tr>
<td>Financial Management</td>
<td>244(16)</td>
</tr>
<tr>
<td>Geography and Environmental Studies</td>
<td>225(16), 265(16) [Remark: Students who are taking/have passed Mathematics 114 could take 214(16) instead of 225(16)]</td>
</tr>
<tr>
<td>Logistics Management</td>
<td>214(16) * 244(16) *</td>
</tr>
</tbody>
</table>
### Economic and Management Sciences

<table>
<thead>
<tr>

</table>
1.3.2 BCom (Economic Sciences): Econometricians focal area

As a focal area, Economics can be combined with other modules to meet different objectives. Three possible combinations are given here. The first combination is proposed for students who have a strong quantitative background and aptitude. The emphasis throughout is on advanced Mathematics and Statistics which are combined with Economics to give students a strong foundation for employment as econometricians in either the financial or public sectors, or at a research institution. The advanced level of mathematical and statistical knowledge will equip the student with the necessary skills to be able to do sophisticated analyses.

First year (128 credits)

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Actuarial Science</td>
<td>112(8)</td>
</tr>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
<tr>
<td>Mathematics</td>
<td>114(16), 144(16)</td>
</tr>
<tr>
<td>Probability Theory and Statistics</td>
<td>144(16)</td>
</tr>
</tbody>
</table>

Second year (128 credits)

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>214(16), 244(16), 281(32)</td>

<tr>
<td>Financial Mathematics</td>
<td>378(32) [Optional extra]</td>
</tr>
</tbody>
</table>
1.3.3  BCom (Economic Sciences): Economic and Management Consultants focal area

The combination is aimed at people who wish to qualify as economic or management consultants. A good knowledge of Economics is combined with broad exposure to commercial and management subjects such as Mercantile Law and Industrial Psychology. This provides the student with the necessary background to be able to make business-related recommendations covering a broad spectrum of fields.

First year (120 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>

<tr>
<td>Financial Accounting</td>
<td>288(32)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>224(16), 244(16)</td>
</tr>
<tr>
<td>Mercantile Law (Commerce)</td>
<td>285(32)</td>
</tr>
<tr>
<td>Financial Management</td>
<td>214(16) and</td>
</tr>
<tr>
<td>Investment Management</td>
<td>254(16)</td>
</tr>
</tbody>
</table>

Third year (at least 120 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>318(24), 348(24), 388(24)</td>
</tr>
</tbody>
</table>

Elective modules

Plus modules from the following to make up the required number of at least 120 credits together with the above modules:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agricultural Economics</td>
<td>314(16), 334(16), 354(16), 364(16)</td>
</tr>
<tr>
<td>Economics</td>
<td>381(24)</td>

<tr>
<td>Financial Management</td>
<td>314(12), 332(12), 352(12), 354(12)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>314(12), 324(12), 348(24)</td>
</tr>
<tr>
<td>Mercantile Law (Commerce)</td>
<td>381(24)</td>
</tr>
</tbody>
</table>

1.3.4 BCom (Economic Sciences): Financial Sector focal area

This combination of modules is suggested for a person wanting to seek employment in the financial sector. As this individual would typically work as an economic or financial analyst, there is ongoing emphasis on mathematical and statistical skills, as well as skills that would be required to analyse investment opportunities and the financial statements of companies.

First year (128 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Actuarial Science</td>
<td>112(8)</td>
</tr>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
<tr>
<td>Mathematics</td>
<td>114(16), 144(16)</td>
</tr>
<tr>
<td>Probability Theory and Statistics</td>
<td>144(16)</td>
</tr>
</tbody>
</table>
Second year (128 or 136 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>214(16), 244(16), 281(32)</td>
</tr>
<tr>
<td>Mathematical Statistics</td>
<td>214(16), 244(16)</td>
</tr>
</tbody>
</table>

Elective modules

Plus at least 32 credits from:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financial Accounting</td>
<td>288(32) or</td>
</tr>
<tr>
<td>Financial Management</td>
<td>214(16), 244(16) or</td>
</tr>
<tr>
<td>Financial Risk Management</td>
<td>274(24)</td>
</tr>
<tr>
<td>Financial Risk Management</td>
<td>212(8), 242(8) or</td>
</tr>
<tr>
<td>Investment Management</td>
<td>254(16) or</td>
</tr>
<tr>
<td>Mathematics</td>
<td>214(16), 244(16) [for Financial Risk Management 314(24), 344(24)]</td>
</tr>
</tbody>
</table>

Third year (at least 120 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>318(24), 348(24), 388(24)</td>
</tr>
</tbody>
</table>

Elective modules

Plus modules from the following to make up the required number of at least 120 credits together with the above modules:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financial Risk Management</td>
<td>314(24), 344(24) or</td>
</tr>
<tr>
<td>Investment Management</td>
<td>314(12), 324(12), 344(12), 348(12), 354(12)</td>
</tr>
<tr>
<td>Mathematical Statistics</td>
<td>318(32), 344(16), 354(16), 364(16) [Optional extra]</td>
</tr>
</tbody>
</table>

1.3.5  BCom (Economic Sciences): Transport Economics focal area

Transport Economics is that field of economics which deals with the optimal allocation of scarce resources within the transport sector, and between the transport sector and other sectors in the economy. In this discipline the underlying economic theory is discussed and evaluation methods and decision-making theory are studied and applied in order to equip prospective transport economists to assist with the abovementioned resource allocation in a scientific manner. In addition, the field strives to inform students about the economic principles of transport regulation, transport pricing, competition and government transport policy. Thorough knowledge of these aspects, and the ability to apply transport policy judiciously, should contribute to a transport system which serves the national economy effectively. Transport economics also equip students with the knowledge of the economic characteristics of different modes of transport and the market conditions in which transport supply takes place in order to enable them to successfully manage transport companies.
First year (120 credits)

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
<tr>
<td>Statistics</td>
<td>186(18)</td>

<td>314(24)</td>
</tr>
<tr>
<td>Quantitative Management</td>
<td>318(24), 348(24)</td>
</tr>
</tbody>
</table>

1.4 BCom Mathematic Sciences programmes
The BCom (Mathematical Sciences) programme offers students a relatively free choice of modules. It is also possible within this programme to focus on a specific area of study. For these focal areas there are recommended combinations of modules.

See the different focal areas below for the recommended combinations of modules.

Please note: The recommended combinations are not prescriptive.

Also take note of the stipulation regarding timetable clashes (see Clause 9 in this Calendar Part).

1.4.1 BCom (Mathematical Sciences) General
First year (128 or 136 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Actuarial Science</th>
<th>112(8)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematics</td>
<td>114(16), 144(16)</td>
</tr>
<tr>
<td>Probability Theory and Statistics</td>
<td>144(16)</td>
</tr>
</tbody>
</table>

Plus

<table>
<thead>
<tr>
<th>Business Management *</th>
<th>113(12), 142(6)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
</tbody>
</table>

Or

<table>
<thead>
<tr>
<th>Computer Science</th>
<th>114(16), 144(16)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
</tbody>
</table>

* Business management 113(12) and 142(6) are followed in the second year.

Second year (128 or 130 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Mathematical Statistics</th>
<th>214(16), 244(16)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mathematics</td>
<td>214(16), 244(16)</td>
</tr>
</tbody>
</table>
Elective modules
Plus 64 credits, of which at least 32 credits must be from one subject, or if Computer Science 114(16) and 144(16) are followed and passed in the first year, then Business Management 113(12) and 142(6) are compulsory plus 48 credits, of which at least 32 credits must be from one subject.

Please note: Where Business Management 113(12) and 142(6) are listed as prerequisites, the relevant second-year modules can only be followed in the third year.

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Actuarial Science</td>
<td>274(24) or 274(24)</td>
</tr>
<tr>
<td>Financial Risk Management</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Computer Science</td>
<td>214(16), 244(16), 281(32)</td>
</tr>
<tr>
<td>Economics</td>
<td>288(32)</td>
</tr>
<tr>
<td>Financial Risk Management</td>
<td>212(8), 242(8)</td>
</tr>
<tr>
<td>Investment Management</td>
<td>254(16)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Operations Research</td>
<td>214(16), 244(16)</td>
</tr>
</tbody>
</table>

Third year (at least 120 credits)

Elective modules
At least one of:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financial Risk Management</td>
<td>314(24), 344(24)</td>
</tr>
<tr>
<td>Mathematical Statistics</td>
<td>318(32) plus two of 344(16), 354(16), 364(16)</td>
</tr>
<tr>
<td>Operations Research</td>
<td>314(16), 326(16), 344(16), 354(16)</td>
</tr>
</tbody>
</table>

Plus modules from the following to make up the required number of at least 120 credits together with the above modules:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computer Science</td>
<td>314(16), 315(16), 334(16), 344(16), 354(16), 364(16)</td>
</tr>
<tr>
<td>Economics</td>
<td>318(24), 348(24), 381(24), 388(24)</td>
</tr>
<tr>
<td>Financial Mathematics</td>
<td>378(32)</td>
</tr>
<tr>
<td>Investment Management</td>
<td>314(12), 324(12), 344(12), 348(12), 354(12)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
<tr>
<td>Mathematics</td>
<td>314(16), 324(16), 325(16), 344(16), 345(16), 365(16)</td>
</tr>
<tr>
<td>Project Management</td>
<td>314(24)</td>
</tr>
</tbody>
</table>
1.4.2 **BCom (Mathematical Sciences): Computer Science focal area**

Computer Science plays a key role in the contemporary business world. Examples include information management system, Internet banking, e-procurement and online shopping. In this focus area, Computer Science is combined with subjects from commerce. In this way, students obtain the best of both worlds: a rigorous understanding of Computer Science as well as management principles.

**First year (128 or 136 credits)**

*Compulsory modules*

<table>
<thead>
<tr>
<th>Subject</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Actuarial Science</td>
<td>112(8)</td>
</tr>
<tr>
<td>Computer Science</td>
<td>114(16), 144(16)</td>
</tr>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Mathematics</td>
<td>114(16), 144(16)</td>
</tr>
<tr>
<td>Probability Theory and Statistics</td>
<td>144(16)</td>
</tr>
</tbody>
</table>

**Second year (130 credits)**

*Compulsory modules*

<table>
<thead>
<tr>
<th>Subject</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>
<td>Computer Science</td>
<td>214(16), 244(16)</td>
</tr>
<tr>

</tbody>
</table>
Third year (at least 120 credits)

**Compulsory modules**

| Computer Science | 314(16), 315(16), 334(16), 344(16), 354(16), 364(16) |

**Elective modules**

*Plus one of:*

- Financial Risk Management | 314(24), 344(24) |
- Mathematical Statistics | 318(32) plus two of 344(16), 354(16), 364(16) |
- Operations Research | 314(16), 326(16), 344(16), 354(16) |

*Plus modules from the following to make up the required number of at least 120 credits together with the above modules:*

Modules from the list above not taken already:

| Computer Science | 314(16), 315(16), 324(16), 344(16), 354(16), 364(16) |
| Economics | 318(24), 348(24), 388(24) |
| Financial Mathematics | 378(32) |
| Investment Management | 314(12), 324(12), 344(12), 348(12), 354(12) |
| Logistics Management | 314(12), 324(12), 344(12), 354(12) |
| Marketing Management | 314(12), 324(12), 344(12), 354(12) |
| Mathematics | 314(16), 324(16), 325(16), 344(16), 345(16), 365(16) |
| Project Management | 314(24) |

1.4.3 BCom (Mathematical Sciences): Financial Risk Management focal area

People with training in Financial Risk Management, Mathematical Statistics and Financial Mathematics are employed by large financial institutions as financial quantitative analysts, such as financial risk managers, portfolio managers and dealers in financial instruments. This training gives students the necessary background for building a stimulating and financially rewarding career in the financial sector.

First year (128 or 136 credits)

**Compulsory modules**

| Actuarial Science | 112(8) |
| Probability Theory and Statistics | 144(16) |
| Mathematics | 114(16), 144(16) |

*Plus*
Second year (136 or 154 credits)

Compulsory modules

If Computer Science 114(16) and 144(16) are followed and passed in the first year, then Business Management 113(12) and 142(6) are compulsory plus the compulsory modules below.

Please note: Where Business Management 113(12) and 142(6) are listed as prerequisites, the relevant second-year modules can only be followed in the third year.

1.4.4  BCom (Mathematical Sciences): Mathematical Statistics focal area

Decision-making processes have become increasingly data-based, due to the recent explosion in information. This has led to an increased demand in the private, public and research sectors, both nationally and internationally, for persons with training in mathematical-statistical theory and procedures together with the concomitant computer skills. Such graduates are employed as statisticians, data miners, data managers and statistical analysts in, for example, marketing, information and management divisions of businesses. In these capacities they form part of the
challenging management and decision-making processes in large organisations. Students with this type of training are well qualified to obtain stimulating and rewarding positions.

**First year (128 or 136 credits)**

*Compulsory modules*

<table>

<tr>
<td>Operations Research</td>
<td>314(16), 326(16), 344(16), 354(16)</td>
</tr>
</tbody>
</table>

1.4.5  BCom (Mathematical Sciences): Operations Research focal area

In Operations Research, students learn a systematic and rational (scientific) approach towards calculating best (optimal) answers in situations where the complexity and/or uncertainty are/is very high and when conflict exists between the possible outcomes. The operational researcher’s approach to problem-solving includes the search for mathematical models offering an optimal answer for different types of situation. This focal area offers powerful tools for solving real practical management problems that organisations face.

First year (128 or 136 credits)

Compulsory modules

<table>

</tr>
</tbody>
</table>
1.5 BCom (International Business)

This programme creates opportunities for employment within firms with an international footprint. It caters for a diverse group of students as it has an interdisciplinary approach and will thus draw students with an interest in both Management Sciences and Social Sciences. Traditional programme development usually does not allow for students to combine modules from both these study fields to the level that is allowed for in this programme.

This programme widens the access to international experience through the international exchange semester, and opens opportunities for students to study abroad.

The programme will be attractive for full degree international students as it offers a combination of Business and Social Sciences that resonates with programmes abroad.

The programme will also actively engage short-term (non-degree-seeking) international students as the module profile of the programme is aligned with the requirements of the programmes of the exchange partners.

Please note:
The BCom (International Business) programme is a strict selection programme with set criteria that have to be met in order to proceed from one academic year to the next:

- Students whose modules are not up to date at the beginning of their third academic year have to change their programme to BCom (Management Sciences).
- No transfer from an existing programme to BCom (International Business) is possible.

First year (120 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>

<td>178(24) (for students without German in Grade 12) 188(24) (for students who passed German in Grade 12)</td>
</tr>
</tbody>
</table>
**Elective modules**
*Plus modules from the list below to make up at least 120 credits, including the modules above:*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial Psychology</td>
<td>152(6)</td>
</tr>
<tr>
<td>Sociology</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Language and thinking skills for EMS</td>
<td>114(12) *</td>
</tr>
<tr>
<td>Philosophy</td>
<td>142(6) *</td>
</tr>
</tbody>
</table>

* Students cannot choose both these modules

**Second year (144 credits)**

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Political Science</td>
<td>114(12), 144(12)</td>
</tr>
</tbody>
</table>

*Plus at least one of the following modules in both the first and second semester:*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>214(16), 244(16) or</td>
</tr>
<tr>
<td>Financial Management</td>
<td>214(16), 244(16) or</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>214(16), 244(16)</td>
</tr>
</tbody>
</table>

**Elective modules**
*Plus at least 32 credits from:*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>214(16) ** 244(16) **</td>
</tr>
<tr>
<td>Financial Management</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Sociology</td>
<td>212(8), 222(8), 242(8), 252(8)</td>
</tr>
</tbody>
</table>

* If students choose the Marketing Management stream, Industrial Psychology 224 is compulsory in the programme (can be chosen in the third or fourth year).

**If students choose Entrepreneurship and Innovation Management 214 and 244, Sociology 212, 222, 242 and 252 cannot be chosen due to timetable restrictions.

**Third year (132 or 136 credits)**

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exchange Semester</td>
<td>342(60)</td>
</tr>
<tr>
<td>Introduction to Intercultural Communication</td>
<td>312(12)</td>
</tr>
<tr>
<td>Legal Aspects of International Transactions</td>
<td>312(12)</td>
</tr>
<tr>
<td>Management of Corporate Social Responsibility</td>
<td>314(12)</td>
</tr>
<tr>
<td>Political Science</td>
<td>222(8)</td>
</tr>
</tbody>
</table>
Plus one of the following modules *not taken* in the second year:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>214(16)</td>
</tr>
<tr>
<td>Financial Management</td>
<td>214(16)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>214(16)</td>
</tr>
</tbody>
</table>

**Elective modules**

Plus at least 12 credits from:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial Psychology</td>
<td>224(16)</td>
</tr>
<tr>
<td>Political Science</td>
<td>212(8)</td>
</tr>
<tr>
<td>Social Anthropology</td>
<td>324(12)</td>
</tr>
</tbody>
</table>

* If students choose the Marketing Management stream, Industrial Psychology 224 is compulsory in the programme (can be chosen in the third or fourth year).

** If students choose Financial Management 314 and 332, Social Anthropology 324 cannot be chosen due to timetable restrictions.

**Fourth year (120 credits)**

**Compulsory modules**

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Strategic Management</td>
<td>344(12)</td>
</tr>
</tbody>
</table>

Plus one of the following modules as a continuation to the final year based on the prior focus area selected in the second and third years:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>318(24), 348(24) or</td>
</tr>
<tr>
<td>Financial Management</td>
<td>314(12), 332(12), 352(12), 354(12) *** or</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>314(12), 324(12), 344(12), 354(12) **</td>
</tr>
</tbody>
</table>

**Elective modules**

Plus at least 60 credits from:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Financial Management</td>
<td>314(12) *** 332(12) *** 352(12), 354(12)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>314(12) ** 324(12) ** 344(12), 354(12)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>224(16) *</td>
</tr>
<tr>
<td>Political Science</td>
<td>242(8), 324(12) **</td>
</tr>
<tr>
<td>Social Anthropology</td>
<td>324(12) ***</td>
</tr>
</tbody>
</table>

* If students choose the Marketing Management stream, Industrial Psychology 224 is compulsory in the programme (can be chosen in the third or fourth year).

** If students choose Marketing Management 314 and 324, Political Science 324 cannot be chosen due to timetable restrictions.

*** If students choose Financial Management 314 and 332, Social Anthropology 324 cannot be chosen due to timetable restrictions.
2. Professional programmes

All the professional programmes offer students the opportunity to register with an occupational council and/or a professional society or write qualification examinations.

2.1 BAcc

This programme offers professional education to qualify as a chartered accountant.

First year (138 credits)

**Compulsory modules**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Management</td>
<td>113(12), 142(6)</td>
</tr>
<tr>

2.2 BCom (Actuarial Science)

This programme is directed towards students who wish to obtain the professional qualification of actuary. The curriculum is structured to enable successful students to obtain exemptions from certain of the examinations of the Actuarial Society of South Africa necessary for qualification as an actuary.
First year (144 or 154 credits)

*Compulsory modules*

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Actuarial Science</td>
<td>112(8), 142(16)</td>
</tr>
<tr>

2.4 BCom (Industrial Psychology)

The previous programme name was BCom (Psych).

To achieve the primary objectives of an organisation, a multitude of coordinated activities, which may be structured in a system of interrelated organisational functions, need to take place. The human resource function represents one of these organisational functions. The human resource function serves the primary objective of the organisation through the procurement, development and maintenance of a competent work force, as well as the effective and efficient utilisation and management of such a work force. The importance of human resource management flows from the premise that organisational success is significantly dependent on the quality of the work force an organisation employs and the manner in which such a work force is utilised and managed.

The human resource function needs to assume that the behaviour of working man is an expression of a complex network of situational and person-centred variables. Industrial Psychology embodies the conviction that, despite the complex nature of human behaviour, regularities in the behaviour of working man can be explained in terms of a comprehensive nomological network of psychological constructs, and that the opportunity arises to deductively infer practical human resource interventions aimed at affecting the flow of employees in, through and out of the organisation, and the work-related behaviour of the work force to the advantage of all stakeholders. The Department of Industrial Psychology aims to position its graduates in the market as professional scientific strategic business partners, who can simultaneously fulfil the roles of behavioural scientist, business partner and psychologist with confidence and ease. Completion of the BCom (Industrial Psychology) programme, the BComHons (Industrial Psychology) programme, an internship and successfully sitting for a professional board examination leads to statutory registration with the Health Professions Council of South Africa (HPCSA) as a psychometrist (independent practice). Statutory registration with the HPCSA as an
An industrial psychologist is possible after completion of a MCom (Industrial Psychology), an internship and successfully sitting for a professional board examination.

**First year (138 credits)**

*Compulsory modules*

<table>
<thead>
<tr>

<td>214(16), 244(16)</td>
</tr>
</tbody>
</table>

**Third year (At least 144 credits)**

*Compulsory modules*

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial Psychology</td>
<td>314(12), 324(12), 348(24)</td>
</tr>
<tr>
<td>Psychology</td>
<td>314(12) * 324(12) * 348(24)</td>
</tr>
</tbody>
</table>

*Plus 48 credits from one of the following three subjects:*

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>318(24), 348(24) or</td>
</tr>
<tr>
<td>Financial Management</td>
<td>314(12), 332(12), 352(12), 354(12) or</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
</tbody>
</table>

Financial Management 314, 332, 352, 354 are recommended as primary elective modules. Marketing Management 314, 324, 344, 354, and Entrepreneurship and Innovation Management 318, 348 are recommended as alternative elective modules.
Transitional Measures
Students who have failed Psychology 318 in 2014 and/or 2015 must register for this module again in 2016.

Remarks
Information regarding undergraduate studies in the Department of Industrial Psychology can be obtained by contacting the Department on 021 808 3005, or by visiting the Department’s website at http://www.sun.ac.za/industrial_psychology/.

2.5 BCom (Management Accounting)
This programme offers professional training aimed at the chartered management accountant (CIMA) qualification.

First year (120 credits)
Compulsory modules

| Business Management                  | 113(12), 142(6) |
| Economics                            | 114(12), 144(12) |
| Financial Accounting                 | 188(24)         |
| Information Systems                  | 152(6), 188(24) |
| Statistics                           | 186(18)         |
| Theory of Interest                   | 152(6)          |

Second year (128 credits)
Compulsory modules

| Financial Accounting                 | 288(32)        |
| Industrial Psychology (Special)      | 244(12)        |
| Information Systems                  | 214(6), 242(6) |
| Management Accounting                | 288(24)        |
| Marketing Management                 | 214(16)        |
| Mercantile Law (Commerce)            | 285(32)        |

Students who have passed Mercantile Law (Acc) 193 do not register for Mercantile Law (Commerce) 285, but rather for Mercantile Law (Commerce) 253.

