

CT Scanner Pricelist (2020)

**We sell digital X-ray and Computed Tomography (CT) imaging and analysis services.
All prices below are VAT EXCLUSIVE and external clients pay additional 7% admin fee.**

We create a quote by email within 24hrs based on your specific needs, typical jobtime for planning is 1 hr per sample for basic scan and 1 hr per sample for basic routine analysis. Maximum scantime is 6 hrs per sample at highest resolution nanoCT scan (for one section, multiple sections are possible). It is possible sometimes for reduced quality to scan up to 5 samples per hour or sometimes more if multiple small objects are loaded. These reduce the quality and increase the complexity of the post-processing, so its not always a good idea.

CT services pricelist (NON MEDICAL – no live humans)

Service	International rate	Industry rate	SA academic rate	Stellenbosch University rate
MicroCT per hr	US\$ 165	R2000	R 1000	R 750
NanoCT per hr	US\$ 165	R2000	R 1000	R 750
Analysis PC use per 4 hr session	US\$ 165	R2000	R 1000	R 750
Custom analysis by experts per hr	US\$ 165	R2000	R 1000	R 750
Hard drive and data transfer	US\$ 165	R1450	R 1450	R 1450

- Prices exclude 7% admin fee, and 15% VAT (no VAT on international).

Advanced services

Dimensional measurements, volume analysis, generating surfaces, density calibration, part to part comparison, combining CT with other analytical tools, 3d printing of scanned objects and many more – see the CT Services page for examples of our service offerings. Pricing based on project complexity.

Data storage and management

The resulting data sets are large, we have different data management options, please enquire. We do not archive or store data for clients, please back up your data or purchase a backup from us to include in your bill.

**No project too small or too large. No need for application forms or motivations, just pay and we do the work.
We guarantee the highest quality and best value X-ray tomography services.**
