2022

Our vision 2040

Stellenbosch University will be Africa's leading research-intensive university, globally recognised as excellent, inclusive and innovative, where we advance knowledge in service of society.

Our mission

Stellenbosch University is a research-intensive university, where we attract outstanding students, employ talented staff and provide a world-class environment; a place connected to the world, while enriching and transforming local, continental and global communities.

Umbono Wethu ka2040

IYunivesithi yaseStellenbosch iya kuba yiyunivesithi egxininisa kuphando nekhokelayo eAfrika, neyamkelwa kwihlabathi lonke njengegqwesileyo, equkayo neyenza inguqulelo ezintsha, nalapho ulwazi olusiqhubela phambili lunika iinkonzo kuluntu.

Ubizo lwethu

IYunivesithi yaseStellenbosch yiyunivesithi egxininise kuphando nalapho sitsala abafundi abagqwesileyo, siqesha abasebenzi abanesiphiwo kwaye sibonelela ngemeko ekwinqanaba lehlabathi; indawo eqhagamshelana nehlabathi, ngeli lixa ityebisa ngophuhliso kwaye iguqula uluntu lwendawo, elizwekazi nolwehlabathi.

Ons visie 2040

Die Universiteit Stellenbosch sal Afrika se voorste navorsingsintensiewe universiteit wees wat wêreldwyd as uitnemend, inklusief en innoverend erken word en waar ons kennis tot diens van die samelewing bevorder.

Ons missie

Die Universiteit Stellenbosch is 'n navorsings-intensiewe universiteit wat uitmuntende studente lok, talentvolle personeel aanstel en 'n wêreldklasomgewing bied; 'n plek wat met die wêreld verbind is en gemeenskappe plaaslik, op die vasteland en in die res van die wêreld verryk en transformeer.

Retired Justice | Oudregter Edwin Cameron

Chancellor | Kanselier

Dear member of the Stellenbosch University community

It is an honour and a privilege for me to bring this message to our graduation ceremonies.

The past year had its difficulties. The severity of the Covid-19 pandemic has declined in 2022, but the Stellenbosch University (SU) community confronted many other real difficulties.

Untoward incidents on campus reminded us that we have a long way to go in learning to live with and respect each other, and to join hands in working for our future together.

But amidst so many difficulties, you have succeeded in graduating – and this says great things about your future and ours!

This week, we are enormously proud of the cascade of hard-won degrees, diplomas and certificates we confer at these ceremonies. Students, lecturers, supervisors, support services staff and management – each one of you have played a critical part in ensuring that Stellenbosch University continues to flourish.

And without the support that loving friends and family have willingly given, many students would not be here today to celebrate their achievements – so, to them, too, a heartfelt thank you.

A further word of appreciation to our generous-hearted donors and sponsors. They have indispensably helped our graduands to keep working, to learn and apply dedication and purpose, until the very end, to crown today's achievements.

To each and every graduand:

May the pride and joy with which we celebrate your achievement today develop over time into something even more valuable – a richer sense of duty and responsibility. Your new status means you can use the knowledge, skills and networks from your studies at Stellenbosch University to make our country, continent and the world better.

More than ever, it is your enriching and empowering choice to help shape society and make a definable difference in your community.

I wish you joy, success and fulfilment in the next phase of your life's journey.

**Retired Justice Edwin Cameron
Chancellor**

Geagte lid van die Universiteit Stellenbosch-gemeenskap

Dit is vir my 'n eer en 'n voorreg om hierdie boodskap vir ons gradeplegtighede te lewer.

Die afgelope jaar het sy probleme gehad. Hoewel die erns van die Covid-19-pandemie in 2022 afgeneem het, is die Universiteit Stellenbosch (US) en sy gemeenskap deur verskeie ander probleme geteister.

Ongewenste voorvalle op kampus het ons daaraan herinner dat ons nog 'n lang pad moet stap om te leer hoe om saam met mekaar te lewe en hoe om mekaar te respekteer, en ook hoe om saam 'n toekoms te bou.

Maar te midde van alles het julle daarin geslaag om julle kwalifikasie suksesvol te voltooi – en dit spreek wonderlike boekdele oor julle én ons toekoms!

Ons is vandeeweke ongelooflik trots daarop om die menigte grade, diplomas en sertifikate waarvoor daar so hard gewerk is, by hierdie plegtighede te kan toeken. Studente, dosente, toesighouers, steundienstpersoneel en bestuur – elkeen van julle het 'n uiters belangrike rol gespeel om te verseker dat die Universiteit Stellenbosch verder floreer.

En sonder die ondersteuning wat geliefde familie en vriende so onvoorwaardelik bied, sou talle studente nie vandag hier kon wees om hulle prestasie te vier nie – so, ons sê uit ons hart uit ook dankie aan hulle.

'n Woord van waardering gaan ook aan ons ruimhartige donateurs en borge. Hulle onontbeerlike hulp het ons graduandi gehelp om tot aan die einde met toewyding en doelgerigtheid aan te hou werk en aan te hou leer sodat hulle vandag die vrug van hulle arbeid kan pluk.

Aan alle graduandi:

Mag die trots en vreugde waarmee ons vandag julle prestasie vier, met die verloop van tyd in iets nog waardevoller ontwikkel – 'n ryker sin van plig en verantwoordelikheid. Julle nuwe status beteken julle kan nou die kennis, vaardighede en netwerke van julle studentejare by die Universiteit Stellenbosch gebruik om ons land, vasteland en die wêreld 'n beter plek te maak.

Dit is nou nog meer as te ooit te vore julle verrykende en bemagtigende keuse om te help om die samelewing te vorm en om 'n werklike verskil in julle gemeenskap te maak.

Ek wens julle vreugde, sukses en vervulling toe met die volgende fase van julle lewensreis.

**Oudregter Edwin Cameron
Kanselier**

Prof Wim de Villiers

Rector and Vice-Chancellor | Rektor en Visekanselier

Dear Matie graduand

Firstly, congratulations!

The main goal of enrolling at university, firstly, is to graduate, and today you're achieving that. This must be celebrated, so I want to say well done to you and everyone who has championed you along the way.

Secondly, your qualification from Stellenbosch University will open doors, no matter where you are in the world. Despite our challenging year, our international reputation is more than intact. We've built strong networks and purposeful partnerships, and the international community is keen to see what impact our graduates will have.

In 2020 and 2021, when the pandemic was still very much at the forefront of everything we did, our objective was simple: complete the academic year. And yet, because of the agility and can-do spirit of our staff and students, we managed to surpass this objective and thrive.

And in 2022 we were able to go even further. Our staff and students across the academic spectrum proved that SU nurtures and advances innovation.

This is not to say we didn't face significant challenges. The unfortunate incidences at our University have forced us to reflect on what it truly means to be an inclusive institution. But reflection also requires action, and we will do everything necessary to ensure SU is a place where everyone feels welcome and heard.

I know the lessons you've learnt here will stand you in good stead, and I hope you will continue to live by SU's values – excellence, compassion, equity, respect and accountability.

We'd like you to stay in touch and be part of SU's future through our alumni network. Please visit www.matiesconnect.com, where you'll be able to maintain ties with your University friends, view job offers and find mentors and networking opportunities – all in one place. SU will always be your academic home, and a strong alumni network is not only beneficial for our University but will also enhance your professional development going forward.

Good luck with what the future holds, until we meet again!

Prof Wim de Villiers
Rector and Vice-Chancellor

Beste Matie-graduandus

Eerstens, baie geluk!

