SRC SUSTAINABILITY MANAGER

Foreword

Hello fellow Maties,

I hope that you all have enjoyed the reses and are rejuvenated to begin with the new semester. I wish everyone success in their academic jounery. As we approach the end of the SRC term I am pleased to witness the success of every member in their events, conference and discussion. I am excited to have interacted with all parteners and the student body as a whole.

Constitutional Responsibilities

According to the student constitution by constitutional responsibilities are the following:

The Student Constitution makes clear that, in my capacity as the Sustainability Portfolio representative, I must:

- 1) fulfil my obligation to provide the Secretary with a thorough report detailing all my activities and responsibilities at the end of each academic session.
- 2) Encourage student beneficial project and activities.
- 3) Represent student in the senate, institutional forum, university council and other university groups, structure and official.

The goal of the Sustainability portfolio is to advocate for institutional modifications that will guarantee our campus's environmental sustainability. The portfolio head's responsibility is to communicate with the student body structure and facilities management regarding sustainability measures.

Portfolio Overview

The constitutional obligations serve as the only definition or summary of this portfolio; otherwise, the overview of the portfolio would be interpreted as follows:

The goal of the Sustainability portfolio is to create a revolutionary, long-lasting influence within the community of students. This would be accomplished by improving campus facilities as well as by disseminating important and educational information that would equip students with the knowledge and abilities to help preserve the environment and live more sustainably. This portfolio aims to keep students informed, connected, and motivated about how they can change the world, actively participate in important projects and discussions, and support the campaign to protect not only the environment but also the planet.

I serve on the following Committees and or Task Teams:

Term 2 Overview

During the second term in the office, I have done the following:

- 1) On April 19 Quiz night with the sustainability representatives took place at Huis Russel Botman House.
- 2). On the 23rd of April Earth Day event took place at Victoria hub
- 3). On April 24th sustainability fashion show took place in the Neelsie which was the collaboration with EcoMaties, and the facilities management. I served as the judge and one of the organisers.
- 4) As Sustainability team we decided to cancel the food garden in Kayamandi because of the following reasons:
 - 1). We were supposed to fertilize the soil in June, which was impossible because that is Exam month, and we are not allowed to do anything during exams, and we were studying also.
 - 11) We found out that UNASA was already doing outreach in KUYASA.
- 5). I attended GCI conference in NMU from July 7th until July 11.

Plans for Next Term

I plan on doing the following:

- 1) Social justice Hike.
- 2) Plastic free August.
