

BERGEN SUMMER RESEARCH SCHOOL GLOBAL CHALLENGES

DIGITAL PHD RESEARCH SCHOOL **JUNE 7-17, 2022**

How can we understand and engage inequality?

In our programme next summer, we use notions and realities of inequality as lenses for scrutinizing processes of socio-economic, political, and environmental trans-

formations.

Six parallel courses will focus on key global challenges, including climate change and mobility, governance and inequality, economic experiments in developing countries, higher education and the arts, food

security, and gender and the environmental crises.

In joint sessions on systems thinking and creative problem solving, supported by cross-cutting keynotes and virtual social events, we offer 100 PhD candidates an opportunity to

develop their skills for building actionable knowledge.
