

South Africa/ France Science and Technology Research Collaboration (PROTEA)

Call for Joint Project Proposals 2019

CLOSING DATE: 04 JUNE 2018

A maximum of 15 joint projects will be funded for this call

The South Africa/ France PROTEA Programme is a bilateral incentive Programme dedicated to strengthening the South Africa/French collaborative research. It is co-funded by both the French Ministry of Foreign Affairs and the Ministry of Higher Education and Research from the French side, and the National Research Foundation from the South African side. The development of the PROTEA Programme was based on a shared conviction regarding the importance of science, technology and innovation in building and sustaining a knowledge-based economy. It is a financial instrument supporting mobility and training of “incoming and outgoing” researchers, contributing to the development of new partnerships and to the strengthening of advanced scientific and technological exchanges between research institutions in South Africa and France. It therefore provides a springboard for initiating, developing and expanding research projects.

This Programme was launched in 1997 and in December 2017 the two countries celebrated its 20th anniversary and agreed, based on the successes that have been achieved in the past 20-year, to continue investing in and supporting the Programme, hence the launch of the 2018 call.

AIMS OF THE PROGRAMME

This Programme aims to:

- contribute to scientific advancement in both countries by funding researchers' mobility in the frame of joint research projects in specified research fields;
- provide an opportunity for researchers to cooperate in an international setting and to develop their scientific careers, especially for early-stage, mid-career as well as female researchers;
- support the advancement of basic and applied research; and
- contribute meaningfully to research capacity development.

AREAS OF COOPERATION

The call is open to all scientific disciplines and thematic areas, including social sciences as well as the humanities.

PLEASE NOTE:

- Joint projects with the potential to lead to future bilateral and multilateral co-operations within the French, South African and European research programmes will be favourably considered. Also, the joint projects by young scientists and those that pay particular attention to a balanced involvement of female and male researchers (gender equality) will be positively considered and will receive a higher rating.

DURATION OF PROJECTS

The projects will be supported for a period of two years (projects starting January 2019 and ending December 2020).

WHO MAY APPLY?

- An application must designate two Principal Investigators (PIs), one in South Africa and one in France, who will bear the main responsibility for the project, including its technical and administrative coordination as well as scientific and financial reporting.
- Project proposals submitted by early-stage or mid-career researchers as well as project proposals with involvement of PhD/doctoral students and/or female researchers will be prioritised for funding by both sides.
- The focus of the Programme lies on new international partnerships. Therefore, follow-up proposals with the same research partners will not be prioritised for funding (if they have already been funded under this Programme).

SOUTH AFRICA:

This call is open to working researchers residing in South Africa and affiliated with a recognised higher education or research institution such as a university, university of technology or science council. Commercial institutions and private education institutions are not eligible to apply under this programme. The South African applicant must be in possession of a PhD. In terms of human capital development, South African applications from previously disadvantaged individuals and the involvement of historically disadvantaged higher education and research institutions will be prioritised.

FRANCE:

This call is open to working researchers residing in France with a recognised French higher education university/college, research institution, or enterprise.

HOW DO I APPLY?

The onus is on the applicant to find their own research partner. Proposals must be received in both South Africa and France. Proposals which have only been received in either South Africa or France, but not both, will not be considered for funding. The call process is highly competitive; therefore submission of an application does not guarantee funding. The availability of funds and the evaluation of applications from both countries should be positive for projects to be considered for funding. The NRF will not be held responsible for non-submission, administration or evaluation of the application in the partner country.

SOUTH AFRICA:

Applicants can apply by following the steps below:

- Applications must be submitted electronically on the NRF Online Submission System to the NRF at <https://nrfsubmission.nrf.ac.za/>
- Register/Login using your ID number and password.
- Go to “My applications” and select “Create Application”.
- Select the call for which you are applying for: **SA/France PROTEA Call for Proposals 2019**.
- Remember to complete all sections of the application as indicated on the online application form.
- **Please attach the necessary documents in PDF file in the following order: CV of partner, budget of partner and the signed page of the partner.**
- Remember to submit your application on completion.
- Completed applications will go to the host institution for verification before being forwarded to the NRF for further processing.
- Incomplete applications will not be considered.
- Applications that do not meet the eligibility criteria as outlined in this document will not be considered.
- Applications submitted outside the NRF Online Submission System will not be accepted.
- No hard copies will be accepted and will automatically be disqualified by the NRF.
- Only applications endorsed by the research office or its equivalent at higher education or research institutions will be accepted.
- Please contact the research office or its equivalent, if you have any queries.