Die hoofdoel daarvan om by 'n universiteit in te skryf, is eerstens om te gradueer, en vandag bereik jy hierdie doelwit. Dit moet gevier word. Daarom wil ek aan jou sê: Knap gedaan aan jou en elkeen wat jou op hierdie reis ondersteun het.

Tweedens sal jou kwalifikasie van die Universiteit Stellenbosch vir jou deure open, ongeag waar jy jou ook al in die wêreld bevind. Ondanks ons uitdagende jaar, is ons internasionale reputasie meer as ongeskonde. Ons het sterk netwerke en doelgerigte vennootskappe gebou en die internasionale gemeenskap is gretig om te sien watter trefkrag ons gegradueerdes gaan hê.

Te midde van die allesoorheersende pandemie in 2020 en 2021 was ons doelwit eenvoudig: Voltooi die akademiese jaar. Maar danksy ons personeel en studente se veerkragtigheid en 'n ingesteldheid van ons-gaan-dit-regkry, kon ons hierdie doelwit oortref en floreer.

En in 2022 kon ons selfs verder gaan. Ons personeel en studente regoor die akademiese spektrum het bewys dat die US innovasie kweek en bevorder.

Dit beteken nie ons het nie aansienlike uitdagings beleef nie. Die ongelukkige voorvalle by ons Universiteit het ons gedwing om na te dink oor wat dit werklik beteken om 'n inklusiewe instelling te wees. Maar nadenke vereis ook aksie, en ons sal alles wat nodig is, doen om te verseker dat die US 'n plek is waar almal welkom voel en dat daar na hulle geluister word.

Ek weet die lesse wat jy hier geleer het, sal jou handig te pas kom en ek hoop jy sal voortgaan om die US se waardes – uitnemendheid, deernis, billikheid, respek en verantwoordbaarheid – uit te leef.

Ons wil graag hê jy moet in aanraking bly en deel word van die US se toekoms deur middel van ons alumni-netwerk. Besoek gerus www.matiesconnect.com waar jy jou bande met jou Universiteitsvriende kan behou, werksgeleenthede kan sien en mentors en netwerkgeleenthede sal vind. Die US sal altyd jou akademiese tuiste bly en 'n sterk alumni-netwerk strek nie net tot voordeel van ons Universiteit nie, maar sal ook vir jou professionele ontwikkeling op jou pad vorentoe voordelig wees.

Alle voorspoed vir die toekoms, tot ons weer ontmoet!

Always a Matie

Congratulations and welcome to the Stellenbosch University alumni family! Your graduation is a momentous occasion and marks the beginning of your continued relationship with your alma mater. The Alumni Office is your lifelong connection to the University.

There are many ways to stay connected.

Homecoming and Family Weekend

The University's Homecoming and Family Weekend takes place from Thursday 14 September to Saturday 16 September 2023 on the Stellenbosch campus. Information is available on www.matiesalumni.com.

Join Maties Connect

Our www.matiesconnect.com platform will help you increase your professional network, find a job opportunity, advertise your business, search for a mentor, reach out to alumni, and keep up to date on what's happening at your alma mater.

Be part of an Alumni Chapter

The University's Development and Alumni Relations team establish alumni chapters both locally and internationally to connect alumni in specific regions with one another through regular networking and social events - both online and in person. For more information on how to join or to volunteer and participate in a chapter, send an e-mail to alumni hubs@sun.ac.za.

I-Matie ngalo Lonk' ixesha

Sivuyisana nawe kwaye wamkelekile kusapho olungabo babesakufunda kwiYunivesithi yaseStellenbosch! Ukuthweswa kwakho isidanga lixesha apha elakha labaluleka, kwaye likwalixesha eliphawula ukuqalisa kwakho ubudlelwane obuqhubekayo kunye nale yunivesithi owawusakufunda kuyo. IOfisi yabo Babesakuba Ngabafundi Apha yiyo ekunxulumanisa neYunivesithi ubomi bakho bonke.

Zininzi iindlela zokuhlala uqhagamshelile.

IMpelaveki yoBuyelekhaya ubekunye noSapho

IMpelaveki yoBuyelekhaya ubekunye noSapho eyenzelwe abo babesakufunda apha yenzeka ukusuka ngoLwesine umhla we-14 kwinyanga yoMsintsi ukuya kutsho ngoMgqibelo umhla we-16 kweyoMsintsi 2023 kwikhampasi yaseStellenbosch. Iingombolo ezithe vetshe zifumaneka ku-www.matiesalumni.com.

Joyina i-Maties Connect

Iqonga lethu le-www.matiesconnect.com liza kukunceda ekwandiseni inani leengcali onxibelelana nazo, ukufumana amathuba omsebenzi, ukwazisa ishishini lakho, ukufuna umcebisi onamava, ekufikeleleni kwabanye ababefunda apha nasekubeni uhlale usazi ngokwenzekayo ngale yunivesithi owawusakufunda kuyo.

Yiba yinxalenye yeQela labo baBesakuba ngaBafundi balapha

Iqela loPhuhliso nezoNxibelelwano lwabo baBesakuba ngaBafundi balapha lisungula amaqela abo babesakuba ngabafundi apha netshapta zawo naza kuzinza kweli lizwe nakwamanye amazwe ukuze kunxibelelwane ngabo babesakuba ngabafundi apha abakwiingingqi ezithile oko kusenziwa ngokunxibelelana rhoqo nangendibano zasekuhlaleni nge-intanethi nangobuso ngobuso. Ukuba ufuna iinkcukacha ezithe vetshe malunga nendlela yokujoyina okanye yokuvolontiya nokuthatha inxaxheba kwiqela okanye itshapta ehlabathini, thumela i-imeyili ku alumni hubs@sun.ac.za.

Altyd 'n Matie

Geluk en welkom in die Universiteit Stellenbosch se alumni-familie! Jou gradeplegtigheid is 'n belangrike mylpaal, en ook die begin van jou voortgesette verbintenis met jou alma mater. Die Alumnikantoor is jou lewenslange skakel met die Universiteit.

Daar is vele maniere om in kontak te bly.

Tuiskoms-en-Familienaweek

Die Universiteit se Tuiskoms-en-Familienaweek vir alumni vind vanaf Donderdag 14 September tot Saterdag 16 September 2023 op die Stellenboschkampus plaas. Inligting is by www.matiesalumni.com beskikbaar.

Sluit aan by Maties Connect

Ons www.matiesconnect.com-platform sal jou help om jou professionele netwerk uit te brei, 'n werkgeleentheid te vind, jou besigheid te adverteer, vir 'n mentor te soek, alumni te kontak, en op die hoogte van gebeure by jou alma mater te bly.

Wees deel van 'n Alumni-tak

Die Universiteit se Ontwikkeling en Alumnibetrekkinge-span vestig plaaslike en internasionale alumni-takke om alumni in spesifieke streke met mekaar in verbinding te bring deur gereelde netwerk- en sosiale geleenthede aan te bied – aanlyn en in persoon. Vir meer inligting oor hoe om aan te sluit, as vrywilliger op te tree en wêreldwyd aan 'n tak deel te neem, stuur 'n e-pos aan alumni hubs@sun.ac.za.

HONORARY DOCTORATE | EREDOKTORSGRAAD

Faculty of Medicine and Health Sciences Fakulteit Geneeskunde en Gesondheidswetenskappe

The degree Doctor of Science (DSc), *honoris causa*, to
Die graad Doktor in die Natuurwetenskappe (DSc), *honoris causa*, aan

Agnes Binagwaho

for her visionary leadership as a national and global policymaker, her commitment to a stronger public health sector, her pioneering work advocating for the rights of people living with HIV, and leveraging her knowledge to launch scientific and citizen-centred endeavours in Africa and beyond.

