

TSRC Candidate 2024/2025

Sinothando Gaika

CANDIDATE MANIFESTO

Dear Tygerberg Community,

To improve the TSRC as a student representative body, we must enhance our transparency, responsiveness, and inclusivity. By actively engaging with the student community through regular feedback sessions and open forums, we can better understand and address their needs. Strengthening communication channels and ensuring every student feels heard and valued will foster a more united and supportive campus environment. As a second-year Dietetics student, my journey has been shaped by both personal and academic challenges that have honed my resilience, empathy, and leadership skills. My experience in community service and my dedication to nutrition and wellness equip me with a unique perspective on the needs of our diverse student body. These experiences have instilled in me the importance of holistic support systems and the critical role of a compassionate, proactive representative. My practical plans include streamlining administrative processes to improve student services efficiency, promoting mental health awareness, and enhancing campus security. I will advocate for the expansion of career services and the introduction of wellness programs, such as fitness classes and nutritional workshops, to support students' overall well-being. For safety and security, I propose increased campus security measures, including better lighting, more security personnel, and emergency call stations. Regular safety drills and partnerships with local law enforcement will further ensure a secure environment. By electing me, you are choosing a representative committed to making tangible improvements in student services, wellness, and safety. Together, we can create a campus where every student thrives in a supportive, inclusive, and secure environment.

Thank you for your support.
