

# TSRC Candidate 2024/2025

## Karabo Setsepu

## CANDIDATE MANIFESTO

I have envisioned the TSRC in which students are encouraged to be involved in activities and projects of the TSRC. It should promote the multicultural campus we have by creating and supporting opportunities that celebrate and showcase the diverse cultures of students. I believe the resources the TSRC has should be channelled to tackle issues such as funding. As I embody intentional leadership, it sets me at a better front to engage with fellow students and facilitate change where necessary. As a leader, I have a proven track record of success in the goals I have achieved. I believe I stand out as an ideal candidate for the TSRC as I have seen how I handle difficult situations in leadership with admirable tact and remarkable patience. I have shown my willingness to take on projects and see them to successful completion. I am proactive and flexible. I am a team player and I believe in collaboration. I have played a crucial role in representing students and ensuring their voices are heard through my leadership. In my experience of leadership, I have strived to advocate for the interests of students through effective communication organizing events, and addressing concerns. Multiple gatherings and events for awareness to current societal matters where students can voice their views on such matters. Institutional change through regular policy forums where students can engage to discuss policies and constitutions. Addressing gender and sexuality issues on campus by having a safe house/room for victims especially for students who live with their perpetrators and through self-defence classes, and pepper sprays. Addressing mental health of students on campus by having ongoing mental health awareness campaigns partnering with the student counselling unit. Assisting students with financial holds during registration period by having an Aid fund in collaboration with the Financial Aid offices.
