

Beste Matie-graduandus

Hartlik geluk met die kwalifikasie wat jy vandag verwerf. Ons is trots op jou!

Jy is deel van 'n uitgelese groep, want vanjaar vind die eerste gradeplegtighede van ons tweede eeu as universiteit plaas. Dit was ons Eeufeesjaar in 2018, en ons het ook 'n nuwe visie en strategiese raamwerk aanvaar waarmee ons nou die toekoms vol vertroue tegemoet gaan.

Die Universiteit Stellenbosch (US) streef daarna om Afrika se voorste navorsingsintensiewe universiteit te wees wat wêreldwyd as uitnemend, inklusief en innoverend erken word. Ons is ook daartoe verbind om kennis tot diens van die samelewing te bevorder. Dit is veral met laasgenoemde doelwit waarmee jy ons kan help namate jy nou die beroepslewe betree.

Jou tyd by Maties het jou voorberei om leiding te neem en uit te blink in 'n diverse wêreld, danksy 'n omgewing waarbinne jy 'n transformerende studente-ervaring kon hê. Mag jy wat jy hier geleer het, met vrug toepas en mag die US se waardes – uitnemendheid, deernis, billikheid, respek en verantwoordbaarheid – jou rigsgoer bly.

Die US sal altyd jou akademiese tuiste wees. Besoek gerus ons opwindende nuwe alumni-platform, www.matiesconnect.com. Daar kan jy kontak met jou universiteitsvriende behou, werksaanbiedinge sien, asook mentors en netwerkgeleenthede vind – alles op een plek. Studies dui daarop dat betrokkenheid by sterk alumni-netwerke vrugte afwerp. Bly deel van die Matie-familie om jou loopbaan te bevorder.

Ons beste wense vergesel jou!

Prof Wim de Villiers
Rector en Visekanselier

Dear Matie Graduate

We warmly congratulate you on the qualification that you will be receiving today. We are proud of you!

You are part of a very special group, as this year's graduation ceremonies are the first to be held in our second century as a university. We commemorated our Centenary in 2018 and in the same year, we adopted our new strategic framework, enabling us to enter the future with confidence.

Stellenbosch University (SU) aims to be Africa's leading research-intensive university, globally recognised as excellent, inclusive and innovative. We are also committed to advance knowledge in service of society. As you set out on your career path, we call on you to assist us with this latter part of our vision.

Your time at Maties has prepared you to lead and excel in a diverse world thanks to an environment in which you could enjoy a transformative student experience. May you succeed in applying what you have learnt here successfully and may the values of SU – excellence, compassion, equity, respect and accountability – continue to guide you.

SU will always be your academic home. Visit our exiting new alumni platform, www.matiesconnect.com, to stay in touch with your university friends, and find the latest job postings, mentors and networking opportunities – all in one place. Studies have shown that involvement in strong alumni networks pays dividends, so remain part of the Matie family to advance your career.

Our best wishes accompany you!

Prof Wim de Villiers
Rector and Vice-Chancellor

Ophumelele Ematie Othandekayo

Sithi huntshu kuwe khwalifikeshini oza kuyifumana namhlanje. Siyazidla ngawe!

Uyinxalenye yeqela elikhethekileyo, njengoko imisitho yabaphumeleleyo yalo nyaka iyeyokuqala ukubanjwa kwinkulungwane yethu yesibini njengeyunivesithi. Siye sabhiyozela iMinyaka Elikhulu sikho ngo-2018 yaye kwangaloo nyaka, siye samkela isicwangciso-qhinga esitsha, nto leyo esincede ukuba singene kwikamva ngokuzithemba.

IYunivesithi yaseStellenbosch (SU) izimisele ukuba yiyunivesithi etshotsh' entla kwezophando olunzulu eAfrika, igqalwa ehlabathini lonke njengephum' izandla, iquka wonke umntu yaye inobuchule. Kanti sizimisele ukuqhubela phambili ulwazi ekunikeni uluntu iinkonzo. Njengoko uza kuqalisa umsebenzi wakho, siyakubongoza ukuba usancedise kulo mbono esigqiba kuwuchaza.

Ixesha obuseMaties ngalo liye lakulungiselela ukukhokela uze uphale phambili kwihlabathi elinabantu abahlukeneyo ngenxa yemo okwazileyo ukunambitha kuyo imo yokuba ngumfundi okwaziyo ukutshintsha izinto. Ngamana ungaphumelela ekusebenziseni izinto oye wazifunda apha yaye ngamana iziseko zaseSU – ukugqwesa, uvelwano, ukulingana, intlonelo nokunikela ingxelo – ungaqhubeka ukhokelwa zizo.

I-SU iya kuqhubeka ilikhaya lakho lemfundo. Tyelela eli qonga lethu elitsha nelibangela umdla lwabo babesakufunda apha, www.matiesconnect.com, ukuze uhlale unxulumana nabahlobo bakho baseyunivesithi, yaye fumana izithuba zemisebenzi ezixhonywa mvanje, abacebisi kwakunye namathuba okudibana nabanye abantu – zonke ezo zinto zikwindawo enye. Uphononongo luye lwabonisa ukuba ukudibana nabanye ababesakufunda apha kuba neziphumo ezihle, ngoko hlala uyinxalenye yentsapho yaseMatie ukuze ukhulise amathuba akho omsebenzi.

Sikunqwenelela eyona minqweno mihle!

Njing Wim de Villiers
INqununu noSekela-Tshansila

Ons Visie 2040

Die Universiteit Stellenbosch sal Afrika se voorste navorsingsintensiewe universiteit wees wat wêreldwyd as uitnemend, inklusief en innoverend erken word en waar ons kennis tot diens van die samelewing bevorder.

Ons Missie

Die Universiteit Stellenbosch is 'n navorsingsintensiewe universiteit wat uitmuntende studente lok, talentvolle personeel aanstel en 'n wêreldklasomgewing bied; 'n plek wat met die wêreld verbind is en gemeenskappe plaaslik, op die vasteland en in die res van die wêreld verryk en transformeer.

Our Vision 2040

Stellenbosch University will be Africa's leading research-intensive university, globally recognised as excellent, inclusive and innovative, where we advance knowledge in service of society.

Our Mission

Stellenbosch University is a research-intensive university where we attract outstanding students, employ talented staff and provide a world-class environment; a place connected to the world, while enriching and transforming local, continental and global communities.

Umbonoweth ka2040

IYunivesithi yaseStellenbosch iya kuba yiyunivesithi egxininise kuphando nekhokeleyo eAfrika, neyamkelwa kwihlabathi lonke njengegqwesileyo, equkayo neyenza inguqulelo, nalapho siqhubela phambili ulwazi sikhonza uluntu.

Ubizo Lwethu

IYunivesithi yaseStellenbosch yiyunivesithi egxininise kuphando nalapho sitsala abafundi abagqwesileyo, siqesha abasebenzi abanesiphiwo kwaye sibonelela nemeko ekwinqanaba lehlabathi; indawo eqhagamshelene nehlabathi, ngelixa ichumisa kwaye iguqula uluntu lwengingqi, lwelizwekazi nolwehlabathi.

Altyd 'n Matie

Geluk en welkom in die Universiteit Stellenbosch se alumni-familie! Jou gradeplegtigheid is 'n belangrike mylpaal, en ook die begin van jou voortgesette verbintenis met jou alma mater. Die Alumni-kantoor is jou lewenslange skakel met die Universiteit.

Daar is vele maniere om in kontak te bly.

Tuiskoms-en-familienaweek

Die Universiteit se Tuiskoms-en-Familienaweek vir alumni vind elke jaar in Maart op die Stellenbosch-kampus plaas. Inligting is beskikbaar by www.matiesalumni.com.

Sluit aan by Maties connect

Ons www.matiesconnect.com platform sal jou help om jou professionele netwerk uit te brei, 'n mentor te vind, alumni te bereik, en op hoogte te bly van gebeure by jou alma mater.

Wees deel van 'n Alumni-hub

Die Stellenbosch Alumni-betrekkinge-span stel plaaslike en internasionale alumni-nawe (oftewel hubs) saam om die skakeling tussen alumni onderling te verbeter deur gereelde netwerke en sosiale geleenthede aan te bied. Vir meer inligting oor hoe om 'n hub in jou gebied te stig of by een van ons gevestigde hubs aan te sluit, stuur 'n e-pos na alumni@sun.ac.za.

Always a Matie

Congratulations and welcome to the Stellenbosch University alumni family! Your graduation is a momentous occasion and marks the beginning of your continued relationship with your alma mater. The Alumni Office is your lifelong connection to the University.

There are many ways to stay connected.

Homecoming and family weekend

The University's Homecoming and Family Weekend for alumni takes place every year in March on the Stellenbosch campus. Information is available on www.matiesalumni.com.

Join Maties connect

Our www.matiesconnect.com platform will help you increase your professional network, find a mentor, reach out to alumni, and keep up to date on what's happening at your alma mater.

Be part of an Alumni hub

The Stellenbosch Alumni Relations team establish alumni hubs both locally and internationally to connect alumni in specific regions with one another through regular networking and social events. For more information on how to start or join an existing hub in your area, send an e-mail to alumni@sun.ac.za.

I-Matie ngalo lonk' ixesha

Sivuyisana nawe kwaye wamkelekile kusapho olungabo babesakufunda kwiYunivesithi yaseStellenbosch! Ukuthweswa kwakho isidanga lixesha apha elakha labaluleka, kwaye likwalixesha eliphawula ukuqalisa kwakho ubudlelwane obuqhubekayo kunye nale yunivesithi owawusakufunda kuyo. IOfisi yabo Babesakuba Ngabafunda Apha yiyo ekunxulumanisa neYunivesithi ubomi bakho bonke.

Zininzi iindlela zokuhlala uqhagamshlekile.

Impelaveki yobuyelo-khaya ubenosapho

IMpelaveki yoBuyelo-Khaya ubenoSapho eyenzelwe abo babesakufunda apha yenzeka qho kwinyanga yoKwindla kwikhampasi yaseStellenbosch. Iingombolo ezithe vetshe zifumaneka ku-www.matiesalumni.com.

Joyina i-Maties connect

Iqonga lethu le-www.matiesconnect.com liza kukunceda ekwandiseni inani leengcali onxibelelana nazo, ukufumaneni umcebisi onamava, eku-fikeleleni kwabanye ababefunda apha nasekubeni uhlale usazi ngokwenzekayo ngale yunivesithi owawusakufunda kuyo.

Yiba yinxalenye yeqela labo babesakuba ngabafundi balapha

Iqela lezoNxibelelwano lwabo baBesakuba ngaBafundi balapha lisungula amaqela abo babesakuba ngabafundi apha naza kuzinza kweli lizwe nakwamanye amazwe ukuze kunxibelelwane ngabo babesakuba ngabafundi apha abakwiingqi ezithile oko kusenziwa ngokunxibelelana rhoqo nangeendibano zasekuhlaleni. Ukuba ufuna iinkcukacha ezithe vetshe malunga nendlela yokuqalisa okanye yokujoyina iqela esele likho kwiingqi yakho, thumela i-imeyili ku-alumni@sun.ac.za.

| | 5. Verwelkoming in Xhosa. |
| | 6. Voorstelling van kandidate wat kwalifikasies ontvang deur die dekaan van die fakulteit en toekenning van kwalifikasies deur die Visekanselier. |
| | 7. Voorstelling van kandidaat vir die Kanselierstoekenning en oorhandiging van die toekenning deur die Visekanselier. |
| | 8. Sluiting deur die Visekanselier. |
| <i>Staan asseblief</i> | 9. Akademiese prosessie verlaat die verhoog. |

PROGRAMME

- | | |
|---------------------|--|
| <i>Please stand</i> | 1. Entrance of academic procession into the hall. |
| <i>Please stand</i> | 2. Singing of the National Anthem (see inside back cover). |
| <i>Please sit</i> | 3. Congregation formally constituted by the Vice-Chancellor. |
| | 4. Welcome by the Vice-Chancellor. |
| | 5. Welcome in Xhosa. |
| | 6. Presentation of candidates receiving qualifications by the dean of the faculty and conferment of qualifications by the Vice-Chancellor. |
| | 7. Introduction of the candidate for the Chancellor's Award and presentation of the award by the Vice-Chancellor. |
| | 8. Closing by the Vice-Chancellor. |
| <i>Please stand</i> | 9. The academic procession leaves the stage. |

Doktor in die Wysbegeerte Doctor of Philosophy

BALCOMB, Blake Howard (Biochemistry)

The Staphylococcus aureus redoxome: Characterisation of enzymes involved in oxidative stress resistance and survival

The global resurgence of antibiotic resistance calls for the identification of novel drug targets. Therapies that strengthen the body's ability to defend itself against infection are receiving increased attention. Mechanisms whereby the pathogen *Staphylococcus aureus* protects itself against oxidative attacks the innate immune system uses to ward off infection were investigated. A new family of enzymes that the bacteria use to detoxify an antimicrobial compound produced by the immune system was discovered. Without these enzymes, *S. aureus* is more susceptible to being killed. These findings open up new avenues for the development of treatments that augment the host's ability to fend off infection.