FRANCE:

The French team’s project proposal, in French, will be submitted online at the following address [Protea on line submission of the French proposals: http://www.campusfrance.org/fr/protea](http://www.campusfrance.org/fr/protea)

WHICH ACTIVITIES MAY I APPLY FOR?

The purpose of this call is to support the mobility of researchers between the two countries to carry out joint research projects. In this regard, funding will be made available for visits and exchanges of scientists conducting joint research in their area of specialisation.

In the case of meetings, research visits and exchanges of scientists, personnel and experts, as well as reciprocal visits undertaken as part of joint research projects and the attendance of workshops, seminars, symposia and other meetings funded under this partnership, the sending side will be responsible for expenses associated with international travel (flights), visas, medical insurance and subsistence while the receiving party covers accommodation costs, local/ground transport and all expenses associated with hosting of events, e.g. venue for workshops, etc.

The following will **NOT** be funded from the funds allocation:

- Consultant's fees
- Project management fees
- Educational expenses (scholarships and/or bursaries, etc.)
- Research funds
- Large equipment
- Salaries and temporary staff fees.

FUNDING MODALITIES

Funding will be available for a maximum of two years for collaborative research projects jointly developed and completed by researchers on both sides. In both countries, all the approved projects will get funding support from the two parties in terms of the cost of activities mentioned above.

Apart from the financial support from the two parties, institutions and universities in both countries are encouraged to solicit other funding resources.

FUNDING LIMITS

- Should you be successful you will be funded only for the activities within the scope of this guideline.
- Scientific and financial reporting on the project is **OBLIGATORY**.
- Research stays in both countries are **OBLIGATORY**.

SOUTH AFRICA:

The total amount requested from the NRF should not exceed **R300 000** per project. Funding will be made available for a maximum of two years, to be paid in annual installments (**R150 000 per year**) and exclusively for research activities commencing in 2019.

FRANCE:

Funding requests from France should not exceed €20 000 (10.000€ per year). The following indicative rates apply:

- The travel from France to South Africa (or vice-versa) will be reimbursed up to €1 500 per return ticket.
- Doctoral and postdoctoral daily allowances of €60/day up to 90 days
- Scientists' daily allowances of €110/day up to 90 days.

HOW ARE APPLICATIONS EVALUATED?

Following the closing date indicated below, applications will be submitted to recognised national experts in the various fields of research represented by the proposals received. These experts will evaluate each proposal based on the following broad criteria:

- Scientific quality of the intended joint research project
- Feasibility and/or plans for future cooperation
- Human Capacity Development

Please note that other national criteria may be applicable in line with the national policies and regulations of

the partnering countries. Following national evaluation, a shortlist of projects to be funded will be constituted through consultations between the two Parties based on the results of the expert evaluations done in both countries. The project selection will be carried out at the Joint Technical Committee (JTC) Meeting. The minutes of this meeting (indicating approved joint projects for funding) shall be signed by both Parties to indicate a joint consensus on projects to fund. The results of this JTC meeting will be announced before the end of December 2018.

PROJECT FOLLOW-UP AND REPORTING

- A final scientific and financial report has to be submitted in English by both the South African and the French PIs no more than 3 months after the end of the project.
- From both the South African and French sides, successful submission of the first annual report is an **OBLIGATORY** condition of funding in subsequent years.
- The French PI should download and use the template for a report within defined timeframe. The project report from the French side should be forwarded to the Attaché for Science and Technology at the French Embassy in South Africa.
- All project reports must mention project outputs as compared to the objectives and aims of the proposal.
- The funders reserves the right to make the final reports available to researchers within and outside this programme in similar disciplines.
- The joint publications by researchers must mention the support from the funders (i.e. the South African Department of Science and Technology, the South African National Research Foundation, the French Ministry of National Education, Higher Education and Research, and the French Ministry of Foreign Affairs and International Development).

INTELLECTUAL PROPERTY

The researchers of each country, particularly the PIs, must take adequate steps to ensure protection and sharing of the intellectual property that could result from the joint projects.

CLOSING DATE FOR APPLICATIONS

Applications must be submitted by **04 June 2018**. Applications received after this date will not be considered for funding. Researchers are also advised to ensure that their research partners' applications are submitted and have also been received in the partner country in time. Both the French and the South African funders will not be held responsible for applications that were not received in either side.