Third year (144 credits)
Compulsory modules

| Auditing                             | 388(24)        |
| Financial Accounting                 | 389(48)        |
| Management Accounting                | 388(48)        |
| Taxation                             | 388(24)        |
2.6 BCom: Financial Planning focal area

The focal area Financial Planning has specifically been developed to enable students to enrol for the Postgraduate Diploma in Financial Planning after the successful completion of a BCom degree. Additional information on this diploma programme can be found under the Department of Business Management, in the latter part of this Calendar Part. Students who complete this diploma successfully are entitled to write the entrance examination for the internationally recognised CFP (Certified Financial Planner) qualification. Additional information on the CFP qualification can be found at www.fpi.co.za.

2.7 **BCom: Investment Management focal area**

The focal area Investment Management is specifically developed to enable students after completion of their BCom with Investment Management as focal area to study successfully for Level 1 of the examination for the international Chartered Financial Analyst® (CFA®) qualification. The international CFA is a qualification focused on portfolio management and investment analysis (shares, bonds, derivative instruments and real estate). All the learning outcomes of Level 1 of the CFA examinations are covered in the second- and third-year modules in Investment Management, second-year modules in Economics, Financial Management and Financial Accounting, and the modules of the generic first-year BCom programme. Successful completion of a BCom programme with these modules allows admission to honours study, where the learning outcomes of Level 2 and 3 of the international CFA examinations are covered. Complete information on the CFA programme is available at www.cfainstitute.org (click on “CFA Program”).

</tr>
</tbody>
</table>

### 4. Four-Year Bachelor’s programme (Extended degree programme): BCom (Management Sciences) EDP

**Objective**

The extended degree programme has at least three objectives, namely allowing students that do not meet the formal entry requirements for BCom studies due to educational disadvantages the opportunity to register for a BCom; easing the transition between school and university; and allowing students the opportunity to develop a solid foundation for later years of study. It offers students with inappropriate foundations in Mathematics, Accountancy and academic communication skills the opportunity to develop this foundation through preparatory study.

Students in the extended degree programme are expected to spend at least 60 hours per week on their studies (lectures, practicals, tutorials, homework and self-study) and take advantage of the reduced prescribed workload to perform well.
Further criteria used for selection:

- Academic achievement compared to the minimum admission requirements of the BCom Management Sciences programme
- Teaching disadvantages that can explain the possible insufficient achievement in the National Senior Certificate (NSC) exams

The closing date for applying for the extended degree programme is the end of June. Prospective students who have been provisionally accepted for the three-year BCom Management Sciences programme, but due to the results of their final National Senior Certificate exams do not meet the admission requirements, have no claim to automatic inclusion in the Extended Degree Programme. Such students can have their names placed on a waiting list and after the official registration period be considered for placement depending on the number of available places. Please note that the Faculty may use NBT-results to inform placement decisions.

Students selected for this programme should note the following requirements:

- Registration and attendance of classes and tutorials for the following modules is compulsory:
  - Academic Literacy for EMS 111
  - Mathematics for EMS 171
  - Introduction to Economics 141
  - Introduction to Financial Accounting 171

- The following prerequisite pass modules for the EDP should be noted:
  - Mathematics for EMS 171 for Statistical Methods 176 or Statistics 186
  - Introduction to Economics 141 for Economics 114
  - Introduction to Financial Accounting 171 for Financial Accounting 188
  - Academic Literacy for EMS 111 for overall re-admittance to the second year
  - If a student has not successfully completed Mathematics for EMS 171 or Academic Literacy for EMS 111 after a maximum of two registrations, the student will not be allowed to register for the BCom (Management Sciences) EDP again.

- The same readmission criteria for all students in the faculty apply to EDP students as well.

- Students are compelled to make use of tutors/mentors in the modules where this support is available. Module mentor support for Business Management 113 and Theory of Interest 152 is compulsory.

- Students are required to meet with the coordinator on a regular basis in order to monitor their progress.

- The choice of modules in this programme is limited to the curriculum prescribed for the BCom Managements Sciences. Conversion to other programmes in the Faculty of Economic and Management Sciences must be approved by the Faculty Council and only in exceptional cases, should the student meet the language specifications of the Faculty.
4.1 BCom (Management Sciences) EDP (Extended degree programme)

Take note of the stipulations regarding timetable clashes (see clause 9 in the calendar part).

First year (90 credits)

</table>

Second year (104 credits)

Compulsory modules

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Information Systems</td>
<td>112(6)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>188(24)</td>
</tr>
<tr>
<td>Statistical Methods</td>
<td>176(18)</td>
</tr>
</tbody>
</table>

Elective modules

If you already enrolled for and passed Financial Accounting 188, you need to select first-year modules of at least 24 credits from the list below, provided that your choices do not create any class-, test- or examination clashes:

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Communication</td>
<td>142(8)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>114(12) *</td>
</tr>
<tr>
<td>Public and development management</td>
<td>114(12), 144(12)</td>
</tr>
<tr>
<td>Introduction to Transport and Logistics Systems</td>
<td>144(12)</td>
</tr>
</tbody>
</table>
If the above is not applicable, select one of the following (at least 32 credits):

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Financial Management</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>114(12), 152(6), 162(6)</td>
</tr>
<tr>
<td>Information System Management</td>
<td>224(16), 262(8), 254(16)</td>
</tr>
<tr>
<td>Logistics Management</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Public and development management</td>
<td>114(12) * 144(12) *</td>
</tr>
</tbody>
</table>

### Third year (102 credits)

#### Elective modules

At least 32 credits from writing- and information-enriched modules (marked with an *) must be taken (see also modules mentioned in the second year above).

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>214(16) * 244(16) * 281(32)</td>
</tr>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Financial Management</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Financial Accounting</td>
<td>288(32)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>214(16), 224(16) * 244(16) *</td>
</tr>
<tr>
<td>Information System Management</td>
<td>224(16) * 262(8), 254(16)</td>
</tr>
<tr>
<td>Logistics Management</td>
<td>214(16), 244(16) *</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>214(16) * 244(16) *</td>
</tr>
<tr>
<td>Quantitative Management</td>
<td>214(16), 244(16)</td>
</tr>
<tr>
<td>Transport Economics</td>
<td>214(16), 244(16)</td>
</tr>
</tbody>
</table>

### Fourth year (120 credits)

#### Compulsory modules

One of the following (48 or 60 or 64 credits):

<table>
<thead>
<tr>
<th>Module</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Economics</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Entrepreneurship and Innovation Management</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Financial Management</td>
<td>314(12), 332(12), 352(12), 354(12)</td>
</tr>
<tr>
<td>Industrial Psychology</td>
<td>314(12), 324(12), 348(24)</td>
</tr>
<tr>
<td>Information System Management</td>
<td>314(18), 334(18), 364(18), 354(18)</td>
</tr>
<tr>
<td>Logistics Management</td>
<td>314(12), 334(12), 344(12), 354(12)</td>
</tr>
<tr>
<td>Marketing Management</td>
<td>314(12), 324(12), 344(12), 354(12)</td>
</tr>
<tr>
<td>Quantitative Management</td>
<td>318(24), 348(24)</td>
</tr>
<tr>
<td>Transport Economics</td>
<td>318(24), 348(24)</td>
</tr>
</tbody>
</table>
Elective modules

Plus modules from the following to make up the required number of at least 120 credits together with the above modules:

Modules from the list above not taken already or modules from the third year of the BCom (Management Sciences), BCom (Economic Sciences) or BCom (Mathematical Sciences) for which students cannot register as part of the BCom programme from the start, but that will be acknowledged if students should change their programmes

<table>
<thead>
<tr>

# Postgraduate Programmes

## Undergraduate module requirements for postgraduate programmes

### Module requirements for postgraduate programmes

Students should review the table below to ascertain whether they meet the minimum module requirements for admission to certain postgraduate programmes. Passing the relevant modules, however, does not guarantee admission to the relevant postgraduate programme. Each programme may have further specific selection criteria, and these may vary depending on the pool of applications for the programme. The table below is thus meant merely as a guideline to assist with undergraduate module selection.

<table>
<thead>
<tr>
<th>BComHons (Industrial Psychology)</th>
<th>BCom (Industrial Psychology) degree programme – required modules include Psychology first-, second- and third-year modules, plus Industrial Psychology 114, 152, 162, 214, 224, 244 and 314, 324, 348.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Minimum pass requirement of 65% in Industrial Psychology 314, 324, 348.</td>
</tr>
<tr>
<td>BComHons (Human Resource Management)</td>
<td>Minimum pass requirement of 65% in Industrial Psychology 314, 324, 348.</td>
</tr>
<tr>
<td>BComHons (Economics)</td>
<td>Bachelor’s degree with minimum pass requirement of 60% in Economics 318 and 348.</td>
</tr>
<tr>
<td></td>
<td>Minimum 60% pass requirement within the Intensive Mathematics course that precedes the formal Honours programme.</td>
</tr>
<tr>
<td></td>
<td>Has to be completed within three years. If not, the compulsory modules have to be repeated.</td>
</tr>
<tr>
<td>BComHons (Economics and Mathematical Statistics)</td>
<td>Selection to the BComHons in Economics and Mathematical Statistics has to be made by both the Department of Economics (minimum pass requirement of 60% in Economics 318 and 348) and the Department of Statistics and Actuarial Science (minimum pass requirement of 60% in Mathematical Statistics 3).</td>
</tr>
<tr>
<td></td>
<td>Has to be completed within three years. If not, the compulsory modules have to be repeated.</td>
</tr>
</tbody>
</table>
| BComHons (Quantitative Management) | • Minimum pass requirement of 60% in Quantitative Management 318 and 348.  
   • Quantitative Management 318(24) and 348(24) and Quantitative Modelling 711 are prerequisites for Methods in Quantitative Management 741. |
| BComHons (Logistics Management) | • Minimum pass requirement of 60% in Logistics Management 314, 324, 344, 354. |
| BComHons (Operations Research) | • Operations Research 324(16) or Mathematics 244(16) is a prerequisite for Decision making 712.  
   • Operations Research 244(16) is a prerequisite for Advanced Linear Programming 712.  
   • Quantitative Management 244(16) or Introduction to Optimization 722 or Operations Research 244(16) is a prerequisite for Optimization 852.  
   • Operations Research 314(16) and Operations Research 344(16) or Quantitative Management 318(24) and Quantitative Management 348(24) passed with a minimum of 60% is a prerequisite for Facilities 742.  
   • Operations Research at third-year level plus Meta-heuristics 713 is a prerequisite for Scheduling 714.  
   • Operations Research 344(16) or Quantitative Management 318(24) and 348(24) passed with a minimum of 65% is a prerequisite for Theory 743.  
   • Probability Theory and Statistics 144(16) and Operations Research 354(16) are prerequisites for Inventory Control 743.  
   • Operations Research 354(16) or Introductory Forecasting 723 is a prerequisite for Forecasting 853. |
| BComHons (Transport Economics) | • Minimum pass requirement of 60% in Transport Economics 318(24) and Transport Economics 348(24).  
   • Transport Economics 318(24) and 348(24) are prerequisites for Urban Transport Economics 742, Economic Investment Planning 712, Air Transport Economics 742 and Shipping Transport Economics 773.  
   • Transport Economics 318(24) and 348(24) or Economics 318(24) and 348(24) are prerequisites for Competition and Regulation 715. |
### BComHons (Financial Analysis)
- Transport Economics 318(24) and 348(24) or Logistics Management 244(16) are prerequisites for Road Transport Management 744.
- Average of 65% for the 60 credits from Investment Management 314(12), 324(12), 344(12), 348(12), 354(12).
- Financial Management 314 and 332 are pass prerequisites to register for the module Financial Management 713 within the Honours degree programme.

### BComHons (Business Management)*
- Any four Business Management modules.*
- Financial Management (Research) 352(12) or Marketing Management (Marketing Research) 344(12) is a pass prerequisite for BComHons (Business Management 778).

### BComHons (Business Management with specialisation areas)*
#### Marketing Management
- Marketing Management 314(12), 324(12), 344(12), 354(12).*
- Marketing Management (Marketing Research) 344(12) is a pass prerequisite for BComHons (Business Management: Specialisation in Marketing Management 778).
- Consumer Behaviour 224 is a pass prerequisite to register for the module Consumer Psychology 721 within the Honours degree programme.

#### Financial Management
- Financial Management 314(12), 332(12), 352(12), 354(12).*
- Financial Management (Research) 352(12) is a pass prerequisite for BComHons (Business Management: Specialisation in Financial Management 778).

#### Strategy and Innovation
- Entrepreneurship and Innovation Management 318(24), 348(24) and Strategic Management 344(12).*
- Strategic Management 344 is a pass requirement.
- Financial Management (Research) 352(12) or Marketing Management (Marketing Research) 344(12) is a pass prerequisite for BComHons (Business Management: Specialisation in Strategy and Innovation 778).
### BComHons (Actuarial Science)
- BCom (Actuarial Science) degree.
- See later sections for specific selection criteria.

### BComHons (Financial Risk Management)
- Minimum pass requirement of 60% in Financial Risk Management 3.

### BComHons (Statistics)
- Minimum pass requirement of 60% in Statistics 3.

### BComHons (Mathematical Statistics)
- Minimum pass requirement of 60% in Mathematical Statistics.

### BComHons (Management Accounting)
- Minimum pass requirement of 60% in Financial Accounting 389 and Management Accounting 388.

### BAccHons
- Weighted average performance mark of 60% for Financial Accounting 379; Management Accounting 378; Auditing 378 and Taxation 399 or Weighted average performance mark of 55% for Financial Accounting 379; Management Accounting 378; Auditing 378 and Taxation 399 and a performance mark of 55% for Financial Accounting 379.

*Please note:* Regardless of the number of credits specified per specialisation area, a minimum of 60% average must be obtained in order to be considered for the Honours programme.

## 1. Postgraduate diploma programmes

The campus for diploma programmes, which are presented by the Postgraduate Management School, Bellville Park Campus and the School for Public Leadership (Postgraduate Department, Bellville Park Campus), will be indicated in the programme name.

### 1.1 Postgraduate Diploma in Actuarial Science

**Programme outcomes**

The diploma is well-suited to students who have completed an Honours degree in Actuarial Science and who wish to study further towards an actuarial qualification but who do not yet want to take a Master’s degree programme (which has a significant research component).

**Specific admission requirements**

- A BCom (Actuarial Science) or equivalent degree with Actuarial Science and Mathematical Statistics as majors, and Mathematics to at least second-year level; and
- Exemptions from (or passes in the profession’s examinations for) all eight of the Foundation and Intermediate Technical examinations of the Actuarial Society of South Africa or Core Technical examinations (CT1–CT8) of the Institute and Faculty of Actuaries.
Notes
Not all of the listed modules may be offered every year. Students should contact the Department to find out which modules will be available.

Programme content
At least 120 credits must be completed from the list of elective modules below.

1.2 Postgraduate Diploma in Business Management and Administration (Bellville Park Campus)

Credits
This postgraduate diploma is presented at NQF level 8 (120 credits).

Programme description
This internationally accredited programme is aimed at working professionals who want to acquire general management skills underpinned by an entrepreneurial approach to business.

This one-year programme has two formats – Blended Learning and Modular. The Blended Learning format (mixed learning format) with compulsory on-campus blocks at the start and the end of the programme. In between these blocks, classes are presented late afternoons on Wednesdays, and students can choose between on-campus and online delivery. The Modular format is delivered in five one-week blocks (Monday to Saturday) spread over one year. Classes are presented in English.
Programme outcomes
The purpose of this general management programme is to:

- Equip you with entrepreneurial skills
- Broaden your knowledge of the various management disciplines in the business environment
- Enable you as a working professional to undertake development by means of a systematic survey of current thinking and practice and to learn via application in a working environment
- Equip you with the ability to define and develop an enterprise’s value proposition in an increasingly competitive and volatile environment
- Enable you to use analytical skills to deal with business problems, but always within the particular social system in which you operate
- Deal with business problems both systematically and analytically.

Specific admission requirements
The following minimum admission criteria are applicable:

- A three-year Bachelor’s degree, advanced or postgraduate diploma at NQF level 7, or higher.
- A minimum of two years’ relevant full-time work experience (preferably at a managerial level).
- The SHL selection test for Numeric, Verbal and Inductive Reasoning. This test can be completed either on campus or online.
- A comprehensive CV indicating your work experience.
- Mathematics at NNS (Grade 12) level or equivalent; proficiency in English.

Programme content
It is expected of students to complete twelve compulsory modules and three electives:

Programme module:

<td>Risk Management</td>
<td>Both</td>
</tr>
</tbody>
</table>

* Note: The Project Management elective has a weighting of 16 credits, which is equal to two of the other electives. Students who choose this elective only need to select one other elective.

Assessment and examination
All modules are assessed via written assignments and the submission of a final assignment. Students have to obtain at least 50% for each core module (96 credits) and 50% for 24 credits via elective modules to graduate.

Assessment and recognition of prior learning
Wider access is assured through the Assessment and Recognition of Prior Learning (ARPL) process. According to Stellenbosch University’s policy framework for ARPL, a limited number of non-degree students may join the MBA programme. The number of ARPL candidates may not exceed 10% of an annual intake of a programme.

Stringent assessment criteria are applied to determine whether applicants have developed the necessary generic competencies during their undergraduate learning.

1.3 Postgraduate Diploma in Development Finance (Bellville Park Campus)

Credits
This postgraduate diploma is presented at NQF level 8 (120 credits).

Programme description
This internationally accredited programme is the ideal starting point for junior and mid-level managers interested in a career in Development Finance and the funding of growth initiatives such as roads, telecommunication infrastructure, hospitals and houses. The programme is focused on Africa, but the skills acquired can be applied in any developing economy. This is a modular programme (two on-campus blocks of classes spread over one year), which allows students to study while they work.
Programme outcomes
Upon completion of this programme, participants should be able to demonstrate the ability to:

- Understand development finance, especially in Africa.
- Diagnose and analyse development finance policy issues, problems or projects.
- Contribute meaningfully to the design and formulation of development finance policies and programmes to address development needs within specific contexts.
- Implement development finance policies.
- Monitor and evaluate the feasibility and outcomes of development finance projects.
- Write an analytical research report on a topical development finance issue.

Recognition of prior learning
A limited number of candidates without the required degrees but with proven relevant experience in the field of development finance can be admitted on the basis of a portfolio of proven comparable competencies.

Specific admission requirements
A Bachelor’s degree in any of the following: Economics, Finance, Accounting, Commerce or Management

or

Any other three-year Bachelor’s degree with at least two years’ relevant experience.

Programme content
Students need to complete six compulsory modules and two elective modules.

Programme module:

</tr>
</tbody>
</table>

**Assessment and examination**

Student progress is monitored by means of continuous assessment. Learning achievement of students will be assessed through: tests, individual and group assignments.

### 1.4 Postgraduate Diploma in Dispute Settlement (Bellville Park Campus)

**Credits**

This postgraduate diploma is presented at NQF level 8 (120 credits).

**Programme description**

The Postgraduate Diploma in Dispute Settlement is the only dispute settlement diploma offered by a tertiary institution in South Africa. The successful completion of the programme will enable candidates to apply for admission as mediators or arbitrators on the panels of the foremost private service providers in this field.

On a professional level, this diploma will enable participants, including people employed in other professional fields, such as attorneys, architects and accountants, to establish themselves as dispute settlement practitioners in a constructive and cost-effective way. It also includes people working in the corporate or public sector, as well as those who do not wish to practise as dispute settlement specialists, but who are expected to deal with conflict and differences.

**Programme outcomes**

**Learning philosophy**

The programme is based on a student-centred learning approach. It combines theory with practical case studies and role play. The course is delivered through a combination of lectures (contact time), independent self-study of standard texts and references as well as prepared materials, and practical work (role playing and case studies). This will sufficiently prepare and enable students to engage effectively in, and to think comprehensively and systematically about, dispute resolution.

**Recognition of prior learning**

A limited number of candidates without the required degrees and proven relevant experience in the field of dispute resolution can be admitted on the basis of a portfolio of proven comparable competencies.
Specific admission requirements
- A relevant Bachelor’s degree.
- Proven relevant experience in dispute resolution is recommended.
- All applicants will be required to submit to a telephonic or in-person interview.

Programme content
Participants must do two compulsory modules during the first six-day on-campus session and must also choose one of two five-day electives (this programme is presented over one year). Participants also have the option of completing both electives for an additional tuition fee. Between learning modules, participants continue to apply their skills in practice, experiment with new approaches to resolve differences, submit assignments and engage in reflective work.

Assessment and examination
Student progress is monitored by means of continuous assessment focusing on individual performance. Assessments consist of class participation, written assignments, peer- and facilitator-reviewed role play, a video assessment, and one integrated case study role play. Students are mentored throughout the programme.

1.5 Postgraduate Diploma in Environmental Management

Credits
A minimum of 120 credits.

Specific admission requirements
A bachelor’s degree with a final pass mark of at least 60% in any of the following major subjects: Geography and Environmental Studies, Sociology, Economics, Public and Development Management, Geology, Botany, Zoology, Agricultural Economics, Logistics, Forestry, Ecology/Nature Conservation, Civil Engineering, Architecture, Town and Regional Planning, Surveying or any other field regarded as equivalent. On the basis of relevant work experience indicated on the application, other fields could be accommodated.
Students are expected to have acquired an acceptable level of computer literacy by the commencement of classes.

**Duration**
The programme is presented on a modular basis over a one-year period and requires attendance of eight compulsory contact sessions of a week each over the course of the year.

**Presentation**
English, though assignments and examinations may be written in Afrikaans if preferred by the student.

**Programme content**
A brochure is available from the Programme Administrator, tel. 021 808 2151, E-mail jjs3@sun.ac.za.

<td>Both</td>
</tr>
</tbody>
</table>

* Elective modules may, with permission of the programme coordinator, be exchanged with any other module from the Postgraduate Diploma in Sustainable Development.

**Assessment and examination**
Written theoretical, practical and oral examinations as well as written assignments or tasks may be required by the various modules.

A final mark of 50% is required to pass a module and a final mark of 75% is required to pass with distinction (cum laude). Accordingly, an average final mark of 50% is required to pass the programme and an average final mark of 75% is required to pass with distinction (cum laude).
Selection
Due to the limited number of students that can be accommodated annually, selection in accordance with the official selection policy of the University may be unavoidable. Successful students must pay a non-refundable deposit to ensure their space on the programme.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
Normally late January or early February before the official commencement of classes.

1.6 Postgraduate Diploma in Financial Planning

Credits
A minimum of 120 credits must be obtained.

Programme description
The postgraduate programme is presented at the Bellville Park campus of Stellenbosch University. The lectures take place Tuesday and Thursday evenings. Students can choose to complete the programme in one or two years.

Specific admission requirements
Grade 12 Mathematics:

- A minimum of 50% (level 4) is a prerequisite for all applicants. For matric results before 2009, at least 60% (SG) or 40% (HG) is required.
- BCom or LLB OR a bachelor’s degree approved by Senate.

Duration
One or two years.

Presentation
English.

Programme content
See programme outline below.

Assessment and examination
Module work is assessed by means of tests and examinations. An additional FPI examination (administered by the FPI) is written to comply with one of the requirements for CFP accreditation.

Selection
Selection of students in accordance with the University’s official selection policy may be unavoidable due to the limited number of students that can be accommodated.

