

We're pleased to introduce the Faculty of Medicine and Health Sciences (FMHS) Student Loan Programme an initiative made possible by Stellenbosch University (SU) with the support of Standard Bank of South Africa Limited.

This initiative supports students in their 5th and 6th years of study in Medicine and students in their final year of Allied Health Sciences students with a Student Loan that will cover all study-related expenses. Only eligible students identified by the university will be invited to apply to the programme.

HOW IT WORKS

- Students should have or must open a Standard Bank transactional account to apply for the loan.
- Standard Bank agents will support students through the application process at Tygerberg Campus.
- A student loan will be opened in the student's name.
- Once a loan is approved all fees will be settled directly with SU.
- The Tygerberg Campus Bursary office will provide administrative support for payments related to the Programme and Accommodation Fees, Books, Meals, Transport and Equipment.
- No repayment is required on the loan while the student is studying, however the student will be expected to start repaying this loan to Standard Bank within 6 months of completion of studies or once they start working, whichever comes first.
- Interest and service fees will be charged to the loan on a monthly basis.
- Interest will be charged at the prime interest rate.

HOW TO APPLY

SU will invite you to open-day sessions with Standard Bank, where a Standard Bank agent will assist you with the loan application. Please bring along the required documentation as outlined below.

REQUIRED DOCUMENTS

Proof of SU Registration, Proof of Residence (where you are staying at the time of your loan application), ID Document and if you do not have a Standard Bank transactional account, one of our consultants will open one for you.