Supervisor: Prof E Strauss

BEGUM, Nusrat Mutta (Polymer Science)

Designing of PoEGylated tyrocidine for improved antiplasmodial chemotherapy

Tyrocidin is a known anti-malarial peptide that cannot be used as a drug due to its haemolytic activity. Tyrocidin was conjugated with poly(oligo(ethylene oxide)methacrylate) (PoEGMA), which resulted in a conjugate that self-assembles into micelles. The link between peptide and PoEGMA is designed to hydrolyse in the food vacuole of the malaria parasite (pH 5.5). The surface of the micelles was decorated with targeting ligands that trigger the uptake of the micelles into erythrocytes. The pH-induced release of tyrocidine was confirmed along with the strongly reduced haemolytic activity.

Supervisor: Prof L Klumperman

Co-supervisor: Dr N Gule

BOTES, Alicia (Polymer Science)

Chitin and chitosan nanomaterials for the efficient removal of heavy metals from waste water

Heavy metal contamination in water is a serious industrial problem. This study involved the use of nanomaterials based on chitin and chitosan to remove heavy metals from water. Chitosan nanoparticles and nanofibers as well as chitin nanowhisker-based composite materials were evaluated, while a serendipitous discovery led to the development of a chitosan-based sponge. It was shown that the selection of a suitable biosorbent based on these materials could be made, taking the target metal species and parameters such as pH into consideration. The biosorbents were shown to be reusable, and it was proved that adsorbed metals could easily be removed from these materials.

Supervisor: Prof AJ van Reenen

Co-supervisor: Dr M Lutz

BRITS, Christiaan Petrus (Physics)

Coulomb excitation of the 2+ state in ¹⁴C and the quadrupole deformation of states in ¹⁹⁴Pt

Electric quadrupole transition strength is a fundamental quantity to probe the collective behaviour in nuclei and is a basic observable in studies of nuclear structure. Experimental measurements of this transition strength provide powerful information on quantities such as deformation, the interaction between protons and neutrons, and the vanishing and emergence of shell gaps. The much improved values of the transition strength between nuclear states in ¹⁹⁴-platinum provide important constraints for nuclear theory. The measurement on ¹⁴-carbon lays the foundation for improved future experiments to address the apparent inconsistencies in the understanding of the nuclear structure in this nucleus.

Supervisor: Dr M Wiedeking

Co-supervisors: Dr K Hadynska-Klek (external), Prof. P Papka

CASTILLO, Maria Loreto (Botany)

Processes and drivers of Prosopis invasions in Eastern Africa

Prosopis trees are among the world's most invasive plants, causing severe economic and biodiversity impacts. A genetic study demonstrated that these trees often hybridise due to low genetic differentiation between species and that higher ploidy levels are associated with invasiveness. A study on founder and invasive genotypes in Kenya suggested that both rapid post-introduction evolution and phenotypic plasticity have contributed to the invasiveness of *Prosopis*. Despite similar introduction histories of *Prosopis* to Kenya and Ethiopia, population genetic analyses further suggest that different demographic processes are driving invasions in these two countries. These findings have important implications for *Prosopis* management.

Supervisor: Prof JJ Le Roux (external)

Co-supervisors: Prof BW van Wilgen, Dr U Schaffner (external)

DAVISON, Steffi (Microbiology)

*Exploring phenotypic and genetic diversity of natural *S. cerevisiae* strains for improved recombinant cellulase secretion*

The one-step conversion of agricultural residues to bio-ethanol is approaching commercialisation, but the technology still requires optimisation to be cost-effective. One of the remaining challenges is the production of recombinant cellulase enzymes at high levels in yeast strains that can withstand the stressful conditions associated with bio-ethanol production. This study investigated the expression of a set of cellulose-degrading enzymes in different natural yeast strains to identify those with superior enzyme production traits. The genetic mechanisms underlying these superior production traits were investigated and new target genes for the enhanced production of enzymes in industrial strains were identified.

Supervisor: Prof WH van Zyl

Co-supervisor: Prof R den Haan (external)

DJAGBA, Prudence (Mathematics)***Contributions to the theory of Beidleman near-vector spaces***

The concept of a vector space is fundamental in mathematics and several of its applications. Some structures are nearly vector spaces but fail to satisfy all of the relevant axioms, hence near-vector spaces are studied. One possible definition of such things was provided by Beidleman in his 1966 thesis. In the present study, Beidleman's ideas were developed further. In particular, a thorough account is given of the two kinds of subspaces generated by a finite set of vectors in a finite Beidleman near-vector space. Several relevant results on near-fields were also proved.

Supervisor: Dr K-T Howell

Co-supervisor: Dr G Boxall

EGHBALI DOGAHEH, Seyed Babak (Chemistry)***An investigation into the functionalisation of polystyrene-co-maleic anhydride with calixarenes and their potential applications***

A method to successfully graft the versatile molecular receptor known as calix[4]arene onto polystyrene-co-maleic anhydride was developed. This entailed optimising the monofunctionalisation of the calix[4]arene in order to selectively attach it without causing uncontrolled cross-linking of the polymer chains. As calix[4]arenes can be modified for a number of different applications, including ion sensing and complexation, the potential applications of this method are extremely promising. Two possible applications were investigated, namely mercury sensing and hydrogel formation. These proved to be challenging due to unforeseen synthetic and conformational issues. Nevertheless, these findings have provided insights and have laid the groundwork for future studies on polymer tethered calix[4]arenes.

Supervisor: Prof GE Arnott

Co-supervisor: Prof PE Mallon

FORTUIN, Lisa (Polymer Science)***Biodegradable polymeric prodrugs for the delivery of antimalarial combination therapy***

The combination therapy consisting of artemether and lumefantrine is currently the preferred choice for the treatment of malaria. The requirement to eat fatty food and the increasing occurrence of drug resistance have sparked the development of new drugs and new drug delivery systems. A delivery system was investigated that features reversibly covalently linked lumefantrine. Targeted uptake by malaria-infected erythrocytes leads to exposure to the acidic environment of the parasite's food vacuole, which leads to local release of the drug. Higher local drug concentrations and less exposure of other tissue to the drug are expected to be major advantages.

Supervisor: Prof L Klumperman

Co-supervisor: Dr R Pfukwa, Prof. M Rautenbach

GU DAGUDI, Kirankumar (Physiological Sciences)***Fibroblast growth factors, a potential game plan for regeneration of skeletal muscle***

Satellite cells are adult stem cells resident in skeletal muscle. In response to injury, they are activated and proliferate, forming colonies of myoblasts. Fibroblast growth factors (FGFs) play an important role in modulating satellite cells and myoblast dynamics. Employing two different FGF family members added to primary human myoblast cultures showed that FGF2 and FGF6 have individual effects. After induction of quiescence, sequential treatment administering first FGF6 and then FGF2 enhanced first activation and then proliferation, respectively. By determining effects on key cell cycle controllers and myogenic regulatory factors, administration in reverse order did not aid in the regeneration sequence.

Supervisor: Prof KH Myburgh

HARRIS, Dugal Jeremy (Geo-informatics)***Regional mapping of spekboom canopy cover using very high-resolution aerial imagery***

Widespread degradation of subtropical thicket has led to substantial decreases in ecological functioning and biodiversity. Canopy cover maps are required to inform and support large-scale restoration. A semi-automated spekboom canopy cover mapping method was developed that can be applied over very large areas. The method was demonstrated in the Little Karoo, which involved radiometric calibration and classification of more than 2 000 very high-resolution (50 cm) multi-spectral aerial images. The radiometric calibration technique developed is currently being commercialised.

Supervisor: Prof A van Niekerk

HODSON, Luke Eric (Chemistry)***Design and synthesis of covalent kinase inhibitors utilising novel electrophiles***

The efficacy of many modern small molecule cancer therapies is frequently diminished by the development of cancer cell resistance. Irreversible inhibitors for the epidermal growth factor receptor, a mutation-prone protein-tyrosine kinase of relevance in modern cancer therapy, were specifically developed and synthesised to target cysteine, serine or catalytic lysine amino acid residues near the active site of this kinase. A range of electrophiles, including 1,4-dicarbonyl-, sulfonyl fluoride-, imidazole- and nitrile-functional groups was incorporated onto established kinase-binding scaffolds. This resulted in compounds that demonstrated good biochemical inhibition and modest activity against drug-resistant cancer cell lines.

Supervisor: Prof WAL van Otterlo

Co-supervisor: Dr SC Pelly (external)

JANA, Collins Edward (Biochemistry)***Synthesis, profiling and mode of action studies of PanSulfAms as inhibitors of coenzyme A biosynthesis and utilisation***

Sulphonamides, the first synthetic antibacterials discovered in the 1930s, target the utilisation of the vitamin folate. Sulphonamide analogues of other vitamins were shown in early tests to hold promise for the treatment of streptococcal and malaria infections, but this work was not developed further. PanSulfAms are analogues of pantothenate (Vitamin B5) that were successfully resynthesised and shown to selectively inhibit certain bacteria, specifically the nosocomial pathogen *Staphylococcus aureus*. This was found to be due to the unique character of the enzymes that *S. aureus* uses to transform pantothenate into the essential cofactor coenzyme A (CoA) and the negative impact the PanSulfAms has on the biosynthesis and utilisation of CoA in this organism.

Supervisor: Prof E Strauss

Co-supervisors: Dr M de Villiers

MALATJI, Kgashane (Physics)***Statistical properties of deformed samarium isotopes and constraining the nucleosynthesis of ^{180}Ta***

Several samarium isotopes show discrepancies in the persistence of the nuclear scissors resonance, which may hint at interesting underlying physics and possibly impact the production of elements in the universe. The importance of nuclear structure effects is apparent from tantalum isotopes. With very few exceptions, most heavy nuclei are produced in neutron capture processes, which take place in stars and supernovae. New nuclear data allow for astrophysical relevant capture cross sections to constrain the production of $^{180}\text{-tantalum}$, mainly due to the photodisintegration process. This solves the longstanding question on which process is primarily responsible for the production of $^{180}\text{-tantalum}$.

Supervisor: Dr M Wiedeking (external)

Co-supervisors: Profs S Siem (external), P Papka

MATEBESE, Belinda Thembisa (Applied Mathematics)***Path planning for wheeled mobile robots using an optimal control approach***

Mobile robots often need to find feasible and collision-free paths from initial to goal states, while satisfying robot kinematic and dynamic constraints. An approach employing optimal control was presented to solve such path-planning problems. Obstacles in the environment were modelled with potential fields and optimality conditions for specific types of robots were derived. The conditions led to sets of differential equations that were solved indirectly with the leapfrog method, which would improve an initial path recursively through a subdivision scheme. Simulations and experiments on a two-wheeled robot and a mobile manipulator highlighted the value of the method over existing approaches.

