SOCIAL IMPACT

The Faculty strategy is to embed social impact initiatives by integrating SI into all its academic and co-curricular practices. In addition, the Faculty embarks upon specific initiatives to address certain societal challenges, e.g. teacher training in mathematics, career guidance workshops at schools, and assisting small business owners in townships through USB's Small Business Academy.

RESEARCH AREAS

We have a significant base of diverse research areas including the economics of social policy; African economic history; public governance and leadership; sustainable development; business in Africa; futures research; marketing; financial and investment management; industrial psychology; logistics; auditing; financial risk; actuarial science; and HIV/Aids management. With more than 60 registered research activities in Africa, most of the research projects are Africa-focused.

PhD SCHOOL

The Faculty's Graduate School for Economic and Management Sciences (GEM) offers three-year full-time doctoral scholarships to 30 PhD candidates annually.

HISTORY

1929

The faculty pioneer, Prof CGW Schumann, became Dean of the faculty, a position he held until his retirement in 1960.

The first 10 students graduated with a BCom degree after the establishment of the Commerce Faculty in 1925.

1935

The Van der Sterr Building was inaugurated. A newly erected building named after Prof Schumann was added in 1977.

1960

A fire caused great damage to a large part of the Van der Sterr Building in the year that the faculty celebrated its 90th anniversary. The building was subsequently modernised and extended.

2015

Prof Ingrid Woolard, the first female dean in the history of the faculty, was appointed.