Prof Agnes Binagwaho is a Rwandan paediatrician who has made remarkable contributions to improving the health and wellbeing of people in Rwanda and the rest of Africa.

Born in Rwanda, Binagwaho moved to Belgium as a child. Here she later obtained her medical degree and specialised in paediatrics before returning to her native country in 1996 – two years after the Rwandan genocide. She proceeded to hold several high-level government offices, including that of health minister.

She has been a tireless advocate for the rights of persons living with HIV/Aids and led the Rwandan National Aids Control Commission from 2002 to 2008. Under her supervision, the commission connected public, private and community sectors to provide better HIV care, resulting in a 44% decrease in HIV-related deaths, while new infections were halved.

During her time as health minister (2011–2016), Rwanda's health system improved significantly: The country achieved nearly universal coverage with a national community-health-based insurance scheme, significant decreases in maternal and neonatal mortality, increased life expectancy and high childhood vaccination rates.

She is the current vice-chancellor of the University of Global Health Equity, as well as a senior lecturer at Harvard. Binagwaho also serves as senior advisor to the director-general of the World Health Organisation and is a member of the United States National Academy of Medicine.

vir haar visionêre leierskap as 'n nasionale en internasionale beleidvormer, haar verbintenis tot 'n sterker openbare gesondheidssektor, haar baanbrekerswerk as kampvegter vir die regte van diegene wat met MIV leef, en die benutting van haar kennis om wetenskaplike én burgergerigte projekte in Afrika en verder van stapel te stuur.

Prof Agnes Binagwaho is 'n Rwandese pediater wat merkwaardige bydraes gelewer het tot die verbetering van die gesondheid en welstand van mense in Rwanda en die res van Afrika.

Sy is in Rwanda gebore, maar het as kind na België verhuis. Hier verwerf sy later haar mediese graad en spesialiseer in pediatrie voordat sy in 1996 – twee jaar ná die Rwandese volksmoord – na haar geboorteland terugkeer. Binagwaho het daarna verskeie hoëvlakregeringsampte beklee, waaronder dié van gesondheidsminister.

Sy is 'n onvermoebare kampvegter vir die regte van diegene wat met MIV/vigs leef, en het van 2002 tot 2008 aan die stuur van die Rwandese Nasionale Vigsbeheerkommissie gestaan. Die kommissie het onder haar leiding die openbare, privaat en gemeenskapsektore laat saamwerk om beter MIV-sorg te voorsien, wat tot 'n 44% afname in MIV-verwante sterftes en die helfte minder nuwe infeksies gelei het.

Gedurende haar tyd as gesondheidsminister (2011–2016) het Rwanda se gesondheidstelsel aansienlik verbeter. Die land het bykans universele dekking met 'n nasionale gemeenskapsgesondheidsgebaseerde versekeringskema bereik, groot afnames in moeder- en babasterftes ervaar, en 'n verhoging in lewensverwagting en kinderinentingsyfers beleef.

Sy is die huidige visekanselier van die Universiteit vir Globale Gesondheidsbillikheid, sowel as 'n senior dosent by Harvard. Boonop dien Binagwaho as 'n senior raadgewer vir die direkteur-generaal van die Wêreldgesondheidsorganisasie én as 'n lid van die Nasionale Akademie vir die Geneeskunde in die Verenigde State.

DOCTORAL QUALIFICATIONS | DOKTORALE KWALIFIKASIES

DOCTOR OF PHILOSOPHY DOKTOR IN DIE WYSBEGEERTE

CHOTHIA, Mogamat-Yazied (Internal Medicine)

Improving the emergency management of hyperkalaemia

This PhD included the largest African epidemiologic study to date, which reported an in-hospital prevalence of hyperkalaemia of 3,7%, and high mortality. It also included a systematic review of the adverse effects of insulin-based therapy which found a hypoglycaemia rate of 17%, and a survey among medical specialists which identified knowledge gaps regarding insulin therapy and the complication of hypoglycaemia. A method comparison study was also conducted, which demonstrated that point-of-care K⁺ measurements could be used for rapid diagnosis of hyperkalaemia. Finally, in a randomised trial, it was demonstrated that a glucose-only bolus is a novel and effective therapeutic option for lowering serum [K⁺] without any risk of hypoglycaemia.

Supervisor: Prof MR Davids
Co-supervisor: Prof UME Chikte

HASSAN, Karim Mohammed (Internal Medicine)

The Contemporary study of Acute Myocarditis in South Africa (CAMISA)

The Contemporary study of Acute Myocarditis in South Africa (CAMISA) is the largest study of myocarditis to be undertaken outside of the developed world. This landmark investigation describes the presentation, causes and outcomes of myocarditis locally and developed a novel echocardiographic and fluoroscopic procedural screening methodology for ensuring the safety of endomyocardial biopsy in low-volume centres. Diagnostic thresholds for Parvo B19 myocarditis, the most common form of viral myocarditis, were determined to assist in differentiating myocarditis from incidental latent viral presence, a common scenario. MRI-based patterns of myocardial involvement and diagnostic sensitivities were linked to specific patterns of presentation and clinical predictors of poor outcome were determined.

Co-supervisor: Prof AF Doubell

KAJERO, Jaiyeola Abiola (Psychiatry)

Investigation of the Potential Beneficial Effects of Cannabidiol on Oro-Bucco-Lingual Dyskinesias, Oxidative Stress and Psychosis Using Animal Studies

This study investigated the potential attenuating effects of cannabidiol (CBD) on antipsychotic-induced vacuous chewing movements (VCM), behavioural and biochemical aberrations, and cognitive and negative symptoms of schizophrenia in rodent models of tardive dyskinesia and psychosis. The results demonstrated that CBD attenuated haloperidol-induced VCM and biochemical parameters; however, these effects were dependent on the prolonged administration of haloperidol. CBD also attenuated metabolic side effects of risperidone and haloperidol. CBD reduced oxidative stress induced by social isolation, but did not have significant effects on cognitive and negative symptoms in a rodent model of schizophrenia.

Co-supervisors: Drs O Aina (*external*), A Akindele (*external*), Prof J Ohaeri (*external*)

LACHMAN, Anusha (Psychiatry)

Shared Pleasure in Early Infant Interactions

This study investigated the shared pleasure paradigm in mothers with and without mental illness and their young infants in a clinical and community setting in the Western Cape. The study included a range of neurodevelopmental, infant withdrawal and maternal mental health variables. The presence of shared pleasure moments showed a complex relationship with infant withdrawal behaviours, cognitive and motor development, maternal mental health and maternal exposure to adverse life events. Shared pleasure in reciprocal interactions may only be disrupted in extreme cases (such as severe mental illness) and hence may serve as a potential screening tool for at-risk mother-infant dyads.

Supervisor: Prof DJH Niehaus
Co-supervisor: Prof K Puura (*external*)

MALULEKE, Tirhani Lineth (Pharmacology)

Development of a Direct ADR Reporting Tool for Patients to Address Under-Reporting of ADRs to the National Pharmacovigilance Unit in South Africa

Medicines obtain marketing authorisation with limited safety data. Global pharmacovigilance (PV) systems dependent on adverse drug reactions (ADRs) reported by healthcare professionals enable the development of post-marketing safety profiles of such medicines. To address the underreporting of ADRs, an online PV reporting tool for consumers was developed and its content and usability were validated by healthcare professionals. A feasibility study among consumers confirmed the practicality of the tool in terms of consumer use and in the causal assessment of a medicine and a suspected adverse event. This reporting tool will significantly promote the efficiency of the National PV system in South Africa.

