## INVITATION TO PARTICIPATE

We are conducting a scientific study to see whether a coronavirus (COVID-19) cough sounds different to any other cough, in order to develop a smartphone app that can be used at home by someone who thinks they may have a coronavirus infection. This will reduce the risk of infection of healthcare workers, reduce the number of people needing to be tested for coronavirus, and reduce transmission.

## ANYONE WHO HAS HAD A RECENT CORONAVIRUS/ SARS-COV2 LAB TEST CAN PARTICIPATE

For more information or to take part visit:
