The untimely death of Dr Raymond Dusabe leaves a tremendous gap in the Tygerberg Obstetrics and Gynaecology family. He recently finished seven years of training at Stellenbosch University and was starting to establish himself as the only gynaecological oncologist in Rwanda. He will be sorely missed here and at home in Kigali.

Raymond was a resourceful person who, despite many difficulties, continued his studies until he achieved his goal. Nothing could derail his ambition. He was a friendly, kind and popular doctor that made friends wherever he went. He liked to dress smartly and was always professional. We will always remember his smile.