Supervisor: Dr C Page

Co-supervisors: Dr E Allen, Prof H Reuter

ROBBERTSE, Pieter-Paul Strauss (Internal Medicine)

Prospective evaluation of the presence, profile and evolution of asymptomatic cardiovascular disease in treatment naïve, HIV infected patients using cardiac magnetic resonance imaging after initiation on antiretroviral therapy

Subclinical HIV-associated cardiovascular disease was prospectively studied in a cohort of newly diagnosed HIV-infected individuals without clinical cardiovascular disease and prior to initiating antiretroviral therapy (ART). MRI demonstrated subclinical cardiac dilatation, thickening, systolic impairment, myocardial oedema and fibrosis. These findings improved on ART, but did not normalise over nine months. Cardiac magnetic resonance tissue characterisation and biomarkers supported the inflammatory hypothesis of HIV heart disease. Biochemical biomarkers of cardiac remodelling and fibrosis, including sST2 and Galectin 3, show promise as surrogates for cardiac magnetic resonance imaging biomarkers, while aortic stiffness looks promising for assessment of cardiovascular disease risk prediction in people living with HIV.

Supervisor: Dr PG Herbst

Co-supervisor: Prof AF Doubell

VOUNG, Eileen (Psychiatry)

Exploring the potential role of adiponectin in the development of posttraumatic stress disorder in female rape survivors in South Africa

This study investigated the potential role of adiponectin (ADP) in predicting the onset of posttraumatic stress disorder (PTSD) and cardiometabolic disease in female rape survivors early after rape. Higher serum adiponectin (*s-ADP*) levels were associated with a reduced risk of PTSD at three- and six-month follow-up. No adiponectin gene (*ADIPOQ*) variant was shown to be associated with PTSD symptom severity; however, a single nucleotide polymorphism of *ADIPOQ* was shown to both influence *s-ADP* levels and significantly reduce the risk of metabolic syndrome at 12 months. Serum ADP was also significantly associated with individual metabolic syndrome components.

Supervisor: Prof S Seedat

WADEMAN, Dillon Timothy (Paediatrics)

A critical interrogation of the acceptability of antituberculosis treatment in caregivers, children and adolescents in the Western Cape, South Africa

This study addressed how we should conceptualise the acceptability of tuberculosis care for children. It first describes the emerging importance of children's autonomy and the experience of patients/caregivers for care outcomes. Then, it evaluated the acceptability of formulations and regimens for drug-sensitive and drug-resistant tuberculosis treatment in children. The study presents a novel, holistic conceptual model of acceptability for childhood tuberculosis care. This model, with the dimensions of usability, receptivity and integration, is a much-needed standard against which to measure new formulations and regimens, thereby informing more child-friendly care, reduced morbidity and ultimately better outcomes.

6 Desember 2022 | 13:00

Programme

Please stand

1. Entrance of academic procession into the hall.

Please stand

2. Playing of the National Anthem.

Please sit

3. Congregation formally constituted by the Chancellor.

4. Welcome by the Chancellor.

5. Presentation of candidates receiving qualifications by the dean of the faculty and conferment of qualifications by the Chancellor.

6. Introduction of the candidates for the Chancellor's Awards and presentation of the awards by the Chancellor.

7. Closing by the Chancellor.

Please stand

8. The academic procession leaves the stage.

Program

Staan asseblief

1. Akademiese prosesie kom die saal binne.

Staan asseblief

2. Speel van die Nasionale Lied.

Sit asseblief

3. Formele konstituering deur die Kanselier.

4. Verwelkoming deur die Kanselier.

5. Voorstelling van kandidate wat kwalifikasies ontvang deur die dekaan van die fakulteit en toekenning van kwalifikasies deur die Kanselier.

6. Voorstelling van kandidate vir die Kanselierstoekennings en oorhandiging van die toekennings deur die Kanselier.

7. Sluiting deur die Kanselier.

Staan asseblief

8. Akademiese prosesie verlaat die verhoog.

HIV Continuum of Care Outcomes among Female Sex Workers in Kampala Uganda

The study investigated service delivery approaches along the HIV care continuum for female sex workers in a routine care setting in Kampala, Uganda. It found that the effect of community-based interventions varies across the stages of the HIV care continuum. Furthermore, retention in care and viral load testing coverage were low, although female sex workers with HIV testing results showed good viral suppression rates. These findings support the notion that consistent monitoring and realignment of effective strategies along with the HIV care continuum are critical to sustain HIV control, but the provision of tailored services under differentiated care models for female sex workers need to be emphasised.

COETZEE, Zelda (Occupational Therapy)

A critical ethnography of the Vona du Toit Model of Creative Ability in the South African occupational therapy context

The Vona du Toit Model of Creative Ability was developed in South Africa in the 1960s and has been used and taught in occupational therapy ever since. This study explored and described the original and contemporary philosophical assumptions underlying the model, as used by three generations of occupational therapists. Findings captured embedded and encultured creative ability mindsets pertaining to the model that remained similar to those developed originally. To broaden representation and inclusiveness for intervention in the South African occupational therapy context, the motivational pattern of the model between people, occupations and naturalistic-Afrocentric contexts requires further development.

Co-supervisor: Prof EM Duncan (*external*)

CUTTLER, Katelyn (Human Genetics)

Investigation of Neurexin 2 as a Candidate for Parkinson's Disease

This study focused on the incurable neurological disorder, Parkinson's disease. A novel sequence variant in the neurexin-2 gene in a South African family was identified. Using several *in vitro* functional studies and *in silico* modelling techniques, it was found that this variant may be linked to mitochondrial and synaptic dysfunction, which may lead to neurodegeneration. Two research articles, one review article and one book chapter were published during the study. This study makes an important and novel contribution to the Parkinson's disease genetics field and has laid a solid foundation for the design of future research projects.

The validity of the Disabilities of the Arm, Shoulder and Hand (DASH) questionnaire in Afrikaans for the Western Cape of South Africa

A four-phased approach comprising quantitative and qualitative components was used to guide the translation and cross-cultural adaptation of the Disabilities of the Arm, Shoulder and Hand (DASH) questionnaire into Afrikaans for the Western Cape. Novel approaches of community translation and shared decision making were employed. The Afrikaans for the Western Cape DASH questionnaire was successfully translated and cross-culturally adapted, with evidence of content, structural and cross-cultural validity for utilisation within the intended context.

KUNSEVI-KILOLA, Carine (Molecular Biology)

Characterization of human alveolar macrophages and blood monocyte-derived macrophages responses to *Mtb* in TB close contacts with and without type 2 diabetes

Given that type 2 diabetes is a risk factor for infectious diseases such as tuberculosis, this study investigated whether diabetes alters the responses of different macrophage subsets to *Mycobacterium tuberculosis* (*Mtb*). It was found that alveolar macrophages from diabetes patients have a reduced ability to control *Mtb* and that responses of these macrophages vary from macrophages in the blood. Responses in the lung and blood are differentially regulated and may therefore influence responses and susceptibility to pulmonary infections. This work is particularly relevant to South Africa, which has a high tuberculosis burden and increasing numbers of people with type 2 diabetes.

