

Conservation Ecology & Entomology Department

Dr Sonja Matthee

I completed my post graduate training in 2000 in the Department of the Veterinary Tropical Diseases, Faculty of Veterinary Science at Pretoria University. I have always been interested in animal diseases and parasites. More recently I have started to research various aspects pertaining to parasite ecology and have included regional scale phylogeographic patterns.

My interest is macroparasites, but we are also conducting projects on viruses, protozoa and bacteria. The target host species mainly include rodents and insectivores. I am fortunate to have an extended network of collaborators from across the globe, who is involved in my research programme. My personal feeling is that a multidisciplinary research approach facilitates high quality and often novel research, with the potential for cutting-edge peer-reviewed publications.

Current students:

MSc:

Tanya Kerr
Karlien Malan

PhD:

Nina du Toit
Adriaan Engelbrecht
Luther van der Mescht
Andrea Spickett
