

# TSRC Candidate 2024/2025

## Tumisang Monau

# CANDIDATE MANIFESTO

In my TSRC term I would like to achieve a stronger, and more united community. I would like to make sure that every Tygerberg Matie is immersed in the essence of being a Stellenbosch University student. This would be through the following initiatives and enhanced initiatives that already exist: Firstly, as someone who believes in consistency, I think that it is important to support and make sure existing initiatives survive. For example, the intercampus shuttle is a great initiative. I think it brings a certain level of connectedness to the two campuses and thus should be constantly motivated for. Secondly, I would like to establish transparent communication channels that hold members of the TSRC accountable. I believe that those that are being served should have constant updates about matters that affect them, and their say should also be considered. Thirdly, I would like to work closely with Cluster to create a working calendar for our campus. This is to avoid clashes as well as to make sure that different stakeholders know when things are happening. Lastly, I would like to start a culture of people accepting and celebrating their differences. I think this campus represents people from all walks of life. This should be celebrated through learning about each other, accepting and helping people express their authentic selves, as well as being free to want to engage with others about their cultures.
