

SUNHEART Advanced imaging and interventional fellowship

SUNHEART will offer a one (1) year fellowship for recently qualified Cardiologists (within the last two years) to complete an advanced imaging (Echocardiography/Cardiac MRI) and/or coronary interventional fellowship at the Division of Cardiology, Department of Medicine, Stellenbosch University and Tygerberg Hospital. The fellowship will be available from 1 February 2024.

Requirements

1. Qualification as a Specialist Cardiologist obtained in a recognised training institution – Cert Cardio (Phys) or equivalent;
2. Registration with the HPCSA as a Specialist Cardiologist (candidates in the process of registration will also be considered)

Candidates who are currently sitting for their examinations are encouraged to apply as they may be appointed on condition that they obtain the relevant qualifications.

Recommendations

1. Previous experience in interventional cardiology
2. Previous experience in advanced echocardiography or cardiac MRI.

Duties

1. Participating fully in all activities of the division
2. Logbook of all cases to be kept
3. Database management of SUNHEART Cardiology outreach program including acute coronary syndrome network
4. Candidates will be afforded the opportunity to enrol for doctoral studies
5. Candidates will be encouraged and supported to spend time at affiliated cardiology units

Please send your CV with a motivation letter to:

Prof Alfonso JK Pecoraro

Head: Division of Cardiology

Department of Medicine, Stellenbosch University and Tygerberg Hospital
