

## BEd 2 Exhibition: Construction of Beginning Knowledge through Integrated Learning

---

On 5th May 2015 students had the opportunity to showcase their group assignment efforts illustrating “The Construction of Beginning Knowledge through Integrated Learning in Grade R”.

This exhibition aimed to share information on how one of the BEd 2 modules (Grade R Theory into Practice) offers student teachers clarity, reassurance and options for putting into practice the construction of Beginning Knowledge in Grade R.

Using the vocabulary and beginning knowledge of the content areas of the school curriculum does not mean that we abandon play-based or other appropriate and effective Grade R- teaching methods. It means only that Grade R teachers present the experiences they offer young children in Beginning Knowledge as the beginning of a continuum for academic learning.

The exhibition was attended by passionate student teachers and experienced Grade R teachers from different education districts.
