

# Biochemistry

## Lecture series 2018

JC Smuts Building | A203 | 13:00-13:45

**Wednesday, 28 March 2018 - Prof Jannie Hofmeyr**

*The complexity of life: from molecules to man*

**Wednesday, 25 April 2018 - Prof Jacky Snoep**

*Mechanistic Modelling of Cellular Function: putting Biochemistry to work!*

**Wednesday, 30 May 2018 - Prof Marina Rautenbach**

*Nature's Solutions to Antibiotic Resistance Armageddon*

**Friday, 27 July 2018 - Prof Hugh Patterton**

*The problem with giant genomes: the biological equivalent of the winzip/gzip utility*

**Friday, 31 August 2018 - Prof Dirk Bellstedt**

*How DNA sequence data has helped us to understand the evolution of the flora of the Cape Floral Region*

**Friday, 28 September 2018 - Prof Ann Louw**

*Gannabos, our GPS to better steroidal anti-inflammatory drugs*

**Friday, 26 October 2018 - Prof Amanda Swart**

*Steroid Power?*
