

ACE (Advanced Certificate in Education)

Life Science Gallery

Two year part-time accredited Advanced Certificate in Education Programmes at Stellenbosch University offers non-graduate teachers the opportunity to improve their qualifications and teaching abilities.

These accredited programmes focus on upgrading the subject knowledge and didactical skills of **servicing teachers**.

The programme is managed by IMSTUS and the teaching is done jointly by IMSTUS, academic staff members of the Faculties of Science and Education at the University of Stellenbosch (US). The programmes are presented in English and Afrikaans, provided that sufficient interest (usually a minimum of 20) is received.

APRIL CONTACT SESSION

Medical Morphology Museum

The Second Year students (accompanied by the taxi drivers!) visited the **Medical Morphology Museum** of the Department of Biomedical Sciences at the Tygerberg Campus of the University of Stellenbosch. We also saw a few other things behind the scenes - a few did not eat or sleep that evening!

Our Tour Guide, Frank, and Dr De Wet Strauss
