 Subject: CALL: SA-Belgium (Wallonia) - all research areas  
 Date: Monday, 16 August 2021, 17:28:08  
 Attachments: SA-Wallonia Research Expedition (ENRCL Framework 2021).pdf  
 Importance: High

Let asb daarop dat hierdie inligting aan 'n verspreidingslys van alle US-naavorsers gestuur word. Dit mag dus wees dat hierdie spesifieke oproep nie van toepassing is op u studieveld nie. Ons vertrou dat toekomstige oproepe wel relevant mag wees./ Please note that this information is sent to a distribution list of all SU researchers. It may, therefore, be possible that this specific call is not applicable to your specific research field. We trust that future calls will be relevant.

Beste Kollegas

Hierdie oproep het ongelukkig nou eers onder ons aandag gekom en word dus later as gewoonlik uitgestuur. Hieronder en aangeheg is besonderhede oor die geleentheid. Gaan asb deeglik deur die relevante aangehegte Raamwerkdokument (Riglyne) om te verseker dat u aan al die vereistes voldoen. **Indien u beoog om aansoek te doen, skop so gou moontlik 'n aansoek op die NRF-sisteem sodat belangrike addisionele inligting aan u gestuur kan word.**

\*\*\*\*\*

Dear Colleagues

This Call has unfortunately just come to our attention and is therefore sent out later than usual. Below and attached are details on this opportunity. Please carefully read the relevant attached Framework document (Guidelines) to ensure that you meet all the requirements. **If you intend applying, create an application as soon as possible on the NRF system so that important additional information could be sent to you.**

Partner countries	Focus areas	Activities to be funded	Funding	Eligibility	Envisaged number of collaborative projects to be funded	Application portals	Internal deadline <i>(applications submitted on the NRF system after this date will not be approved institutionally)</i>

## **South Africa/ Wallonia-Brussels Federation Science and Technology Research Collaboration**

2022 Call for Joint Research Proposals

**Closing date at Stellenbosch University: 14 September 2021**

A maximum of four joint projects will be funded for this call

The National Research Foundation (NRF) and the Fund for Scientific Research - FNRS (F.R.S.-FNRS) of Wallonia-Brussels Federation (WBF) signed the Memorandum of Understanding (MoU) on 11 March 2014 in order to contribute to the scientific research outputs of both countries by funding researchers' mobility in the frame of joint research projects in all research fields. The call mostly supports early to mid-career researchers and aims to contribute meaningfully to their research capacity development.

### **Thematic areas of cooperation**

Joint research proposals can be submitted in the following areas of cooperation:

- Natural and Life Sciences
- Engineering
- Humanities and the Social Sciences (including Indigenous Knowledge Systems)

### **Please Note:**

- In terms of human capital development, joint projects that involve young scientists (i.e. doctoral students) and pay attention to gender equality (a balanced involvement of female and male researchers) will be positively considered and will receive a higher rating.
- In terms of the South African transformation agenda, South African applications from previously disadvantaged higher education and research institutions and the involvement of previously disadvantaged individuals will be prioritised.

### **Duration of support**

The projects will be supported for a period of two years.

### **Who may apply?**

Each proposal must have one main applicant based in South Africa and one main applicant based in Wallonia Brussels Federation. They are the **Principal Investigators (PIs)** and they bear the main responsibility for the project including its technical and administrative coordination as well as timely delivery of scientific and financial reports. Commercial institutions and private higher education institutions are not eligible to apply under this programme.

### **South Africa:**

- Only working researchers/scientists residing in South Africa and affiliated with a recognised South African public higher education or research institution such as a university, university of technology or science council are eligible to apply.
- Private higher education institutions are not eligible to apply under this programme.

### **Wallonia Brussels Federation:**

This call is open to permanent researchers affiliated to the French speaking higher education universities/ colleges, or research institutions of the Wallonia Brussels Federation. All eligibility rules and criteria can be found in the [PINT-BILAT-M](#) regulations.

### **Which activities may I apply for?**

The purpose of this call is to support the mobility of researchers between the two countries. The funds can only be used for international travel, accommodation, subsistence and local travel relating to the researchers' joint research projects. Further to this the call supports research activities as organised by the partnering researchers such as joint workshops, seminars, conferences, symposia, lecture presentations, capacity building sessions, meetings, local/regional dissemination of results aimed at involving stakeholders, and/or end-users from outside the projects.

### **Funding modalities**

Funding will be available for a maximum of two years for **2-year collaborative research projects** jointly developed and completed by researchers on both sides. In both countries, all the approved projects will get funding support from the two funders in terms of the cost of exchange of experts, scientists and other specialists unless specified otherwise by the two funders. Apart from the financial support from the two funders, institutions and universities in both countries are encouraged to solicit other funding resources. Successful researchers will be funded only for the activities within the scope of these guidelines.

### **South Africa:**

The funds requested from the NRF should not exceed R500 000 per project for research activities commencing in 2022. Funding will be made available for a maximum of two years, to be paid in annual instalments (R250 000 per year). Note that a commitment to both scientific and financial reporting on the project is an obligatory condition of funding. Please also note that the requested amounts do not necessarily imply that this amount will be awarded upon selection for funding.

### **Wallonia Brussels Federation:**

The F.R.S.-FNRS funding total amount should not exceed € 15,000 per two-year project, meaning € 7,500 per project, per year. The F.R.S.-FNRS will finance the mobility costs of the researchers affiliated to the French speaking universities from the postdoctoral level.

