

Bernard Pieters

Curriculum Vitae

Personal information

I am a dedicated advocate for community autonomy and the expansion of democracy in the Western Cape, South Africa. With a profound commitment to promoting self-help initiatives and cultivating strong, autonomous communities. I achieve the aforesaid by mobilising resources to fight poverty, build community economies, and contributing to the establishment of well-functioning societies. My focus on conflict resolution, cooperation, and mutual recognition among diverse communities reflects a comprehensive approach to community development. In addition, I am actively involved in community-based safety projects, contributing to the overall welfare and safety of the public. As a steadfast advocate for autonomy, I work tirelessly on devolution of decision-making power on a federal basis, thereby giving communities the power to take more responsibility for their own development.