Supervisor: Prof MK Banda (external)

Co-supervisor: Drs DJ Withey (external), WH Brink

MENTOOR, Ilze Lauren (Physiological Sciences)***Chemoresistance in a breast cancer animal model: The role of obesity and inflammation***

Obesity in the context of breast cancer contributes to poor treatment outcomes. Adipose tissue in the tumour micro-environment serve as an exogenous energy source for the survival of breast cancer cells. These cancer cells modulate lipid metabolism by altering the secretion of adipokines through adipocytes, resulting in the release of free fatty acids to serve as energy substrates. The underlying physiological and molecular mechanisms that are involved in chemotherapeutic treatment resistance were investigated and confirmed the hypothesis that obesity-induced inflammation contributes to the development of doxorubicin chemotherapeutic treatment resistance in breast cancer cells.

Supervisor: Dr TA Nell

Co-supervisor: Prof A-M Engelbrecht

MUNCH, Zahn (Geo-informatics)***Towards land change management using ecosystem dynamics and land cover change in rural Eastern Cape***

Woody encroachment in grasslands is a threat to the functioning and productivity of rangelands, affecting rural livelihoods in the Eastern Cape. This study determined how accurately land cover transformation can be quantified using erroneous, existing data sets and how error patterns affect future scenario modelling. Grasslands are predicted to decrease in favour of woody invasive plant species and cultivated land, resulting in a decrease of 12% net carbon storage and 6% evapotranspiration. The quantification of such changes in biophysical parameters is essential to support future land management in the Eastern Cape and provides the foundation for wider applications of the novel methods developed.

Supervisor: Prof A van Niekerk

MUZA, Upenyu Lucky (Polymer Science)***Thermal field-flow fractionation and the advanced analysis of complex polymers***

The advent of cutting-edge technologies has prompted a surge in the demand for unique and advanced materials. Complex polymers are advanced materials with critical functionalities and applications in biomedicine, cosmetics and nanotechnology. Such materials have complexities in their molecular composition, structure, shape, size and weight. The definition and characterisation of such complexities are essential in the design and application of requisite materials and understanding the mechanisms of the relevant synthesis process. Novel and advanced multidimensional analytical techniques were developed in this study for the comprehensive analysis of such complexities, with the utility of a contemporary separation technique called thermal field-flow fractionation.

Bacterial biological control of toxic cyanobacteria and the resulting eco-toxicity

Globally, toxic cyanobacterial blooms are a major environmental and human health concern. These toxins, produced by cyanobacteria, affect aquatic life, contaminate drinking water and have been recorded to kill wildlife and humans. A potential biological control scenario was investigated using predatory bacteria. Four bacterial isolates were selected and shown to reduce cyanobacterial toxicity in water within four days. Water fleas, shrimp, lettuce seeds and onions were used as bio-indicators. A significant increase in the survival of the bio-indicators following treatment suggested that the predatory bacteria could be used to control cyanobacteria growth and improve water quality.

PASNIN, Charles (Zoology)

A genetic approach to the conservation of sponges in the Western Indian Ocean, with emphasis on the Mascarene Archipelago

Sponges are important components of marine ecosystems globally, but their lack of morphological characteristics make it difficult to distinguish species, hence sponges are largely understudied. Biodiversity surveys in the Rodrigues, Mauritius and Reunion islands revealed a high diversity of sponges, including numerous new species. Phylogenetic analyses showed that sponges in the Mascarene Archipelago are separated from other species globally and that, largely, each island harbours an evolutionary unique sponge fauna found nowhere else. Within the context of marine conservation, the management focus should be on each separate island, rather than the combined Mascarene region, to safeguard reef ecosystems in a changing environment.

PRETORIUS, Arnu (Computer Science)

On noise-regularised neural networks: Initialisation, learning and inference

The effects of popular noise regularisation techniques for neural networks on optimal weight initialisation, the training process and the model obtained were investigated. Noise regularisation was shown to de-emphasise low-variance components in training data, allowing the model to focus on more prominent statistical regularities. Studying the interplay between noise injection and initialisation led to the development of noise-sensitive critical initialisations for stable signal propagation in deep networks and an understanding of the failure modes for alternative initialisation. These insights were used to propose a novel training scheme for Bayesian neural networks, allowing the training of deeper networks than previously possible.

REYNOLDS BERRY, Terry Veronica (Zoology)

Systematics of the parasitoid wasp subfamily Banchinae (Hymenoptera; Ichneumonidae) in the Afrotropical region

The evolutionary history and taxonomy of parasitoid wasps are uncertain. The analysed morphological and genetic data, based on a large number of African Banchinae specimens, resulted in new systematic insights and the description of thirteen new species. The forest-associated lineage was found to be the oldest banchine genus within the Afrotropical region, and the Bayesian dating of a temperate-associated genus refutes the hypothesis that banchine lineages found within the Cape region are more derived because of their association with the Cape Floristic Region. The outdated generic key to the Banchinae in the Afrotropical region was updated and illustrated.

SHAUMBWA, Vaino Tuhafeni (Mathematics)

Weighted centrality and a further approach to categorical commutativity

The familiar fact that the sum of a pair of numbers does not depend on the order in which they are added, known as commutativity, fails for many other operations. Commutators were introduced as a kind of measure of the obstruction to commutativity. The main results were to produce new clear connections between various commutators, to characterise commutators by their global properties and to extend commutator and related theory to more general contexts than previously considered. It was shown that the theory of centrality can be studied in contexts where there is only an abstract notion of subtractivity.

Flexible Co(II) metal-organic frameworks with mixed ligands under controlled pressure

Three new porous cobalt-based metal-organic frameworks were prepared and studied for their ability to absorb carbon dioxide. The framework linkages were selected for their conformational flexibility and the resulting materials were found to exhibit structural pliability in response to increasing gas pressure. The crystal structures were characterised using X-ray diffraction and computational methods with a view to understanding the mechanisms that govern structural flexibility at the molecular level. One of the materials possesses a new 3-D topology and its mechanism for gas uptake involves two distinct modes of flexibility, namely breathing and swelling.

Supervisor: Prof LJ Barbour

SKEIN, Lisa (Zoology)***The role of native marine predators in regulating invasions: A case study of the invasive mussel *Semimytilus algosus* and native subtidal predators***

The role of native marine predators in regulating alien prey is poorly understood. While generalist predators might be expected to include alien prey into their diets, this outcome is not necessarily immediate. Such avoidance of alien prey can facilitate invasions. This research demonstrated that, long-term exposure to alien prey that are similar to prey already eaten by predators can overcome avoidance. Importantly, the degree to which native predators are able to regulate non-indigenous prey depends on their abundance and feeding rate. This highlights the importance of protecting native predator populations in an effort to protect against invasions in marine systems.

VAN DER WESTHUIZEN, Leandi (Chemistry)***Scaffold manipulation for the syntheses of novel, potentially irreversible Akt inhibitors***

The protein kinase Akt is implicated in the progression of cancer. A number of covalent allosteric Akt inhibitors are known and based on these scaffolds a small library of novel potential covalent allosteric inhibitors was designed and synthesised. The binding modes, potencies and antiproliferative activities of these compounds were explored, thereby furthering the structure activity relationship knowledge of this class of Akt inhibitors. Three novel covalent inhibitors were identified, exhibiting fair activity against Akt1wt and some cancer cell lines, potentially paving the way for novel covalent allosteric inhibitors with improved physiochemical properties.

Supervisor: Prof WAL van Otterlo

Co-supervisor: Dr SC Pelly (external)

VAN NIEKERK, Francois Koch (Mathematics)***Concrete foundations of the theory of noetherian forms***

Concrete foundations to a new theory of noetherian forms were developed by means of elaboration of links with the theory of semi-abelian categories and discovery of a new significant class of examples, which considerably widens the previously thought scope of application of the theory in algebra. In addition, the theory of biproducts and comutators was developed in full generality in the context of a noetherian form, and the notion of a rank of complementedness, which earlier arose in the study of the noetherian form of finite abelian groups, was investigated in depth in the context of a modular lattice.

VYMERS, Preston Arthur (Physics)***Structure of excited states seen in double beta decay investigated with the $^{98}\text{Mo}(\text{}^3\text{He},n)^{100}\text{Ru}$ and $^{148}\text{Nd}(\text{}^3\text{He},n)^{150}\text{Sm}$ two-proton stripping reactions***

The nuclear structure of daughter nuclei plays an important role in the decay constant of double beta radioactive decays. Two nuclei, ^{100}Mo and ^{150}Nd , were observed to decay to excited states of daughter nuclei ^{100}Ru and ^{150}Sm , respectively. An experimental investigation was conducted to probe the two-proton occupation of these specific excited states. The measurements were conducted using a detector arrangement sensitive to the $(\text{}^3\text{He},n)$ reaction, a high-resolution gamma-ray spectrometer (AFRODITE) and a neutron detector array. The second 0^+ excited state of ^{100}Ru was strongly populated, indicating a strong two-proton occupation of the state.

WILBERS, Derik (Chemistry)***Hydrocarbon oxidations using metal-containing polypropylene-imine dendrimers***

Protocols for the immobilisation of several transition metals on the periphery of polypropylene-imine dendrimers were developed. The resulting metallodendrimers were applied as catalysts in the oxidative transformation of hydrocarbons to form value-added oxygenates. Investigations into the effect of several reaction parameters on the catalytic process provided some useful insight into the behaviour of these systems at a molecular level. Of special interest was the behaviour of the metal complexes in relation to the oxidant employed. It is envisaged that this will facilitate the development of catalytic systems with greater efficiencies in the aforementioned processes.

KANSELIERSTOEKENNING | CHANCELLOR'S AWARD

Kantoor van die Rektor en Visekanselier Office of the Rector and Vice-Chancellor

JEROME SLAMAT

Dr Slamats het vorm en inhoud aan die nuwe posisie van Uitvoerende Bestuurder: Rektoraat gegee. Hy het die bestuurs- en administratiewe aspekte van die Rektoraat verbeter, en sommige van ons kernsaakepraktyke op só 'n wyse hervorm dat dit die doeltreffendheid en prosesvloei van die hele uitvoerende bestuurstruktuur beduidend versterk het. In sy vorige rol as die eerste Senior Direkteur: Gemeenskapsinteraksie by die US het hy 'n kennisgebaseerde benadering tot die Universiteit se gemeenskapsbetrokkenheid aangevoer. Hy het homself ook onderskei as brugbouer en hersteller van verhoudings tussen die uiteenlopende gemeenskappe en belangegroepes van die dorp en die Universiteit. Hy verdien die Kanselierstoekenning as erkenning vir sy uitsonderlike loopbaan en sy bydrae tot die bevordering van die US.

PROGRAM

- | | |
|------------------------|---|
| <i>Staan asseblief</i> | 1. Akademiese prosessie kom die saal binne. |
| <i>Staan asseblief</i> | 2. Sing van die Nasionale Lied (sien binnekant van die agterblad). |
| <i>Sit asseblief</i> | 3. Konstituering deur die Visekanselier. |
| | 4. Verwelkoming deur die Visekanselier. |
| | 5. Verwelkoming in Xhosa. |
| | 6. Voorstelling van kandidate wat kwalifikasies ontvang deur die dekaan van die fakulteit en toekenning van kwalifikasies deur die Visekanselier. |
| | 7. Voorstelling van kandidaat vir die Kanselierstoekenning en oorhandiging van die toekenning deur die Visekanselier. |
| | 8. Sluiting deur die Visekanselier. |
| <i>Staan asseblief</i> | 9. Akademiese prosessie verlaat die verhoog. |

PROGRAMME

- | | |
|---------------------|--|
| <i>Please stand</i> | 1. Entrance of academic procession into the hall. |
| <i>Please stand</i> | 2. Singing of the National Anthem (see inside back cover). |
| <i>Please sit</i> | 3. Congregation formally constituted by the Vice-Chancellor. |
| | 4. Welcome by the Vice-Chancellor. |
| | 5. Welcome in Xhosa. |
| | 6. Presentation of candidates receiving qualifications by the dean of the faculty and conferment of qualifications by the Vice-Chancellor. |
| | 7. Introduction of the candidate for the Chancellor's Award and presentation of the award by the Vice-Chancellor. |
| | 8. Closing by the Vice-Chancellor. |
| <i>Please stand</i> | 9. The academic procession leaves the stage. |

DUBE, Sithobile Priscilla (Education Policy Studies)

Examining relations between educational policy and higher education students' access to industry in Zimbabwe

This study contributes to the current body of knowledge on graduate employability. A qualitative interpretive approach was used. Twenty participants (university students and managers in industries) were purposively sampled and interviewed. The findings revealed that there is a need for dialogue and collaboration among universities, industries, government and all stakeholders. These parties need to agree on how they can work collaboratively to produce graduates whose potentiality will be enhanced, such as being responsive to higher education challenges and the economy. The universities are expected to provide human capability-enriched programmes that promote employability, job creation and citizenship agency.