Application
Applications for a specific year must be received by the last day of October of the previous year.

Programme start date
January

1.7 Postgraduate Diploma in Futures Studies (Bellville Park Campus)

Credits
This postgraduate diploma is presented at NQF level 8 (120 credits).

Programme description
Full details are available:
http://www.usb.ac.za/Common/Pdfs/1Pagers/PGDFutureStudies/USBPGD_Futurestudies.pdf

Futures Studies serve the needs of individuals, groups, organisations and governments to enhance an understanding of possible changes in their long-term future and to respond accordingly. This is particularly important in the light of Africa’s and South Africa’s imperative to raise the quality of life of its peoples. This, in turn, requires the development of a growing number of open-minded citizens and institutions capable of displaying a holistic understanding of the social, ethical, political, technical and economic forces shaping the future.

As the only programme of its kind presented in Africa (and one of only a few in the world), the Postgraduate Diploma in Futures Studies equips candidates with high-level competencies to react meaningfully to growing complexity in the organisational environment, while taking into account the unique developmental challenges facing Africa and South Africa (including health and education deficits, global participation, and human security). The Postgraduate Diploma in Futures Studies contributes to candidates’ ability to make significant strategic long-term decisions in an increasingly internationally competitive and volatile environment.

Programme outcomes
The program outcomes and objectives are based on the following core values:

- Cultivating a professional conscience.
- Developing relevant thinking styles and skills.
- Meeting internationally acceptable and recognised quality standards.
Programme format and credits
- The programme is presented over a period of one year through blended learning. Students choose between on-campus classes or online classes. There is a compulsory on-campus block of four days at the start of the programme.
- Teaching, discussions and presentations will be conducted in English; however, assignments, tests and examinations may be written in Afrikaans.

Specific admission requirements
The following admission requirements are applicable for the Postgraduate Diploma in Futures Studies:
- An appropriate, recognised and valid Bachelor’s degree from a university or university of technology.
- A minimum of two years’ experience in the field of strategic management or long-term planning.
- A limited number of candidates may be admitted in accordance with Assessment and Recognition of Prior Learning (ARPL).
- The same criteria are applicable as in the case of the Postgraduate Diploma in Business Management and Administration, including the submission of a comprehensive portfolio of learning.

1.8 Postgraduate Diploma in HIV/AIDS Management

Programme description
This postgraduate diploma is presented by the Africa Centre for HIV/AIDS Management of Stellenbosch University. It is an online (via the Internet) teaching programme that is presented only in English on a part-time basis over one academic year. Students have to attend one compulsory contact session in January – a week-long summer school at Stellenbosch. Students must complete six modules of 20 credits each. A number of compulsory satellite classes will be presented on Saturdays.
**Programme content**
See layout below.

**Pass requirements**
Students must pass all six modules to obtain the necessary 120 credits to pass the diploma.

**Assessment and examination**
The programme makes use of continuous assessment by means of individual assignments.

**Credits**
120 credits to complete the programme

**Selection**
Only a limited number of students are accepted each year on the grounds of their qualification, appropriate experience and computer skills.

**Application**
The admission requirements are: (i) any bachelor’s degree or National Higher Diploma or equivalent, (ii) appropriate managerial experience and (iii) computer, internet and e-mail skills.

**Application for admission**
Prospective students have to apply in writing before 31 October of the year prior to their studies. Application forms are available from the Africa Centre for HIV/Aids Management, or on the Centre’s website.

1.9 Postgraduate Diploma in Leadership Development (Bellville Park Campus)

Credits
This postgraduate diploma is presented at NQF level 8 (120 credits).

Programme description
This programme addresses the need to establish a leadership culture and practices that build a sustainable, competitive, market-based and democratic society. An absence of positive leadership attitudes in public and private organisations continues to inhibit constructive transformation of organisational and leadership practices. Sound technocratic and managerial competencies still form the foundation of high performance, but it is the added presence of clearly discernible leadership competencies that separates average from superior performance.

Programme outcomes

Learning philosophy
The content of this programme is rooted in well-founded academic research and internationally benchmarked theory and practices. The main objective is to encourage students to combine academic rigour and experiential learning which is applied within the larger framework of internationally benchmarked action and work-based learning. Students are mentored throughout the programme.

Recognition of prior learning
A limited number of candidates without the required degrees and proven relevant experience in the field of leadership can be admitted on the basis of a portfolio of proven comparable competencies.

Specific admission requirements
A relevant Bachelor’s degree or demonstrated assessment and recognition of prior learning (ARPL). Proven relevant experience of three to five years in a managerial role is essential.

Programme content
Students need to complete the seven compulsory modules and one elective. The modules establish the foundations of the four dimensions of leadership development, namely me (personal leadership), we (interpersonal or team leadership), work (organisational leadership) and world (societal leadership). The elective enables participants to develop a specific leadership attribute or a more specialised core competence.
Compulsory modules:

</tr>
</tbody>
</table>

Assessment and examination

Student progress is monitored by means of continuous assessment. The postgraduate diploma will provide learners with both the theoretical and practical underpinning of leadership development. The theoretical part of the course will be delivered through a class programme of lectures, case studies, tutorials and assignments, while the practical part will consist mainly of syndicate groups, peer-based coaching and workplace application.

1.10 Postgraduate Diploma in Marketing

Credits

A minimum of 120 credits.

Specific admission requirements

Any acceptable bachelor’s degree obtained in a field other than marketing. The field of marketing includes the following disciplines at bachelor’s level: marketing, consumer behaviour, retail management, marketing communication, services marketing.

Duration

One year full-time from January to November.

</table>

Assessment and examination

The programme is subject to continuous assessment. A variety of procedures and methods are employed to undertake the assessment, including written and oral presentations, tests, examinations, case studies, and individual and group assignments.

Selection

Strictly according to admission requirements and performance in bachelor’s degree. Only full-time students will be considered for the programme.

Application

Applications for a specific year must be received by the last day of October of the previous year.

Programme start date

The last week of January.
1.11 Postgraduate Diploma in Project Management (Bellville Park Campus)

Credits
This postgraduate diploma is presented at NQF level 8 (120 credits).

Programme description
Managers are facing increasingly complex challenges, having to contend with rapid changes stemming from constant obsolescence of their products, the necessity for rapid response to their markets and moving fast when faced with opportunities. This situation is exacerbated by most of these challenges being of a discontinuous nature and increasingly requiring inputs across the organisation, across various organisations or even across various countries. Project management is concerned with delivering a specified, discontinuous deliverable by a specific team representing the various specialist skills required, against planned performance, time and cost targets, and is therefore eminently suited to the above scenario. Even with regard to the public sector, Government has publicly emphasised the need to embrace project management as the way to deliver services and improve service levels.

Programme outcomes

Learning philosophy
Project management is not a basic management science but an applied management science, building on, applying and integrating basic management knowledge. The proposed qualification, therefore, should combine those management skills underlying effective project management with the philosophy, principles and techniques particular to manage by project. This will not only prepare and increase the availability of competent project managers, but also start to build a pool of executive managers able to manage the project management function in organisations. In addition, it should create upper management skills in respect of understanding the relationship between project management and functional management as well as the integration of projects with the strategic management of organisations.

Recognition of prior learning
A limited number of candidates without the required degrees and proven relevant experience in the field of project management can be admitted on the basis of a portfolio of proven comparable competencies.

Specific admission requirements
A relevant Bachelor’s degree and a minimum of two years’ experience in a project management position.
Programme content
Participants must complete eight compulsory modules over a course of two years (four modules in year one and four modules in year two).

Programme module

</tbody>
</table>

Assessment and examination
Learning achievement of students will be assessed through:

- Individual written assignments for each module as summative assessment requiring the application of theoretical framework in the work context
- A minimum of four written exams on the integration of related modules as summative assessment
- Syndicate and group work as formative assessment
- One group business-driven action learning assignment as formative assessment.

1.12 Postgraduate Diploma in Sustainable Development

Credits
A minimum of 120 credits.

Specific admission requirements
1. Any bachelor’s or BTech degree or a relevant four-year diploma with a 60% pass mark in one of the following major subjects: Town and Regional Planning, Housing, Geography and Environmental Studies, Sociology, Social sciences, Psychology, Economics, Public and Development Management, Geology, Botany, Zoology, Forestry, Ecology/ Nature Conservation, Mathematics, Statistics, Agricultural Economics, Transport Economics, Forestry, Civil/Structural/Mechanical/Electrical Engineering, Architecture, Land Surveying or any other major discipline approved by the Programme Committee. Relevant work experience will also be considered for admission; or
2. Any tertiary three-year programme of formal studies with five years’ working experience and compliance with the Assessment and Recognition of Prior Learning (ARPL) policy of the University and the School of Public Leadership. According to this policy, the equivalent of 120 credits at NQF level 7 (bachelor’s degree level) must be acquired in one or more of the following ways, subject to the decision of the Programme Committee, consisting of the Director of the School of Public Leadership, the Programme Director and other relevant persons:

- 2.1 Completion of supplementary modules prior to or during the degree programme
- 2.2 Recognition of professional short courses, in-service training courses and completed subjects for a degree or diploma
- 2.3 Submission of a learning portfolio, with copies of written work (manuals, project proposals, reports, etc.)
- 2.4 Passing an entrance examination

**Programme structure**

This structured transdisciplinary programme, with four options/specialisations that focus on the planning, management and practice of sustainable development, is presented in partnership with the Sustainability Institute. The structured Postgraduate Diploma in Sustainable Development is obtained through coursework (eight modules of 15 credits each). Unless specified otherwise by the Programme Director from time to time, all modules will be presented on the premises of the Sustainability Institute at Lynedoch.

**Duration**

The postgraduate diploma can be obtained after a minimum period of one year and the successful completion of eight modules. The programme is presented over a period of one year (full-time) or two years (part-time) in a modular format consisting of a minimum of a six-day modular contact session per module (unless a longer duration is specified in the Course Outline of the module), with independent structured self-study for the rest of the study period.

**Presentation notes**

The language of instruction during formal teaching sessions, class discussions and class presentations will be English.

**Notes**

Please note that approval in terms of the ARPL policy requires quite a lot of additional information, and also takes time. Often it is a condition of acceptance that the student successfully completes one or more modules in a year as an executive student, after which the ARPL application will be processed. The student can then formally register the year following his/her original application, but all completed modules will be recognised for the purpose of the degree.

Also note that a Postgraduate Diploma is an Honours-level multidisciplinary postgraduate qualification that is formally recognised by the South African Qualifications Authority and is also, therefore, recognised internationally.
Programme content

This structured transdisciplinary postgraduate diploma is composed of coursework that focuses on the planning, management and practice of sustainable development. Four programme options are provided for, with different combinations of modules in each of the options. Each option consists of eight modules that have to be completed. Modules of the Postgraduate Diploma in Sustainable Development that have been completed by students as executive or special students (including successful completion of all group work and individual assignments and journals) will be recognised for the purpose of the degree, to a maximum of four modules. Note that students can continue their specialisation through to the MPhil level.

The coursework component of the Postgraduate Diploma in Sustainable Development is composed of a compulsory foundation module and compulsory and elective core modules.

Programme composition
The foundation module (Sustainable Development) is compulsory. Each option/specialisation (Sustainable Development, Sustainable Development Planning, Sustainable Food Systems, Renewable and Sustainable Energy, Political Economy of Development) requires a specific combination of module selections. The requirements are described in detail below.

Option 1: Sustainable Development
This option makes it possible for students to craft their own programme of sustainability studies by selecting any combination of modules from all modules offered in the Postgraduate Diploma in Sustainable Development. Students must select one compulsory module and seven core modules. A maximum of two core modules can be selected from the modules offered by the Engineering Faculty.

Option 2: Sustainable Development Planning

Students who intend to practice as planners in South Africa or elsewhere are advised to select this programme option. Students are required to complete six compulsory modules, and may then select additional modules from the list of core modules, and may then select any two modules from the list of core modules offered by the School of Public Leadership and the Engineering Faculty. (Note: If permission is granted to reduce the number of compulsory modules, no more than two modules can be selected from the modules offered by the Engineering Faculty.)

</tbody>
</table>

Students may request in writing to be exempted from any compulsory planning module by the Programme Director if they can prove the completion of a similar postgraduate module at any university, but will then have to choose another module in the place of that module from the list of core modules.

All students wanting to complete the Sustainable Development Planning option are advised to first complete the Introduction to Development Planning module before attending any other development planning modules.

After completion of the Postgraduate Diploma in Sustainable Development, students wishing to complete this option of the MPhil in Sustainable Development are advised to select four additional electives as listed under this programme. The research component for the MPhil in Sustainable Development will also need to have a Sustainable Development Planning focus.
Two core modules must be selected from the options described below:

Core modules presented by the School of Public Leadership:

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>

<td>15</td>
<td>Renewable Energy Systems</td>
<td>1</td>
</tr>
</tbody>
</table>

Option 3: Sustainable Food Systems

Students interested in the entire food chain stretching from primary production, to the consumption of food, through to food waste are encouraged to select this option. Students must select eight modules from the following options as specified.

Programme module:

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>58122</td>
<td>788</td>
<td>120</td>
<td>Sustainable Development Planning and Management</td>
<td>Both</td>
</tr>
</tbody>
</table>
Compulsory modules:

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>12232</td>
<td>774</td>

<td>Both</td>
</tr>
<tr>
<td>64890</td>
<td>714</td>
<td>15</td>
<td>Renewable Energy Systems</td>
<td>1</td>
</tr>
</tbody>
</table>
Option 4: Renewable and Sustainable Energy

The programme is jointly managed by the Centre for Renewable and Sustainable Energy Studies (Department of Mechanical and Mechatronic Engineering), the School of Public Leadership and the Sustainability Institute. Students who enrol for this option will be studying together with Engineering students. This creates a challenging learning environment that will prepare people for working across disciplines as is required for those who pursue careers in the sustainable energy field. Students are required to complete certain compulsory modules and also select additional modules from the list of core modules. Some of these modules will be taught by departments in the Engineering Faculty.

</table>

Option 5: Political Economy of Development
The establishment of the National Planning Commission (NPC) and our research on emerging trends across a number of rapidly growing developing countries point to the need for a field of study that serves students interested in the relationship between economic growth, state-driven economic planning processes and sustainability.

After completion of the Postgraduate Diploma in Sustainable Development, the research component of the MPhil must have a renewal and sustainability focus

**Assessment and examination**

The foundation, core and general modules will be subject to continuous assessment, which includes a combination of any of the following methods:

- two individual assignments to be handed in after completion of the module on a date stipulated in the course outline or by the course convenor;
- group work (normally working in groups during the module);
- a journal of readings and reflections on the module;
- a written examination/test and/or an oral examination; and
- short daily class assignments, based on prescribed readings.

Each module coordinator has discretion as to the most appropriate combination of assessment methods, provided that each assessment does not count more than 25% of the total mark for the module.

A final mark of 50% is required to pass a module and a final mark of 75% is required to pass with distinction (cum laude). To pass the Postgraduate Diploma in Sustainable Development, an average final mark of 50% (including a pass mark of 50% for each of the modules) is required and an average final mark of 75% is required to pass with distinction (cum laude). A minimum of 50% for each individual assignment is required for each module.
Selection
Due to the limited number of students that can be accommodated in the programme, yearly selection in accordance with the overall selection policy of the University may be unavoidable. Preference will be given to applicants with relevant experience who apply early.

Application
Applications for any given year should be received before the end of August of the previous year unless the programme coordinator allows a student to apply later.

Enquiries
Enquiries regarding the programme content, study fees and application procedure can be addressed to The Administrator: Master’s Programme in Sustainable Development, School of Public Leadership, Stellenbosch University, PO Box 162, Lynedoch 7603.
Tel.: 021 881 3952; E-mail: beatrix.steenkamp@spl.sun.ac.za.

2. Honours programmes

2.1 BComHons

2.1.1 BComHons (Actuarial Science)

Programme description
The Actuarial Science Honours programme is suited to students who have completed an undergraduate degree in Actuarial Science and who have been exempted from (or passed the profession’s examinations in) most of the technical subjects of the Actuarial Society of South Africa (or Institute and Faculty of Actuaries). The degree offers successful students exemptions from the profession’s examinations up to the level of associate actuary.

Specific admission requirements
- A BCom (Actuarial Science) or equivalent degree with Actuarial Science and Mathematical Statistics as majors;
- Passes in university modules equivalent to at least seven of the eight foundation and intermediate technical subjects of the Actuarial Society of South Africa (or core technical subjects CT1–CT8 of the Institute and Faculty of Actuaries); and
- Exemptions from (or passes in the profession’s examinations for) at least five of the foundation and intermediate technical examinations of the Actuarial Society of South Africa (or core technical examinations CT1–CT8 of the Institute and Faculty of Actuaries), including at least one of the subjects A201 (CT1) or A203 (CT5).
**Programme content**

*Note:* At least 120 credits must be completed from the list of compulsory and elective modules below.

Not all of the listed modules may be offered every year. Students should contact the Department to find out which modules will be available.

**Programme module:**

<table>
<thead>

</table>

Students can elect from the honours modules following the 300-level modules of their other major subject(s) up to a maximum of 32 credits, subject to the permission of the relevant department, to contribute to a minimum of 120 credits.

2.1.3 **BComHons (Business Management)**

**Credits**

A minimum of 120 credits.

**Specific admission requirements**

A BA, BCom or BAgricAdmin degree from this University or another bachelor’s degree that has been approved by Senate, and an average of 60% in the modules from the respective focal areas offered by the Department of Business Management.
All prospective postgraduate students and in particular students who graduated in other departments must consult the departmental website as there are both general and module-specific requirements for individual postgraduate modules.

Admission is also subject to attendance of a compulsory orientation programme during the week before the commencement of official classes.

**Programme structure**
A student who wishes to study Business Management as major has to obtain a minimum of 120 credits, of which at least 84 credits have to be earned in subjects that are offered by the Department of Business Management. A maximum of 36 credits may be earned by way of advanced study in the following departments (the credit values of such study must be decided in advance by the Chairperson of the Department of Business Management and the respective departments):

- Accounting
- Agricultural Economics
- Economics
- Graduate School of Business
- Industrial Psychology
- Logistics
- Statistics and Actuarial Science

**Duration**
Twelve months.

**Programme content**
The following modules are offered by the Department of Business Management, subject to annual approval by the Chairperson of the Department. (All modules are not necessarily presented every year.)

The respective modules must be selected in consultation with the Chairperson of the Department. Further information on the content of the programme can be obtained on the Department’s website at [http://academic.sun.ac.za/business/](http://academic.sun.ac.za/business/).

* Module not presented in 2016;

and/or

Any elective module(s) to a maximum of 36 credits from another department in any faculty within Stellenbosch University, in consultation with the Chair of the Department of Business Management;

or

Any elective module(s) to a maximum of 36 credits from another university, according to the existing exchange agreements of Stellenbosch University, in consultation with the Chair of the Department of Business Management.

Assessment and examination

Examinations take place at the end of the first semester in June and at the end of the second semester in November.
Selection
Only a limited number of applicants may be accommodated in the programme. Selection may therefore take place in accordance with the University’s overall selection policy.

Application
Applications for a particular year must be received by the last day of October of the previous year.

Programme start date
One week before the official commencement of lectures.

or

Any elective module(s) to a maximum of 36 credits from another university, according to the existing exchange agreements of Stellenbosch University, in consultation with the Chair of the Department of Business Management.
2.1.7 BComHons (Economics)

One of two streams can be chosen for the honours programme: Pure Economics or Financial Economics. The semester in which the modules are presented may change at short notice from year to year.

Credits

A minimum of 120. A maximum of 20 credits may be obtained from a related and approved field of study.

Specific admission requirements

- A bachelor’s degree with an average mark of at least 60% for Economics 3.
- A minimum achievement mark of 60% in the Intensive Mathematics course that precedes the formal programme.
- Grade 12 Mathematics at least a 5 (60%).

In exceptional circumstances, a student that does not meet the Grade 12 Mathematics requirement may be considered for admission via the University’s policy for the Assessment and Recognition of Prior Learning.

Duration

Twelve months. Must be completed within three years. If not, the compulsory modules must be repeated.

Presentation

English.

* A final mark of 65% in Investment Management 344 is a prerequisite.

**Investment Management 254 is a prerequisite pass module. Investment Management 314, 324 and 354 are strongly recommended and selection of students takes place.

Assessment and examination
Examinations are written at the end of the first semester in June and at the end of the second semester in November. Examination results are supplemented by the assessment of coursework, including a relatively large number of essays and an assignment.

Selection
Selection of students in accordance with the University’s official selection policy may be unavoidable due to the limited number of students that can be accommodated in the programme.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
A three-week intensive Mathematics course precedes the formal programme and commences early January.

2.1.8 BComHons (Economics and Mathematical Statistics)

Credits
A minimum of 164 credits.

Specific admission requirements
Students have to be accepted for honours studies in both the Department of Economics (at least 60% average for Economics 3) and the Department of Statistics and Actuarial Science (at least 60% average for Mathematical Statistics 3).

Grade 12 Mathematics at least a 6 (70%).

Duration
Twelve months. Must be completed within three years. If not the compulsory modules must be repeated.

Programme content
The programme comprises at least 54 credits (four modules) from Economics and 48 credits (four modules) from Mathematical Statistics. Two additional modules must be taken from Economics and/or Mathematical Statistics and 42 credits are earned from an assignment consisting of a statistical application in a field of economics, with joint supervision from both departments.
Please note that the first semester of a year module is a requirement for continuing study in the second semester. The semester in which the modules are presented may change at short notice from year to year. Also see the programme outline below.

**Assessment and examination**
Examinations are written at the end of the first semester in June and at the end of the second semester in November. Examination results are supplemented by the assessment of coursework, including a relatively large number of essays and an assignment.

**Selection**
Selection of students in accordance with the University’s official selection policy may be unavoidable due to the limited number of students that can be accommodated in the programme.

**Application**
Applications for a specific year must be received by the end of October of the previous year.

**Programme start date**
Early January.
2.1.9 BComHons (Financial Analysis)

Credits
A minimum of 120 credits.

Specific admission requirements
A BCom (Management Sciences) or BCom degree with Investment Management as focal area from this University or another bachelor’s degree that has been approved by Senate; and an average of 65% in the third-year Investment Management modules, as well as a pass mark for Financial Management 314 and 332.

All prospective postgraduate students and in particular students who graduated in other departments must consult the departmental website as there are both general and module-specific requirements for individual postgraduate modules.

Admission is also subject to attending a compulsory orientation programme during the week before the commencement of the official classes.

Programme structure
A student for the BComHons (Financial Analysis) degree has to obtain a minimum of 120 credits.

Duration
Twelve months.

Notes
An information brochure is available on the Department’s website at http://academic.sun.ac.za/business/.

Programme content
See the programme outline below. More information on the content of the programme may also be found on the Department’s website at http://academic.sun.ac.za/business/.

Assessment and examination
Examinations take place at the end of the first semester in June and at the end of the second semester in November.

Selection
Only a limited number of applicants may be accommodated in the programme. Selection may therefore take place in accordance with the University’s overall selection policy.