Co-supervisor: Dr L Kleynhans

MANTULA, Fennie (Public Health)

Barriers to cervical cancer screening in Gwanda district, Zimbabwe: A mixed-method analysis

This study explored factors that influence the low utilisation of cervical cancer screening services in Gwanda district, Zimbabwe – a unique area consisting of urban, rural and mining populations, where no data exist. The study identified major barriers to cervical cancer screening at all levels of the socio-ecological model, implying that individual, interpersonal, community and health system-related factors contribute to challenges women face in accessing screening services. The findings from this study provide evidence for strengthening the current services in Zimbabwe and impetus for engagement with policymakers and programme managers with a view to strengthening the current national programme.

Co-supervisor: Dr Y Toefy

ODUWOLE, Odunayo Elizabeth (Public Health)

Investigating vaccine hesitancy in the City of Cape Town Metropolitan District

Vaccination is increasingly challenged by vaccine hesitancy, which refers to the motivational state of being conflicted about or opposed to vaccination and which was identified by the World Health Organization in 2019 as one of the top 10 global health threats. This study used a combination of research methods to investigate vaccine hesitancy in Cape Town. It was found that existing vaccine hesitancy measurement tools have mainly been developed for and validated in high-income countries. In addition, the work revealed that vaccine hesitancy varies across vaccines, time and place, and that it is potentially influenced by misinformation, conspiracy theories, religion and concerns about safety.

SANGWENI, Nonhlakanipho Felicia (Medical Physiology)

Prevention of Doxorubicin-induced cardiotoxicity with *Galenia Africana*: A mechanistic study

This study investigated the cardioprotective potential of 5,7-DH and pinocembrin (Pin) against doxorubicin (Dox)-induced cardiotoxicity (DIC). Pin improved cardiac function in mice hearts without reducing the chemotherapeutic effect of Dox. Mechanistically, the study showed that 5,7-DH and Pin prevent DIC by mitigating autophagy, oxidative stress, mitochondrial dysfunction and apoptosis. Intellectual property due diligence is currently being performed on 5,7-DH.

Co-supervisors: Prof B Huisamen, Drs L Mabasa, D van Vuuren

SWART, Yolandi (Human Genetics)

Admixture mapping of TB susceptibility and the contribution of type 2 diabetes in a South African population

The four scientific publications emanating from this study addressed three concerns: tuberculosis (TB), type 2 diabetes (T2D) and the analysis of populations with complex genetic ancestry from sub-Saharan Africa. It identified ancestry-specific genetic variants affecting gene expression between TB-T2D comorbid and T2D patients, as well as between TB patients and healthy controls. This work is of particular relevance to South Africa, afflicted by both TB and T2D, as many genetically diverse populations requiring unique analysis methods are present.

TAPFUMA, Kudzanai Ian (Molecular Biology)

Antimycobacterial activity of ascidian fungal symbionts

This study explored the use of fungal metabolites as anti-tuberculosis agents and the use of bimetallic iron oxide nanoparticles in enhancing the bioactivity of these metabolites. The methanol extract from the fungal isolate *Clonostachys rogersoniana* exhibited significant inhibitory activity against *Mycobacterium tuberculosis*, while naked silver iron oxide nanoparticles showed higher antimycobacterial activity compared to nanoparticles functionalised with the *C. rogersoniana* extract.

Supervisor: Dr V Mavumengwana
Co-supervisors: Dr N Allie, Prof AG Loxton, Dr R Malgas-Enus

VAN COLLER, Ansia (Medical Microbiology)

Phenotypic and functional immune cell profiling of patients with primary immunodeficiency associated with mycobacterial infections in a tuberculosis endemic region

Mendelian susceptibility to mycobacterial disease (MSMD), an inborn error of immunity relating to increased mycobacterial susceptibility, encompasses 15 genes within the Interleukin-12-Interferon- γ (IL-12-IFN- γ) pathway. In this study, whole-genome sequencing identified novel disease-associated variants in 82% of MSMD-suspected patients. Significantly reduced levels of specific monocyte and lymphocyte subsets together with altered inflammatory cytokine production were observed. The transcription factor T-bet was significantly reduced in key immune cells. Despite commonalities in immune dysfunction, each patient had a unique phenotype, emphasising the importance of individual immune assessment in these underreported and understudied conditions.

Supervisor: Prof RH Glashoff

Co-supervisors: Prof M Esser, Dr B Glanzmann

VERMEULEN, Marion (Medical Virology)

The impact of individual donation nucleic acid testing for HIV and HBV on blood safety in South Africa

In 2005, South Africa became the first country to introduce single-donation nucleic acid testing to assure blood transfusion safety. Nevertheless, residual risk of infection in blood recipients remains, predominantly due to donors being in the early window period. The six peer-reviewed publications emanating from this study entailed an investigation into residual risk and the epidemiology of HIV and hepatitis B in blood donors. The findings of this study contribute to making South Africa a leader in blood safety testing and residual risk modelling.

Supervisor: Prof GU van Zyl

Co-supervisors: Drs MP Busch, N Lelie (*external*), Prof A Welte

WATSON-VAN ZYL, Jeanine (Sport Science)

Exploring the role of exercise on thyroid function, postural control and neuroplasticity in individuals with hypothyroidism

The study involved a novel approach to investigating exercise-induced neuroplasticity in the context of movement neuroscience. The findings identified moderate-intensity exercise as a complementary modality in improving thyroid-related quality of life, contributing knowledge to contemporary debates on treatment plans in hypothyroid patients. An original asynchronous tele-exercise design showed potential in reducing depressive moods and anxiety in this population, which may be meaningful, as risks of depression and anxiety are elevated in hypothyroidism. By using a translational approach, the study made a novel breakthrough in understanding exercise-induced neuroplasticity and postural control in individuals with overt hypothyroidism.

Supervisor: Prof K Welman

Co-supervisor: Dr B Sehm (*external*)

WEBER, Tariq Raool (Molecular Biology)

Investigation of underlying immune and endocrine mechanisms associated with dysregulated immune responses in TB and type 2 diabetes

This study investigated alterations in immune and endocrine responses in contacts of tuberculosis patients with and without type 2 diabetes (T2D) in South Africa and Texas. It was found that patients from these two regions displayed distinct peripheral immune and endocrine profiles, that cytokine and hormone levels were altered in T2D patients and that changes in hormone levels in these patients correlated with poor mycobacterial control in immune cells. Lastly, the expression of various proteins in peripheral immune cells was affected by T2D. This study emphasises the importance of the endocrine system in tuberculosis susceptibility and pathogenesis in T2D patients.

Faculty of Medicine and Health Sciences Fakulteit Geneeskunde en Gesondheidswetenskappe

Daniel Ranna

Mister Ranna is an extraordinary employee who joined the Faculty of Medicine and Health Sciences in 2006. We admire his demeanour and always-ready-to-assist attitude. As the face of the Faculty, he is, for many of us, both the first and the last person we see on campus every day. He cheers up your day no matter what challenges you face. Mister Ranna has developed personal connections with nearly every staff member and has the uncanny ability to remember all our stories. Mister Ranna has consistently been an overachiever. His presence in our faculty made a big difference for many people over the past 16 years. He personifies Stellenbosch University's values of excellence, compassion, equity, respect and accountability, and we thank him for his admirable dedication.