HANEKOM, Pauline Wilna (Curriculum Studies)

Designing a WhatsApp VCoP model to support the effectiveness of blended learning teacher professional learning science short courses

This study makes an original contribution to the previously under-researched interrelated fields of academic support, educational technology and teacher professional learning. Adopting a non-singular reality perspective and a comprehensive conceptual framework, the study employed design-based research methodology and analytical pluralism for data collection and analysis. The findings confirm the effectivity of the use of WhatsApp groups as platform for virtual communities of practice (VCoPs), give insights into the different ways in which different models of VCoPs can support academic and professional skills learning and present 14 design principles for the effective design, implementation and maintenance of such VCoPs.

HAUTEMO, Aletta Mweneni (Curriculum Studies)

English Wikipedia translation as a communicative task in task-based language teaching pedagogy: A case of Namibian language student teachers

This study examined the translation of English second language content on Wikipedia into Oshikwanyama/Oshidonga first languages. The use of Wikipedia translation as a task-based language teaching task was explored by allowing language student teachers to use language in real-life contexts and interact collaboratively. The study was underpinned by the interpretivist research paradigm, with a qualitative research approach. The study recommends that language teachers use technological tools for guided scaffolding to promote language learning through mediation processes.

Supervisor: Dr M van der Merwe

JACOBS, Carmelita (Educational Psychology)

Parental educational support for adolescents in single-mother families of a low-income community

This study explored educational support to adolescents within single-mother family units. The aim was to disrupt hegemonic understandings of the single-mother family from low socio-economic communities as deficit. This multiple case study adopted a social constructivist paradigm and was conceptualised from a feminist standpoint. The study found that the mothers were stabilising pillars who created supportive home conditions for their children to be resilient and to stay committed to their education. Informal forms of capital included mothers using their own stories to build aspirational capital in their children and to accumulate navigational capital through tapping into community and familial capital in creative ways.

Supervisor: Prof D Daniels

MWALA, Maria Elizabeth (Curriculum Studies)

An investigation into the implementation of the Bachelor of Education (Pre-primary and Lower Primary) curriculum in Namibia

This study investigated the implementation of the BEd Pre-primary and Lower Primary curriculum in Namibian teacher education. Using the theoretical framework of critical social realism, the study explored how structural, cultural and agential conditions interacted to support or constrain the implementation of the curriculum. Data were gathered through documentary analysis and interviews with teacher educators in four former colleges of education in Namibia. The study contributes to knowledge that could be used by the Ministry of Education in Namibia, the University of Namibia and elsewhere to inform future decision making in relation to national curriculum planning and implementation.

Supervisor: Prof M Robinson

NDLOVU, Levi (Curriculum Studies)

Design-based research on students' understanding of quadratic inequalities in a graphing calculator enhanced mathematics environment

This exploratory design-based research (DBR) study investigated the efficacy of the pedagogical use of the graphing calculator to teach mathematics concepts such as quadratic inequalities. The study involved three DBR cycles, each with approximately 20 Grade 11 learners in three different schools. The hypothetical learning trajectory design principles were inspired by the historical development of quadratic inequalities, the realistic mathematics education principles and the theory of instrumental genesis on the use of artefacts (machines/instruments) for educational purposes. The main findings were that the graphing calculator enabled learners to improve their conceptual understanding, visualisation and graphing capabilities of quadratic inequalities.

Supervisor: Prof M Ndlovu

SAUNDERSON, Claudia Priscilla (Educational Psychology)

Narratives of educational and psychological support among black African male students at a historically white university

This qualitative case study drew on critical race theory, co-cultural theory and micro-aggression theory to do an in-depth exploration of black African male students' everyday educational and psychosocial experiences at a historically white South African university. Focus group sessions and individual interviews were conducted with 20 black African male students. The findings of the study demonstrate how race and gender-based micro-aggressions that include negative stereotyping, criminalisation, racial profiling and the questioning of their intellectual abilities impede participants' abilities to thrive at the institution. Participants shared positive experiences about the institution, which included funding opportunities, well-aligned administrative processes, quality of education and supportive lecturers. The study has implications for student support services and higher education transformation.

Supervisor: Prof R Carolissen

SCHOLTZ, Zena Evelyn (Education Policy Studies)

Towards a conceptual framework for the integration of critical thinking into a teacher education curriculum: Addressing some of the educational challenges of South Africa

The study explored notions of critical thinking in relation to policy and pedagogy in initial science teacher education. The research method entailed a conceptual and deconstructive analysis of notions of critical thinking as they are revealed in the literature, dominant South African educational discourse, teacher education policy and Physical Science school curriculum documents. Each subsequent cycle of the analysis resulted in an expansion of a conceptual elaboration. Dimensions of critical thinking identified can potentially inform how science teacher education programmes can operationalise notions of critical thinking in the subject discipline of Physical Science.

Supervisor: Prof Y Waghid

TERBLANCHE, Judith (Education Policy Studies)

Cultivating socially just responsible citizens in relation to university accounting education in South Africa

The aim of this study was to determine whether higher education institutions in South Africa could cultivate and nurture socially responsible democratic citizens, in particular future chartered accountants (CAs). Through Foucault's genealogical analysis and Derrida's method of deconstruction, it was found that critical thinking pertaining to knowledge construction, the decoloniality of the (accounting) curriculum, deliberative encounters as teaching and learning practice, and principles in support of an *ubuntu* philosophy were largely absent from the CA educational landscape. The study proposes the re-education of CAs and renegotiation of the relations and roles of each stakeholder involved in the educational process.

GOTYI, Zamikhaya Gladwell (Military Science)

A critical analysis of the role of cooperatives in enhancing the socio-economic development of Chris Hani District Municipality

This study investigated the role of cooperatives in enhancing the socio-economic development of poor communities in the Chris Hani District Municipality. The study found that cooperatives improve socio-economic development, as poor communities in this municipal district have used such cooperatives in job creation, income generation, poverty alleviation, maintaining food security, crime reduction and community empowerment. Apart from this generally positive findings, the study also established that a number of factors, in particular ineffective state support, weaken the functionality of cooperatives. Given this finding, the study proposes a comprehensive and integrated support programme as the framework within which state support should be provided to cooperatives to improve both their profitability and their sustainability.

Supervisor: Dr KI Theletsane

Co-supervisor: Dr WD Erasmus

RAMOKGADI, Baleseng Shadrack (Military Science)

Exploring the military role in promoting durable peace for sustainable development in southern Africa

This study contributes towards theory building in public administration. Existing pieces of legislation, policy framework and scholarly contributions were used to establish the link between military role and durable peace, and to establish those roles that in turn link durable peace and sustainable development. The study further examined existing regional administrative arrangements and related regional defence institutions through a particular focus on the southern African region. Through grounded theory, systems thinking and metaphorical reasoning, the study developed the regional defence administration theory. This theory proposes that civil-military partnership be enhanced to maintain common peace, collective security and sustainable development.

Fakulteit Krygskunde | Faculty of Military Science

OLWOLE DANIËL MAKINDE

Prof OD Makinde is professor in Toegepaste Wiskunde en Berekenings aan die Fakulteit Krygskunde. Hy is die outeur van 10 universiteitsonderrig- en navorsingshandboeke en publiseer 450 eweknie-geëvalueerde navorsingsartikels in hooggeagte vaktydskrifte. Hy tree op as studieleier vir 32 PhD-, 72 MSc- en 200 BSc (Hons)-kandidate in Toegepaste Wiskunde en Berekenings oor die vasteland van Afrika heen. Hy ontvang verskeie toekennings vir navorsingsuitnemendheid, insluitende die NRF-NSTF-navorsingsprys, die Afrika-unie Kwame Nkrumah Kontinentale Wetenskapstoekenning, en toekennings vir navorsingsuitnemendheid van die Universiteit van Limpopo, CPUT en die US se Fakulteit Krygskunde. Hy is 'n genoot van die African Academy of Sciences, die International Academy of Physical Sciences en die Papua New Guinea Mathematical Society, en dien as redakteur/redaksielid van verskeie hooggeagte akademiese vaktydskrifte.

Prof OD Makinde is a professor of Applied Mathematics and Computations at the Faculty of Military Science. He has authored and edited 10 university teaching and research textbooks and published 450 peer-reviewed research papers in reputable journals. He has supervised 32 PhD, 72 MSc and 200 BSc (Hons) candidates in Applied Mathematics and Computations across the African continent. He received various research excellence awards, such as the NRF-NSTF Research Award, the African Union Kwame Nkrumah Continental Scientific Award, and Research Excellence Awards from the University of Limpopo, CPUT and SU's Faculty of Military Science. He is a fellow of the African Academy of Sciences, the International Academy of Physical Sciences and the Papua New Guinea Mathematical Society, and served as editor/editorial board member of several reputable academic journals.

ALBERTYN, Maria Adriana (Drama and Theatre Studies)

Stripping the Border of restorative nostalgia: Using social media discourses to write a research-based play about South Africa's Border War veterans

Numerous plays have been staged about the South African Border War. Some of these plays have been uncritical in their representation of the war and have promoted a kind of restorative nostalgia that glosses over the SADF's past. This study examined contemporary social media discourses on the Border War to generate thematic material for the creation of a new play titled *Bloed en Bodem*. The study concluded that complexity and binary voices can be an antidote to restorative nostalgia. By including voices that both contradict and expose the veteran's views of the past, the master narrative of conscription is destabilised and responsible meaning making can emerge.

Co-supervisor: Prof MS Kruger

DE KLERK, Anneke (Visual Arts)

Telling places: A photographic exploration

This study and exhibition developed a postphenomenological approach to landscape photography practice that questions the technological determinist position in which power relations are skewed towards the viewer, in part due to the nature of the photographic medium. The result is a co-constitutive relation between photographer, camera and environment and therefore a continual process of emplacement, beginning with the act of photographing and continuing into the experience of the exhibition, "Telling Places: A Photographic Exploration". The postphenomenological insights developed throughout this study allow the curatorial practice to become a phenomenological act that tells of, and is telling, of places.

Social work services offered by non-governmental organisations to households affected by HIV and AIDS

The study engaged with the widespread problem of HIV and AIDS in South Africa. It intensively explored and closely examined how existing government policies and legislation inform and structure social work services offered by non-governmental organisations in the Western Cape to families affected by HIV and AIDS. The findings highlight the challenges that service providers experience to implement government policies and legislation in practice. The study demonstrates the urgent need for government and non-governmental organisations to collaborate closely to offer high-quality services to families affected by HIV and AIDS in line with existing policies and legislation.

LOUW, Zirk Walter Eon (Music)

The toccatas in the Italian lute and theorbo repertoires of the early seventeenth century: A contribution to the history of instrumental music in the beginning of the Baroque

The toccatas in 17th-century Italian lute and theorbo repertoires have received little attention by music researchers to date. This study fills this gap by not only providing an overview of this important musical repertoire, but by also transcribing a representative selection of these works from the original tablature notation into modern staff notation, thereby making them available for the first time to modern performers. The research provides an alternative view of the toccata as a musical genre and thereby affords new insights into early Baroque music history. This study has already drawn considerable attention from international scholars and performers alike.