Application
Applications for a particular year must be received at the end of October of the previous year.

Programme start date
One week before the official commencement of lectures.

2.1.10 BComHons (Financial Risk Management)

Credits
A minimum of 120 credits.

Specific admission requirements

Duration

Assessment and examination
Examinations are written at the end of the first semester in June and at the end of the second semester in November. Examination results are supplemented by the assessment of various practical assignments.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
One and a half weeks prior to the general commencement of classes.

2.1.11 BComHons (Human Resource Management)

Credits
A total of 120 credits.

Programme description
The BComHons (Human Resource Management) is offered on a full-time basis.

Programme outcomes

First meeting
The first meeting for full-time honours students is one week before the commencement of classes for undergraduate students, at 08:30 in the Honours room of the Mathematical Science-Industrial Psychology building.

Pass requirements
All the required modules (120 credits in total) have to be passed with a mark of at least 50% in each module, although the average for the modules offered for a degree programme will represent the student’s final mark.

Recognition period of honours modules
Recognition of honours modules for graduation purposes usually expires after five years, unless written permission has been obtained to extend the recognition period.
Registration as Chartered Human Resource Practitioner
The programme BComHons (Human Resource Management) could, after approved practical work, lead to registration with the South African Board for People Practices (SABPP) as chartered human resource practitioner. Detailed information is available on the SABPP’s website at http://www.sabpp.co.za.

Specific admission requirements
A recognised bachelor’s degree with Industrial Psychology as major, as well as undergraduate exposure to all Industrial Psychology modules is required, among other things, for the BComHons (Human Resource Management) degree. Students who have a bachelor’s degree without Industrial Psychology as major must first pass all the required undergraduate Industrial Psychology modules as a special student, or be granted exemption from those subjects if comparable modules have been passed elsewhere, before they will be considered for selection for the BComHons (Human Resource Management) degree. An average of 60% for the Industrial Psychology final-year modules is required for admission to the degree.

Other requirements
To qualify for admission to BComHons (Human Resource Management), the following modules offered by the Department of Industrial Psychology are required: Industrial Psychology 114, 152 and 162, Industrial Psychology 214, 224 and 244, Industrial Psychology 314, 324 and 348.

</tbody>
</table>

Exit criteria

Compulsory vacation work

Full-time students should do compulsory job shadowing for five working days in an approved industrial organisation before admission to either one of the honours programmes. Students should write a draft report about the work experience (in English) before the commencement of the programme. See the departmental website for further information.

Assessment and examination

A system of continuous assessment is used.

A final mark of 50% is required for each module in order to pass the programme. If a pass mark is not obtained for a specific module, it can be repeated only once.

Selection

A limited number of students are selected on the basis of academic performance and other selection requirements. An average achievement of 60% is required in the undergraduate final year Industrial Psychology modules for admission to the honours programme in Human Resource Management. The students that have been selected must inform the Department in writing before the end of the second week in December whether they will be proceeding with the programme.
Application

Students should apply in writing before 31 October of the year prior to the start of their studies on the official application form of the University as well as on the specific departmental application forms that are obtainable from the departmental website (http://www.sun.ac.za/industrial_psychology/). Late applications will be considered in exceptional cases only. No applications for admission to the honours programme during the second semester will be considered.

Enquiries

For more information regarding postgraduate programmes offered by the Department of Industrial Psychology, visit our website at http://www.sun.ac.za/industrial_psychology/ or contact 021 808 3005.

2.1.12 BComHons (Industrial Psychology)

Credits

A total of 120 credits

Programme description

Registration as psychometrist (independent practice)

In terms of the requirements of the Professional Board for Psychology of the Health Professions Council of South Africa (HPCSA), a person will be eligible for statutory registration as a psychometrist (independent practice) after having completed the BCom (Industrial Psychology) (previous programme name BCom (Psych)) and BComHons (Industrial Psychology) (previous programme name BComHons (Psych)) degrees, having completed the approved BPsych equivalence programme and after having successfully written a professional board examination set by the Psychometric Committee of the Professional Board for Psychology of the HPCSA. Additional detailed information is available on the website of the HPCSA (http://www.hpcsa.co.za).

Detailed information on the prerequisites for statutory registration as an industrial psychologist is available on the website of the HPCSA (http://www.hpcsa.co.za).

The Department offers the BComHons (Industrial Psychology) on a full-time basis.

Programme outcomes

First meeting

The first meeting for full-time honours students is one week before the commencement of classes for undergraduate students, at 08:30 in the Honours room of the Mathematical Science/Industrial Psychology building.
Pass requirements
All the required modules (120 credits in total) have to be passed with a mark of at least 50% in each module, although the average for the modules offered for a degree programme will represent the student’s final mark.

Recognition period of honours modules
Recognition of honours modules for graduation purposes usually expires after five years, unless written permission has been obtained to extend the recognition period.

Specific admission requirements
The BCom (Industrial Psychology) (previous programme name BCom (Psych)) qualification, or an equivalent bachelor’s degree which leads to statutory registration as psychometrist (independent practice) and industrial psychologist, is required for admission to the honours degree programme in Industrial Psychology (BComHons (Industrial Psychology)). Alternatively, a BA degree with Psychology and Industrial Psychology up to third-year level is required, or a BCom qualification with Industrial Psychology and modules from Business Management up to third-year level. In both of these last two instances, the 60% requirement for the Industrial Psychology final-year modules is still valid.

The following Business Management modules at second-year level are recommended: Financial Management 214, Investment Management 254, Marketing Management 214, 244 as well as Entrepreneurship and Innovation Management 214, 244 are recommended as alternative elective modules.

Recommended elective modules at the third-year level are: Financial Management 314, 332, 352 and 354. Marketing Management 314, 324, 344, 354 as well as Entrepreneurship and Innovation Management 318, 348 are recommended as alternative elective modules.

Practicals and seminars at second- and third-year level are presented during scheduled double periods.

Other requirements
Students with a bachelor’s degree without Industrial Psychology as major has to pass, as a special student, all outstanding undergraduate Industrial Psychology modules, or obtain exemption from it if comparable modules have been passed elsewhere. The following modules offered by the Department of Industrial Psychology are required: Industrial Psychology 114, 152 and 162, Industrial Psychology 214, 224 and 244, Industrial Psychology 314, 324 and 348.

Duration
Full-time BComHons (Industrial Psychology): 1 year

Exit criteria

Compulsory vacation work
Full-time students should do compulsory job shadowing for five working days in an approved industrial organisation before admission to either one of the honours programmes. Students should write a draft report about the work experience (in English) before the commencement of the programme. See the departmental website (http://www.sun.ac.za/industrial_psychology/) for further information.

Assessment and examination
A system of continuous assessment is used.
A final mark of 50% is required for each module in order to pass the programme. If a pass mark is not obtained for a specific module, it can only be repeated once.

Selection
A limited number of students are selected on the basis of academic performance and other selection requirements. An average achievement of 60% is required in the undergraduate final-year Industrial Psychology modules for admission to the honours programme. The students that have been selected must inform the Department in writing before the end of the second week in December whether they will be proceeding with the programme.

Application
Students should apply in writing before 31 October of the year prior to the start of their studies on the official application form of the University, as well as on the specific departmental application form obtainable from the departmental website (http://www.sun.ac.za/industrial_psychology/). Late applications will be considered in exceptional cases only. No applications for admission to the honours programme during the second semester will be considered.
Enquiries
For more information regarding postgraduate programmes offered by the Department of Industrial Psychology, visit our website at http://www.sun.ac.za/industrial_psychology/ or contact 021 808 3005.

2.1.13 BComHons (Information System Management)

Credits
A minimum of 120 credits.

Programme description
The purpose of the programme is two-fold. Firstly, it aims to consolidate and deepen the knowledge and skills of students with Bachelor’s degrees in the area of Informatics. In doing so the programme aims to deliver a mature graduate with a holistic understanding of information systems as socio-technical phenomena operating in the context of social collectives. Due to the nature of the content covered in the programme it is envisaged that graduates would be more suited to managerial positions in ISM contexts, as opposed to junior developer/analyst positions. The second purpose of the programme is to introduce students to the various aspects of conducting research in the fields of Informatics, Information Systems, Knowledge Management and others. As part of the programme students are expected to conduct a research assignment (30 credits).

Specific admission requirements
Any Bachelor’s degree (NQF Level 7 qualification) in Informatics / Information Systems Management / Computer Science.

For example:
- BCom (Management Sciences) (Focus Area in Information Systems Management)
- BA (Socio-Informatics)

Duration
Twelve months.

</tr>
</tbody>
</table>
Assessment and examination
Three of the four modules follow a continuous assessment policy in which students will be assessed through multiple tests/projects/assignments based on the nature of the content taught. The research module will be examined through the evaluation of a written report.

Selection
Selection of students in accordance with the University’s official selection policy may be unavoidable due to the limited number of students that can be accommodated in the programme.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
The programme starts on the first day of the official commencement of lectures.

2.1.14 BComHons (Logistics Management)

Credits
120 credits.

Specific admission requirements
To be admitted to the BComHons programme, a student must be in possession of the BCom degree, or a bachelor’s degree other than a BCom degree, and must have passed Logistics Management at third-year level with an average of at least 60%.

Duration
Twelve months (full-time).

Presentation
The modules will be presented in English.

Programme content
A student taking Logistics Management 778 must earn at least 120 credits as set out below. A maximum of 30 credits may be obtained from a related and approved field of study. Not all of the listed modules may be offered every year. Students should contact the Department to find out which modules will be available. At least one of the elective modules must be of an analytical/quantitative nature.

</table>

Assessment and examination
Examinations are written at the end of the first semester in June and at the end of the second semester in November. Examination results are supplemented by the assessment of coursework, including a number of essays, assignments and a research seminar.

Selection
Students are selected for this programme primarily based on their academic performance. Only a limited number of students can be accommodated in the programme. Selection takes place in accordance with the University’s overall admission and selection policy.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
One week before the official commencement of lectures.
Enquiries
More information regarding the postgraduate programmes offered by the Department of Logistics is available on the website www.sun.ac.za/logistics, or contact 021 808 2249.

2.1.15 BComHons (Management Accounting)

Credits
A minimum of 120 credits.

Programme description

The training of chartered management accountants

The internationally recognised professional management accounting qualification of chartered management accountant is awarded on passing the qualifying examinations as set by the Chartered Institute of Management Accountants, with its head office in London, and obtaining the necessary practical experience. The BCom (Management Accounting) and BComHons (Management Accounting) programmes, as offered by this University, are recognised by the Chartered Institute of Management Accountants.

Specific admission requirements

A BCom (Management Accounting) or BCom (Financial Accounting) degree obtained from Stellenbosch University or an equivalent qualification from another university and a final mark of at least 60% in Management Accounting 388 and Financial Accounting 389;

or

A BAcc or BAccLLB obtained from Stellenbosch University and a final mark of at least 60% in Management Accounting 378 and a final mark of at least 55% in Financial Accounting 379.

Duration

Twelve months.

Presentation

English.

Assessment and examination
Examinations are written at the end of the first semester and second semester. The examination results are supplemented by class tests, presentations and assignments, which are assessed on a continuous basis. The 786 module is assessed as a research project.

Application
Applications for a specific year must be received not later than 1 November of the preceding year.

Programme start date
At the official commencement of classes.

2.1.16 BComHons (Mathematical Statistics)

Credits
A minimum of 120 credits.

Specific admission requirements
A bachelor’s degree with an average mark of at least 60% for Mathematical Statistics 3.

Duration
Twelve months.

Programme content
Depending on circumstances in the Department, some of the modules listed below may not be offered in a specific year and modules can also be offered in different semesters than listed below.

A compulsory assignment under supervision must be submitted for examination. Permission may be granted to obtain at the most 12 credits from suitable postgraduate modules offered by other departments.

See programme outline below.

### Assessment and examination
Examinations are written at the end of the first semester in June and at the end of the second semester in November. Examination results are supplemented by the assessment of various practical projects.

### Application
Applications for a specific year must be received by the end of October of the previous year.

### Programme start date
One and a half weeks prior to the general commencement of classes.
2.1.17 BComHons (Operations Research)

Specific admission requirements
To be admitted to the BComHons (Operations Research) programme a student must be in possession of a bachelor’s degree and have passed Operations Research with an average of at least 60% at third-year level, or a qualification considered by the Department of Logistics to be of equal standing.

Programme content
A student who enrols for Operations Research 778 must earn at least 120 credits as set out below. Not all of the listed modules may be offered every year. Students should contact the Department to find out which modules will be available.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
One week before the official commencement of lectures.
Enquiries
More information regarding the postgraduate programmes offered by the Department of Logistics is available on the website www.sun.ac.za/logistics, or contact 021 808 2249.

2.1.18 BComHons (Public and Development Management)

Credits
A minimum of 120 credits.

Specific admission requirements
- A BA, BAdmin, BEcon or BCom degree in Public and Development Management with an acceptable study record, or
- Any university degree/BTech degree/four-year tertiary diploma with an acceptable study record, appropriate work exposure and the passing of five NQF level 7 admission modules, or
- Any three-year tertiary diploma with an acceptable study record, at least five years’ appropriate work exposure, meeting the ARPL (Assessment and Recognition of Prior Learning) policy requirements of the University, according to which the equivalent of 120 credits at NQF level 7 are assessed and recognised, as well as the passing of five NQF level 7 admission modules.

Programme structure
This programme is presented by means of modular as well as interactive telematic education. Modular presentation comprises attending blocked contact sessions of two weeks of lectures at the campus. Presentation by means of interactive telematic education requires students to gather for lectures once per term for each module for a whole day at an electronic study centre near their places of residence. The lectures are presented on television from a studio at Stellenbosch and transmitted by satellite to the different study centres in Southern Africa. During the transmission, students can interact telephonically with the lecturer. During the remaining time, the students do assignments and study at home.

Duration
The programme is presented over one year by a combination of modular (blocked session of lectures for two weeks) and interactive telematic education.

Presentation
The medium of instruction is English, but students are free to do assignments and write examinations in Afrikaans.

Notes
In consultation with the Director, School of Public Leadership, students may substitute any module of nine credits with a postgraduate module of equivalent credit value from another major.

Programme content
A brochure is available from the Course Administrator.

**Assessment and examination**
Examination writing is decentralised and takes place in the different study centres.
Assignments, case studies and group projects in the course of each semester and written examinations at the end of each term.
A final mark of 50% is required to pass a module and a final mark of 75% is required to pass with distinction (cum laude). Accordingly, an average final mark of 50% is required to pass the programme and an average final mark of 75% is required to pass with distinction (cum laude).
Selection
Due to the limited number of students that can be accommodated annually selection in accordance with the official selection policy of the University may be unavoidable.

Application
Applications must be received by the end of October of the previous year.

Programme start date
Normally end of January.

Enquiries
Enquiries regarding the programme content, duration, study fees and application procedure can be addressed to the School of Public Leadership, Stellenbosch University, PO Box 610, Bellville 7535.
Tel.: 021 918 4192; E-mail: enquiry@spl.sun.ac.za

2.1.19 BComHons (Quantitative Management)

Specific admission requirements
To be admitted to the BComHons programme, a student must be in possession of the BCom degree, or a bachelor’s degree other than a BCom degree and must have passed Quantitative Management at third-year level with an average of at least 60%, or a qualification considered by the Department of Logistics to be of equal standing.

Assessment and examination
Examinations are written at the end of the first semester in June and at the end of the second semester in November. Examination results are supplemented by the assessment of coursework, including a number of essays, assignments and a research seminar.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
One week before the official commencement of lectures.

Enquiries
More information regarding the postgraduate programmes offered by the Department of Logistics is available on the website www.sun.ac.za/logistics, or contact 021 808 2249.

2.1.20 BComHons (Statistics)

Credits
A minimum of 120 credits.

Specific admission requirements
A bachelor’s degree with an average mark of at least 60% for Statistics 3.

Duration
Twelve months.
Programme content

Depending on circumstances in the Department, some of the modules listed below may not be offered in a specific year and modules can also be offered in different semesters than listed below.

A compulsory assignment under supervision must be submitted for examination.

See programme outline below. Permission may be granted to obtain at the most 12 credits from suitable postgraduate modules offered by other departments.

Assessment and examination

Examinations are written at the end of the first semester in June and at the end of the second semester in November. Examination results are supplemented by the assessment of various practical projects.

Application

Applications for a specific year must be received by the end of October of the previous year.
Programme start date
One and a half weeks prior to the general commencement of classes.

2.1.21 BComHons (Transport Economics)

Specific admission requirements
To be admitted to the BComHons programme in Transport Economics, a student must be in possession of the BCom or another bachelor’s degree subject to the approval of Senate, and must have passed Transport Economics at third-year level with an average final mark of at least 60%.

Programme content
A student taking Transport Economics 778 must earn at least 120 credits as set out below.

Selection
The number of placements is limited to the teaching capacity of the Department of Logistics. Selection takes place in order of academic performance. Note that the enrolment for certain modules is subject to the fulfilment of specific prerequisites.
Application
Applications for a specific year must be received by the end of October of the previous year.

Enquiries
More information regarding the postgraduate programmes offered by the Department of Logistics is available on the website www.sun.ac.za/logistics or contact 021 808 2249.

2.2 BAHons

2.2.1 BAHons (Public Administration)

Credits
A minimum of 120 credits.

Specific admission requirements
- A BA degree in Public and Development Management with an acceptable study record, or
- Any university degree/BTech degree/four-year tertiary diploma with an acceptable study record, appropriate work exposure and the passing of five NQF Level 7 admission modules, or
- Any three-year tertiary diploma with an acceptable study record, at least five years’ appropriate work exposure, meeting the ARPL (Assessment and Recognition of Prior Learning) policy requirements of the University, according to which the equivalent of 120 credits at NQF Level 7 are assessed and recognised, as well as the passing of five NQF Level 7 admission modules.

Programme structure
This programme is presented by means of modular as well as interactive telematic education. Modular presentation comprises attending blocked contact sessions of two weeks of lectures at the campus. Presentation by means of interactive telematic education requires students to gather for lectures at least once per term for each module for a whole day at an electronic study centre near their places of residence. The lectures are presented on television from a studio at Stellenbosch and transmitted by satellite to the different study centres in Southern Africa and Namibia. During the transmission, students can interact telephonically with the lecturer. During the remaining time, the students do assignments and study at home.

Duration
The programme is presented over one year by a combination of modular (blocked session of lectures for two weeks) and interactive telematic education.

Presentation
The medium of instruction is English, but students are free to do assignments and write examinations in Afrikaans.

Notes
In consultation with the Director: School of Public Leadership, students may substitute any module of nine credits with a postgraduate module of equivalent credit value from another major.
Programme content
A brochure is available from the Course Administrator.
Tel.: (021) 918 4192; E-mail: enquiry@spl.sun.ac.za

</tbody>
</table>
Assessment and examination
Examination writing is decentralised and takes place in the different study centres.
Assignments, case studies and group projects in the course of each semester and written examinations at the end of each term.
A final mark of 50% is required to pass a module and a final mark of 75% is required to pass with distinction (cum laude). Accordingly, an average final mark of 50% is required to pass the programme and an average final mark of 75% is required to pass with distinction (cum laude).

Selection
Due to the limited number of students that can be accommodated annually selection in accordance with the official selection policy of the University may be unavoidable.

Application
Applications must be received by the end of October of the previous year.

Programme start date
Normally end of January.

Enquiries
Enquiries regarding the programme content, duration, study fees and application procedure can be addressed to the School of Public Leadership, Stellenbosch University, PO Box 610, Bellville 7535.
Tel.: 021 918 4192; E-mail: enquiry@spl.sun.ac.za

2.3 HonsB
2.3.1 BPubAdminHons
Credits

2.4 BAccHons

2.4.1 BAccHons

Credits
A minimum of 120 credits.

Programme description

The training of chartered accountants

The South African Institute of Chartered Accountants (SAICA) controls the chartered accounting profession in the RSA. To qualify as a chartered accountant a candidate must pass both the Initial Test of Competence and the Assessment of Professional Competence of SAICA and complete a three-year traineeship (after obtaining a bachelor’s degree) at an approved training organisation.

To gain admission to the Initial Test of Competence, which is conducted by SAICA, a candidate must obtain the degree BAccHons at this University or another degree or diploma that has been approved for this purpose.

To gain admission to the Assessment of Professional Competence, which is conducted by SAICA, a candidate must meet the following requirements:

- Successful completion of the Initial Test of Competence.
- Successful completion of a preparatory course (at an approved educational organisation) aimed at the Assessment of Professional Competence.
- Completion of 20 months’ traineeship at an approved training organisation.

Specific admission requirements

Weighted average performance mark of at least 60% for the following modules in the BAcc or BAccLLB programme obtained at this University: Financial Accounting 379, Taxation 399, Management Accounting 378 and Auditing 378. The following weightings are used in the calculation of the weighted average performance mark: Financial Accounting and Management Accounting 4 each; Taxation and Auditing 3 each.

OR

Weighted average performance mark of at least 55% for the following modules in the BAcc or BAccLLB programme obtained at this University: Financial Accounting 379, Taxation 399, Management Accounting 378 and Auditing 378 AND a performance mark of at least 55% for Financial Accounting 379. The following weightings are used in the calculation of the weighted average performance mark: Financial Accounting and Management Accounting 4 each; Taxation and Auditing 3 each.

Specific admission requirements for students who obtained degrees at other universities that are equivalent to BAcc or BAccLLB are available on request from the School.

Duration
Twelve months.

Presentation
Afrikaans.
Programme content
Integrated presentation of the following Accounting subject areas:

- Auditing, Regulation and Information Systems
- Financial Accounting
- Financial Management
- Management Decision Making and Control
- Taxation

</tbody>
</table>

Assessment and examination
Examinations are written in October. The final performance mark is supplemented by class tests that are assessed on a continuous basis.

Selection
Strictly according to admission requirements.

Application
Applications for a specific year must be received by 31 October of the previous year.

Programme start date
At the official commencement of classes.

3. Master’s programmes

3.1 MCom

3.1.1 MCom (Actuarial Science)

Credits
180 credits.

Programme description
The Master’s programme is suited to students who have completed an Honours degree in Actuarial Science and who are embarking on the profession’s Fellowship examinations having been exempted from (or passed) all of the profession’s earlier examinations.
Thesis option (879) and Coursework option (889)

Specific admission requirements
An Honours degree in Actuarial Science or Mathematical Statistics; and

Passes in university modules equivalent to all eight of the foundation and intermediate technical subjects of the Actuarial Society of South Africa (or the core technical subjects CT1–CT8 of the Institute and Faculty of Actuaries); and

Exemptions from (or passes in the profession’s examinations for):
- at least seven of the foundation and intermediate technical examinations of the Actuarial Society of South Africa (or the core technical examinations CT1–CT8 of the Institute and Faculty of Actuaries); and
- the Actuarial Risk Management (A301/CA1) examination or one of the Fellowship Principles examinations of the Actuarial Society of South Africa (or one of the specialist technical examinations of the Institute and Faculty of Actuaries).

Programme content
At least 180 credits must be completed from the list of compulsory and elective modules below.

