

Fruit Flies In-silico Prevention & Management

FF-IPM

01

Promoting Research
for healthy, fresh
fruit in a clean,
sound environment

02

Enhancing the capacity for
ON-Season FF-IPM
through innovative in-silico
tools and services

03

Providing local, regional and
EU-wide knowledge-based
support to enhance EU plant
health policy implementation

04

Reducing production losses,
post-harvest losses and
food waste through better
protection against FF

05

Integrated protection of
fruit against pests from the
producer to the consumer

06

Creating a fundamental
paradigm shift in FF-IPM
towards OFF-Season
management of emerging pests