ADEDOJA, Opeyemi Adebayo (Entomology)

Response of plant-pollinator interactions to landscape transformations in the Greater Cape Floristic Region biodiversity hotspot

Insect pollinators worldwide are declining greatly. Without the pollinators, there will be a loss of plant species. It is urgent that conservation strategies for pollinator conservation are put in place, especially in the Cape, which is so rich in many unique species. Threats facing local pollinators include excessive fires, invasive alien plants and climate change. Here, strategies involving the implementation of fire refuges were developed, and are effective. In turn, alien plants must be removed strategically to allow the sun-loving pollinators to thrive. Climate change is a global issue that will likely lead to loss of pollinators at high elevations.

BARKHUIZEN, Helmien (Wine Biotechnology)

Characterisation of transgenic grapevine ectopically expressing plant defensin peptides

Plants have developed several sophisticated methods to defend themselves against attacks from pathogens and pests or against environmental stresses. One such mechanism relies on defensins, small peptides that form part of the innate defence system of plants. Four defensin peptides were overexpressed in grapevine plants and shown to not only control the economically important powdery mildew pathogen, but to also increase the mortality of mealybugs, an insect pest that is known to be the major vector of the devastating leafroll disease. Grapevine plants that produce the peptides were also shown to cope better with induced water stress under laboratory conditions, providing proof of both biotic and abiotic stress protective properties of the peptides.

Digital soil mapping techniques across multiple landscape scales in South Africa

Detailed soil information is essential for the strategic use of natural resources. Activities such as hydrological modeling and soil carbon stock estimation directly rely on detailed soil information. Digital soil mapping entails the spatial prediction of soil properties through statistics. In this study frameworks were created to generate meaningful soil maps at farm and regional scales using existing complex Land Type Survey maps. The frameworks developed will greatly enhance soil information availability in South Africa, which is required for environmental modeling and food security planning.

Supervisor: Dr CE Clarke

Co-supervisor: Dr AB Rozanov

KIETZKA, Gabriella Joy (Conservation Ecology)

Dragonflies as ecological indicators and biodiversity surrogates for freshwater ecosystems

This study assessed the use of dragonflies as bio-indicators of aquatic ecosystem health and aquatic biodiversity. It shows that the interchangeability of using their life stages for assessments is dependent on the spatial scale measured. The study further demonstrates the use of dragonflies as biodiversity surrogates for Ephemeroptera, Plecoptera and Trichoptera. Furthermore, water quality and adult dragonfly diversity were conserved within large-scale conservation corridors within the timber production landscape. The study highlights the value of a constructed urban education pond for dragonfly biodiversity and demonstrates the benefits of dragonflies for good aquatic conservation planning and monitoring in transformed landscapes.

MAKEREDZA, Brian (Horticultural Science)

*A study of photothermal damage in Japanese plums (*Prunus salicina* Lindl.)*

High irradiance and high temperature cause heat damage to fruit. In plums, the damage not externally apparent at harvest appears during cold storage internally. Relevant research on plums in this regard was lacking. Micro-climatic and cultural practices were therefore investigated, based on apple research findings. Optimal irrigation, shade nets and early summer pruning generally improved fruit quality and had remedial effects on external damage. Further increasing of irrigation did not improve tolerance, while late summer pruning aggravated damage. Advanced harvest maturity increased susceptibility to internal damage, although the high pre-storage temperatures offered heat curing against cold storage disorders.

MUCHERI, Tendai (Agronomy)

Factors influencing inhibition of glutamine synthetase enzyme in grass weeds by glufosinate ammonium under different temperatures

The increasing evolution of weed herbicide resistance seriously hampers crop production. This study provides an alternative to the ever-increasing resistance-prone herbicide glyphosate by using glufosinate ammonium – a post-emergence, contact and broad-spectrum herbicide. The study provides insight into how various environmental and plant factors affect glufosinate ammonium efficacy in controlling ryegrass weeds. Humidity and temperature play a large role in influencing the efficacy of the herbicide. Furthermore, practical implications of results relevant to farmers were investigated and discussed. In addition, the study's investigations perceived the use of phenolic compounds in plant genetics to develop natural glufosinate ammonium-tolerant crops.

Supervisor: Dr PJ Pieterse

Co-supervisors: Prof CF Reinhardt, Dr A Kleinert (external)

MUKAMA, Matia (Food Science)***Optimising ventilated package design for postharvest handling of pomegranate fruit in the cold chain***

Unlike other types of fruit packed in multi-layered ventilated cartons, pomegranate fruit has been historically packed in single-layer cartons, presumably due to the larger fruit size. For the first time, this study designed a new multi-layer ventilated carton for handling pomegranates. Using a combination of a novel virtual prototyping design approach and multi-parameter performance evaluation of physical prototypes, new ventilated cartons with two layers of fruit were developed. Comparative analysis showed that the benefits of the new designs included less fruit cooling time and increased space utilisation of shipping containers. Both carton strength and fruit quality were maintained.

Supervisor: Prof UL Opara

Co-supervisor: Dr AA Tsige

MUKWEVHO, Vuledzani Oral (Conservation Ecology)***The role of competition and mutualism in shaping microbial communities in Protea flowers***

The *Protea* is an integral part of the ecological functioning of the fynbos ecosystem and the basis of a thriving cut flower industry. *Protea* flowers are colonised by ophiostomatoid fungi that form complex, often mutualistic, interactions with mites, pollinating insects and even birds. This study uncovered complex interactions between different fungi within flowers and showed why these dominate. The study presents evidence that ophiostomatoid fungi can protect *Protea* seeds from detrimental fungi and seed predators. The use of fungal competition studies for investigations into multi-interaction systems was demonstrated and can now be applied to numerous other ecological systems.

Supervisor: Prof F Roets

Co-supervisor: Prof L Dreyer

SMIT, Renate (Entomology)***Postharvest phytosanitary disinfestation strategies using thermal and atmospheric stress: Commodity and insect tolerances***

The main aim of the study was to examine the feasibility of using high temperatures and altered atmospheres, or ethyl formate fumigation, as postharvest phytosanitary treatments to control insect pests while maintaining the quality of export fruit. A physiological study of a key phytosanitary pest, the grain chinch bug, was conducted to better understand its tolerance to thermal postharvest treatments. Commercial application of these alternative phytosanitary treatments will enable the South African fruit export industry to offer improved measures for phytosanitation, as well as expand and access new markets and continue to participate and grow in international trade.

Supervisor: Dr SA Johnson

Co-supervisors: Prof P Addison, Dr M Jooste (external)

WALTERS, Nico Albertus (Food Science)***Comprehensive characterisation of the phenolic composition of *Cyclopia pubescens* (honeybush)***

The phenolic composition of *Cyclopia pubescens* (honeybush), an endemic South African fynbos plant under threat of extinction, is largely unknown. An HPLC-DAD method of quantification of major phenolic compounds belonging to the benzophenone, xanthone, flavanone and flavone sub-classes was developed and validated. Comprehensive two-dimensional chromatographic separation allowed tentative identification of a large number of minor compounds. In addition, eight phenolic compounds (flavanones, phenolic acids, a flavan, an anisole) were isolated and unambiguously identified. Natural deep eutectic solvents (NADES) were evaluated to improve the extraction efficiency of phenolic compounds. The different NADES selectively extracted stereoisomers, which showed differences in antioxidant activity.

Supervisor: Prof D De Beer (external)

Co-supervisors: Prof E Joubert (external), Dr PJ Williams

WOODS, Michael Josias (Animal Science)***Colouring the grey areas of insect mass production to solidify their use as feed, food and biological control agents***

This study was the first published study to address the total chain involved in the production of insects for feed and food. It addressed the requirement of establishing such a chain by starting with the development of a technique for the determination of the nutrient requirement of various insect species. This information was then used in the formulation of diets and ultimately the mass rearing of insects for various purposes related to food security, including integrated pest management, feed production as well as food production. The study concluded in the final processing of insects for the manufacture of high-quality protein powders, oil and chitin.

Doktor in die Regsgeleerdheid Doctor of Laws

KIEWITZ, Leigh-Ann (Public Law)

Trading rights as a novel category of servitudes in South African law

The aim of this study was to determine whether it is possible to recognise trading rights as a category of servitudes, what its nature and content would be if such recognition is possible and under which conditions such servitudes could be registered. The study provides a methodology that courts should follow to ensure that the particular right complies with all the requirements and can therefore be recognised as a servitude in South African law. It furthermore suggests legislation that would enable a more nuanced and balanced approach when attempting to structure these types of trading agreements.

Supervisor: Prof ZT Boggenpoel

MASAKE, Pilisano Harris (Public Law)

A critical consideration of the exclusion of corporate criminal liability for the atrocity crimes under the Rome Statute of the International Criminal Court

The Rome Statute of the International Criminal Court (ICC) limits criminal responsibility to natural persons. It does not provide for corporate criminal liability for crimes against humanity, genocide and war crimes, which exclusion of corporate criminal liability is problematic. Comparative national legal doctrine, international human rights law and regional criminal justice inform the proposed inclusion of corporate criminal liability in the Rome Statute. The study makes proposals regarding the inclusion of the elements of corporate conduct, *mens rea*, as well as an appropriate sentencing framework. The proposed amendments to the Rome Statute will contribute to global corporate governance.

KANSELIERSTOEKENINGS | CHANCELLOR'S AWARDS

Fakulteit Lettere en Wysbegeerte *Faculty of Arts and Social Sciences*

MARLENE VAN NIEKERK

As 'n uitmuntende kreatiewe skrywer ontvang prof Marlene van Niekerk die Hertzogprys vir haar roman *Agaat* in 2005 en weer in 2017 vir haar digbundel *Kaar*. In 2015 word sy benoem vir die Man Booker- internasionale prys in erkenning van haar prestasies op die gebied van die prosa. Sedert 2000 tree prof. Van Niekerk by die US as studieleier van 16 MA-tesisse in Kreatiewe Skryfkunde op. Sy ontvang in 2009 'n eregraad van die Universiteit van Tilburg in Nederland uit waardering vir haar talle prestasies op literatuurgebied.

As an outstanding creative writer, Prof Marlene van Niekerk received the Hertzog Prize for her novel *Agaat* in 2005 and in 2017 for her book of poetry, *Kaar*. In 2015, Prof Van Niekerk received a nomination for the Man Booker International Prize in appreciation of her achievements in fiction. Since 2000, Prof Van Niekerk has completed the supervision of 16 MA theses in Creative Writing at SU. In recognition of her many achievements in the field of literature, the University of Tilburg in the Netherlands awarded an honorary doctorate to Prof Van Niekerk in 2009.

Fakulteit AgriWetenskappe *Faculty of AgriSciences*

LINUS OPARA

Prof Umezuruike Linus Opara is 'n uitgelese professor aan die Departement Hortologie en houer van die DST-NRF Suid-Afrikaanse Navorsingsleerstoel in Na-oestegnologie. Sedert 2009 tree hy op as studieleier vir 38 meestersgraad- en 29 PhD-studente en 11 nadoktorale genote vanuit 14 Afrikalande, op gebiede wat oor sewe departemente en vier fakulteite strek. Prof Opara het reeds meer as 350 artikels in eweknie-geëvalueerde vaktydskrifte, boekhoofstukke en internasionale kongresverrigtinge gepubliseer, tesame met meer as 150 referate by internasionale konferensies, insluitende programredes en gaslesings. Hy is die ontvanger van die Afrika-unie Kwame Nkrumah Kontinentale Wetenskapstoekenning in Lewens- en Aardwetenskappe (2016) en die IMPRESSA-toekenning vanaf die Regional Universities Forum for Capacity Building in Agriculture (2015).