Please note: Not all of the listed modules may be offered every year. Students should contact the Department to find out which modules will be available.

3.1.2 MCom (Agricultural Economics)

Credits
180 credits

Specific admission requirements
To be admitted to the MCom (Agricultural Economics) programme, a student must be in possession of the BComHons (Agricultural Economics) degree or a qualification considered by the Department of Agricultural Economics to be of equal standing.

Duration
Twelve months (full-time Full Thesis option) or twenty four months (part-time Full Thesis option).

Programme content
A student taking Agricultural Economics 878 must take the Full Thesis option that is the result of independent research and must earn at least 180 credits as set out below.

</tr>
</tbody>
</table>

Assessment and examination
A minimum of 180 credits, of which 180 credits are obtained from a thesis.

Pass requirements
To pass, a student shall obtain a mark of at least 50% for the thesis.

Enquiries
More information regarding the postgraduate programmes offered by the Department Agricultural Economics is available from www.sun.ac.za/ Agricultural Economics or contact 021 808 4758.

3.1.3 MCom (Business Management)

Credits
180 credits.

Specific admission requirements
BComHons or another honours degree (with Business Management as major).
Note
Information for prospective postgraduate students is available on the Department’s website.

Programme content
Thesis (879) option.

3.1.4 MCom (Computer Auditing)

Credits
A minimum of 180 credits.

Programme description
Please note: This programme is only presented if an acceptable minimum number of applications are received in a particular year. If not, applications are transferred to the next year.

Specific admission requirements
A BAccHons degree or Postgraduate Diploma in Accounting (after attainment of a recognised bachelor’s degree) or an equivalent qualification from another university and registration as Chartered Accountant (SA) with the South African Institute of Chartered Accountants, or an equivalent qualification plus any other preparatory work approved by Senate for this purpose.

Academic achievement in Auditing as subject area at undergraduate and postgraduate level during previous studies is taken into account during admission.

Duration
Twenty-four months.

Presentation
English or Afrikaans.

Programme content
Control frameworks and risk, internet-centric environments, hardware and software components, project management, computer security, IT operations, e-commerce, packages from an internal control point of view and computer auditing techniques.

An assignment or article publishable in an accredited journal.

Students are required to attend a writing skills workshop about the writing of research proposals, presented by the Language Centre.

<td>60</td>
<td>Research assignment: Computer Auditing</td>
<td>Both</td>
</tr>
</tbody>
</table>

Assessment and examination
Assignments, tests and examination papers are assessed by an internal examiner and, where applicable, moderated by internal and external moderators in accordance with the rules of the University. The assignment or article publishable in an accredited journal is assessed and, where applicable, moderated according to the requirements set by the School of Accountancy as agreed with the student.

Computer Auditing 871 is a pass prerequisite for Research assignment: Computer Auditing 872.

Selection
Because only a limited number of students can be accommodated in this programme, selection, in accordance with the University’s overarching selection policy, may be necessary.

Application
Applications for a specific year must be received not later than 31 October of the preceding year.

Programme start date
At the official commencement of classes.

3.1.5 MCom (Economics)

Credits
180 credits.

Programme outcomes
In the case of the Coursework and Assignment or Thesis option (889):
A minimum of 180 credits of which either 60 credits must be earned through a research assignment or 90 credits through a thesis and the balance of credits from fields of study as determined by the Department. A maximum of 20 credits may be obtained from a related and approved field of study.

In the case of the Full Thesis option (879):
A full thesis of 180 credits.
Specific admission requirements

- An honours degree with Economics as major with an average mark of at least 60%.
- Grade 12 Mathematics at least a 5 (60%).

In exceptional circumstances, a student who does not meet the Grade 12 Mathematics requirement may be considered for admission via the University’s policy for the Assessment and Recognition of Prior Learning.

In the case of the Coursework and Assignment or Thesis option (889):
A minimum achievement of 60% in the Intensive Statistics course that precedes the formal programme.

In the case of the Full Thesis option (879):
Admission is subject to selection with a mark of at least 65% in the Honours research assignment as a selection requirement.

Duration
 Twelve months for the Coursework and Assignment or Thesis option (889), and it must be completed within three years. If not, the compulsory modules must be repeated.

A minimum of twelve months for the Full Thesis option (879).

Presentation
English.

Programme content
See the programme outline below.

</tr>
</tbody>
</table>

**Mathematical Economics 771 must be taken if a similar module was not passed as part of an honours programme, which will extend the programme with six months. This is because this module is preceded by an intensive three-week Mathematics course which runs concurrently with the intensive three-week Statistics course which feeds into the Econometrics 871 module.
Elective modules (at least 40 credits):
If Mathematical Economics 771 is taken, at least 30 elective credits must be taken. If the 90-credit Thesis option is chosen, at least 10 credits must be taken.

All the modules are not necessarily presented every year.

* 60% achievement in the Time Series component of Econometrics 871 is required for admission to this module. Financial Economics 771 or any second-year module in Finance/Investment Management is strongly recommended.

** 60% performance in Econometrics 871 is required for admission to this module.

*** As a rule these modules are only presented every second year. Students need to enquire as to which modules will be presented in a specific year.

Assessment and examination

In the case of the Coursework and Assignment or Thesis option (889):
Examinations are written at the end of the first semester in June and at the end of the second semester in November. Examination results are supplemented by the assessment of coursework, including a relatively large number of essays and the research assignment or thesis.

In the case of the Full Thesis option (879):
A student must submit a thesis resulting from independent research plus supplementary work that may be required by the Department.

Selection

In the case of the Coursework and Assignment or Thesis option (889):
Selection of students in accordance with the University’s official selection policy may be unavoidable due to the limited number of students that can be accommodated in the programme.

Application

In the case of the Coursework and Assignment or Thesis option (889):
Applications for a specific year must be received by the end of October of the previous year.

Programme start date

In the case of the Coursework and Assignment or Thesis option (889):
A three-week intensive Statistics course precedes the formal programme and commences early January.

3.1.6 MCom (Financial Accounting)

Credits

A minimum of 180 credits.

Specific admission requirements

A BComHons degree in Financial Accounting or Management Accounting or a similar degree from another university plus any additional preparatory work approved by Senate for this purpose.
Academic achievement at postgraduate level during previous studies is taken into account during admission.

Duration

Twelve months.

Presentation

English or Afrikaans.
**Programme content**
A research project according to the requirements set by the School of Accountancy, consisting of a thesis as well as a related article publishable in an accredited journal.

Students must attend a writing skills workshop about writing a research proposal, presented by the Language Centre.

**Programme module:**

<table>
<thead>

<td>Thesis: Financial Accounting</td>
<td>Both</td>
</tr>
</tbody>
</table>

**Assessment and examination**
The thesis and related article publishable in an accredited journal are assessed according to the requirements set by the School of Accountancy as agreed with the student.

**Selection**
Because only a limited number of students can be accommodated in this programme, selection, in accordance with the University’s overall selection policy, may be necessary.

**Application**
Applications for a specific year must be received not later than the preceding October.

**Programme start date**
At the official commencement of classes.

**3.1.7 MCom (Financial Risk Management)**

**Credits**
- In the case of the Coursework and Assignment option (889): A minimum of 180 credits.
- In the case of the Coursework and Thesis option (879): A thesis of 90 or 120 credits and further credits from advanced coursework to obtain a total of at least 180 credits.

**Specific admission requirements**
BComHons in Financial Risk Management or an equivalent qualification of another recognised university.

**Duration**
A minimum of 12 months.
Programme content
Depending on circumstances in the Department, some of the modules listed below may not be offered in a specific year.
See programme outline below.

Programme module:

<table>
<thead>
<tr>

<td>2</td>
</tr>
</tbody>
</table>

Assessment and examination
Examinations in the coursework are written at the end of the second semester in November. A student must submit an assignment resulting from independent research plus supplementary work that may be required by the Department.
Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
One and a half weeks prior to the general commencement of classes.

3.1.8 MCom (Human Resource Management)

Credits
180 credits.

Programme description
The Master’s programme in Human Resources Management is offered on a full-time basis (889) and a modular basis (899) or offered in a Full Thesis option (879).

Programme outcomes
A minimum of 180 credits, of which 90 credits are obtained from a thesis and 90 credits from the coursework modules for the Coursework options (889 and 899) or 180 credits for the Full Thesis option (879).

Specific admission requirements
An acknowledged honours degree in Industrial Psychology or Human Resource Management or an equivalent qualification is required for admission to the Master’s programme in Human Resource Management.

Students must have obtained a minimum average of 65% for the preceding honours degree. Only a limited number of students will be accepted for this master’s programme.

Other requirements

In the case of the full-time Coursework option (889) and modular Coursework option (899):

Pass requirements
To pass, a student must obtain a mark of at least 50% for the thesis and, where applicable, at least 50% in each module. The final mark achieved will be calculated as an average of the mark for the thesis and the average mark of the modules, or the final mark is the mark for the full thesis. A manuscript based on the thesis must be presented for publication in an accredited journal on completion of the studies.

In the case of the Full Thesis option (879):
A minimum of 180 credits, of which 180 credits are obtained from a thesis.

Pass requirements
To pass, a student shall obtain a mark of at least 50% for the thesis.

Programme structure

Recognition of Master’s modules
Recognition of Master’s modules for graduation purposes usually expires after five years, unless written permission has been obtained to extend the recognition period.
Duration

*In the case of the full-time Coursework option (889) and modular Coursework option (899):*
Full-time programme: 12 months.
Modular programme: 24 months (of which five weeks during the first year must be set aside to attend compulsory classes on campus).

*In the case of the Full Thesis option (879):*
Full-time: 12 months.
Part-time: 24 months.

Presentation
English.

Programme content
See programme layout below.

*In the case of the Full Thesis option (879):*
A student has to submit a thesis that is the result of an independent investigation.

Assessment and examination

*In the case of the full-time Coursework option (889) and modular Coursework option (899):*

A system of continuous assessment is used.

A final mark of 50% is required for each module in order to pass the programme. If a pass mark is not obtained for a specific module, it can be repeated only once.

Examination is decentralised and takes place in the various centres.

Selection

All Master’s applicants will be subjected to a selection process before admission. Selected candidates must inform the Department in writing before the end of the second week in December whether they will be proceeding with the programme.

Application

Students should apply in writing before 31 October of the year prior to the start of their studies on the official application form of the University as well as on the specific departmental application form that is obtainable from the departmental website (http://www.sun.ac.za/industrial_psychology/). Late applications will be considered only in exceptional cases.

Programme start date

One week prior to the official commencement of full-time undergraduate classes.

**3.1.9 MCom (Industrial Psychology)**

Credits

A minimum of 180 credits, of which 90 credits are obtained from a thesis and 90 credits from the coursework modules for the coursework programme.

Programme description

The Master’s programme in Industrial Psychology, MCom (Industrial Psychology) (previous programme name MCom (Psych)) is offered as a full-time coursework programme (the 889 option) as well as a modular coursework programme (the 899 option).

Specific admission requirements

The BComHons (Industrial Psychology) (previous programme name BComHons (Psych)) degree, or an equivalent honours degree which leads to statutory registration as psychometrist (independent practice), is required for admission to the Master’s degree programme in Industrial Psychology (MCom (Industrial Psychology)).

Students must have obtained a minimum average of 65% for the preceding honours degree. Only a limited number of students will be accepted for this Master’s programme.
Other Requirements

Pass requirements
To pass, a student must obtain a mark of at least 50% for the thesis and, where applicable, at least 50% in each module. The final mark achieved will be calculated as an average of the mark for the thesis and the average mark of the modules, or the final mark is the mark for the full thesis. A manuscript based on the thesis must be presented for publication in an accredited journal on completion of the studies.

Programme structure

Recognition of Master’s modules
Recognition of Master’s modules for graduation purposes usually expires after five years, unless written permission has been obtained to extend the recognition period.

Registration as Psychologist, Category: Industrial Psychology
The MCom (Industrial Psychology) serve as requirement for registration as psychologist (in the category industrial psychologist) with the Health Professions Council of South Africa (HPCSA). Information regarding the requirements for statutory registration as psychologist is obtainable on the website of the HPCSA (http://www.hpcsa.co.za). Students who intend registering as psychologists should register with the Professional Board for Psychology from the first year of their registration as a Master’s student in Industrial Psychology. Application forms can be obtained from the HPCSA website. The forms should be completed and mailed together with all the necessary documentation.

Duration
Full-time programme: one year. Modular programme: two years (of which five weeks during the first year must be set aside to attend compulsory classes on campus).

Presentation
English.

3.1.10 MCom (Logistics Management)

Credits
180 credits.

Specific admission requirements
To be admitted to the MCom (Logistics Management) programme, a student must be in possession of the BComHons (Logistics Management) degree or a qualification considered by the Department of Logistics to be of equal standing.
Duration
Twelve to eighteen months (full time).

Presentation
All modules will be presented in English.

Programme content
A student taking Logistics Management 899 must earn at least 180 credits as set out below. A maximum of 30 credits may be obtained from a related and approved field of study. Not all of the listed modules may be offered every year. Students should contact the Department to find out which modules will be available.

A student taking Logistics Management 879, must follow the Full Thesis option that is the result of independent research and must earn at least 180 credits as set out below.

Programme modules:

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>50407</td>
<td>899</td>
<td>180</td>
<td>MCom Logistics Management Coursework- and Thesis option</td>
<td>Both</td>
</tr>
<tr>
<td>50407</td>
<td>879</td>
<td>180</td>
<td>MCom Logistics Management Full Thesis option</td>
<td>Both</td>
</tr>
</tbody>
</table>

For the Coursework and Thesis option (899), the following research module must be chosen:

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>11238</td>
<td>884</td>
<td>150</td>
<td>Thesis: Logistics Management</td>
<td>Both</td>
</tr>
</tbody>
</table>

Elective modules (to form a total of at least 180 credits together with the research module):

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>11571</td>
<td>814</td>
<td>15</td>
<td>Capita Selecta (Logistics Management)</td>
<td>1</td>
</tr>
<tr>
<td>11571</td>
<td>844</td>
<td>15</td>
<td>Capita Selecta (Logistics Management)</td>
<td>2</td>
</tr>
</tbody>
</table>

Compulsory modules for the Full Thesis option (879):

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>11238</td>
<td>828</td>
<td>180</td>
<td>Thesis: Logistics Management</td>
<td>Both</td>
</tr>
</tbody>
</table>

Assessment and examination

In the case of the Coursework and Thesis option (899):
Examinations are written at the end of the first semester in June and at the end of the second semester in November. Examination results are supplemented by the assessment of coursework, including a number of essays, assignments and an assignment/thesis.
Selection
Students are selected for this programme primarily based on their academic performance and research skills. As only a limited number of students can be accommodated in the programme, selection takes place in accordance with the University’s selection policy.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
One week before the official commencement of lectures.

Enquiries
More information regarding the postgraduate programmes offered by the Department of Logistics is available from www.sun.ac.za/logistics or contact 021 808 2249.

3.1.11 MCom (Management Accounting)

Credits
A minimum of 180 credits.

Specific admission requirements
A BComHons degree in Management Accounting or similar degree from another university plus any additional preparatory work approved by Senate for this purpose.

Academic achievement at postgraduate level during previous studies is taken into account during admission.

Duration
Twelve months.

Presentation
English or Afrikaans.

Programme content
A research project according to the requirements set by the School of Accountancy, consisting of a thesis and a related article publishable in an accredited journal.

Students must attend a writing skills workshop about writing a research proposal, presented by the Language Centre.

Programme module:

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>10812</td>
<td>879</td>
<td>120</td>
<td>MCom Management Accounting or MAcc</td>
<td>Both</td>
</tr>
</tbody>
</table>

All modules are compulsory.

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>66540</td>
<td>828</td>
<td>180</td>
<td>Thesis: Management Accounting</td>
<td>Both</td>
</tr>
</tbody>
</table>
Assessment and examination
The thesis and related article publishable in an accredited journal are assessed according to the requirements set by the School of Accountancy as agreed with the student.

Application
Applications for a specific year must be received not later than 31 October of the preceding year.

Programme start date
At the official commencement of classes.

3.1.12 MCom (Mathematical Statistics)

Credits
- *In the case of the Coursework and Assignment option (889):* A minimum of 180 credits. The assignment of 60 credits is compulsory.
- *In the case of the Coursework and Thesis option (879):* A thesis of 90 or 120 credits and further credits from advanced coursework to obtain a total of at least 180 credits.

Specific admission requirements
An honours degree with Mathematical Statistics as the major field of study.

Duration
A minimum of 12 months.

Programme content
Depending on circumstances in the Department, some of the modules listed below may not be offered in a specific year and modules can also be offered in different semesters than listed below.

See programme outline below.

Programme module:

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>22853</td>
<td>889</td>
<td>180</td>
<td>MCom and MSc in Mathematical Statistics (Coursework plus Assignment option)</td>
<td>Both</td>
</tr>
<tr>
<td>22853</td>
<td>879</td>
<td>180</td>
<td>MCom and MSc in Mathematical Statistics (Coursework plus Thesis option)</td>
<td>Both</td>
</tr>
</tbody>
</table>

*In the case of the Coursework and Assignment option (889) the Research Assignment: Mathematical Statistics module is compulsory.*

</tbody>
</table>

Assessment and examination
Examinations in the coursework are written at the end of the second semester in November. A student must submit an assignment resulting from independent research plus supplementary work that may be required by the Department.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
One and a half weeks prior to the general commencement of classes.
3.1.13 MCom (Operations Research)

Credits
180 credits.

Specific admission requirements
To be admitted to the MCom (Operations Research) programme (Coursework and Thesis option (899) or Full Thesis option (879)) a student must be in possession of a BComHons degree in Operations Research or a qualification considered by the Department of Logistics to be of equal standing.

For information on Operations Research 899, or 879 MSc in Operations Research (coursework and Thesis option or Full Thesis option), consult Part 5 (Faculty of Sciences) of the Calendar.

Programme content
A student who enrols for Operations Research 899 must earn at least 180 credits as set out below. Not all of the listed modules may be offered every year. Students should contact the Department to find out which modules will be available.

A student who enrols for Operations Research 879 must follow the Full Thesis option that is the result of independent research and must earn at least 180 credits as set out below.

Programme modules:

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>

</tr>
</tbody>
</table>

Compulsory modules for the Full Thesis option (879):

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>11243</td>
<td>828</td>
<td>180</td>
<td>Thesis: Operational Research</td>
<td>Both</td>
</tr>
</tbody>
</table>
3.1.14 MCom (Public and Development Management)

Credits
180 credits.

Programme description

In the case of the Coursework and Thesis option (899):
This programme is presented by means of modular as well as interactive telematic education. Modular presentation comprises attending blocked contact sessions of one to two weeks of lectures at the Bellville Park campus. Presentation by means of interactive telematic education requires students to gather for lectures at least four times per module at an electronic study centre near their places of residence. The lectures are presented on television from a studio at Stellenbosch and transmitted by satellite to the different study centres in Southern Africa. During the transmission, students can interact telephonically with the lecturer. During the remaining time, the students study at home and do assignments that are electronically submitted.

In the case of the Full Thesis option (879):
The student must, besides a course in appropriate advanced research methodology and academic writing (if the student has not successfully completed such a course previously), complete a thesis of 180 credits under guidance of a senior academic.

Specific admission requirements
BAHons/BAdminHons/BComHons/BEconHons in Public and Development Management, BHons in Public Administration and the Advanced Diploma in Public Administration or an honours degree in Public and Development Management obtained at another university. An acceptable study record in the preceding programmes is also required. An average of 65% in the preceding programme is deemed to be acceptable, although other factors, such as the mark obtained for the research component of the preceding programme, may be considered if applicants attained at least 60% in the preceding programme. In the case of the Full Thesis option, the completion and acceptance of a research proposal during the compulsory contact session in January/February is applicable.

Duration
The programme is presented over a period of 45 weeks by a combination of modular (capstone laboratory of one to two weeks) and interactive telematic education.

Presentation
English, but written assignments, examinations, research assignment/thesis may be written in Afrikaans if preferred by the student.

Programme content
A brochure on the Master’s programmes is available from the Course Administrator.
Tel.: (021) 918 4400; e-mail: enquiry@spl.sun.ac.za
In the case of the Coursework and Thesis option (899):
The student follows three optional modules of 30 credits each and an appropriate, advanced
course in research methodology and academic writing skills. Students must also participate in a
capstone laboratory where various activities are aimed at integrated assessment and set with an
oral examination. In addition, the candidate must also complete a limited thesis of 90 credits that
is still subjected to all the qualitative requirements of a thesis and a full examination by the
supervisor, an internal examiner and an external examiner.

In the case of the Full Thesis option (879):
The student must, besides a course in appropriate advanced research methodology and academic
writing (if the student has not successfully completed such a course previously), complete a
thesis of 180 credits under guidance of a senior academic.

</tr>
</tbody>
</table>

Assessment and examination
A final mark of 50% is required to pass a module and a final mark of 75% is required to pass with distinction (cum laude). Accordingly, an average final mark of 50% is required to pass the programme and an average final mark of 75% is required to pass with distinction (cum laude). The thesis is subjected to examination by the supervisor, an internal examiner and an external examiner. The thesis must provide evidence of the candidate’s ability to integrate existing data, information and knowledge in order to generate new knowledge and wisdom.

Selection
Due to the limited number of students that can be accommodated annually selection in accordance with the official selection policy of the University may be unavoidable.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
Normally late January or early February.

3.1.15 MCom (Quantitative Management)

Credits
180 credits.

Specific admission requirements
To be admitted to the MCom (Quantitative Management) programme, a student must be in possession of the BComHons (Quantitative Management) degree or a qualification considered by the Department of Logistics to be of equal standing.

Duration
Twelve months (full-time and Full Thesis options).

Programme content
A student following Quantitative Management 899 must earn at least 180 credits as set out below.

A student following Quantitative Management 879 must follow the Full Thesis option that is the result of independent research and must earn at least 180 credits as set out below.

Programme modules:

<table>
<thead>
<tr>

</tbody>
</table>

Assessment and examination

In the case of the Coursework and Thesis option (899):
Examinations are written at the end of the first semester in June and at the end of the second semester in November. Examination results are supplemented by the assessment of coursework, including a number of essays, assignments and a research seminar.

Selection
Students are selected for this programme primarily based on their academic performance. As only a limited number of students can be accommodated in the programme, selection takes place in accordance with the University’s overall selection policy.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
One week before the official commencement of lectures.

Enquiries
More information regarding the postgraduate programmes offered by the Department of Logistics is available from www.sun.ac.za/logistics or contact 021 808 2249.

3.1.16 MCom (Statistics)

Credits
- In the case of the Coursework and Assignment option (889): At least 180 credits. The assignment of 60 credits is compulsory.
- In the case of the Coursework and Thesis option (879): A thesis of 90 or 120 credits and further credits from advanced coursework to obtain a total of at least 180 credits.

Specific admission requirements
An honours degree with Statistics as the major field of study.
Duration
At least 12 months.

Programme content
Depending on circumstances in the Department, some of the modules listed below may not be offered in a specific year and modules can also be offered in different semesters than listed below.

