

Clinical Research Protocol Writing Short Course

| From research idea to protocol in 4 months |

33 CPD
credits

Registrars, Medical Officers and other novice researchers who are ready to begin or are in the process of drafting a quantitative or qualitative clinical research protocol.

Certificates of competence and CPD credits (30 general + 3 ethics) will be issued to participants who successfully complete the course.

This is a 4-month blended course, facilitated online, which consists of 5 online, self-study modules and 5 interactive contact sessions.

Input required during the course:

- 12-15 hours online content
- 5 x 1.5 hour contact sessions
- Additional time for protocol development and drafting

This course covers the basic concepts of clinical research, and participants can choose to focus on quantitative or qualitative research, or both.

We provide templates and guidance on how to write a clinical research study protocol.

We will not cover laboratory research, systematic reviews or qualitative evidence synthesis.