Prof Umezuruike Linus Opara is a distinguished professor in the Department of Horticultural Science and holder of the DST-NRF South African Research Chair in Postharvest Technology. Since 2009 he has supervised 38 master's and 29 PhD students and 11 postdoctoral fellows from 14 African countries in related fields, spanning seven departments across four faculties. Prof. Opara has published over 350 articles in peer-reviewed journals, book chapters and international conference proceedings, together with more than 150 oral presentations at international conferences, including keynote addresses and invited lectures. He is a recipient of the African Union Kwame Nkrumah Continental Scientific Award in Life and Earth Sciences (2016) and the IMPRESSA Award from The Regional Universities Forum for Capacity Building in Agriculture (2015).

Fakulteit Regsgeleerdheid *Faculty of Law*

JACQUES DU PLESSIS

Oor die afgelope 20 jaar het prof Jacques du Plessis hom as 'n toonaangewende navorser op die gebiede van kontrakreg, ongeregverdigde verryking en regsvergelyking gevestig. Hy was besoekende navorser by prominente internasionale navorsingsinstellings in Hamburg en Oxford, en sy werke is plaaslik, deur die Konstitusionele Hof en die Hoogste Hof van Appèl, sowel as internasionaal, deur die Hoogste Hof van die Verenigde Koninkryk, aangehaal. Prof Du Plessis dien op die rade van verskeie internasionale vaktydskrifte, verenigings en navorsingsinstellings, waaronder die Max Planck Instituut vir Vergelykende en Internasionale Privaatreg, en is die houer van 'n aantal toekennings, insluitende 'n Alexander von Humboldt-beurs en die Presidentstoekenning van die Nasionale Navorsingstigting.

Over the past 20 years, Prof Jacques du Plessis has established himself as a leading researcher in the fields of contract law, unjustified enrichment and comparative law. He has held visiting scholarships at prominent international research institutes in Hamburg and Oxford, and his works have been cited both locally, by the Constitutional Court and Supreme Court of Appeal, and internationally, by the Supreme Court of the United Kingdom. Prof Du Plessis serves on the boards of various international journals, societies and research institutions, including the Max Planck Institute for Comparative and International Private Law, and is the holder of a number of awards, including an Alexander von Humboldt scholarship and the President's award of the National Research Foundation.

Performance and financing of micro, small and medium enterprises in Nigeria: Implication of transaction costs and collateral

This study utilised World Enterprise Survey data to analyse the employment generation capability and productivity of micro, small and medium enterprises (MSMEs) in the Nigerian economy. It further explored how transaction costs and collateral constitute constraints to MSMEs' access to finance. The results of the non-parametric variance estimation showed that MSMEs perform better than large firms in employment generation. MSMEs were found to have underperformed in terms of productivity, except in some specialised products. The analysis of transaction costs and collateral showed that high operating costs and collateral value are severe constraints to access to finance by MSMEs. The study recommends alternative financial and collateral arrangements as solutions to the MSME problem.

BUTLER, Martinus Johannes (Business Management and Administration)

A systems perspective on the contribution of project portfolio management practices towards business and IT alignment

Investment in information technology (IT) has significant implications for modern enterprises. Continued academic interest in the value of IT is the result of contradictory studies about the relationship between investment and performance. A deductive approach was used to present the contribution of project portfolio management practices towards IT value using system dynamics diagrams. Six high-level IT value success factors were identified, including collaborative IT and business planning. From the analysis, three portfolio management practices were shown to have a direct influence on IT value. The importance of leverage points established in literature was confirmed, as well as the quick and efficient resolution of technology failure leading to IT credibility, a strong driver of IT value.

Modelling the effect of disruption to electricity supply on economic growth in Benin

The Beninese electricity sector is one of the most vulnerable in sub-Saharan Africa due to disruption of the imported electricity supply, losses encountered during transmission and distribution and its reliance on oil for electricity production. The study developed a composite index of disruption risk to guide the performance of the sector. It subsequently assessed the effect of electricity losses on economic growth and furthermore assessed the causal effect of negative shocks to electricity supply on economic growth using advanced econometric models. This research has led to valuable insights into support of the national policy framework for electricity in Benin.

Stakeholder relationship management as a tool for municipal public value generation: A case study of five municipalities in the Western Cape

The relationships between municipalities and professional stakeholders such as the Auditor General, Eskom, SALGA, the Public Protector, trade unions, universities, NERSA and National Treasury are haphazard and not conducive to local service delivery. The study investigated how municipalities can engage with such professional stakeholders in a manner that will lead to improved service delivery and enhanced public value. Through an analysis of five cases, shortcomings were identified and a framework for institutionalised stakeholder relationship management was designed. The recommendations include a set of practices that will embed stakeholder relationship management in decision making and behaviour. These serve to ensure governance through networks and partnerships, rather than operating in isolation.

HIGGINS, Benedict Francis (Public and Development Management)

Global discourse and local politics – the political economy of urban regeneration in Woodstock, Cape Town

This study explored the political economy of urban regeneration in Woodstock, Cape Town. The study was grounded in an epistemology that deflects the ontological dualism proliferating throughout contemporary urban theory. Here, the city was studied in a specificity yet, simultaneously, in a spatial and temporal relationality. Drawing on Foucault and Gramsci, the study excavated and analysed both the archaeology and the genealogy of contemporary urban regeneration in Woodstock. It revealed hitherto overlooked contingencies related to the formation of its discourse. To this end, the study proposes discursive points of entry to affect positive socio-spatial integration.

Essays on alternative energy options, environment and economic growth: The case study of Nigeria

This study provides some new insights into alternative energy sources, economic growth, development and environmental quality. Using data from Nigeria, it shows that for a developing country, energy supply is essential for growth. However, there is a threshold of per capita income growth beyond which energy use and economic activity adversely affect the quality of the environment. At this stage, the environmental degradation effect of growth is larger than any environmental quality effect and detrimental to any growth and development gains. The study further assessed viable energy options for Nigeria and proposes an energy portfolio optimal for growth and environmental quality.

Supervisor: Prof CKD Adjasi

MANYATHI, Sakhile (Public and Development Management)

The influence of procurement practices on service delivery: An analysis of government legislation–service delivery relationships in South Africa

A hotly debated question among public procurement scholars is whether public procurement prescripts promote or hinder service delivery. Extensive demands for accountability, challenged by continuous attempts at political interference, have resulted in legislative fragmentation, whereby various pieces of legislation in specialised fields were incrementally added as stopgaps, but without a common overarching legal framework. The study found that the absence of a public procurement act, e-procurement systems and a public procurement regulator to oversee public procurement operations compromises procurement effectiveness. Evidence suggests that the independent variable (procurement practices) is causing the dependent variable (service delivery) to slow down. Clean audits as highly celebrated compliance outcome therefore do not translate into improved service delivery as desirable outcome. The study proposes recommendations for correcting this situation.

OLOWU, Akinseye Uwem (Development Finance)

Public policy and entrepreneurship performance: The divide and nexus in West Africa

The study addressed a very important topic, especially in the wake of the increased need of employment and growth in African countries. The idea of including gender is also timeless. Literature shows that although women are playing an increasing role in economic activities, their role in business is still lagging behind. Therefore, understanding the role that they play in the interplay between entrepreneurship outcomes and policy is critical. The study demonstrates the need to examine public policy and its effect on entrepreneurial activity. It also measured the efficiency of entrepreneurial process and outcomes and provided interesting insights into the phenomenon in West Africa.

ROBERTSON, Sarah Jane (Business Management and Administration)

The development of a transformative business-driven action learning framework

The aim of the study was to explore how (if at all) individual transformative learning could be embedded into a business-driven action learning framework as part of a management development programme. The research questions were addressed through a narrative inquiry approach using hand-drawn images and in-depth interviews grounded in a constructivist paradigm. The result of this study was a new theoretical framework called Transformative Business-Driven Action Learning (TBDAL), underpinned by guidelines for practice. It is suggested that TBDAL be applied during the design and facilitation of management development programmes to promote the potential for individual transformative learning.

Methodological agility in the Anthropocene: An emergent, transformative transdisciplinary approach

This study developed a new approach for conducting transdisciplinary research within an African context, which is characterised by informality, relationality, institutional fluidity and widespread poverty. A vast range of literature was integrated, including complexity theory, European literature on transdisciplinarity, African literature on indigenous research methods, phenomenology and incrementalist theories of social change. Using a case study in the Enkanini informal settlement (Stellenbosch) to illustrate the argument, the study successfully developed an agile transdisciplinary research methodology that can empower African researchers to conduct research in ways that are appropriate for Africa's diverse socio-cultural contexts.

Supervisor: Prof M Swilling

VENTER, Carli (Public and Development Management)

Improved network governance in regional and local economic development partnerships: A management strategy

The aim of the study was to overcome operational and performance barriers in regional and local economic development partnerships in South Africa, in keeping with the pragmatic practitioner approach. The objectives were to contextualise the emergence of partnerships within the current legislative and practice framework for regional and local economic development, apply literature and tools from the fields of networks and governance to two cases in practice and provide theoretical groundings for a network management strategy for partnerships. The study demonstrates that network governance theory is not 'the theory of everything', but offers great potential in addressing complex challenges.

KANSELIERSTOEKENINGS | CHANCELLOR'S AWARDS

Afdeling Navorsingsontwikkeling | Division for Research Development

MARYKE HUNTER-HÜSSELMANN

Me Maryke Hunter-Hüsselmann, Direkteur: Navorsingsinligting en -strategie in die Afdeling Navorsingsontwikkeling, ontvang die Kanseliers-toekenning in 2019 vir haar uitstekende bydraes tot die bevordering van die US se navorsingsportefeulje. Me Hunter-Hüsselmann speel 'n baanbrekersrol in die daarstelling van innoverende stelsels en bronne om navorsing aan die US te bevorder. Sy koördineer die veelvuldig bekroonde jaarlikse verslag Navorsing aan die Universiteit Stellenbosch, en sorg hiermee dat die US se navorsingsuitsette en -impak sigbaar en toeganklik is vir sy belanghebbendes. Sy speel verder 'n sleutelrol in die daarstelling van navorsingsverwante statistieke en inligting vir strategiese besluitnemingsdoeleindes. Haar toewyding en passievolle ondersteuning van die ontwikkeling en instaatstelling van navorsing aan die US is uitsonderlik en navolgenswaardig.

Ms Maryke Hunter-Hüsselmann, Director: Research Information and Strategy in the Division for Research Development, receives the Chancellor's Award in 2019 for her outstanding contributions to the advancement of SU's research portfolio. Ms Hunter-Hüsselmann plays a ground-breaking role in establishing innovative systems and resources to promote research at SU. She coordinates the multiple award-winning annual Research at Stellenbosch University publication, ensuring that SU's research outputs and impact are visible and accessible to its stakeholders. She furthermore plays a leading role in generating research-related statistics and information for strategic decision-making purposes. Her dedication and passionate support for developing and enabling research at SU are exceptional and exemplary.

Registrateursafdeling | Registrar's Division

PIERRE ROSSOUW

Mnr Pierre Rossouw begin op 1 Januarie 1987 aan die US werk, dieselfde dag waarop die USB hul nuwe kampus betrek. Sedertdien het die USB-programaanbod van 1 MBA en PhD na 13 nagraadse programme gegroei. Mnr Rossouw is nou betrokke by die oprigting van die Bellvista Anneks en Herberg, die instelling van die Onderrig-en Leerkomitee by die USB, die digitalisering van die USB-rooster, die ontwikkeling van die aanlyn assesseringsbeleid en die implementering van afstandstoetsing. Tydens elke akkrediteringsbesoek van EQUIS, AMBA en AACSB word mnr Rossouw se sentrum erken vir uitmuntende dienslewering aan studente. Die Kanselierstoekenning gee aan hom erkenning vir sy bydraes tot die ontwikkeling en verbetering van stelsels en prosesse, sowel as sy bekwame dienslewering oor sy loopbaan heen.

