

The **Psychosis Research Program (PRP)** at Stellenbosch University located in the Department of Psychiatry, Faculty of Medicine and Health Sciences is **looking for a Postdoctoral Fellow** for a project examining **stress sensitivity and schizophrenia symptoms**.

About the Psychosis Research Program

The PRP, established in the 1990's, consists of a motivated and diverse team of researchers and clinicians. We are committed to being a centre of research excellence that responds to knowledge gaps in the field of psychosis research and needs relevant to our setting through innovative scholarship and strategic collaborations.

Primary expectations of the role

Administration and participant assessment of a stress-sensitivity (using virtual reality) and schizophrenia project

Work collaboratively in a team

Contribute to supervision/co-supervision of students

Writing and submission of journal manuscripts

Ability to shift focus to other psychosis projects if required

Benefits of the role

Capacity development and training in psychosis and cutting edge virtual reality research

Working with a motivated, experienced and diverse research team

Ability to incorporate hybrid working conditions

Meaningful work with a focus on translating research into benefit for communities

Opportunity for you to explore your own research ideas relevant to the PRP

Remuneration

R200 000 per annum, tax free with remuneration for other academic activities up to 12 hours per week allowed. The post is tenable for two years if satisfactory progress.

Eligibility

PhD in Psychology, Psychiatry or related field within the last 5 years

South African or foreign national individuals

Need to be located in Cape Town for the duration of the Fellowship

How to apply:

Send a CV, with research outputs and referee details as well as a cover letter detailing why you are a good fit for this post to: Prof. Laila Asmal: laila@sun.ac.za

Deadline 31 March 2023