Meneer Daniel Ranna is 'n uitsonderlike personeellid wat in 2006 by die Fakulteit Geneeskunde en Gesondheidswetenskappe aangesluit het. Ons bewonder sy behulp same ingesteldheid – 'n eienskap wat vir baie mense by die Fakulteit opmerklik is, aangesien hy vir baie van ons sowel die eerste as die laaste mens is wat ons elke dag op kampus sien. Meneer Ranna het die vermoë om jou dag op te helder, ongeag die uitdagings waarvoor jy te staan kom. Hy het persoonlike verbintenisse met byna elke personeellid en die ongelooflike vermoë om al ons stories te onthou. Meneer Ranna was nog altyd 'n uitblinker. Sy teenwoordigheid in ons fakulteit het vir baie mense 'n reuseverskil oor die afgelope 16 jaar gemaak. Hy verpersoonlik die Universiteit Stellenbosch se waardes van uitnemendheid, deernis, billikheid, respek en verantwoordbaarheid, en ons bedank hom vir sy prysenswaardige toewyding.

Susan van Schalkwyk

Professor Van Schalkwyk is a leader and a teaching specialist in the health sciences, whose innovations feature projects that influence the work of students and staff, academia and industry. Her academic journey situated the Centre for Health Professions Education on an international stage and she has also served as educational advisor for some major USA-based funds. Attaining associate professorship in 2012 and full professorship in 2016, she continues to lead several development initiatives of the Faculty of Medicine and Health Sciences. Professor Van Schalkwyk's awards include a Distinguished Teacher Excellence award and a teaching fellowship, both from Stellenbosch University. Her inclusive and innovative leadership style is embedded in her daily practice.

Professor Van Schalkwyk is 'n leier en onderwysspesialis in die gesondheidswetenskappe wie se innoverende projekte die werk van studente en personeel, die akademie en die bedryf beïnvloed. Haar akademiese reis het die Sentrum vir Gesondheidsberoepse Onderwys op die internasionale verhoog geplaas en sy het ook as opvoedkunde-adviseur vir groot VSA-gebaseerde fondse gedien. Professor Van Schalkwyk is in 2012 en 2016 onderskeidelik tot medeprofessor en professor bevorder en is die leier van verskeie ontwikkelingsinisiatiewe by die Fakulteit Geneeskunde en Gesondheidswetenskappe. Haar toekennings sluit in 'n Toekenning vir Uitnemende Onderrig (Uitgelese Dosent) en 'n onderriggenootskap, albei van die Universiteit Stellenbosch. Haar inklusiewe en innoverende leierskapstyl word daagliks in haar praktyk toegepas.

Tarryn Young

Professor Young is an expert in evidence-informed healthcare. She has authored over 150 academic articles and secured R150 million in research grants. Professor Young is the executive head of the Department of Global Health, head of the Division of Epidemiology and Biostatistics, and director of the Centre for Evidence-based Health Care. She collaborates with leading health and evidence-based institutions to advance the translation of science, and her links with the provincial and national departments of Health have advanced evidence-informed policies. The leadership she provides in research capacity building has positively embedded the scientific rigour and output of students and emerging and established researchers.

Professor Young is 'n kundige op die gebied van bewys-gebaseerde gesondheidsorg. Sy is die outeur van meer as 150 akademiese artikels en het reeds R150 miljoen in navorsingstoekennings verkry. Professor Young is die uitvoerende hoof van die Departement Globale Gesondheid, hoof van die Afdeling Epidemiologie en Biostatistiek, en direkteur van die Sentrum vir Bewysgebaseerde Gesondheidsorg. Haar samewerking met van die voorste gesondheids- en bewysgebaseerde instellings ter bevordering van wetenskaptoepassing, asook haar verbintenisse met die provinsiale en nasionale gesondheidsdepartemente, het gelei tot bevordering van bewysgebaseerde beleid. Haar leierskap in navorsingskapasiteitsontwikkeling het 'n positiewe invloed op die wetenskaplike strengheid en werk van studente en opkomende en gevestigde navorsers.

Fakulteit AgriWetenskappe

6 Desember 2022 | 17:00

Programme

Please stand

1. Entrance of academic procession into the hall.

Please stand

2. Playing of the National Anthem.

Please sit

3. Congregation formally constituted by the Vice-Chancellor.

4. Welcome by the Vice-Chancellor.

5. Presentation of candidate for the honorary doctorate and conferment of the degree by the Vice-Chancellor.

6. Presentation of candidates receiving qualifications by the dean of the faculty and conferment of qualifications by the Vice-Chancellor.

7. Introduction of the candidate for the Chancellor's Award and presentation of the award by the Vice-Chancellor.

8. Closing by the Vice-Chancellor.

Please stand

9. The academic procession leaves the stage.

Program

Staan asseblief

1. Akademiese prosesie kom die saal binne.

Staan asseblief

2. Speel van die Nasionale Lied.

Sit asseblief

3. Formele konstituering deur die Visekanselier.

4. Verwelkoming deur die Visekanselier.

5. Voorstelling van die eredoktorandus en toekenning van die eredoktorsgraad deur die Visekanselier.

6. Voorstelling van kandidate wat kwalifikasies ontvang deur die dekaan van die fakulteit en toekenning van kwalifikasies deur die Visekanselier.

7. Voorstelling van kandidaat vir die Kanselierstoekenning en oorhandiging van die toekenning deur die Visekanselier.

8. Sluiting deur die Visekanselier.

Staan asseblief

9. Akademiese prosesie verlaat die verhoog.

HONORARY DOCTORATE | EREDOKTORSGRAAD

Faculty of AgriSciences | Fakulteit AgriWetenskappe

The degree Doctor of Science in Agriculture (DScAgric), *honoris causa*, to
Die graad Doktor in die Natuurwetenskappe in Landbou (DScAgric), *honoris causa*, aan

Thomas Dreyer (Tommie) van Zyl

for his leadership in South African commercial agriculture, his contribution to sustainable agricultural and conservation practices, and his commitment to creating development opportunities for small-scale farmers as well as promoting entrepreneurship and innovation.

As a well-respected thought leader in the agriculture sector, Mr Thomas Dreyer van Zyl has been at the helm of the ZZ2 farming enterprise, an innovative fresh-produce company, for more than 20 years.

The company is a significant contributor to socioeconomic development in South Africa, creating multiple employment opportunities at various levels, including opportunities for emerging entrants and small-scale farmers.

Van Zyl has made noteworthy contributions to the development of sustainable agricultural and conservation practices. As an innovator, he regularly shares the global stage with peers, deliberating on sustainable solutions to secure the future of the agricultural sector. To him, entrepreneurship is imperative to be able to create sustainable economic value.

This alumnus of Stellenbosch University previously also served as director and vice-chair of the American-based Produce Market Association, and he chaired South Africa's Agricultural Produce Agents Council for seven years. He continues to serve as a director on various boards, and his expertise and achievements have earned him numerous local and international awards.

vir sy leierskap in die Suid-Afrikaanse kommersiële landbousektor, sy bydrae tot volhoubare landbou- en bewaringspraktyke, en sy verbintenis tot die skep van ontwikkelingsgeleenthede vir kleinboere en die bevordering van entrepreneurskap en innovasie.

As 'n hoog aangeskrewe denkleier in die landbousektor, staan mnr Thomas Dreyer van Zyl al langer as 20 jaar aan die stuur van die landbou-onderneming ZZ2, 'n innoverende varsproduktemaatskappy.

Die maatskappy lewer 'n belangrike bydrae tot sosio-ekonomiese ontwikkeling in Suid-Afrika en skep veelvuldige werkseleenthede op verskeie vlakke, waaronder geleenthede vir nuweling in die mark sowel as kleinboere.

