

Information Governance

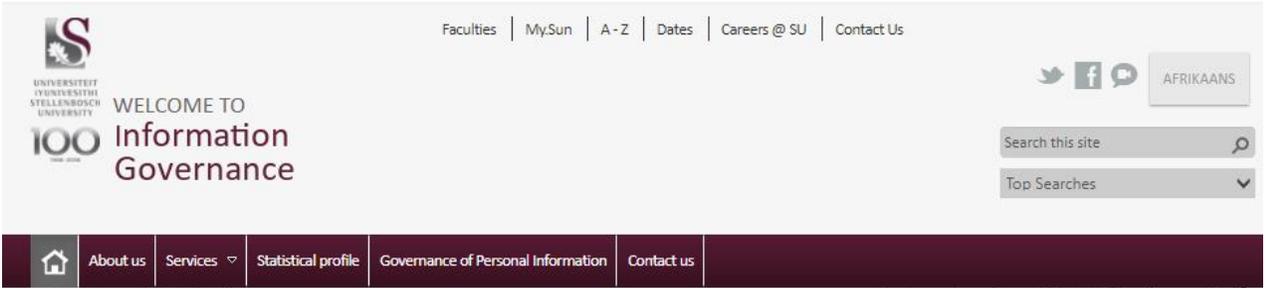

Creating value from information

The Division for Information Governance (IG) forms part of the management portfolio of Strategy and Internationalisation.

Centre for Institutional Information (II) and Centre for Business Intelligence (BI)

Organogram of IG

The Division for Information Governance (IG) supports institutional strategy, planning and policy development. IG is also responsible for establishing a framework for governance of personal information and the provision of management information, business analytics and support for decision-making at Stellenbosch University.

Institutional Reports

For internal use

By tracking involvement in both face-to-face and online student development activities, we can measure the impact of these interventions and identify crucial factors to optimise academic achievement. Example applications are:

The BeWell Mentor Wellness System, involving approximately 600 mentors and 4000 first-years annually.

i-FlourishWell4Life - an intervention- and evidence based curriculum to optimise student well-being. i-FlourishWell4Life aims to simultaneously advance success and well-being, and attempts to explicitly develop a series of malleable factors that are linked to academic performance. All interactions are tracked. Target audiences currently include EDP students in five faculties, main stream students from two faculties and the online onboarding programme for newcomers.

For more information contact [Dr. Alten du Plessis](#)

Student Tracking

For wellness and
development

Surveys provide valuable profiling information and insights to improve processes, performance and well-being, and to conduct institutional research. Examples include:

SUBSIFY: Stellenbosch University Baseline Survey for Incoming First Years

Newcomer Welcoming Questionnaire

PSO & Residence Satisfaction Surveys

The Graduate Destination Survey

The SU Well-being, Culture and Climate at Work Survey

Surveys are also available on request as a Service