Mr Pierre Rossouw started working at SU on 1 January 1987, on the same day the USB settled on a new campus. Since then, the USB programme offering has grown from an MBA and PhD to 13 postgraduate programmes. Mr Rossouw has been involved in the establishment of the Bellvista Annex and Hostel, the establishment of the Teaching and Learning Committee at the USB, the digitalisation of the USB timetable, the development of the online assessment policy and the implementation of remote proctoring. During each accreditation visit by EQUIS, AMBA and AACSB, Mr Rossouw's centre is acknowledged for excellent service delivery to students. The Chancellor's Award acknowledges him for his contributions to the development and improvement of systems and processes, as well as for his competent service delivery across his career.

Fakulteit Ekonomie en Bestuurswetenskappe - Bestuurskool Faculty of Economic and Management Sciences - Business School

GRETCHEN ARANGIES

Me Arangies se loopbaan by die US begin in 1989 in die Afdeling Menslike Hulpbronne, waar sy 'n leidende rol speel om dié afdeling van 'n transaksionele tot 'n strategies transformerende omgewing by die US te lei. In 2008 word sy aangestel as direkteur van Menslike Hulpbronne (Operasioneel). In dieselfde jaar verwerf sy haar MBA cum laude aan die USB. In 2012 verander haar loopbaanfokus toe sy aangestel word as bedryfsdirekteur by die USB en die Bellville Park-kampus. Die operasionele sukses en implementering van 'n aggressiewe groeiplan by die USB is grootliks te danke aan haar verstommende werksetiek. Gedurende haar loopbaan dien me Arangies in die US Raad, die Raad se Menslike Hulpbronnekomitee, as 'n trustee van die US-aftredefonds en as voorsitter van die Raad se Disiplinêre Komitee. Dit is byna onmoontlik om voldoende erkenning te gee aan 'n professionele personeelid met die operasionele vermoëns, akademiese insig en natuurlike leierskapskappe waarvoor me Arangies beskik.

Having started her career in SU's Human Resources Division in 1989, Ms Arangies played a key role in leading this division from a transactional to a strategic transformational role at SU. In 2008 she was appointed director of Human Resources (Operations) and, in the same year, obtained her MBA degree cum laude from the USB. Changing her career focus in 2012, she was appointed as director of Operations at the USB and Bellville Park Campus. The operational success and implementation of an aggressive growth plan at the USB can be attributed largely to her enormous work ethic. During the course of her career, Ms Arangies was an active member of the SU Council, served on the Human Resources Committee and the Board of Trustees of the SU Retirement Fund, and chaired the Council Disciplinary Committee. One can hardly give enough recognition to a professional staff member with such operational capabilities, academic insight and natural leadership qualities as Ms Gretchen Arangies.

PROGRAM

- | | |
|------------------------|---|
| <i>Staan asseblief</i> | 1. Akademiese prosessie kom die saal binne. |
| <i>Staan asseblief</i> | 2. Sing van die Nasionale Lied (sien binnekant van die agterblad). |
| <i>Sit asseblief</i> | 3. Konstituering deur die Visekanselier. |
| | 4. Verwelkoming deur die Visekanselier. |
| | 5. Verwelkoming in Xhosa. |
| | 6. Voorstelling van die eredoktorandus en toekenning van die eregraad deur die Visekanselier. |
| | 7. Voorstelling van kandidate wat kwalifikasies ontvang deur die dekaan van die fakulteit en toekenning van kwalifikasies deur die Visekanselier. |
| | 8. Sluiting deur die Visekanselier. |
| <i>Staan asseblief</i> | 9. Akademiese prosessie verlaat die verhoog. |

PROGRAMME

- | | |
|---------------------|--|
| <i>Please stand</i> | 1. Entrance of academic procession into the hall. |
| <i>Please stand</i> | 2. Singing of the National Anthem (see inside back cover). |
| <i>Please sit</i> | 3. Congregation formally constituted by the Vice-Chancellor. |
| | 4. Welcome by the Vice-Chancellor. |
| | 5. Welcome in Xhosa. |
| | 6. Presentation of the candidate for the honorary doctorate and conferment of the degree by the Vice-Chancellor. |
| | 7. Presentation of candidates receiving qualifications by the dean of the faculty and conferment of qualifications by the Vice-Chancellor. |
| | 8. Closing by the Vice-Chancellor. |
| <i>Please stand</i> | 9. The academic procession leaves the stage. |

EREGRAAD | HONORARY DEGREE

Fakulteit Lettere en Sosiale Wetenskappe *Faculty of Arts and Social Sciences*

Die graad Doktor in die Wysbegeerte (DPhil), honoris causa, aan
The degree Doctor of Philosophy (DPhil), honoris causa, to

BONISILE JOHN KANI

vir sy passievolle toewyding aan die uitvoerende kunste as akteur, regisseur en skrywer; vir sy verbintenis om toegang tot die uitvoerende kunste vir jongmense uit gemarginaliseerde gemeenskappe te verseker; vir die benutting van die kunste om op te voed, om gemeenskap te skep en as 'n uitingsvorm vir die onderdrukte; en uit erkenning vir sy uitnemendheid in sy internasionale loopbaan in die uitvoerende kunste oor 50 jaar.

Bonisile John Kani is op 30 August 1943 in New Brighton, Port Elizabeth, gebore. Sy band met drama begin reeds op skool, en duur voort ná matriek. Nadat hy in 1965 'n vriendskapsband met Winston Ntshona en Atholl Fugard gesmee het, ontwikkel hulle in 1972 *Sizwe Bansi is Dead*, gevolg deur *The Island* in 1973. Hulle voer albei plaaslik en internasionaal op en in 1974 wen Kani en Ntshona albei die gesogte Tony-toekenning vir beste akteur in die twee toneelstukke.

In 1977 stig Kani en Barney Simon die Markteater, en in 1990 die Markteater Laboratorium, wat jongmense uit gemarginaliseerde omstandighede in staat stel om die uitvoerende kunste te bestudeer. In 1982 skud Kani en Sandra Prinsloo die fondasies van die wit Suid-Afrikaanse samelewing toe hulle op die verhoog soen in Strindberg se *Miss Julie* in die Baxterteater. In 1987 word hy die eerste swart Suid-Afrikaner om Othello in Suid-Afrika te vertolk.

Hy skryf drie toneelstukke: *Nothing but the Truth* (2002), *Missing* (2014) en *Kunene and the King* (2018).

Kani se behoefte om die stories van die verdruktes te vertel en om die uitwerking daarvan op mense te sien, het sy diepgewortelde siening dat teater 'n kragtige instrument vir verandering is, gevestig.

for his passionate commitment to the performing arts as actor, director and playwright; for his dedication to ensure access to the performing arts for young people from marginalised communities; for using the arts to educate, to create community and as a tool of expression for the oppressed; and in recognition of his commitment to excellence in his 50-year international career in the performing arts.

Bonisile John Kani was born in New Brighton, Port Elizabeth, on 30 August 1943. His connection to drama started at school and continued after matric. After forging a bond with Winston Ntshona and Atholl Fugard in 1965, the three developed *Sizwe Bansi is Dead* in 1972, followed by *The Island* in 1973. They took both plays to local and international stages and in 1974 Kani and Ntshona both won the Tony Award for Best Actor in these two plays.

In 1977, Kani and Barney Simon established The Market Theatre, and in 1990 The Market Theatre Laboratory, enabling young people from marginalised circumstances to study the performing arts. In 1982, Kani and Sandra Prinsloo shook the very foundations of white South African society when they kissed on stage in Strindberg's *Miss Julie* at the Baxter Theatre. In 1987, he became the first black South African to play Shakespeare's Othello in South Africa.

He has written and starred in three plays: *Nothing but the Truth* (2002), *Missing* (2014) and *Kunene and the King* (2018).

Kani's need to tell the stories of the oppressed and to see the effect they have on people developed his deeply held belief that theatre is a powerful tool for change.

(Science and Technology Studies)

Research uptake management: A strategic framework for institutionalising research uptake at the Kwame Nkrumah University of Science and Technology, Kumasi

This study examined research uptake management with particular reference to how it can be institutionalised within an organisation. The study proposes a strategic framework that identifies pathways and activities necessary for research uptake suitable for the Kwame Nkrumah University of Science and Technology (KNUST), Ghana. The study employed a survey (202 responses) and follow-up interviews with 20 researchers at KNUST. From the findings, a policy framework for institutionalising research uptake is proposed. This framework incorporates pathways, mechanisms and channels of engagement that facilitate research uptake. The broader impact of the study is its implications for the management of research.

BRINK, Beatrix (Psychology)

Coping with destructive leadership behaviour: A qualitative study of non-physical abuse in South African companies

This constructivist study explored subordinates' experiences with destructive leadership behaviour and consequential coping strategies. The findings indicate that managers' perceived destructive leadership styles had consequences for participants, the managers themselves and the work unit, affecting the execution of tasks, the attainment of goals and employee well-being. To cope, participants endeavoured to find control; to distance themselves from the situation, their own thoughts and emotions; sought ways to affirm their closely held self-beliefs; indulged in positive and negative self-nurturing; sought solace in religion/spirituality; sought social and family support; and attempted to redirect their cognitions. These coping attempts were accomplished with varying degrees of effectiveness.

DAMON, Eleanor Denise (Geskiedenis)

'n Genealogiese analise van die Cyster-familie van Pniël: hulle bydrae tot die ontwikkeling van 'n sendingdorp en 'n geslote gemeenskap in Suid-Afrika

Genealogiese navorsing is vandag 'n komplekse dissipline wat 'n betekenisvolle bydrae kan maak tot analise in 'n verskeidenheid sosiale wetenskappe. Die vestiging van 'n gemeenskap in die middel-19de eeu, saamgestel uit hoofsaaklik vrygestelde slawe, georganiseer en beheer deur 'n sendinggenootskap, het aan Pniël uit die staanspoor 'n eksklusiwiteit verleen wat oor 'n tydperk van 170 jaar tot 'n eiesoortige identiteit ontwikkel het. Die uitgebreide parenteelstaat van die Cyster-familie van Pniël wat die kern van hierdie studie vorm, lei tot talle navorsingsvrae, maar werp terselfdertyd ook lig op sekere sosiale verskynsels in die gemeenskap.

DAVID, Stephen Temitope (English Studies)

Biafra as third space: Reading the politics of belonging in Biafra-Nigeria Civil War literature

The study examined Nigerian novels and memoirs that reference the Nigerian/Biafran War and its aftermath. Using Nira Yuval-Davis's situated intersectionality and Homi Bhabha's idea of a third space, the study read these unavowed narratives of Biafra as challenging hegemonic, binary and nationalistic accounts of the war perpetuated by both sides in the conflict. These stories from in-between unsettle the notion of Biafra as a homely space, revealing instead multiple forms of violence deployed against characters situated at the margins of the dominant discourses of the war.

DLAMINI-AKINTOLA, Virginia Thontea (General Linguistics)

The discursive construction of identity in young offenders' narratives in Swaziland

This study investigated the discursive identity construction of young offenders in Swaziland after the introduction of formal schooling. The study used arts-based methodology to elicit narratives and to investigate the semiotic landscape of the correctional facility in which the young offenders lived and the school they attended. The findings suggest that although formal schooling is seen as a beacon of hope, a tension between retribution and rehabilitation exists within both the school and the correctional facility. In addition, the study shows that a long-term ethnographic engagement with the school opened up new understandings of the life trajectories of the young offenders.

DUBE, Thembelihle (Psychology)

Narrative identities: Voices of the unemployed youth in a low-income community in South Africa

This study explored the context, content, key constructs and discourses of the narrative identities of 10 unemployed young people from Kayamandi. A qualitative, interpretivist research approach was adopted using narrative inquiry. The findings revealed agency, community and meaning making as narrative themes that defined the youths' narrative identities. Grand narratives that emerged were how poverty fuels unemployment, being a responsible man/woman, the double edge of education and the importance of (social) support. Further analysis revealed the manifestation of *ubuntu*, freedom of expression, the differences in engagement with unemployment by young men and women, the enduring impact of racism and the salience of capitalist principles.