Van Zyl het merkwaardige bydraes tot die ontwikkeling van volhoubare landbou- en bewaringspraktyke gelewer. As 'n innoveerder, deel hy gereeld die wêreldverhoog met eweknieë om te beraadslaag oor volhoubare oplossings om die toekoms van die landbousektor te verseker. Vir hom is entrepreneurskap noodsaaklik om volhoubare ekonomiese waarde te skep.

Hierdie alumnus van die Universiteit Stellenbosch het voorheen gedien as direkteur en ondervoorsitter van die Varsproduktemarkvereniging, wat in Amerika geleë is, en was sewe jaar lank voorsitter van die Suid-Afrikaanse Raad vir Landbouproduktagente. Hy dien steeds in heelparty direksies, en sy kundigheid en prestasies het om al etlike plaaslike en internasionale toekennings besorg.

DOCTOR OF PHILOSOPHY DOKTOR IN DIE WYSBEGEERTE

BARICHIEVY, Kurt Russel (Soil Science)

Evaluating soil and terrain variables in a production environment: Implications for Agricultural Land Assessment

Agricultural land in South Africa is under pressure to produce more food from an ever-shrinking land base, as more land is converted to non-productive uses. This study highlights the importance of agricultural land and the accurate assessment thereof and increases understanding of production-based approaches at an operational scale through the novel combination of traditional methodologies and the application of newer technologies. This improved understanding aids in not only protecting current agricultural land that may have been previously undervalued, but also in providing an intuitive assessment tool to highlight the yield gap between potential and actual production levels.

Supervisor: Prof CE Clarke
Co-supervisor: Dr AB Rozanov

BURGER, Nicholaas Francois Visser (Genetics)

Diuraphis noxia* biotypes ascribed through genotypic characterization and utilization of their endosymbiont, *Buchnera aphidicola

Diuraphis noxia is an economically important aphid pest of wheat. Despite reproducing mostly through parthenogenesis, it has developed several resistance-breaking populations, called biotypes. This study investigated genetic differences in several of these biotypes through multiple analyses and released the first draft African *D. noxia* genome, which revealed unusual AT richness and many nucleotide polymorphisms between biotypes. Transcriptomic comparisons between biotypes and other aphids identified several salivary effector proteins for future research. Lastly, assembly of the genome of the aphid's endosymbiont, *Buchnera aphidicola*, suggests gene loss, the presence and inheritance of isolines and potential evidence for *Buchnera's* transition to become an organelle.

Supervisor: Prof AM Botha-Oberholster

KAWHENA, Tatenda Gift (Horticulture Science)

Formulation and application of novel bioactive edible coatings to extend storage and shelf life of pomegranate whole fruit and arils

Pomegranate fruit is susceptible to a high incidence of postharvest losses and waste along the value chain due to a wide range of physiological disorders and mechanical damage, leading to spoilage. In this study, novel bioactive edible coatings were formulated and applied on whole pomegranate fruit to extend their storage duration and shelf life. Optimised coating containing Gum arabic, maize starch, lemongrass oil and glycerol showed great potential as a postharvest treatment for reducing losses and maintaining the quality of 'Wonderful' pomegranates. However, the combination of coatings with polyliners proved to be the most effective treatment to maintain the quality of 'Wonderful' pomegranates.

Supervisor: Prof UL Opara
Co-supervisor: Prof OA Fawole

MAHACHI, Leo Nyikadzino (Animal Science)

Beneficiation of *sericea lespedeza* for lamb worm control, meat production and preservation

Lack of adequate nutrient supply and gastrointestinal helminthosis due to *Haemonchus contortus* threaten sheep productivity and meat quality. This study evaluated the potential of *sericea lespedeza*, a bioactive forage legume, to suppress helminths and modulate lamb meat production and shelf life. Dietary substitution of *sericea lespedeza* for lucerne in lamb feedlot diets up to 18,75% damaged adult *Haemonchus contortus* heads, maintained lamb growth performance, meat production and quality, but reduced total feed costs and meat lipid oxidation. The study concluded that *sericea lespedeza* may be beneficiated in lamb diets to reduce feed costs while maintaining lamb meat production and quality.

Supervisor: Prof C Mapiye
Co-supervisors: Dr MC Marufu (*external*), Prof AO Aremu (*external*)

MALGAS, Rhoda Ronette (Conservation Ecology)

A social-ecological systems approach to sustainable production of endemic Rooibos (*Aspalathus linearis*) and honeybush (*Cyclopia* spp.) species amongst agrarian communities in the Cape Floristic Region (CFR), South Africa

How do we ensure sustainable fynbos biomass production to support the livelihoods of small-scale producers in the geographically delimited Cape Floristic Region? The question pertains to the uniquely South African small-scale rooibos (*Aspalathus linearis*) and honeybush (*Cyclopia* spp.) sectors. Social-ecological variables and their interactions were identified using Ostrom's Social Ecological Systems Framework (SESF), a novel undertaking for fynbos sectors. The study explored pathways and pitfalls to social-ecological system outcomes, such as sustainable harvesting, sustainable livelihoods and maintaining the ecological integrity of wild rooibos and honeybush populations. The resultant modified SESF may be applicable for advancing sustainability in other fynbos-based sectors.

Supervisor: Prof K Esler

Co-supervisors: Profs SM Jacobs, JHJ Schaminée (*external*)

MOHAMMED, Abubakar Sadiq (Wood Product Science)

Properties of wood-plastic composites made from alien invasive tree waste and recycled low-density polyethylene for interior use in social housing

Wood-plastic composites were manufactured from recycled low-density polyethylene and the biomass from the entire tree of invasive Port Jackson, including bark, twigs and leaves, in order to minimise manufacturing costs. The resulting wood-plastic composite boards are intended for use as insulation materials in low-cost RDP houses. Various blending ratios, particle sizes and press settings were tested with regard to their chemical, physical and mechanical properties and the optimum processing parameters were determined. In addition, the acoustical and thermal insulation properties, as well as fouling properties and behaviour in a fire, were tested. The boards were found suitable for use as insulation boards, while also meeting acoustical and safety requirements.

Supervisor: Prof M Meincken

Co-supervisor: Prof A Krause (*external*)

MORKEL, Russell George (Forest Science)

Measuring and modelling dynamic moisture loss of pulpwood during rail transport in South Africa

The study measured and modelled incremental moisture loss of wet pulpwood during freight rail transport. It was hypothesised that the faster, more turbulent airflow within the boundary layer of a train would result in more weight loss than comparable static controls. Laboratory wind tunnel simulations recorded a statistically significant 6,6% step-down in the weight of treatment payloads. Operational field experiments recorded smaller slipstream-induced weight losses (averaging 2,84%).

Supervisor: Prof PA Ackerman

Co-supervisor: Prof CB Wessels

MULENGA, Charles (Wood Product Science)

Effects of mining pollution on tree growth and wood quality

Mining-induced heavy metal dispersion often contaminates the soil in forests surrounding copper mines. This study investigated the effect of mining-induced heavy metal on the growth and wood quality of *Brachystegia longifolia*, one of the commercially important Miombo woodland species growing in a mining environment, as a function of distance and wind direction around an active copper mine in Mufulira, Zambia. The concentration of heavy metals in soil, leaves and wood was detected with X-ray fluorescence and atomic emission spectroscopy. The wood growth response was determined through growth ring analysis, anatomical characterisation, as well as determination of density and elemental composition. This study demonstrated that copper mining-induced heavy metal pollution and the subsequent metal stress affect the growth and anatomical characteristics of *B. longifolia*.