### **How do I apply?**

The onus is on the applicant to find their own research partner. Proposals must be received in both South Africa and Wallonia Brussels Federation. Proposals which have only been received in either South Africa or WBF, but not both, will not be considered for funding. The call process is highly competitive; therefore submission of an application does not guarantee funding. The evaluation of the proposals and the availability of funds from both countries should be positive for proposals to be considered for funding. Both the NRF and the F.R.S.-FNRS will not be held responsible for non-submission, administration or evaluation of the application in the partner country.

### **South Africa:**

Applications must be submitted through an online application process to the NRF on the NRF Online Submission System at <https://nrfs submission.nrf.ac.za/>. Applicants must attach the required documents in

PDF format in the following order: CV of partner and the budget of partner. Failure to submit compulsory documents will result in the disqualification of the application. Applicants are further advised to consult the NRF General Application Guide 2022 available at <https://www.nrf.ac.za/funding/framework-documents/funding-framework-documents> for further details on how to apply for this opportunity and for making use of the NRF Online Submission System.

### **Wallonia Brussels Federation:**

The submission of proposals for bilateral agreements is performed via the Sémaphore platform (<https://applications.frs-fnrs.be>) and consist of three steps:

- 1) Completion of an administrative pre-form
- 2) Completion of the full application form:
  - a) Research objectives, identity of the researchers from Belgium and from São Paulo, number of missions from each side.
  - b) Detailed description of the project by using [the model document](#).
  - c) CVs of the participants: researchers from Belgium and from the State of São Paulo, co-Promotor (Co-Principal Investigator) of a FWB institution (if applicable), researchers from Belgium and from Sao Paulo for whom missions are requested (if known at the time of submission).
  - d) Letter of Agreement of the Host Institution in the State of São Paulo to which the PI from São Paulo is affiliated.
- 3) Fill in the budget part of the proposal.

### **How are applications evaluated?**

Following the closing date indicated below, applications will be peer reviewed according to the eligibility criteria. The review panel will include recognised local experts in the various fields of research represented by the proposals received. These experts will evaluate each proposal based on the following criteria:

- Scientific and technical merit
- Feasibility
- Methodology
- International significance
- National priorities
- Participation of students and young researchers

Particular emphasis is to be placed on the training of students and young researchers achieved through research and the transfer of knowledge and know-how aimed at socio-economic community development. The integration of young researchers and students, and the exchange of post-doctoral researchers are encouraged, as is the involvement of students and researchers from historically disadvantaged communities.

A final decision on projects to be funded will be made in consultation with the F.R.S.-FNRS authorities. Funding will only become available once both funding agencies have completed their respective evaluation and operational processes. Note further that both scientific and financial reporting on the project is an obligatory condition of funding. **It is highly recommended that students should travel abroad in this programme.**

### **Projects follow-up and reporting**

- Principal Investigators are expected to submit progress reports to the NRF annually. Funds for the subsequent years will not be released by the NRF without a Progress Report (PR).
- A final scientific and financial report should be submitted by both the South African and the French speaking project Principal Investigators no more than 3 months after the end of the project.
- The report should mention the outputs of the projects compared with the objectives and aims of the proposal.

- Any joint publications by the researchers should mention the support from the NRF and the F.R.S.-FNRS.

## Science engagement

The NRF supports science engagement through its coordination and implementation of the Department of Science and Innovation’s Science Engagement Strategy. The strategy embraces a broad understanding of science, encompassing systematic knowledge spanning natural and physical sciences, engineering sciences, medical sciences, agricultural sciences, mathematics, social sciences and humanities, technology, all aspects of the innovation chain and indigenous knowledge. Within this context, science engagement refers to activities, events, or interactions characterised by mutual learning and dialogue among people of varied backgrounds, scientific expertise and life experiences, who articulate and discuss their perspectives, ideas, knowledge and values. Science engagement is an overarching term for all aspects of public engagement with science, science awareness, science education, science communication and science outreach, which aim to develop and benefit individuals and society. Researchers funded through the NRF programmes are required to contribute to science engagement and report the related outputs in their project’s annual Progress Report.

## Intellectual property

The researchers of each country, particularly the PIs, must take adequate steps to ensure protection and sharing of the intellectual property that could result from the joint projects.

## Ethical clearance

It is the responsibility of the grantholder, in conjunction with the institution, to ensure that all research activities carried out in or outside South Africa comply with the laws and regulations of South Africa and/or the foreign country in which the research activities are conducted. These include all human and animal subjects, copyright and intellectual property protection, and other regulations or laws, as appropriate. A research ethics committee must review and approve the ethical and academic rigor of all research prior to the commencement of the research and acceptance of the grant. The awarded amount will not be released for payment if a copy of the required ethical clearance certificate, as indicated in the application, is not attached to the Conditions of Grant. Please also refer to the “Statement on Ethical Research and Scholarly Publishing Practices” on the NRF website at <https://www.nrf.ac.za/media-room/news/statement-ethical-research-and-scholarly-publishing-practices>.

## Closing date for applications

**Closing date at Stellenbosch University: 14 September 2021.** The deadline for Designated Authorities (DAs) submission to the NRF is **17 September 2021**. South African researchers **must** consult their institutions for internal closing dates.

Applications received after this date will not be considered for reviews. Please note that neither the NRF nor the F.R.S.-FNRS will be held responsible for applications that were not received. Researchers are also advised to ensure that their research partners’ applications are submitted and have also been received in the partner country.
