

Dr Sonja Matthee

I completed my postgraduate training in 2000 in the Department of the Veterinary Tropical Diseases at Pretoria University. I have always been interested in animal diseases and parasites. More recently I have started to research various aspects pertaining to parasite ecology and have included regional scale phylogeographic patterns. My interest is macroparasites, but I also have an interest in viruses, protozoa and bacteria. The target host species mainly include rodents and insectivores. I am fortunate to have an extended network of collaborators from across the globe, who is involved in my research programme. My personal feeling is that a multidisciplinary research approach facilitates high quality and often novel research, with the potential for cutting-edge peer-reviewed publications.

Current postgraduate students and postdocs:

PhD:

Engelbrect, A. Comparative phylogeography of the four-striped mouse, *Rhabdomys pumilio* (Rodentia: Muridae), its host-specific parasite, the sucking louse *Polyplax arvicanthis* (Phthiraptera: Anoplura), and a generalist mite *Laelaps giganteus* (Acari, Mesostigmata) – Graduate March 2016

Kerr, T.J. Assessing inter-pride contact in the lion populations of the Kruger National Park through the use of the Feline Immunodeficiency Virus.

Spickett, A. Helminth diversity in *Rhabdomys* species across South Africa and the role of co-occurring small mammals species in shaping community patterns.

Nyangiwe, N. Species composition and geographic distribution of ticks (Acari: Ixodidae) on cattle grazing in different farming systems in the temperate regions of Eastern Cape Province of South Africa.

Espinaze, M. Establishing the effect of parasites on the health status, nesting behaviour and colony dynamics of African penguins (*Spheniscus demersus*).

Postdocs:

Du Toit, N. Phylogenetic relationship among members within the genus *Polyplax* (Anoplura) on small mammals in southern Africa.

Van der Mescht, L. The ecology of Siphonaptera of rodents (Family Muridae) in South Africa

Research publications for the past 5-years:

(complete profile: <http://scholar.google.com/citations?user=7OMEUycAAAAJ&hl=en>)

2016

1. Engelbrecht, A., **Matthee, S.**, du Toit, N., & Matthee, C.A. 2015 “Drown on arrival”: limited dispersal contributes to significant phylogenetic congruence between ectoparasitic mites, *Laelaps*, and their rodent hosts, *Rhabdomys*. *Molecular Ecology* DOI: 10.1111/mec.13523

2015

1. Drexler JF. and the Hepatovirus Ecology Consortium. 2015. Small mammals shaped the evolution of human hepatitis A virus. *PNAS*, doi:10.1073/pnas.1516992112
2. Barnard, K., Krasnov B.R., Goff, L. & **Matthee, S.** 2015. Infracommunity dynamics of chiggers (Trombiculidae) parasitic on a rodent. *Parasitology*, doi:10.1017/S0031182015001110
3. Van Der Mescht, L., **Matthee, S.** & Matthee, CA. 2015. A genetic perspective on the taxonomy and evolution of the medically important flea, *Dinopsyllus ellobioides* (Siphonaptera: Dinopsyllinae), and the resurrection of *Dinopsyllus abaris*. *Biological Journal of Linnean Society*, 116: 541-557
4. Van Der Mescht, L., **Matthee, S.** & Matthee, CA. 2015. Comparative phylogeography between two generalist flea species reveal a complex interaction between parasite life history and host vicariance: parasite-host association matters. *BMC Evolutionary Biology*, 15:105 (DOI 10.1186/s12862-015-0389-y)
5. Sands, AF., **Matthee, S.** Mfune, JKE & Matthee CA. 2015. Life history and isolation by distance determine the mtDNA phylogeographic structures of two southern African Mastomys species (Rodentia: Muridae: Murinae). *Biological Journal of Linnean Society*, 114: 58–68.