See programme outline below.

Programme module:

</tbody>
</table>
Assessment and examination
Examinations in the coursework are written at the end of the second semester in November. A student must submit an assignment resulting from independent research plus supplementary work that may be required by the Department.

Application
Applications for a specific year must be received by the end of October of the previous year.

Programme start date
One and a half weeks prior to the general commencement of classes.

3.1.17 MCom (Taxation)

Credits
A minimum of 180 credits.

Specific admission requirements
A BCom (with Law subjects) and LLB degree of this University or an equivalent qualification plus relevant preparatory programmes approved by Senate for this purpose.

Academic achievement in Taxation as subject at undergraduate and postgraduate levels during previous studies is taken into account in admission to the Coursework option.

Academic achievement in Taxation as subject at postgraduate level during previous studies is taken into account in admission to the Thesis option.

Duration
Twelve months in the case of the Thesis option (879) and 24 months in the case of the Coursework option (889). In the case of the Coursework option (899), the research assignment and publishable article related to Research Assignment: Advanced Taxation 872 must be completed within two years after passing Advanced Taxation 871.

Presentation
Thesis option: English or Afrikaans; Coursework option: Afrikaans and/or English.

Programme content

In the case of the Thesis option 879:
A research project according to the requirements set by the School of Accountancy, consisting of a thesis as well as a related article publishable in an accredited journal.

Students must attend a writing skills workshop in respect of writing a research proposal, presented by the Language Centre.

In the case of the Coursework option 889:
Study of taxation legislation in the Republic of South Africa.

Practice notes and departmental practice of the South African Revenue Services.

Selected case law (court cases).

Essays and practical presentations as prescribed by the lecturers involved.
A research project of limited scope according to the requirements set by the School of Accountancy, consisting of a research assignment as well as a related article publishable in an accredited journal.

Students must attend a writing skills workshop in respect of writing a research proposal, presented by the Language Centre.

**Assessment and examination**

In the case of the Thesis option 879, the thesis will be assessed according to the requirements set by the School of Accountancy as agreed with the student.

In the case of the Coursework option 889, tests are assessed in accordance with the rules of the School of Accountancy. Examination papers are assessed by internal and external moderators according to the rules of the University. The essays, practical presentations and the research assignment will be assessed according to the requirements set by the School of Accountancy as agreed with the student.

Passing Taxation 871 is a pre-requisite for Research Assignment: Advanced Taxation 872.

**Selection**

Because only a limited number of students can be accommodated in this programme, selection in accordance with the University’s overall selection policy may be necessary.

**Application**

Applications for a specific year must be received not later than 31 October of the previous year.

**Programme start date**

At the official commencement of classes.
3.1.18 MCom (Transport Economics)

Credits
180 credits.

Specific admission requirements
To be admitted to the MCom (Transport Economics) programme (Coursework and Thesis option (899) or Full Thesis option (879)), a student must be in possession of a BComHons degree in Transport Economics or a qualification considered by the Department of Logistics to be of equal standing. The number of placements is limited by the Department of Logistics. Selection takes place in order of academic performance.

Programme content
A student who enrols for Transport Economics 899 must earn at least 180 credits as set out below.

A student who enrols Transport Economics 879 must follow the Full Thesis option that is the result of independent research and must earn at least 180 credits as set out below.

3.2 MAcc

3.2.1 MAcc (Auditing)

Credits
A minimum of 180 credits.

Specific admission requirements
A BAccHons degree or Postgraduate Diploma in Accounting (after attainment of a recognised bachelor’s degree) or an equivalent qualification from another university plus any additional preparatory work approved by Senate for this purpose.

Academic achievement at postgraduate level during previous studies is taken into account during admission.

Duration
12 months.

Presentation
Afrikaans or English.

Programme content
The thesis that is the result of a research project in accordance with the requirements set by the School of Accountancy, as well as a related article publishable in an accredited journal.

Students are required to attend a writing skills workshop about the writing of research proposals, presented by the Language Centre.

Programme start date
At the official commencement of classes.
3.2.4 **MAcc (Taxation)**

**Credits**
A minimum of 180 credits.

**Specific admission requirements**
The BAccHons degree, BAccLLB or the Postgraduate Diploma in Accounting (after obtaining a recognised bachelor’s degree) of this University or an equivalent qualification, plus relevant preparatory programmes approved by Senate for this purpose.

Academic achievement in Taxation as subject at undergraduate and postgraduate levels during previous studies is taken into account in admission to the Coursework option.

Academic achievement in Taxation as subject at postgraduate level during previous studies is taken into account in admission to the Thesis option.

**Duration**
Twelve months in the case of the Thesis option (879) and 24 months in the case of the Coursework option (889). In the case of the Coursework option (899), the research assignment and publishable article related to Research Assignment: Advanced Taxation 872 must be completed within two years after passing Advanced Taxation 871.

**Presentation**
Thesis option: English or Afrikaans; Coursework option: English and/or Afrikaans.

**Programme content**

*In the case of the Thesis option (879):*
A research project according to the requirements set by the School of Accountancy, consisting of a thesis as well as a related article publishable in an accredited journal.

Students must attend a writing skills workshop in respect of writing a research proposal, presented by the Language Centre.

*In the case of the Coursework option (889):*
Study of Taxation Legislation in the Republic of South Africa.

Practice notes and departmental practice of the South African Revenue Services.

Selected case law (court cases).

Essays and practical presentations as prescribed by the lecturers involved.

A research project of limited scope according to the requirements set by the School of Accountancy, consisting of a research assignment as well as a related article publishable in an accredited journal.

Students must attend a writing skills workshop in respect of writing a research proposal, presented by the Language Centre.

Assessment and examination

In the case of the Thesis option (879), the thesis and related article publishable in an accredited journal will be assessed according to the requirements set by the School of Accountancy as agreed upon with the student.

In the case of the Coursework option (889), tests are assessed in accordance with the rules of the School of Accountancy. Examination papers are assessed by internal and external moderators according to the rules of the University. The essays, practical presentation and the research assignment will be assessed according to the requirements set by the School of Accountancy, as agreed on with the student.

Passing Taxation 871 is pre-requisite for Research Assignment: Advanced Taxation 872.

Selection

Because only a limited number of students can be accommodated in this programme, selection, in accordance with the University’s overarching selection policy, may be necessary.

Application

Applications for a specific year must be received not later than 31 October of the previous year.

Programme start date

At the official commencement of classes.
3.3 MA in Public and Development Management

3.3.1 MA in Public and Development Management

Credits
A minimum of 180 credits.

Programme description

In the case of the Coursework and Thesis option (889)
This programme is presented by means of modular as well as interactive telematic education. Modular presentation comprises attending blocked contact sessions of one to two weeks of lectures at the Bellville Park campus. Presentation by means of interactive telematic education requires students to gather for lectures at least four times per module at an electronic study centre near their places of residence. The lectures are presented on television from a studio at Stellenbosch and transmitted by satellite to the different study centres in Southern Africa. During the transmission, students can interact telephonically or per sms with the lecturer. During the remaining time, the students study at home and do assignments that are electronically submitted.

In the case of the Full Thesis option (879)
The student must, besides a course in appropriate advanced research methodology and academic writing (if the student has not successfully completed such a course previously), complete a thesis of 180 credits under guidance of a senior academic.

Specific admission requirements
BAHons/BAdminHons/BComHons/BEconHons in Public and Development Management, BHon in Public Administration and the Advanced Diploma in Public Administration or an honours degree in Public and Development Management obtained at another university. An acceptable study record in the preceding programme is also required. An average of 65% in the preceding programme is deemed to be acceptable, although other factors, such as the mark obtained for the research component of the preceding programme, may be considered where applicants attained at least 60% in the preceding programme. In the case of the Full Thesis option, the completion and acceptance of a research proposal during the compulsory contact session in January/February is applicable.

Duration
The programme is presented over a period of 45 weeks by a combination of modular (capstone laboratory of one to two weeks) and interactive telematic education.

Presentation
English, but written assignments, examinations, research assignment/thesis may be written in Afrikaans if the student prefers.
Programme content
A brochure on the master’s programmes is available from the Course Administrator.
Tel.: (021) 918 4400; e-mail: enquiry@spl.sun.ac.za

In the case of the Coursework and Thesis option (889)
The student follows a compulsory module in Public Management Law (30 credits), as well as two optional modules of 30 credits each and an appropriate, advanced course in research methodology and academic writing skills. Students must also participate in a capstone laboratory where various activities are aimed at integrated assessment and set with an oral examination. In addition, the candidate must also complete a limited thesis of 90 credits that is still subjected to all the qualitative requirements of a thesis and a full examination by the supervisor, an internal examiner and an external examiner.

In the case of the Full Thesis option (879)
Full research option. The student must, besides a course in appropriate advanced research methodology and academic writing (if the student has not successfully completed such a course previously), complete a thesis of 180 credits under guidance of a senior academic.

Assessment and examination
A final mark of 50% is required to pass a module and a final mark of 75% is required to pass with distinction (cum laude). Accordingly, an average final mark of 50% is required to pass the programme and an average final mark of 75% is required to pass with distinction (cum laude).

The thesis is subjected to examination by the supervisor, an internal examiner and an external examiner. The thesis must provide evidence of the candidate’s ability to integrate existing data, information and knowledge in order to generate new knowledge and wisdom.

Selection
Due to the limited number of students that can be accommodated each year, selection in accordance with the official selection policy of the University may be unavoidable.

Application
Applications for a specific year must be received by the end of the preceding October.

Programme start date
Normally late January or early February.

3.4 M in Public Administration
3.4.1 M in Public Administration (MPA)

Credits
A minimum of 180 credits. Full Thesis or structured Coursework and Thesis option.

Programme description
In the case of the Coursework and Thesis option (889)
The student follows three optional modules of 30 credits each and an appropriate, advanced course in research methodology and academic writing skills. Students must also participate in a capstone laboratory where various activities are aimed at integrated assessment and set with an oral examination. In addition, the candidate must also complete a limited thesis of 90 credits that is still subjected to all the qualitative requirements of a thesis and a full examination by the supervisor, an internal examiner and an external examiner.
In the case of the Full Thesis option (879)
The student must, besides a course in appropriate advanced research methodology and academic writing (if the student has not successfully completed such a course previously), complete a thesis of 180 credits under guidance of a senior academic.

Specific admission requirements
BAHons/BAdminHons/BComHons/BEconHons in Public and Development Management, BHons in Public Administration and the Advanced Diploma in Public Administration or an honours degree in Public and Development Management obtained at another university. An acceptable study record in the preceding programme is also required. An average of 65% in the preceding programme is deemed to be acceptable, although other factors, such as the mark obtained for the research component of the preceding programme, may be considered where applicants attained at least 60% in the preceding programme. In the case of the Full Thesis (879) option, the completion and acceptance of a research proposal during the compulsory contact session in January/February is applicable.

Duration
The programme is presented over a period of 45 weeks by a combination of modular (capstone laboratory of one to two weeks) and interactive telematic education.

Presentation

 Normally late January or early February.

3.5 MPhil
3.5.1 MPhil (Development Finance)

Credits
180 credits (120 credits for coursework and 60 credits for the research report).

Programme description
This unique master’s degree in Development Finance is designed to provide a coherent programme of study at postgraduate level to train graduates that can fill the skill gaps in the financial industry and in the policy-making and regulatory institutions in the development finance environment as well as to better understand the complexities of and manage the different development finance resources available to poor countries, especially in Africa. It has the specific aim of equipping students with a thorough understanding of the special problems of finance in developing countries and Africa in particular and with the skills to operate successfully and to make a meaningful contribution to policy formulation and implementation in this field. Overall, it offers an internationally recognised top-quality academic programme with content that is relevant to the needs of Africa.

Programme outcomes
Upon completion of the MPhil in Development Finance, participants should be able to demonstrate:

- a coherent and thorough understanding of the theories underpinning development finance practices and the ability to apply such knowledge to a developing country context within the public, private and NGO sectors;
- a comprehensive understanding of specific objectives and challenges of development finance as well as the structure of the development finance industry, especially in Africa;
• the ability to design, formulate, implement and evaluate development finance policies and programmes to address specific development needs within specific contexts;
• the ability to create an industry network for the leveraging of existing initiatives and uncovering of potential initiatives in the development finance industry;
• the ability to carry out an in depth evaluation of development finance projects and schemes in terms of feasibility as well as outcomes;
• the ability to conduct research in development finance at an advanced level and to communicate effectively the findings of such research to peers, policy makers and other end users; and
• the ability to produce a research report which meets the standard of scholarly research and professional writing.

**Specific admission requirements**

The following is required for admission to the MPhil in Development Finance:

• An appropriate Honours degree (the first postgraduate degree after a Bachelor’s degree) or a four-year in-depth Bachelor’s degree with content focused on business, finance, economics, accounting or commerce; or
• A three-year Bachelor’s degree and a postgraduate diploma (120 SAQA credits) from a university or a university of technology with content focused on business, finance, economics, accounting or commerce; or
• A postgraduate degree in any discipline and appropriate experience in the area of development economics and/or finance; and
• A sound understanding of quantitative analysis – a good pass grade for Grade 12 Mathematics is advisable.

**Important**

• The Bachelor’s or Honours degree must be on a level that is equivalent to the South African qualification.
• Local and foreign academic qualifications have to be at the NQF 7 level (old) or NQF 8 level (new). This implies that the qualification includes a module in Research Methodology and an individual research paper.
• For Assessment and Recognition of Prior Learning (ARPL), candidates may be required to write an academic paper on a development finance or development economics topic to demonstrate their competence in the subject.

**Programme structure**

**Programme format**

• **Modular programme**: The MPhil in Development Finance is presented as a modular programme over two years. Students attend three class contact sessions of a fortnight each over a period of two years, and complete a research report.
• **Course methodology:** A mix of highly interactive lectures/course material, case studies and a workshop on financial risk and structure. Handbooks, guidelines, articles, journal materials and a matrix/checklists will serve as reference material for future project design and delivery.

**Research assignment**

The research report is an integral part of the master’s programme and carries a total of 60 credit unit, thus making it one-third of the credit requirements of the programme. The research report is normally between 15 000 and 25 000 words on a topic chosen by the student and is supervised by a member of the academic staff. Students are encouraged to base their research reports on topics of direct professional interest to them.

The aims of the research assignment are to:

- Enable students to clearly identify and describe a research problem/question and goal within the field of development finance;
- Enable students to become sufficiently acquainted with the relevant literature (both theoretical and empirical) on their chosen research problem;
- Develop students’ ability to apply critically research methods and techniques that are appropriate to their research report topic;
- Develop students’ ability to present their material in a logical, clear and systematic way as well as in acceptable linguistic and stylistic standards;
- Provide students with the opportunity to demonstrate the capacity for independent, self-managed learning and critical reflection on the research process.

**Elective modules:**

In addition to the core subjects, students have to attend two elective modules (each elective module counts 15 credits).
Assessment and examination
It is expected from students who have been admitted to the MPhil in Development Finance programme that they obtain pass grades in the prescribed written and oral assessments of the required fields of study and complete a satisfactory research assignment (as prescribed by the USB).

3.5.2 MPhil (Environmental Management)

Credits
A minimum of 180 credits.

Specific admission requirements
A Postgraduate Diploma in Environmental Management. The Programme Committee may also consider any other equivalent qualification if the applicant did not graduate with a Postgraduate Diploma in Environmental Management.

Duration
The MPhil can be completed in a minimum of one year. Students will need to reapply for admission in the second year and will be accepted in exceptional cases only.

Programme content

In the case of the Coursework and Thesis option (899)
The MPhil degree in Environmental Management comprises a compulsory module and a thesis that focuses on environmental management.

In the case of the Full Thesis option (879)
The MPhil degree in Environmental Management comprises a research thesis that focuses on environmental management as well as the attendance of a compulsory research workshop.

A brochure is available from the Programme Administrator, tel. 021 808 2151, E-mail jjs3@sun.ac.za.

<td>Both</td>
</tr>
</tbody>
</table>

Assessment and examination
An average mark of 50% is required to pass the MPhil degree and an average final mark of 75% is required to pass with distinction (cum laude).

Selection
Since only a limited number of students can be accommodated in the programme every year, selection may be required in accordance with the University’s overarching selection policy. Preference will be given to students who attained an average of 65% or more in the Postgraduate Diploma in Environmental Management programme.

Application
Applications for a specific year must be received before end of October of the previous year unless permission for later application was granted by the programme coordinator.

Programme start date
Normally late January or early February, before the official commencement of classes.

Enquiries
Applications for admission to the programme should be addressed to:
The Coordinator: MPhil in Environmental Management, School of Public Leadership, Private Bag X1, Matieland 7602
Tel.: 021 808 2151; Fax: 021 808 2085; E-mail: jjs3@sun.ac.za.
3.5.3 MPhil (Futures Studies)

Credits
This programme consists out of 180 credits (100 credits for course work and 80 credits for the research assignment).

Programme description
The MPhil (Futures Studies) is presented by the Graduate School of Business in cooperation with the Institute for Futures Research. The programme is presented over a period of two years by way of a blended learning approach (physical and online contact). Students must complete five modules (100 credits) and a research assignment of 80 credits, for a total of 180 credits.

Programme outcomes
The development of creativity and professionalism in the field of futures studies is an important overall objective of the programme. It will therefore require a proactive attitude from students. Students will be encouraged to develop their own models, practical applications and design protocols and to test these in a variety of environments. At present no other university in Africa presents such a programme. The MPhil (Futures Studies) of Stellenbosch University therefore offers candidates a unique opportunity to equip themselves with techniques and methods to react meaningfully to the growing complexity in the organisational environment and world affairs, especially from an African perspective.

Specific admission requirements
The admission requirement is the Postgraduate Diploma in Futures Studies, with an average of at least 65%. Students must attend the prescribed programme at the University for at least two years. All modules must be passed for the degree to be conferred.

Programme content
The programme is composed of five compulsory modules, plus a research assignment. The research assignment is regarded as the culmination and the final manifestation of the learning experience provided by the programme, and it offers students the opportunity to apply the knowledge and abilities that have been developed in the programme to a specific field.

Teaching, discussions and presentations will be conducted in English; however, assignments, tests and examinations may be written in Afrikaans.

The programme is presented through blended learning, students choose between on-campus or online classes.

</table>

Assessment and examination
It is expected of students who have been admitted to the MPhil programme to pass the prescribed assessments in all the modules and to submit a satisfactory research assignment.

Application
Applications for any given year must be received before the end of January of that year.
Apply online: http://ifr.applications.usb.ac.za/

3.5.4 MPhil (HIV/Aids Management)

Credits
A minimum of 180 credits must be obtained to pass the MPhil.

Programme description
The MPhil is presented by the Africa Centre for HIV/Aids Management. It is an online (via the Internet) teaching programme that is presented in English. Students attend one compulsory contact session at Stellenbosch University during the year. Students have to complete four modules of 25 credits each and a study project (thesis) of 80 credits.

Specific admission requirements
The admission requirements are: (i) the Postgraduate Diploma in HIV/Aids Management with an average of at least 65%, (ii) appropriate managerial experience and (iii) computer, internet and e-mail skills.

Presentation
It is an online (via the Internet) programme that is presented in English. A number of compulsory satellite classes on Saturdays will be presented through the course of the year.

Programme content
Students have to pass all four modules and the study project to obtain the 180 credits necessary to pass the MPhil.

</tbody>
</table>

Selection
A limited number of students are selected on the basis of academic performance and other admission requirements.

Application
Prospective students have to apply in writing before 30 November of the year prior to their studies. Application forms are available from the Africa Centre for HIV/AIDS Management or on the Centre’s website.

Website: http://www.aidscentre.sun.ac.za

3.5.5 MPhil (Management Coaching)

Credits
This master’s programme is presented at NQF level 8 (180 credits).

Programme description
The MPhil in Management Coaching is aimed at managers, leaders, specialists and learning facilitators in all industries. It holds significant value for all people working with the human aspect of transferring knowledge, and those that support growth, facilitate the forming of meaningful relationships and help to enhance performance.

Programme outcomes

Learning philosophy
The learning philosophy of MPhil in Management Coaching is based on the following:

- Integrating theory and practice
- Finding an authentic coaching style
- International application with local specialisation
Programme format
This modular programme (block release programme) runs over two years and consists of three phases:

- **Phase 1 – Class programme:** Students have to attend four blocks of one week each on the Bellville Park campus during the first year. During this time, they will be exposed to various models to discover their own particular framework for coaching. Coaching practice, case studies and assignments form part of this phase of the programme.

- **Phase 2 – Professional assessment:** Students’ coaching competence is assessed both in terms of their ability to convey their personal coaching approach and style, and in terms of authentically displaying coaching skills which resonate with their own model. This phase takes one week at the beginning of the second year.

- **Phase 3 – Research and development:** Students have to complete a research report during the second year of enrolment. During this phase, a tutor will be assigned to each student based on the student’s field of interest. Students may schedule a number of face-to-face sessions with their tutors to discuss coaching issues that may arise.

- **Throughout – Triad practice, supervision and coaching:** A significant part of the students’ journey is to coach and be coached.

Recognition of prior learning
A limited number of students can enter the programme through Stellenbosch University’s Assessment and Recognition of Prior Learning (RPL) policy. ARPL candidates are required to put together a comprehensive portfolio of experience, demonstrating that they are on an equal footing as far as knowledge, competencies and skills are concerned with those with formal training. Prospective candidates may have to present their portfolios to two senior faculty members of the USB and they need to prepare for an in-depth interview.

Specific admission requirements
The following is required for admission to the MPhil in Management Coaching:

- An Honours degree, *or*
- A four-year professional Bachelor’s degree, *or*
- A three-year Bachelor’s degree and a postgraduate diploma

*plus*

- A minimum of four years’ work experience in the broad field of Human Resources Management
- A comprehensive essay in which the candidate reflects on his/her experience and motives why he/she should be admitted to the programme
- Applicable psychometric tests.

*Note:* The candidate’s previous academic qualifications should be at least on NQF Level 8.
Programme content
The class programme of the MPhil in Management Coaching is spread over five phases of one week each. Between these phases, participants will continue to apply their coaching in practice, experiment with new approaches in their learning triads (support groups of fellow students), receive their own coaching and engage in reflective work. They will also participate in supervision days dedicated to reviewing their case work, using multiple lenses to enhance their understanding of their own professional practice.

The programme will be delivered through lectures, tutorials, case studies, assignments, practical work and independent research. The class programme covers the following:

Assessment and examination
It is expected from students who have been admitted to the MPhil in Management Coaching programme that they obtain pass grades in the prescribed written and oral assessments of the required fields of study and complete a satisfactory research report (as prescribed by the USB).

3.5.6 MPhil (Sustainable Development)

Credits
A minimum of 180 credits comprising two electives (15 credits each) plus a thesis/project/articles (150 credits). Students may select the option of doing four electives (15 credits each) plus a thesis/project/articles (120 credits).