Supervisor: Prof AV Naidoo

ESTERHUYSE, Harrie Willie (Science and Technology Studies)

Understanding the societal impact of research through productive interactions and realist theory-based evaluation: Select cases of agricultural research in South Africa

This study explored the concept of societal impact of research in four agricultural research projects in South Africa. It identified productive research–stakeholder interactions and assigned value to the interactions by using them to build theories of change and impact pathways. The study introduces a classification scheme of research impact that allows for a direct comparison between the understandings of societal impact as emerging from the impact pathways and the understandings of impact as reported by the research funders. The end result is a new research impact assessment method that contributes to the international research impact literature.

GORDON, Hugh William (History)

Forged in battle? A socio-military history of South Africa's 32 Battalion (1975–1993)

This study produces the first critical history of 32 Battalion. Starting as a faction of the FNLA, the Battalion deployed as Bravo Group during Operation Savannah and was subsequently incorporated into the regular structures of the SADF. From the start, the Battalion, which comprised soldiers and their extended families, had a distinct character. Drawing on recently declassified archival material and adopting a bottom-up approach, the study examined both the life of the Battalion (from formation to disbandment) and the patterns of life inside this highly effective, and rather unique, military unit.

GROBLER, Gerhardus Martinus (Applied Ethics)

To serve two masters? A moral analysis of an apparent conflict of interest in the profession of occupational physicians

The discipline of occupational medicine is rooted in a bid to reform unhealthy and dangerous workplaces in 18th-century Britain. Whereas doctors are considered duty-bound to always prioritise their patients' interests, occupational physicians' vocation is occupational health and safety – for the common good of society. Practising healthcare in the ambit of labour creates a uniquely challenging ethical milieu. It adds an unusual dimension to the doctor–patient relationship – that of legitimate stakeholders and role players. Resolving ethical dilemmas calls for protecting the professional independence of occupational physicians and a virtue ethics approach, spearheaded by contextual wisdom.

IBAKA SANGU, Philippe (Sociology)

Adaptation des institutions traditionnelles à la gestion foncière de Kinshasa, ville capitale

The Democratic Republic of Congo has experienced the existence of traditional chiefs before and after colonisation. With the development of cities, a new way of governing with impersonal urban institutions has emerged. This process of adaptation has not been uniform. In the former colonial zone of Kinshasa, traditional institutions have been replaced by modern urban state institutions; in the planned zone, they have lost much of their authority; and in the periphery, they tend to coexist with their modern equivalents. A new state body has enabled some traditional leaders in the city to collaborate and cohabit with modern state institutions.

KABWE, Kabaso (Political Science)

Assessing the utility of Kingdon's Multiple Streams Framework for studying policy implementation: A case study of mobile hospitals in Lusaka province, Zambia

This study explored what can be learned about policy implementation with application of the Kingdon's Multiple Streams Framework. The framework was applied to analyse data collected on the case study, which was the implementation of mobile hospitals in the Lusaka province in Zambia. The study demonstrates that the framework is useful but in need of adaptation to accommodate the contextual inputs identified in the study. The study proposes changes such as analysing the centralisation of power in the government system and the role of the executive in policy implementation. In addition, it questions the standard conceptualisation of the policy entrepreneur.

Nominal classification in Bantu revisited: The perspective from Chichewa

This study focused on a core, but still very poorly understood, characteristic of languages belonging to the Bantu language family, namely the noun classification system. The study was centrally concerned with Malawi's most widely spoken language, Chichewa, which poses numerous challenges to the standardly accepted nominal classification theory. It makes two major contributions: Firstly, it offers a very thorough and systematic description of the Chichewa facts, encompassing a much wider range of data than that traditionally considered in research on nominal classification, and secondly, it sets out and motivates an acquisitionally plausible account of the organisation of the Chichewa nominal system.

MUSILA, Benson Shisavilu (Political Science)

Foreign aid in Africa: Analysing the role of European Union political aid in political processes in Kenya, 1990–2013

European Union political aid in Kenya initially supported liberalisation after the Cold War. Since the 1990s, the focus shifted to bolstering domestic civil society in its struggle against the Moi dictatorship. In the first decade of the 2000s, the agenda shifted again to building institutions tied to the war on terrorism. This failed to press the Kenyan government to effect institutional reforms that promoted participative political processes, leading to the post-election crisis of 2007–08. The study argues for a healthy balance in political aid between the promotion of agency and participative processes versus effective and robust institutions.

Naming the witch, housing the witch and living with witchcraft: An ethnography of ordinary lives in Northern Ghana's witch camps

In Northern Ghana, people found guilty of witchcraft are often banished to so-called witch camps. This ethnography explores the ways in which convicted 'witches' settled in host communities as morally compromised strangers. It shows that although dewitchment rituals played a vital role in villagers' decision to trust and accept 'witches' into their communities, meaningful social co-existence depended on enormous generosity from the accused (who provided labour) and locals (who allowed dangerous Others into their midst). In this social exchange, however, the moral stain of witchcraft skewed transactions in favour of locals who accepted the risks of living with a 'witch'.

Adapting and piloting a cognitive-behavioural group therapy-based anxiety intervention programme for vulnerable children from a disadvantaged background within the South African context

Childhood anxiety is a prevalent psychological problem worldwide and has been identified as a concerning mental health issue in need of intervention, especially among vulnerable children within disadvantaged contexts. Within such contexts, access to mental health services is particularly limited due to a lack of resources that diminish service delivery capacity. This timely study with a creative focus on adapting and piloting an accessible, cost-effective and contextually tailored cognitive-behavioural group therapy-based anxiety intervention programme contributes uniquely to the psychological well-being of vulnerable children from a disadvantaged background within the South African context. The findings have important implications for anxiety prevention.

Historicising borders: Studies in Nigerian novels

The study provides an alternative imagining of the border by examining fictional representations of bordered identities in three generations of Nigerian literature. From the perspective of border poetics, which is the intervention of arts and culture in border studies, the study examined a range of fictional novels thematising concerns related to geographical, cultural, ethnic and social divides. By engaging novels that speak to the national concerns prevalent in different periods of Nigerian literary history, the study demonstrates how literary texts conceptualise the lived experience of shifting borders and the cultural and social distinctions that have attended historical changes in Nigeria.

Media multitasking and cognitive control: Assessing the feasibility of an intervention requiring the self-regulation of smartphone use

Media multitasking is a near-ubiquitous behaviour in modern life and has been associated with a number of adverse cognitive, psychosocial and functional outcomes. This project investigated interventions targeting media multitasking and related cognitive effects through a mixed-methods investigation. First, an integrative theory of media use behaviour and media multitasking drivers was produced. Second, existing research was synthesised through a systematic review. Third, a self-regulation-based media multitasking intervention was developed. Insights into the feasibility of the intervention (demand, implementation, acceptability and efficacy) for a student population were produced through an experimental design involving cognitive assessments, usage tracking and interviews.

Smallholder farmers' understandings of and responses to climate change in Malawi: A case study of Mphunga group village, Salima district

This study used an actor-oriented approach to explore how smallholders in a Malawian village hit repeatedly by extreme weather events are responding to the discourse of climate change that international climate change experts and donor-funded relief agencies have brought to their district. Age, gender and education emerged as significant in shaping farmers' understandings of how climate change relates to the changes in weather they are experiencing, while local social networks provide important safety nets for households struggling to cope with repeated livelihood shocks. External agencies are supporting farmers to develop adaptation strategies, but vulnerable farmers' dependency on these interventions is also increasing.

Supervisor: Prof CJ Walker

SHABALALA, Nokulunga Candice Nosipho (Psychology)***The experience of black medical specialists in training at two medical schools in the Western Cape***

Using a decolonial lens, the student sensitively explored the experiences of black trainees in various medical specialties. She shows that despite all policies to the contrary, black medical specialists in training experience a range of subtle exclusions and disavowals in their training and workplace settings. The experience of race, along with other aspects of identity such as gender, deeply inflects the ways in which people who have historically been excluded enter and struggle to inhabit contemporary spheres of power. The candidate made exceptional use of her own reflexivity as a black healthcare professional to collect and analyse rich and complex data.

STANDER, Daniël Botha (English Studies)***Reza de Wet (1952–2012): Life and works***

This study charted the intellectual and artistic development of South African playwright Reza de Wet. Her life as a writer, actress, director and scholar is under-researched, and this is the first full-length biographical study of both her life and her works. Drawing on theatre, literary and biographical studies, the study analysed her work in thematic clusters. It placed special emphasis on De Wet's idiosyncratic Jungian psychoanalytic poetics and read her oeuvre as an expression of a psyche in search of greater self-knowledge. It relied on close readings and extensive archival research to conduct an encompassing lifeworlds analysis.

Co-supervisor: Dr RN Oppelt

SWARTS, Johannes Jacobus (Afrikaans en Nederlands)***A grammatical framework for the computational parsing of written Afrikaans sentences***

Hierdie studie bied 'n ondersoek na 'n grammatikale raamwerk wat die geskikste is vir die rekenaarmatige voorstelling en ontleding van geskrewe Afrikaanse sinne. Dié raamwerk is nodig om 'n omvattende Afrikaanse boombank te bou – 'n hulpbron wat 'n noodsaaklike voorvereiste is vir gevorderde Afrikaanse natuurlike taalverwerking. Die studie beskryf die struktuur van geskrewe Afrikaans vanuit die perspektief van twee dominante grammatikale raamwerke. Met hierdie beskrywings as vertrekpunt word 'n taalkundig gemotiveerde Afrikaanse boombank gebou. Die data word met vier toonaangewende sinsontleders bewerk om die beste raamwerk vir die rekenaarmatige voorstelling van die sintaktiese struktuur van geskrewe Afrikaanse sinne te bepaal.

TSHABANGU, Thulani (Journalism)***Citizen journalism and alternative media in Zimbabwe: An ethnographic study of citizen participation, newsmaking practices and discourses at AMH Voices***

This study, in a repressive environment in Zimbabwe, examined theories of the public sphere, critical political economy and critical discourse analysis. It argues that a counterpublic sphere emerged in which AMH Voices, an alternative media platform, afforded marginalised citizens the opportunity to participate in journalistic processes. It found that news discourses were mostly framed in non-dominant perspectives using interpretive news-writing styles to express alternative political narratives, challenge the status quo and advocate for radical political change. However, they were also influenced by contextual and structural pressures, including conservative views regarding gender, which made categorisation as an automatic or consistent counterpublic sphere difficult.

Supervisor: Dr GJ Botma

VAN HEERDEN, Lorinda (English Studies)***Intimating a female archive: Rendering the wounds of family trauma***

This study (an original artist's book plus a theoretical dissertation) explored femaleness, family, trauma, archive and creative practice. Bearing proxy witness to the lives of three generations of women in her family, the candidate, inspired by Hélène Cixous, reworked traditional, Derridean archival discourses via experimental, feminist-inflected alternatives such as the unsayable, the interior and the surrogate. The study innovatively configured multiple imaginative modes (among them critical theory, poetry, manipulated photographic images and recorded oral testimonies) to produce both a creative artefact and a generative model for the hybrid, critical-creative potentials of autoethnographic scholarship in the arts.

Supervisor: Prof SA Murray

Co-supervisor: Dr M Slabbert

WESTMAN, Claire Stephanie (Philosophy)***'There's no such thing as gay': Black lesbians and nationhood in post-apartheid South Africa***

Within contemporary South Africa, lesbian women are widely understood as a symbolic threat to the national identity under construction. By incorporating visual activism and the narratives of some survivors of lesbo-phobic rape, this study developed a black lesbian standpoint framework with which to analyse the phenomenon. This lens brings to the fore the social and historical conditions that have led to lesbo-phobic rape: While the liberal and traditional paradigms in the country clash on the surface, they in fact reinforce each other's patriarchal and lesbo-phobic effects. The black lesbian body figures as the abject, to be either corrected or otherwise violently expelled.
