- ✚ The purpose of this workshop is to plan a national Diploma in Family Medicine and Primary Care for South Africa. This Diploma is envisaged as a training model to go to scale, by re-orientating the collective body of practising primary care doctors (medical officers and general practitioners) towards functioning in the new NHI and integrated health system.
- ✚ The workshop is funded by the EuropeAid project, “Strengthening primary health care through primary care doctors and family physicians” (SAAFP is an associate member of the project). This workshop feeds into one of its activities. This activity’s outcome is “a new nationally designed Diploma level training programme to up-skill and re-orientate existing primary care doctors.”
- ✚ Workshop attendees include representatives from each South African Family Medicine department, as well as a registrar representative. Alphen boutique hotel provides the perfect space to allow for creative thinking. The organisers trust that this workshop will meet its purpose and that the attendees will enjoy this collaborative opportunity.