Specific admission requirements
The only admission requirement is the Postgraduate Diploma in Sustainable Development, the BPhil degree in Sustainable Development Planning and Management or compliance with the requirements for the abovementioned Postgraduate Diploma (Sustainable Development) (passing eight core modules with a minimum of 65% for each module), whether or not the student has already obtained the diploma.
Duration
Students who have completed the Postgraduate Diploma (Sustainable Development) or comply with the requirements can complete this programme in a minimum of one year or on a part-time basis over two years.

Presentation
English, but written assignments, examinations, research assignments/theses may be written in Afrikaans if the student prefers and where possible (some modules are presented by international lecturers who do not speak Afrikaans).

Programme content
A brochure for the MPhil (Sustainable Development) is available at www.sustainabilityinstitute.net and www.schoolofpublicleadership.co.za.

The transdisciplinary MPhil (Sustainable Development) programme is composed of a minimum of two electives (explained further below) plus a research component that focuses on the planning, management and practice of sustainable development. The research component can be a thesis, a business plan or academic journal articles (explained further below).

The following options are available:

1. A thesis or business plan or two journal articles (150 credits), plus two electives (15 credits each), plus attendance of a compulsory Research Methodology workshop; OR
2. A thesis or business plan or two journal articles (120 credits), plus four electives (15 credits each), plus attendance of a compulsory Research Methodology workshop.

The requirements for the research component are as follows:

Programme modules:

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>58122</td>
<td>889</td>
<td>180</td>
<td>Sustainable Development</td>
<td>Both</td>
</tr>
</tbody>
</table>

Integrated thesis (150 credits):

<table>
<thead>
<tr>

<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>11189</td>
<td>874</td>
<td>150</td>
<td>Integrated Thesis and compulsory Research workshop</td>
<td>Both</td>
</tr>
</tbody>
</table>

A thesis must be completed in accordance with the requirements of the University, the School of Public Leadership and the supervisor. This thesis includes participation in a compulsory Research Methodology workshop. The Research Committee will assign a supervisor plus an internal and external examiner for each candidate in accordance with available expertise and equitable distribution of the supervision load.
On written application from the student, the Programme Director may approve the following alternatives to the normal academic thesis:

- **Option 1:** Two academic articles in the style of a predetermined journal and in accordance with the requirements of the University, the School and the supervisor.

- **Option 2:** A business plan for a complex capital works project or sustainable development project. For this option, students must select the Project Management modules as electives (see below).

**Integrated thesis (120 credits):**

<table>
<thead>
<tr>
<th>Code</th>
<th>Module</th>
<th>Credits</th>
<th>Module Name</th>
<th>Semester</th>
</tr>
</thead>
<tbody>
<tr>
<td>11189</td>
<td>875</td>
<td>120</td>
<td>Integrated Thesis and compulsory Research workshop</td>
<td>Both</td>
</tr>
</tbody>
</table>

The thesis includes participation in a compulsory Research Methodology workshop. The Research Committee will assign a supervisor plus an internal and external examiner for each candidate in accordance with available expertise and equitable distribution of the supervision load. On written application from the student, the Programme Director may approve the following alternatives to the normal academic thesis:

- **Option 1:** Two academic articles in the style of a predetermined journal and in accordance with the requirements of the University, the School and the supervisor.

- **Option 2:** A business plan for a complex capital works project or sustainable development project. For this option, students must select the Project Management modules as electives (see below).

- **Students wishing to complete a specific specialisation spanning the PG Dip (Sustainable Development) and the MPhil (Sustainable Development) and have it recognised as such must note that the research component for the MPhil (Sustainable Development) will also need to have the focus of that specific specialisation, for example a Sustainable Development Planning focus or a Renewable and Sustainable Energy focus. Students wishing to complete the Sustainable Development Planning option are advised to choose the 120-credit option for the thesis plus four electives chosen from those listed below; or from the MPhil Environmental Management or HonsPA or MPA programmes or from the Master’s in Urban and Regional Planning (MURP) or the MPhil in Urban and Regional Science offered by the Centre of Regional and Urban Innovation and Statistical Exploration (CRUISE), which is part of the Geography and Environmental Studies Department under the Faculty of Arts and Social Sciences; with the thesis having a Sustainable Development Planning focus, and with the following electives highly recommended:**

  - **Project Management (SPL)**
  - **Geographic Information Systems in Environmental Analysis and Management (from the MPhil in Environmental Management) (or a similar GIS module)**
  - **Urban Management Processes (CRUISE):** Any of the following PG Dip (Sustainable Development) modules not yet completed: Sustainable Cities; Ecological Design for Community Building; Complexity Theory and Systems Thinking.
Elective modules
Programme participants will be required to complete additional specialised elective modules. This can be done in any of the following ways:

1. A student may select any module from those listed below.
2. A student may select a module presented by any university or tertiary learning institution, including modules offered by the School of Public Leadership, as part of the MPhil in Environmental Management, or the Honours and Master’s programmes in Public and Development Management (such as Project Management or GIS), on condition that the elective entails five or six teaching days, entails written work, and is equivalent to approximately 15 credits. If this module meets with the approval of the Programme Director, the student may enrol as long as the conditions pertaining to admission to the programme have been met. If this enrolment entails the payment of additional fees, this will be the responsibility of the student. The criteria used to approve an elective will be whether the elective is broadly consistent with the overall goal of building an understanding of sustainable development, also taking into account the requirements that the same modules cannot be offered for two degrees. A student who selects electives offered by the School of Public Leadership that do not appear on the list of modules below or from other departments at Stellenbosch University that do not appear on the list below or at any other university or institution, will be registered for the module Advanced Studies in Sustainable Development.

Assessment and examination

Assessment is based on the requirements for the modules plus the internal and external examination of the thesis/project/articles (see below). To pass the MPhil (Sustainable Development) degree, an average mark of 50% must be obtained for each of the electives, plus a mark of 50% for the thesis/project/articles. To pass the MPhil (Sustainable Development) degree with distinction (cum laude), an average final mark of 75% is required.

Selection

Due to the limited number of students that can be accommodated in the programme, preference will be given to students who obtained an average of 65% or higher for each of the eight modules in the Postgraduate Diploma (Sustainable Development) or BPhil in Sustainable Development Planning and Management. Students must also submit an acceptable research proposal in order to qualify for selection.

Application

Applications for admission close at the end of September; late applications will only be considered if there are still openings.

Programme start date

New students are registered during February, but attend a research workshop during November of the previous year and submit their research proposal during January before registration.

Enquiries

Enquiries regarding the programme content, study fees and application procedure can be addressed to

3.6 Master of Business Management and Administration 
(Bellville Park Campus)

Credits
This degree is presented at NQF level 9 (213 credits).

Programme description
This internationally accredited Master in Business Management and Administration is presented on a full-time and modular basis at the Bellville Park Campus.

Programme Options
USB’s MBA programme has been redesigned to better fulfil the needs of today’s students. The previous (longer) MBA, presented up till 2015, has now been restructured into a 213 credit programme on NQF Level 9. All formats of the USB MBA have been shortened significantly and this takes effect from 2016:

- Students can choose between the Full-time MBA over one year or the Modular MBA over two years. The Full-time MBA is presented in English and starts in January. The Modular MBA has three intakes: the Modular MBA (English) starting in January, the Modular MBA (English) starting in February and the Modular MBA (mainly in Afrikaans) starting in February.

- All classes are presented at the USB Campus in the Tyger Valley business district in northern Cape Town.

- Students in the Modular MBA class attend nine blocks of classes of one week each, spread over two years. During a modular block, classes are presented from Monday to Saturday. This format allows people from all over South Africa, other African countries and further afield to attend classes. The Modular MBA has various intakes.

- All classes are supplemented by web-based support. The course content is embodied in a series of lectures and group discussions, blended with course material composed of comprehensive course outlines, text books and journal articles. Students have to be thoroughly prepared for all lectures so as to extract the optimal benefit from contact sessions and collaborative learning.

- Learning activities include lectures, guest lectures by practitioners, tutorials, syndicate groups, practical workplace experience and independent self-study.

- Students are assessed on a flexible assessment basis. The final performance mark is based on, among others, online assessments, class tests, group work, individual and group assignments, class participation as well as presentations. The flexible assessment system implies that there are no supplementary tests or opportunities for the resubmission of assignments to improve grades.
Programme outcomes

The USB MBA aims to give students a clear understanding of how to manage a business responsibly in an African and global multicultural environment. It’s about acquiring the intellectual ability to recognise social, economic and other patterns, to argue in a critical fashion, to innovate, to embrace the complexities of today’s business and social environment, and to come up with solutions.

USB’s MBA is rigorous. It is underpinned by solid quantitative subjects and complemented by interpersonal and leadership skills.

Collaborative learning – where students learn from each other – is a key feature of the USB MBA. What makes this valuable is the unique knowledge and managerial experience that each student brings to the table.

USB believes leaders are developed, not born. Therefore, each MBA student follows USB’s Personal Leadership Development Journey (PLDJ) in the Leadership Development Module. This journey focuses on personal leadership, relationship leadership and organisational or strategic leadership which ultimately deliver leadership performance and organisational performance.

The USB approach to personal leadership development is endorsed by a growing body of respected research and evidence. The PLDJ focuses on the process of development and utilises evidential theory and content to stimulate the thinking, learning and development of the individual as a leader. The two dimensions of the USB PLDJ involve students in the following:

- **Content**: Faculty members introduce students to content through lectures, readings, video clips, case studies, class discussions, etc.
- **Process**: Students utilise a range of self-led adult learning and leadership development processes to strengthen and grow them as a leader.

On this journey, students will acquaint themselves with both the theory and practice of leadership through:

- Exploring and enhancing personal authentic leadership
- Narrative learning
- Experiential learning
- Work-based and action learning
- Reflective learning and confronting “knowledge” that is “not true”
- Leveraging strengths and development potential
- Addressing derailment risks.
Specific admission requirements
The MBA degree may be conferred upon students who:

- hold an appropriate four-year Bachelor’s degree (NQF Level 8) and at least three years’ relevant full-time working experience

 or

- An honours degree (NQF Level 8), plus three years’ relevant full-time working experience

 or

- An appropriate three-year Bachelor’s degree (NQF Level 7) and a Postgraduate Diploma (NQF Level 8), and at least three years’ relevant working experience
- Successfully took the required selection tests and
- After obtaining the aforementioned qualification for admission, take the prescribed programme at the University and at the end thereof have passed its assessments.

Note: The working experience should preferably be on managerial level.

Further requirements
- Mathematics at NNS (Grade 12) level or equivalent
- A comprehensive CV
- Three essays, showing the candidate’s level of motivation and working experience
- An interview with an MBA alumnus

USB introduced a new one-year Postgraduate Diploma in Business Management and Administration (NQF Level 8 with 120 credits) in 2015 to prepare students for the MBA and make them eligible for entry into the MBA.

Programme content
This section covers the compulsory modules and the electives. The compulsory modules include the Research Assignment, which spans the entire MBA, and the International Study module at a foreign business school.

Elective modules

Students need to select two elective modules of 8 credits each, or one elective module of 16 credits.

The elective modules have been grouped together in specialisation streams. By choosing elective modules from the same speciality, students can acquire areas of expertise in Strategy, Leadership, Finance, Marketing, Developing Markets, Project Management or other management areas.

The elective modules change yearly.

Assessment and examination

It is expected from students who have been admitted to the MBA programme that they obtain pass grades in the prescribed written and oral assessments of the required fields of study and complete a satisfactory research report (as prescribed by the USB).

The Graduate School of Business applies a system of continuous assessment. Subjects must be taken continuously. Each subject must be passed on individual work prior to taking group grades into account.
Continuation and termination of studies

Full-time students
Students who have completed the compulsory syllabus towards the end of the academic year and still have more than one third of their credits of the core modules in arrears, may not continue with the MBA programme.

Modular students
Students who have completed the compulsory syllabus towards the end of the first academic year and still have more than 50% of their credits of the core modules in arrears may not continue with the MBA programme.

All groups
Students at the end of their residential period of the MBA programme who still have more than 50% of their credits in arrears, will not be allowed to continue with the programme.

Assessment and recognition of prior learning
Wider access is assured through the Assessment and Recognition of Prior Learning (ARPL) process. According to Stellenbosch University’s policy framework for ARPL, a limited number of non-degree students may join the MBA. The number of ARPL candidates may not exceed 10% of an annual intake of a programme.

Stringent assessment criteria are applied to determine whether applicants have developed the necessary generic competencies during their undergraduate learning.

Selection
The selection of candidates takes place on a yearly basis from July. It is expected of all candidates to take a series of selection tests. Furthermore, it could be expected from candidates to have a selection interview with a representative from the Graduate School of Business.

Application
Go to www.usb.ac.za/apply and complete the online MBA application form. You will be able to complete the form in steps without losing information. The application process is the same for South African and foreign students.

It is advisable to complete the application form as soon as possible in order to register for the programme. The annual closing date for applications for admission is 30 November.
4. Doctorate programmes

4.1 The PhD degree

Statutory requirements
Subject to contrary provisions in the Statute of the University, a doctor’s degree can be conferred upon a student in the Faculty of Economic and Management Sciences if he has been registered with the University as a student for a doctorate for at least two years since the conferment of the master’s degree approved for this purpose by Senate, or in some other way has attained a level of proficiency in said field of study, deemed by Senate to be of an adequate standard.

PhD candidates are required to –

- complete advanced original research of a highly creative nature, subject to approval of the University, in the area of economic and management sciences or administrative sciences.
- submit original work(s) – already published – of a high standard, dealing with a central theme and which, in the opinion of Senate, shows that the candidate has made a substantial contribution to the enrichment of knowledge in the field of economics, business or administrative sciences.
- conduct an oral examination, if required by the examiners, to the University’s satisfaction.

Admission
Prospective students must apply in writing for admission to the doctoral degree. Each application will be considered by Senate on the recommendation of the Faculty Board.

Further provisions
Every candidate for the doctoral degree will be required to produce a dissertation.

In general, an oral examination will be required for the doctoral degree.

A candidate who is in the employ of an organisation external to the University must, prior to admission to a programme of study for the doctorate, furnish proof in writing that he has obtained such employer’s permission –

- to register for the said programme of study for the doctorate; and
- to abide by the University’s rules concerning the publication of dissertations.

Students who utilise sources beyond the control of the University must, prior to admission for a doctoral degree programme, and in instances where it is required by the University, submit a declaration from the relevant body regarding the conditions under which they may use this information.

No candidate may submit his dissertation for an examination before written approval has been obtained from his promoter.

Candidates may at any time during the academic year register for the doctoral examination.

When a candidate reports for the doctoral examination, an unbound copy of his dissertation must be submitted in its final form to the relevant department with a view to examination.
For the complete provisions concerning class attendance, dissertation requirements, oral examinations and registration after the basic period of residence, refer to the rules for higher degrees in Part 1 (General) of the Calendar.

If a candidate already possesses a degree of Doctor of Philosophy in the Faculty of Economic and Management Sciences or any other which, in the opinion of Senate, is a comparable qualification, he must –

- be registered at this University for at least one academic year before the PhD programme may be conferred upon him, and
- inform the Registrar, on application for admission as a student, whether he wishes to follow a PhD programme.

If a candidate is not in possession of the degree of Doctor of Philosophy in the Faculty of Economic and Management Sciences or any other which, in the opinion of Senate, is a comparable qualification, he must –

- be registered at this University for at least three academic years before the PhD programme may be conferred upon him; and
- inform the Registrar, on application for admission as a student, whether he wishes to follow a PhD programme.

Enquire with the applicable department in connection with a specific subject-related research proposal.

4.2 Transdisciplinary doctoral programme focusing on complexity and sustainability studies

Programme description

Inter-departmental and -faculty offering

The Faculty of Economic and Management Sciences, in cooperation with the Faculties of Arts and Social Sciences, AgriSciences, Law, Engineering, Medicine and Health Sciences, Science and Theology, offers opportunities to prospective students who wish to do research on the finding of sustainable solutions to complex social-natural systems problems that cannot necessarily be studied from a particular, mono-disciplinary perspective, to enrich their doctoral studies in any of these faculties through courses on the theory and practice of transdisciplinarity. The current local-global challenges and crises experienced around the issues of poverty, urbanisation, water, waste, energy, food, soil, conflict and violence, equity and justice are typical problems/themes that lend themselves to research in this regard.

Programme outcomes

Outcomes

Students completing this doctoral programme can expect to be equipped not only with a profound new understanding of the complex nature of the problems facing the African continent and the world at large, but will also have developed the cross-disciplinary thinking skills necessary to participate in multi-disciplinary teams intent on finding long-term, holistic solutions.
Qualification
The doctoral qualification of the faculty in which a student is registered, is conferred.

Specific admission requirements

Admission, registration and supervision
Prospective students submit their doctoral research proposals to a panel of supervisors constituted by representatives of the participating faculties. These representatives are appointed by the deans of the participating faculties. The panel of supervisors will, in consultation with the prospective student, evaluate the research proposal for its transdisciplinary merits and will recommend an appropriate multi-disciplinary team of main and co-supervisors to each successful research proposal. This panel will also recommend an appropriate academic department and faculty in which the research is registered. The usual criteria and processes of admission, registration and the appointment of the doctoral supervisor(s) of the participating faculties apply.

Programme structure

Dissertation, core modules and learning model
This programme entails a dissertation constituting all the credits for the degree. A set of core modules, presented by international and local experts, in the areas of sustainability, transdisciplinary epistemology, methodology and methods and complexity theory will be offered at the commencement of the programme. These modules are not credit bearing. However, written assessment of a thorough understanding of the material covered during these modules will be a requirement for proceeding with the programme. Furthermore, for the duration of the programme, students will be required to attend a regular postgraduate seminar series, affording them with the opportunity to present and discuss their work-in-progress with fellow students and their supervisors.

Duration
This is a full-time three-year programme during which students will, as far as practically possible, be co-located so as to ensure maximum transdisciplinary synergy with and between fellow students and supervisors. Students will be allowed additional time to complete their dissertations.

Notes

Funding and bursaries
Students admitted to this programme will be eligible to apply for bursaries made available by the University and other funding institutions in this regard. More details and application forms can be obtained from the programme coordinator.

Assessment and examination
The usual examination procedures of the University and the faculty in which a student is registered apply.
Enquiries

Contact details
In addition to completing the normal University postgraduate application forms, prospective
students should complete and return in writing the necessary application forms for this
programme. These forms can be requested from:

John van Breda
Programme manager: Transdisciplinary Doctoral Programme
Room 1019, AI Perold Building
Stellenbosch University
Tel.: 021 808 2152
Fax: 021 808 2085
E-mail: jrvb@sun.ac.za

4.3 Graduate School of Economic and Management Sciences (GEM)

Vision of the Graduate School

Promotion of doctoral studies in Economic and Management Sciences
The Graduate School of Economic and Management Sciences started its operations in 2014 with
the aim of strengthening the Faculty’s doctoral throughput and enhancing access to doctoral
studies in the disciplines that are housed by the Faculty. The Graduate School is managed as a
unit in the Dean’s office, with the following objectives serving as its foundation:

- To provide a partially structured programme for full-time, residential doctoral studies
  that is available to all departments and schools of the Faculty.
- To drastically increase the number of doctoral graduates in the Faculty.
- To broaden access to doctoral studies in Economic and Management Sciences.
- To continuously develop effective support structures for doctoral studies that are made
  available to the Faculty.

The Graduate School essentially plays a supporting role to enhance the chances of candidates to
finalise their doctoral studies within the allocated time of three years. The admission
requirements for students that are admitted into the Graduate School’s doctoral programme are
the same as stipulated in 4.1.

Foundation of the Graduate School programme

Funding of full-time residential PhD-candidates
Students that are admitted to the Graduate School programme are provided with generous
scholarships, sufficient to support their three-year stay in Stellenbosch. The scholarships are
awarded annually after a selection process that identifies excellent candidates and pairs them
with suitable academic supervisors.

Partially structured doctoral study
The Graduate School offers several supportive courses during the first year of its doctoral
programme to provide the knowledge and skills required to conduct research at doctoral level.
Continuous progress monitoring
Scholarship holders of the Graduate School, in collaboration with their supervisors, report on the progress of their research projects once every trimester. The reporting process is, furthermore, coupled to the payment of the scholarships. Satisfactory progress is expected to ensure scholarship payments.

Continuous support of doctoral candidates
The Graduate School’s doctoral students are provided with administrative, logistical and infrastructural support throughout the course of their studies. This support is mediated by the Graduate School Office in collaboration with the existing support structures at Stellenbosch University.

Enquiries
Contact details
Applications are accepted during the application period that is indicated on the website of the Graduate School (http://www.sun.ac.za/english/faculty/economy/gem). Any additional queries can be directed to:

Dr Jaco Franken
Manager: Graduate School of Economic and Management Sciences (GEM)
Room 711, CGW Schumann Building
Stellenbosch University
Tel: +27 21 808 9545
E-mail: franken@sun.ac.za
Subjects, Modules and Module Contents

Abbreviations and numbering system

All subjects are represented by a subject number of five digits. Each module of the subject is represented by a three-digit module code, in which the year of study and semester of presentation (unless otherwise stated) are combined.

The subjects, including their constituent modules, credits, module subject, lecture loads, language specifications and module content, are given below.

Example:

<table>
<thead>
<tr>
<th>Subject Number</th>
<th>Module Code</th>
<th>Module Name</th>
<th>Credits</th>
<th>Format</th>
<th>Language</th>
</tr>
</thead>
<tbody>
<tr>
<td>10553</td>
<td>114(12)</td>
<td>Industrial Psychology</td>
<td>12</td>
<td>3L, 1P</td>
<td>A&amp;E</td>
</tr>
</tbody>
</table>

Explanation:

10553 is the subject number; it refers to the subject Industrial Psychology.

114(12) (the 12 will normally be written in brackets) is the module code of the module.

Industrial Psychology 114(12) with the module subject: Industrial Psychology

The module code 114(12) has the following meaning:

- First digit: 1 – refers to the year of study in which the module is presented;
- Second digit: 1 – is a number to discriminate between modules of the same subject in the same year of study and refers to the semester (unless stated otherwise), according to the following pattern:
  - 1, 2 or 3: modules offered in the first semester;
  - 4, 5 or 6: modules offered in the second semester;
  - 7, 8 or 9: modules offered over two semesters, i.e. a year module.
- Third digit: 4 – has no specific meaning, but can be used to discriminate between different modules of the same subject in the same semester of the same year of study.

The number in the second column (otherwise in brackets) (12) – indicates the credit value of the module. Industrial Psychology 114(12) is therefore offered as a module during the first semester of the first year and a student will acquire twelve credits on completion.

Please note that in the majority of postgraduate modules, the following information is provided in a six-column table: the five-digit subject code, three-digit module code, credit value, module name, whether the module is compulsory or elective and, where applicable, in which semester the module is offered.

The teaching load of each module is indicated in brackets in the column next to the module subject. The following abbreviations are used:

- L – lectures lasting 50 minutes each (e.g. 3L, 2L)
- P – practical periods lasting 50 minutes each (e.g. 1P, 2P, 3P)
S – seminars lasting 50 minutes (e.g. 1S, 2S)
T – tutorials lasting 50 minutes each (e.g. 1T, 2T)

The teaching load of Industrial Psychology 114(12) amounts to three lectures plus one practical period per week for the duration of the module, i.e. one semester, and classes are presented separately in Afrikaans and English.