Supervisor: Prof M Meincken

Co-supervisor: Prof C Clarke

PFUKWA, Trust Mukudzei (Food Science)

Bioprospecting South African indigenous fruit by-products as natural antioxidants in processed meat products

Convenience foods market growth, consumer sophistication and increased food losses due to oxidative degradation have increased demand for natural antioxidants in processed foods. This study evaluated the potential of phenolic extracts from eight South African indigenous fruit by-products as natural antioxidants in processed meat products. Purified phenolic extracts from wild plum peel showed the highest antioxidant activity and its application at 450 ppm was less cytotoxic and reduced colour loss and oxidation, while maintaining sensory quality in beef patties relative to other extracts. Evidence suggests that wild plum peel extracts are a source of safe antioxidants in processed meat products.

SEMWOGERERE, Farouk (Animal Sciences)

Nutrients and phytochemicals in hempseed (*Cannabis sativa* L.) cake: Bioavailability and bio-efficiency for chevon production and quality enhancement

The chevon industry is constrained by costly protein feedstuff, and research into alternative protein sources such as hempseed cake is paramount. The study evaluated the effects of incorporating hempseed cake into goat finisher diets on nutrient digestibility and the bioavailability of phytochemicals for chevon production and quality. Inclusion of hempseed cake in diets up to 100 kg dry matter did not affect nutrient digestibility and chevon production, but improved the bioavailability of phytochemicals, protein stability, fatty acids and flavour compound profiles in chevon. Goat producers can utilise hempseed cake as an alternative protein source with chevon health value, flavour compound and protein stability enhancing benefits.

TODD, Melvi (Food Sciences)

Multi-stakeholder perspectives on food labels and the future of healthy eating

The value creation potential, and possible formats, of nutritional and health information on food labels in South Africa was investigated using a mixed-method approach. Interviews revealed strong evidence for economic value creation potential, but concerns were raised about unequal distribution thereof, possibly tainting the opportunity. Health warnings and health star ratings on front-of-pack labels showed promise in assisting consumers in quickly identifying less healthful products, potentially assisting in healthier food choices and reducing the country's non-communicable disease burden. However, consumers who rely heavily on the informal food market with many unlabelled products will not benefit.

UUSHONA, Tulimo (Animal Sciences)

Feeding value and biopreservative potential of *Acacia mearnsii* leafmeal for lamb meat production and quality improvement

Meat production and supply currently fail to cope with increasing consumer demand due to animal feed shortages and increased post-harvest meat losses. This study evaluated the effects of substituting wheat bran with increasing levels of *Acacia mearnsii* leaf meal in lamb finisher diets on nutrient intake and digestibility, meat production and quality. Inclusion of *A. mearnsii* leaf meal up to 100 g/kg digestive matter improved nutrient intake and digestibility, growth and carcass attributes, without negatively affecting the health value and oxidative shelf life of meat. Valorisation of *A. mearnsii* leaf meal as a ruminant fibre source for meat production enhancement is recommended.

Supervisor: Prof C Mapiye

VAN WYNGAARD, Elizma (Viticulture)

Investigation of fresh grapevine organs using infrared spectroscopy and chemometrics

This study investigated the application of multiple chemometrics approaches to improve the understanding of the infrared spectral properties of fresh grapevine organs. Novel and advanced algorithms were applied to the dataset, aiming to optimise the accuracy of the prediction calibrations with the use of the most relevant information contained in the infrared spectra of fresh shoots, leaves and berries. The results showed increased accuracy for the quantification of nutritional content in grapevine plant material. The novel approach presented in this study may have relevant implications in viticultural studies as well as in the broader field of agriculture.

WESSELS, Kirsten (Food Science)

Efficacy of bacteriophages Fo1a and S16 in the reduction of *Salmonella* on chicken carcasses in the processing environment

Antimicrobial-resistant *Salmonella* linked to chicken meat causes severe illness and substantial economic loss. A proposed alternative to antimicrobials is the use of bacteriophages. Although proven effective in the laboratory, there is little information on the performance of bacteriophages in a food-processing facility. In this study, bacteriophages were applied via a designed spraying system in-line during chicken processing immediately after chlorine spin chilling, and found that the combined hurdle concept was able to reduce *Salmonella* incidence. These results pave the way for the future of food safety in South Africa by providing an effective alternative to high chemical doses to control *Salmonella*.

CHANCELLOR'S AWARD | KANSELIERSTOEKENNING

Faculty of AgriSciences | Fakulteit AgriWetenskappe

Marena Manley

Professor Manley made a significant contribution as educator and researcher in the Department of Food Science through supervision of 53 master's and 14 PhD students and 5 postdoctoral fellows. She has published 121 peer-reviewed publications and 9 book chapters and has presented at over 160 national and international conferences, including keynote lectures. Notable highlights are the Excellence Award for Grain Research and Technology in 2010 and an invited review article in the prestigious journal *Chemical Society Reviews* in 2014. Professor Manley also played a leading role in the establishment of Africa's first Vibrational Spectroscopy Unit at Stellenbosch University in 2018.

Professor Manley lewer 'n belangrike bydrae as opvoedkundige en navorsers aan die Departement Voedselwetenskappe by wyse van onder meer studieleiding aan 53 meestersgraad- en 14 PhD-studente en 5 nadoktorale genote. Haar bydrae sluit ook in 121 eweknie-beoordeelde publikasies en 9 boekhoofstukke en aanbiedinge by meer as 160 nasionale en internasionale kongresse, wat programredes insluit. Uitstaande hoogtepunte is die Toekenning vir Volgehoue Uitnemendheid in Graanavorsing en Tegnologie in 2010 en die uitnodiging vir 'n oorsigartikel in die gesogte vaktydskrif *Chemical Society Reviews* in 2014. Professor Manley het ook 'n belangrike rol gespeel in die vestiging van die eerste Eenheid in Vibrasiespektroskopie in Afrika aan die Universiteit Stellenbosch in 2018.

National anthem | Nasionale volkslied

Nkosi Sikelel' iAfrika
Maluphakanyisw' uphondo lwayo,
Yizwa imithandazo yethu,
Nkosi sikelela, thina lusapho lwayo

Morena boloka setjhaba sa heso,
O fedise dintwa le matshwenyeho,
O se boloke, O se boloke setjhaba sa heso,
Setjhaba sa South Afrika - South Afrika.

Uit die blou van onse hemel,
Uit die diepte van ons see,
Oor ons ewige gebergtes,
Waar die kranse antwoord gee,

Sounds the call to come together,
And united we shall stand,
Let us live and strive for freedom,
In South Africa our land.

Stellenbosch University Alumni

Graduating from university is a big step in your life's journey. Once you have obtained your degree, you form part of the alumni community and

Stellenbosch University remains your intellectual home. The Alumni Relations Office believes the success of a university depends greatly on the participation of its alumni, therefore we strive to keep you connected to your alma mater long after the euphoria of obtaining your qualification/s has died down.

Om van 'n universiteit te gradueer is 'n groot stap in enigeen se lewensreis. Sodra jy jou graad verwerf het, vorm jy deel van die alumni-gemeenskap van jou universiteit en bly die Universiteit Stellenbosch jou intellektuele tuiste. Die Alumni-kantoor streef daarna om alumni met hul almal mater in verbinding te hou nog lank nadat die euforie van graadvang verby is.
