

B.Com. (Actuarial Science)

Admission Requirements – 2018

Minimum requirements for admission:

- An NSC average based on the six best subjects, excluding Life Orientation, 80%;
- Mathematics 80%;
- Home Language 60%;
- If English was not the home language: English First Additional Language 75%.

The Bachelor's programme is a Selection Programme:

The Selection Mark, on which selections will be based, will be calculated as:

$$\frac{(2 \times \text{Mathematics}) + \text{Aggregate of best 5 other results (excl. Life Orientation)}}{7}$$

For students who completed Grade 12 through a system requiring fewer subjects the Selection Mark may be calculated as:

$$\frac{(2 \times \text{Mathematics}) + \text{Aggregate of best 3 other results}}{5}$$

For automatic provisional acceptance applicants will need to have met the minimum admission requirements and have a selection mark of at least 85% (based on Grade 11 results, or Grade 12 results if matriculated). Applicants with a selection mark of below 85% will then be considered on merit, taking account of the number of places available and the Faculty's general admissions policy.