In the last column the language specification of each module is indicated. The following language specifications are used:

<table>
<thead>
<tr>
<th>Type</th>
<th>Code</th>
<th>Displayed in the Calendar as</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Parallel medium</td>
<td>A&amp;E</td>
<td>A or E</td>
<td>Afrikaans (A) and English (E) classes are presented separately. Students select their tuition language of choice at registration.</td>
</tr>
<tr>
<td>Interpreting to English</td>
<td>A+i</td>
<td>A+i</td>
<td>Interpreting into English, from Afrikaans instruction.</td>
</tr>
<tr>
<td>Interpreting to Afrikaans</td>
<td>E+i</td>
<td>E+i</td>
<td>Interpreting into Afrikaans, from English instruction.</td>
</tr>
<tr>
<td>Bilingual</td>
<td>T</td>
<td>T</td>
<td>A combination of Afrikaans and English in the same class. Most of these classes occur when modules of other faculties are taken.</td>
</tr>
</tbody>
</table>

- **Parallel medium [Code: A&E]**: Afrikaans and English classes presented separately. Instruction language is supplied by students at registration.
- **Interpreting [Codes: A+i of E+i]**: Interpreting can take place in Afrikaans or English, depending on the language of tuition. A+i = Class in Afrikaans and interpreting to English; E+i = Class in English and interpreting to Afrikaans.
- **Bilingual [Code: T]**: A combination of Afrikaans and English in the same class.

*Please note:*
Language options of modules could be adjusted from time to time, taking in consideration the language preferences of the enrolled students and the availability of staff.

Information on language options of modules is available in the Calendar Part 10.

**Prerequisite pass, prerequisite and corequisite**

After the description of the content of the module, the prerequisite pass, prerequisite and/or corequisite modules, where applicable, are given for that module. The following abbreviations are used:

PP – Prerequisite pass module
P – Prerequisite module
C – Corequisite module
The following definitions apply:

- A **prerequisite pass module** is a module which students must have passed before they are allowed to take the module(s) for which it is a prerequisite pass module.
- A **prerequisite module** is a module in which students must have achieved a class mark of at least 40, or a final mark of at least 40 in the case of a module subject to continuous assessment, before they are allowed to take the module for which it is a prerequisite module.
- A **corequisite module** is a module which students must take in the same academic year as the module for which it is a corequisite, or in an earlier academic year.

*Please note:*

No qualification will be awarded unless the candidate has passed all the relevant prerequisite and corequisite modules.

Introduction to training, education and development: an overview of the macro-factors that affect training and development in South Africa, the national training strategy of South Africa. Aspects of managing training in an enterprise: the place and role of the training function in the organisation, training models. The administration of training: training records and information systems, training costs and budgets. The theoretical aspects of learning: basic learning principles, adult learning, learning styles. Determining training needs: training needs assessment, models for determining training needs. Programme design: formulating training objectives, factors that affect course development, competency-based training. The evaluation of training.

The human being as employee; human resource planning; recruitment; selection; placement and induction; communication; motivation; leadership in organisations; overview of labour relations. The module is designed for students in Occupational Therapy and these perspectives will be highlighted throughout.

Home department: INDUSTRIAL PSYCHOLOGY

Human resource management: human resource planning, recruitment, selection, induction, training and development, performance appraisal, compensation management, labour turnover, absenteeism, health and safety.

Labour relations: field of study, organised labour, role of employers; labour legislation.

Organisational behaviour: introduction and orientation, organisational design, the individual, groups and teamwork, motivation, leadership, organisational effectiveness.

Home department: INDUSTRIAL PSYCHOLOGY
Department of Information Science

The content and module codes of the subject Information Systems Management (ISM) are the same as for the subject Socio-Informatics. Additional information is available at http://www.informatics.sun.ac.za/. The subject presently falls in the category of scarce skills as defined by the government.

Special modules in Information Sciences for BCom and BCom (Management Science) students

</tbody>
</table>

Introduction to Optimisation and Modelling: Linear programming (revision, graphical methods, simplex algorithm, duality and sensitivity). Modelling with linear programming. Transportation (modelling, transportation-simplex algorithm). Deterministic inventory control (ABC analysis, economic order quantity, quantity discounts, non-zero lead time, continuous production models, back orders). Problem-solving with applicable software.

*PP Statistics 186 or*  
*PP Probability Theory and Statistics 114 or 144 or*  
*PP Statistical Methods 176 with a final mark above 60%*  
*PP Quantitative Management 214 (No Quantitative Management modules may be taken in combination with Operations Research modules.)*

Home department: LOGISTICS
### Optimisation and Decision Theory

**Decision Theory**: Decision analysis (basic concepts, risk and uncertainty, multi-criterion decision analysis, break-even analysis, marginal analysis, decision trees, utility theory, sensitivity analysis). Game theory. Financial and economic investment planning (principals of interest calculations, nominal and effective interest rates, evaluation methods and selection measures, replacement decisions). Decision trees and linear programming models in financial decision theory.

*PP Quantitative Management 214, 244*

*PP Theory of Interest 152 (No Quantitative Management modules may be taken in combination with Operations research modules)*

Home department: LOGISTICS

### Production and Stochastic Modelling

*PP Quantitative Management 214, 244 (No Quantitative Management modules may be taken in combination with Operations research modules)*

</tbody>
</table>

This module is an introduction to the basic axiomatic structures of algebra. These structures provide the natural surroundings for the discussion of many of the most important results in number theory, algebraic geometry and computational algebra. Among others, the following are studied: groups, rings, residue classes modulo \( n \), quotient rings and fields, rings of polynomials, Euclidean domains, unique factorisation domains, extensions of fields, applications to straight-edge and compass constructions, finite fields and their applications.

*PP Mathematics 214, 244*

Home department: MATHEMATICS
324 16 Complex Analysis 3L, 3T E+i

Types of sets in $\mathbb{C}$, convergence of series, point wise and uniform convergence of sequences and series of functions, paths, Cauchy-Riemann equations, determination of the radius of convergence and coefficients of a power series, the complex exponential and trigonometric functions, arguments, complex logarithms and exponentiation, integration of continuous functions along piecewise smooth paths, Cauchy’s theorem and formula, Taylor series expansion of differentiable functions, analytic functions, zeros, Liouville’s theorem, proof of the Fundamental Theorem of Algebra, Laurent series, identification and classification of isolated singularities, calculation of residues, the Residue theorem, applications.

*PP Mathematics 214, 244*

Home department: MATHEMATICS

325 16 Topology 3L, 3T E+i

*Out of the three tutorial periods, one is a scheduled tutorial, and two are for independent work on assignments.*

This module gives an introduction to topology through its basic concepts: Topological spaces and continuous maps. Applications to analysis will be also covered.

*Continuous assessment*

Home department: MATHEMATICS

344 16 Discrete Mathematics 3L, 3T E+i

Discrete Mathematics, or “Concrete Mathematics”, as it is called in a famous book, deals with concrete objects that are inherently discrete, such as permutations, sets, trees and words. Emphasis will be placed on enumeration techniques. An introduction to elementary number theory will also be presented. In this part of the module, classical topics such as Fermat’s theorem, Wilson's theorem or Lagrange’s theorem on sums of four squares are treated.

*PP Mathematics 214, 244 or equivalent modules*

Home department: MATHEMATICS

345 16 Logic 2L, 4T E+i

*Out of the four tutorial periods, two are scheduled tutorials and two are for independent work on assignments*

This module gives an introduction to mathematical logic and formal mathematical languages, with a special emphasis on those languages that can be used for foundation of mathematics.

*Continuous assessment*

*PP Mathematics 114, 144 or equivalent modules*

Home department: MATHEMATICS
Some concepts and results from real analysis will be covered.

*PP Mathematics 214, 244*

</tbody>
</table>

This module provides a general introduction to law for commerce students and explains how the law regulates international business transactions. Emphasis is placed on the risks of doing business internationally and how the law can address these risks. A capita selecta of legal aspects pertaining to international business transactions will be discussed, such as the law relating to the international sale of goods, methods of payment in international transactions; international carriage of goods and insurance; international partnership, agency and distributorship agreements; intellectual property law; legal aspects of e-commerce; competition law; dispute resolution; white collar crime; environmental protection; as well as labour and human rights implications of international business transactions.

Macro-organisation of the State, separation of powers, theories of the State (new public management, network theories, co-operative governance, liberal, radical and developmental theories of the State), integrated public management, practical applications at national, provincial and local government levels, and the moral and ethical bases of the State.

Home department: SCHOOL OF PUBLIC LEADERSHIP
### Development Policy Frameworks

Focus on the following development related areas with the intention of allowing learners to think about possible development strategies that can be introduced in each area in order to bring about positive change. The aim and focus of this module will relate to theoretical issues relative to practical challenges. Selected macro development issues will be analysed. These issues include:

- An introduction in macro-development strategies in the South African context
- Development dimensions: economic and social development and the role of the State in a global context: RDP and GEAR
- Urban and rural development management – urban renewal and rural development strategy
- Sustainable development/the natural environment and development

Home department: SCHOOL OF PUBLIC LEADERSHIP

### The Public Policy Process

Studies public policy and developmental policy by analysing the process through which public policy is formulated, policy agenda setting, policy option generation, policy implementation, policy evaluation, policy impact assessment and policy change.

Home department: SCHOOL OF PUBLIC LEADERSHIP

### Micro-development Management Strategies

- Micro-level strategies of development management practice integrating appropriate development theory, strategy, management and policy principles in a holistic, interdisciplinary way
- Integrated development planning (IDP) in the context of Developmental Local Government, through community development, planning and project management at micro-level, functions of the change agent, the Community Development Worker Programme, public participation strategies, the social learning process, capacity-building, empowerment and sustainable development at a micro/local government level
- The relevance of qualitative research and indigenous knowledge systems for community development and project management

*PP Public and development management 114, 144, 212, 222, 242, 252*

Home department: SCHOOL OF PUBLIC LEADERSHIP
This module explores the strategic nature and integrity of whatever is planned, executed and evaluated to achieve good governance, through a focus on

- **Strategic function:** definition, planning, execution and evaluation of the purpose of an initiative by means of strategic planning as well as programme and project management techniques;
- **Resources:** strategies for utilisation of financial, human and information resources in serving the purpose; and
- **Structure:** The utilisation of organisational development (OD) techniques to acquire the appropriate organisational framework by which the purpose is served.

*PP Public and development management 114, 144, 212, 222, 242, 252*

Home department: SCHOOL OF PUBLIC LEADERSHIP

The study of topical issues in public and development management and integrated governance like, for example, issues concerning ethics, housing, public and private partnerships, alternative service delivery, organisational change, performance management and transformation and regulatory and environmental governance (capita selecta).

*PP Public and development management 114, 144, 212, 222, 242, 252*

**Linear programming**: Graphical techniques to solve problems with two variables; Shadow prices; Sensitivity analyses.

**Sampling techniques**: Simple random; Stratified; Systematic; Cluster; Probability proportional to size.

**Descriptive Statistics**: Various data types; Stem-and-leaf representations; Frequency distributions; Graphical representation of data (histograms, polygons, bar and pie charts); Descriptive measures of location, spread and association (mean, median, mode, percentiles, variance, standard deviation, coefficient of correlation); Box plots.

**Probability theory**: Basic probability concepts (sample spaces, events, addition and multiplication rules, conditional probabilities, probability trees, contingency tables); Bayes' theorem; Counting rules.

Discrete random variables and probability distributions: Expected value, variance and standard deviation of a discrete random variable; Covariance between discrete random variables; Portfolio management; Binomial and hypergeometric distributions.

**Basic calculus**: Introduction to differentiation and integration with simple applications.

Continuous random variables and probability distributions: Expected value, variance and standard deviation of a continuous random variable; Normal distribution.

**Sampling distributions**: Central limit theorem; Sampling distributions of the mean, a proportion and the variance; Sampling distribution of the difference between two means.

Inferential Statistics: Interval estimation and hypothesis testing for the mean, a proportion, the variance and the standard deviation; Interval estimation and hypothesis testing for the difference between two means and the ratio of two variances; Applications of interval estimation in auditing.

**Regression analysis**: The simple linear regression model; The method of least squares estimation; Inference on the model parameters and coefficient of correlation; Residual analysis.

**Time series analysis**: Components of a time series; Smoothing; Least squares trend fitting and forecasting; Index numbers.

**Differences between Statistics 186 and Statistical Methods 176**: In Statistics 186 and Statistical Methods 176 similar statistical techniques are covered. However, in Statistics 186 basic mathematical techniques are revised and expanded, which are not covered in Statistical Methods 176. The Statistics 186 module is a normal exam written module with three tests that are written during the year and a final examination written at the end of the year. The Statistical Methods 176 module is a more practical module that focuses
Sampling techniques: Simple random; Stratified; Systematic; Cluster; Probability proportional to size.

Descriptive statistics: Various data types; Frequency distributions; Contingency tables; Graphical representation of data (histograms, polygons, bar charts, pie charts); Descriptive measures of location and spread (mean, median, mode, variance, standard deviation, coefficient of variation, percentiles); Approximate measures for grouped data; Box plots; Measure of association (coefficient of correlation); Determining the regression line.

Probability theory: Basic probability concepts (sample spaces, events, addition rules, multiplication rules, conditional probabilities, contingency tables); Bayes’ theorem; Counting rules.

Discrete random variables and probability distributions: Expected value, variance and standard deviation of a discrete random variable; Correlation between discrete random variables; Joint, marginal and conditional distributions; Distribution of the sum of variables; Binomial and Poisson distributions.

Continuous random variables and probability distributions: Expected value, variance and standard deviation of a continuous random variable; Uniform, normal and exponential distributions.

Sampling distributions: The central limit theorem; Sampling distributions of the mean and a proportion; Sampling distributions of the difference between two means and the difference between two proportions.

Inferential statistics: Interval estimation and hypothesis testing for the mean, a proportion and the variance; Interval estimation and hypothesis testing for the difference between two means, the difference between two proportions and the ratio of two variances; Concept of and calculation of p-values in above cases; Determining sample sizes; Calculation of power and the effect of sample size on power.

Note
Application of statistical techniques using Microsoft® Excel is emphasised throughout.

Continuous assessment.

PP Statistical Methods 176 with a final mark of at least 60 or
PP Statistics 186 or
PP Probability Theory and Statistics 114 or 144
C Statistics 224 (Students who have passed Mathematics 114 or 144 are exempt from this.)

Home department: STATISTICS AND ACTUARIAL SCIENCE
### Statistical Theory and Practice

**Handling data sets:** Data vectors and data matrices; different types of data and its influence on the choice of applicable statistical techniques; manipulations with data vectors and data matrices; calculating simple statistical measures with the use of vectors and matrices; the R programming language; importing data into R; vector and matrix operations in R to calculate statistical measures; determinant and eigen-values of a square matrix with applications in statistics.

**Moment-generating functions and their applications:** Moments of a random variable; calculation and interpretation of discrete and continuous moments with summation and integration; the exponential function and some of its basic properties; the moment generating function; moment generating functions of important distributions; obtaining moments from moment generating functions using differentiation and a series expansion; graphical displays of probability distributions in R (the denstrip package).

**Transformations:** The logarithmic and square root transformations and their usage and effect in the analysis of data.

**Optimisation in statistics:** Obtaining the maximum and minimum of a function of a single variable using differentiation; the least squares method; the maximum likelihood method (in general); Lagrange multipliers.

**PP Statistical Methods 176 with a final mark of at least 60 or PP Statistics 186**

Home department: STATISTICS AND ACTUARIAL SCIENCE

### Statistical Inference

**Sampling techniques:** Simple random sampling; Stratified sampling; Systematic sampling; Cluster sampling; Probability proportional to size sampling.

**Properties of estimators:** Unbiasedness; Efficiency; Consistency; Sufficiency; Robustness.

**Estimation methods:** Maximum likelihood; Method of moments.

**Simple linear regression analysis:** The simple linear regression model; Method of least squares estimation; Inference on the model parameters and the correlation coefficient; Residual analysis; Prediction intervals and confidence intervals.

**Multiple linear regression analysis:** The multiple linear regression model; Residual analysis; Inference on the parameters of the model; Regression models with dummy variables and interaction terms; Polynomial regression; Transformations; Collinearity; Variable selection.

**Analysis of variance:** Completely randomized factorial designs; Block designs.

**Non-parametric techniques for analysis of variance:** Wilcoxon’s rank sum test; The sign test; Wilcoxon’s signed-rank test; Kruskal-Wallis test; Friedman’s test.

**Note**

Application of statistical techniques using Microsoft® Excel and STATISTICA is emphasised throughout.

**Continuous assessment.**

### US Language Centre

### 12269 Business Communication

| 142 | 8 | Business Communication | 3L | A&E |
---|---|-----------------------|---|---|
The focus of this module is effective communication in the professional business environment. The focus will be specifically on document types used in the professional environment such as proposals, reports and correspondence, as well as on text skills such as coherence, appropriate style and text structure. Attention will also be given to appropriate referencing skills.

*Continuous assessment.*

Home department: LANGUAGE CENTRE

**12526 Language and Thinking Skills for EMS**

| 114 | 12     | Language and thinking skills for EMS | 1L   | A&E |

The focus of this module is on the development of reading, writing and thinking skills in the academic environment in general and specifically the Economic and Management Sciences. Skills like problem identification and solving, the collection and ordering of information, and synthesising, analysing and evaluation thereof are addressed. Aspects such as grasping the notion of text components, the use of fluent, correct and proper language as well as plagiarism and referencing will be addressed.

Home department: LANGUAGE CENTRE

---

**Faculty of Economic and Management Sciences**

**11569 Academic Literacy for Economic and Management Sciences**

| 111 | 12 | Academic Literacy for Economic and Management Sciences | 1L   | A&E |

The focus of this module is to promote academic literacy for economics with an economic thought approach (to think like economists). Students are provided with the opportunity:

- to use economics to solve meaningful problems and understand the art of the logic of economics;
- to practice the skills and analysis that are fundamental to participating in economics debate and decision making;
- to apply basic critical thinking skills through critical listening, reading and writing of economics texts (i.e. deductive reasoning, analyse economic policies, construct arguments and support them, interpret different kinds of economic text (i.e. Adam Smith; Popper, Malthus); understand academic vocabulary, interpret the use of analogies and metaphors in the context of social coordination, individualism, self-interest; understand the market as a system; understand voluntary exchange, profit, process and incentives, to read and interpret information presented in graphic or visual format (demand and supply curves);
- to explain their thinking and constructively critique the thinking of others;
- to focus on organising information logically; select important information and reduce it to a form that is easy to study and review.
- Students will further acquire the basic knowledge, skills and attitudes to become successful EMS students by understanding the university ethos, by developing academic readiness and personal management skills such as study, time and stress management.

Home department: ECONOMIC AND MANAGEMENT SCIENCES (GENERAL)
The focus of this module is to provide a foundation and promote deeper understanding and working knowledge of the following basic fundamental economics concepts:

- **What is economics?** Basic assumption in economic theory; Economic models; Definitions of economics; Scarcity and choice; Utopias; What is a science? Positive and normative statements; Cause and effect; Unintended consequences; How to study economics.

- **Action and results:** Contingent behaviour; Production possibilities; Price-taking; Marginal costs and benefits; Exchange and consumption; By-products; The commons.

- **The individual and the group:** Prisoner’s dilemma, Self-interest; Small groups; Coordination; Central planning; Exchange and politics.

- **The model of supply and demand:** Introduction to demand; The demand curve; Demand terminology; Supply – Benefits and costs; The supply curve; Supply terminology; The model of supply and demand; Assumptions; Buyer and seller equilibrium; Shortages and surpluses.

- **Macro-economic topics:** Connecting microeconomic foundations with macroeconomic models; analysing labour markets through demand and supply curves; Growth and development (Hyperinflation and depression); Measuring the economy (Unemployment; Inflation; Gross Domestic Product).

Home department: ECONOMIC AND MANAGEMENT SCIENCES (GENERAL)
Research and Service Bodies

Africa Centre for Dispute Settlement (SU Postgraduate Business School)
The Africa Centre for Dispute Settlement sees itself as a catalyst and thought leader in developing the theory and practice of mediation in all its forms, with a special emphasis on conflicts involving economic actors.
The activities of the Centre include teaching, training, research and publications, consulting, projects and the development and maintenance of accreditation standards for mediators.
For more information, visit the Centre’s website at www.usb.ac.za/disputesettlement or send an e-mail to sunelle.hanekom@usb.ac.za.

Africa Centre for HIV/AIDS Management
The Centre is a unit for education, research and community projects relating to HIV and AIDS management in the workplace. Its postgraduate academic programmes comprise online teaching programmes supplemented with interactive satellite broadcasts.
For more information, visit the Centre’s website at www.aidscentre.sun.ac.za/ or send an e-mail to pdm@sun.ac.za

Bureau for Economic Research (BER)
The Bureau for Economic Research is an economic research institution. It monitors and forecasts economic trends and identifies and analyses factors, both locally and internationally, that affect South African businesses. The BER’s respected economic analysis and forecasting services are used by a wide range of clients, ranging from small- and medium-sized firms to very large JSE-listed companies, as well as public sector bodies and non-governmental organisations.
For more information, visit the BER’s website at www.ber.ac.za or send an e-mail to bws@sun.ac.za

Centre for Corporate Governance
The Centre for Corporate Governance conducts multi-disciplinary research and offers educational and development activities to improve the effectiveness of corporate governance in African organisations. The Centre focuses on the development of the compliance and performance aspects of directors’ attitudes, knowledge and skills, as well as on the link between corporate governance, business ethics and total organisational performance.
For more information, visit the Centre’s website at www.governance.usb.ac.za or send an e-mail to governance@usb.ac.za
Centre for Statistical Consultation
The Centre for Statistical Consultation assists researchers and postgraduate students with statistical aspects of their research, including the calculation and interpretation of results.
For more information, visit the Centre’s website at www.academic.sun.ac.za/statis_consult/ or e-mail mkidd@sun.ac.za

Institute for Futures Research (IFR) (SU Postgraduate Business School)
The Institute for Futures Research is a research institution uniquely positioned to assist decision-makers and strategic planners in initiating and managing medium- to long-term change. It prepares and supports organisations to implement effective strategic planning and lead them to envision and realise their future. The Institute is internationally recognised for its research and teaching in futures studies.
For more information, visit the Institute’s website at www.ifr.sun.ac.za or send an e-mail to future@ifr.sun.ac.za

School of Public Leadership (SPL)
The School of Public Leadership provides solutions through unique research, graduate, postgraduate and executive programmes that add value for the public good within a global and African context.
Programmes are offered in modes that facilitate learning while working. Students, many of whom are mid-career leaders and managers, are guided to incorporate solutions for all levels of society in the workplace.
For more information, visit the School’s website at www.schoolofpublicleadership.co.za/ or send an e-mail to enquiries@spl.sun.ac.za
